

TITLE 310. OKLAHOMA STATE DEPARTMENT OF HEALTH

Editor's Note: *Effective 1-1-02, "all powers, duties, responsibilities, . . . of the State Board of Health, the State Department of Health, and the State Commissioner of Health relating exclusively to the regulation of the plumbing, electrical and mechanical trades, and building and construction inspectors [were] placed under the authority of the Construction Industries Board [59 O.S., § 1000.4(C)]." "In addition to rules promulgated by the Construction Industries Board, rules promulgated by the State Board of Health prior to January 1, 2002 shall be the rules of the Construction Industries Board and shall continue in effect until such rules are amended or repealed by rules promulgated by the Construction Industries Board." [59 O.S., § 1000.4(A)(3)] The Construction Industries Board promulgated emergency rules effective 1-22-02 (Chapters 10, 30, 40, 50, and 60) and 2-1-02 (Chapter 1), and superseded the emergency rules with permanent rules effective 5-28-02. •For additional information about this transfer of rulemaking authority, see 59 O.S., §§ 1000.1 et seq. •For emergency rules promulgated by the Construction Industries Board on 1-22-02 and 2-1-02, see 19 Ok Reg 719, 721, 726, 732, 738, and 1243. •For permanent rules promulgated by the Construction Industries Board, see OAC 158. •For related rules of the Oklahoma State Department of Health promulgated prior to 1-1-02, see Title 310, Chapters 6, 7, 110, 245, 275, 290, and 310 in the 2001 OAC Edition and emergency amendments to 310:290 published at 18 Ok Reg 3591.*

Editor's Note: *Effective 7-1-93, some programs and functions of the Oklahoma State Department of Health were transferred to the newly-created Department of Environmental Quality (DEQ). Rules "relating to such programs and functions transferred ... remain [ed] in effect until the promulgation of rules by the [DEQ]" [Laws 1993, c. 145, § 8]. For additional information on this transfer, see Laws 1993, c. 145 and Laws 1992, c. 398.*

CHAPTER 1. PROCEDURES OF THE OKLAHOMA STATE BOARD OF HEALTH

[**Authority:** 63 O.S., § 1-105; 75 O.S., § 302]
[**Source:** Codified 12-31-91]

SUBCHAPTER 1. PURPOSE AND ORGANIZATION

310:1-1-1. Purpose; fair and impartial construction [REVOKED]

[**Source:** Amended at 12 Ok Reg 2267, eff 6-26-95 ; Revoked at 38 Ok Reg 1914, eff 9-11-21]

310:1-1-2. Board membership [REVOKED]

[Source: Amended at 12 Ok Reg 2267, eff 6-26-95 ; Revoked at 38 Ok Reg 1914, eff 9-11-21]

310:1-1-3. Board officers

- (a) The Board of Health shall elect from its membership a President, a Vice-President, and a Secretary.
- (b) Officers of the Board shall be elected annually, at the last meeting of each fiscal year. In the event an officer's position becomes vacant, a replacement shall be elected to complete the unexpired term at the following meeting of the Board.
- (c) The President shall preside over all Board meetings and rule on all questions of procedure and order. He shall have the power, in the exercise of his discretion, to call special meetings of the Board, and shall call a special meeting when requested by four members, in writing, to do so. The President shall determine the agenda of each meeting.
- (d) The Vice-President shall assume the duties of the President during the President's absence or incapacity.
- (e) The Secretary shall be responsible for keeping the minutes of Board meetings, and have such other duties as the Board may, from time to time, designate. The Board may designate an employee of the Department to assist the Secretary in the performance of these functions.
- (f) The officers shall serve as the Executive Committee of the Board.

310:1-1-7. Citation [REVOKED]

[Source: Revoked at 38 Ok Reg 1914, eff 9-11-21]

SUBCHAPTER 3. MEETINGS

310:1-3-1. Meetings

The Board shall hold such meetings as it deems necessary, with a regular meeting once during each quarter of the calendar year. Special meetings may be called by the President in his discretion, and shall be called when four (4) members of the Board request of the President, in writing, that such a meeting be called.

310:1-3-2. Location

The Board may convene at any location or institution within the jurisdiction of the Board or of the State Commissioner of Health, or at such other location as the Board may specify. Provided, that unless otherwise specified, meetings shall be conducted at the room provided for that purpose at the Oklahoma State Department of Health, 123 Robert S. Kerr Ave., Oklahoma City, Oklahoma, 73102-6406.

[Source: Amended at 39 Ok Reg 1220, eff 9-11-22]

310:1-3-3. Open Meeting Act [REVOKED]

[Source: Amended at 12 Ok Reg 2267, eff 6-26-95 ; Revoked at 38 Ok Reg 1914, eff 9-11-21]

310:1-3-4. Agenda

The agenda of the Board's regular meetings shall be determined by the President, and a copy thereof sent to each Board member at least ten (10) days before the meeting. Additional items of business which were not known or could not have been reasonably foreseen prior to posting of the agenda may be added to that agenda at the discretion of the President or on the request of at least three members of the Board; however, objection by three members shall be sufficient to postpone consideration of such items.

310:1-3-5. Special meetings

The agenda of the Board's special meetings shall be determined by the President, and copies thereof shall be sent to each Board member no less than five (5) days prior to the meeting. Only those items appearing on the agenda of such special meetings shall be considered by the Board.

310:1-3-6. Robert's Rules of Order [REVOKED]

[Source: Revoked at 38 Ok Reg 1914, eff 9-11-21]

310:1-3-7. Quorum

Five (5) members of the Board shall constitute a quorum and may transact any business or hold any hearing by a simple majority vote of the quorum.

SUBCHAPTER 5. GENERAL COURSE AND METHOD OF OPERATIONS

310:1-5-1. Principal office

The principal office of the Board of Health is: Oklahoma State Department of Health, Attention: Board of Health, 123 Robert S. Kerr Ave., Oklahoma City, OK 73102-6406.

[Source: Amended at 39 Ok Reg 1220, eff 9-11-22]

310:1-5-2. Office hours

Office hours shall be from 8:00 a.m. to 4:30 p.m., unless otherwise designated by the Commissioner of Health, Monday through Friday inclusive, excepting legal holidays established by statute or proclamation of the Governor.

310:1-5-3. Exercise of powers [REVOKED]

[Source: Revoked at 38 Ok Reg 1914, eff 9-11-21]

310:1-5-4. Writing to the Board

Every communication in writing to the Board of Health shall be addressed to the President of the Board of Health at the principal office designated above, unless otherwise directed by the Board.

[Source: Amended at 12 Ok Reg 2267, eff 6-26-95]

310:1-5-5. Records

(a) **Rules and policy.** All rules and other written statements of policy or interpretations formulated, adopted, or used by the Board shall be available at the principal office during regular business hours.

(b) **Proceedings and forms.** All final orders, decisions, and opinions, and all forms, applications, and instructions which are required to be completed in applying for a license or permit, shall be made available within the offices of the individual program during regular business hours.

(c) **Copies.** Copies of all official records of the Board not privileged from disclosure by law shall be available for inspection at the principal office during regular office hours. Copies of such records, certified by the Commissioner of Health or his designee, may be made, and the expense of such copies shall be paid by the person requesting the same. Fees for such copies shall be in accordance with a fee schedule established by the Commissioner of Health.

[Source: Amended at 12 Ok Reg 2267, eff 6-26-95]

310:1-5-6. Petitions

(a) **Form.** All requests for hearings, declaratory rulings, in or for the adoption, amendment, or repeal of a rule or regulation shall be in the form of a petition captioned as follows.

BEFORE THE

OKLAHOMA STATE BOARD OF HEALTH

IN RE (Nature of Proceeding, No. _____ (to be
e.g. - Request for Amendment of Rule Regarding Hospital Licensure Requirements)))) completed by staff if
no number assigned
or known)

(b) **Contents.** The Petition shall state the nature of the request and, where relevant, the reasons for the request, and shall be signed by the person, firm, or corporation making the request, his agent or attorney.

SUBCHAPTER 7. RULEMAKING PROCEDURES [REVOKED]

310:1-7-1. Upon Board's initiative or request of Commissioner [REVOKED]

[Source: Revoked at 38 Ok Reg 1914, eff 9-11-21]

CHAPTER 2. PROCEDURES OF THE STATE DEPARTMENT OF HEALTH

[**Authority:** 63 O.S., §§ 1-101 et seq. 1-104, 1-106.1, and 1-106.2; 75 O.S., §§ 302 and 506]
[**Source:** Codified 12-31-91]

SUBCHAPTER 1. DESCRIPTION OF ORGANIZATION

310:2-1-1. Purpose

These rules implement the Administrative Procedures Act, 75 O.S. § 250 et seq., as amended ("APA"). These rules govern formal proceedings of the Department and may be supplemented by procedural rules within a particular departmental area. Informal proceedings may be held as announced by the Department or as agreed with any person.

[**Source:** Amended at 12 Ok Reg 2271, eff 6-26-95 ; Amended at 16 Ok Reg 901, eff 1-5-99 (emergency); Amended at 16 Ok Reg 1389, eff 5-27-99 ; Amended at 38 Ok Reg 1916, eff 9-11-21]

310:2-1-2. Definitions

The following words or terms, when used in this Chapter, shall have the following meaning unless the context clearly indicates otherwise:

"Administrative Law Judge" means a person appointed by the Commissioner of Health to conduct an individual hearing under the Administrative Procedures Act and may be an employee or a private attorney with whom the Department has a contract for services.

"Board" means the Oklahoma State Board of Health.

"Commissioner of Health" and **"Commissioner"** mean the Oklahoma State Commissioner of Health, the chief executive officer of the Department. References in this Chapter to the Commissioner may include a designee of the Commissioner of Health. Designations shall be subject to such powers and limitations as are specified in writing.

"Department" means the Oklahoma State Department of Health.

"Respondent" means the person(s) or legal entity(ies) named in a petition for an individual proceeding, against whom relief is sought.

[**Source:** Amended at 12 Ok Reg 2271, eff 6-26-95 ; Amended at 16 Ok Reg 901, eff 1-5-99 (emergency); Amended at 16 Ok Reg 1389, eff 5-27-99 ; Amended at 38 Ok Reg 1916, eff 9-11-21]

310:2-1-3. Organization

The Department shall be organized and divided into such departmental areas and divisions as the Commissioner deems desirable for efficiency. Such organization and division may be revised by the Commissioner as necessary or expedient.

[**Source:** Amended at 38 Ok Reg 1916, eff 9-11-21]

SUBCHAPTER 3. GENERAL OPERATIONS AND PROCEDURES

310:2-3-1. Address

The principal office of the Department is Oklahoma State Department of Health, 123 Robert S. Kerr Avenue, Oklahoma City, Oklahoma 73102.

[Source: Amended at 38 Ok Reg 1916, eff 9-11-21]

310:2-3-2. Office hours [REVOKED]

[Source: Revoked at 38 Ok Reg 1916, eff 9-11-21]

310:2-3-3. Writing to the Department

Unless a person is working with a particular departmental area, written communication to the Department shall be addressed to the Commissioner at the principal office.

310:2-3-4. Agency statements, orders and forms

Each departmental area shall make available to the public all rules and other written statements of policy or interpretations formulated, adopted or used in the discharge of its functions; all final orders, decisions and opinions; and all forms, applications and instructions for use by the public, including those required to apply for a license or permit.

310:2-3-5. Access to agency records pursuant to the Open Records Act

(a) **Official records.** Official records include records required to be maintained by law, the record in individual proceedings, records submitted to the agency by any person and any other "record" as that term is defined by the Oklahoma Open Records Act, 51 O.S. § 24A.1, et seq., (OORA).

(b) **Access to official records.** Records available to the public pursuant to the Oklahoma Open Records Act, 51 O.S. § 24A.1 et seq., are subject to inspection and mechanical reproduction under the provisions set forth below.

(c) **Initial procedural requirements.** A request for inspection shall be submitted electronically or in writing. To encourage a fully articulated and accurate response to a request, the request shall be submitted on a form made available by OSDH, online and the requester must reasonably describe the records sought. Additionally, if applicable, every request must specify a time period for which records are being sought. A request submitted in the manner above, reasonably describing the records sought and stating an appropriate time period for the records being sought will be timely acknowledged and further processed for a review and inspection. Consistent with the OORA, agency personnel may determine that the requester is required to pay, in advance, any fees due pursuant to subparagraph (h) below.

(d) **Requests received.** Requests submitted to the agency will not be deemed to have been received unless and until the request has been

identified by agency personnel as a request properly submitted in accordance with these rules. After a determination is made of the estimated fees to gather the records requested, the agency will advise the requester of the cost. Upon receipt of the requested search fee, the request will be deemed to have been received by the agency and will then be timely processed for inspection.

(e) **Abandonment.** Any request not confirmed by a tender of the requisite search fee within thirty (30) days of advice by the agency shall be deemed to be abandoned, unless, within the time stated, the requester can show cause why the confirmation should be delayed or postponed.

(f) **Cooperation with the agency.** If the requester fails to furnish additional information reasonably necessary to identify the records sought or otherwise enable agency personnel to accurately process the request, the processing of the subject request may be suspended by agency personnel. A request that remains suspended for a period exceeding thirty (30) days shall be deemed abandoned.

(g) **Unavailable or confidential records.** If the agency cannot comply with the request for disclosure, the requester shall be notified of the adverse determination, stating the reason(s) therefor.

(h) **Fees.** The following are fees for preparing records for production:

(1) Paper Records - The fees for preparing paper records are those set forth in the OORA.

(2) Electronic Records - If request is for records to be produced in a format other than an electronically transmitted digital file, the preferred digital media to the agency, the agency will recoup the actual cost of transferring the records to the requester's media.

(3) Other Fees - The hourly fee for requests that are solely for commercial purpose or that cause excessive disruption of the agency's essential functions is in accordance with the schedule filed at the Oklahoma County Clerk's office. 'Excessive disruption' fees apply to requests that require more than eight (8) hours of actual employee work time to compile.

(4) Actual cost charged to OSDH by any third party related to obtaining records.

[Source: Amended at 19 Ok Reg 532, eff 1-3-02 through 7-14-02 (emergency)¹; Amended at 20 Ok Reg 1180, eff 5-27-03 ; Amended at 36 Ok Reg 1649, eff 9-13-19 ; Amended at 38 Ok Reg 1916, eff 9-11-21]

Editor's Note: ¹*This emergency action expired without being superseded by a permanent action. Upon expiration of an emergency amendatory action, the last effective permanent text is reinstated. Therefore, on 7-15-02 (after the 7-14-02 expiration of the emergency action), the text of 310:2-3-5 reverted back to the permanent text that was effective prior to enactment of the emergency action on 1-3-02, as was last published in the 2001 Edition of the OAC, and remained as such until amended by permanent action on 5-27-03.*

310:2-3-6. Office of Administrative Hearings

(a) **Session hours.** Unless otherwise ordered by the assigned administrative law judge, the morning sessions shall begin at 9:00 a.m.

and close at 12:00 noon, and the afternoon sessions shall begin at 1:30 p.m. and close at 4:30 p.m.

(b) **Chief Administrative Law Judge.** The Chief Administrative Law Judge is the administrative officer for the Office of Administrative Hearings and shall perform all duties that the Commissioner may delegate or assign. The Chief Administrative Law Judge may assign administrative law judges to conduct individual proceedings or other hearings, or specific activities within proceedings and hearings. The Chief Administrative Law Judge shall have the discretion to issue non-dispositive orders including the scheduling of conferences and pre-hearing conferences, orders on non-dispositive motions, and orders for the conduct of the proceedings in general or in a specific proceeding.

(c) **Assigned administrative law judge.** The administrative law judge shall have complete authority to conduct the proceedings and may take any action not inconsistent with the provisions of the rules of this Chapter or of the APA for the maintenance of order at hearings and for the expeditious, fair, and impartial conduct of the proceedings. The assigned administrative law judge may also:

- (1) arrange and issue notice of the date, time and place of hearings and conferences;
- (2) establish the methods and procedures to be used in the presentation of the evidence;
- (3) hold conferences to settle, simplify, determine, or strike any of the issues in a hearing, or to consider other matters that may facilitate the expeditious disposition of the hearing;
- (4) administer oaths and affirmations;
- (5) regulate the course of the hearing and govern the conduct of participants;
- (6) examine witnesses;
- (7) rule on, admit, exclude and limit evidence;
- (8) establish the time for filing motions, testimony, and other written evidence, briefs, findings, and other submissions, and hold the record open for such purposes;
- (9) rule on motions and other pending procedural matters; and
- (10) divide the hearing into stages or combine interests of parties whenever the number of parties is large or the issues are numerous and complex.

(d) **Hearing Clerk.** The Hearing Clerk is the person designated by the Commissioner to assist the Chief Administrative Law Judge and maintain the administrative hearing files and dockets within the Office of Administrative Hearings.

SUBCHAPTER 7. ADDITIONAL PROCEDURES FOR ADMINISTRATIVE PENALTY PROCEEDINGS

PART 1. ENVIRONMENTAL HEALTH PENALTIES

310:2-7-1. Applicability

The requirements of this Subchapter are in addition to other requirements of this Chapter governing individual proceedings and are applicable to matters where the Department is a party brought under 63 O.S. § 1-1701.1A.

[Source: Amended at 16 Ok Reg 901, eff 1-5-99 (emergency); Amended at 16 Ok Reg 1389, eff 5-27-99 ; Amended at 38 Ok Reg 1916, eff 9-11-21 ; Amended at 39 Ok Reg 1221, eff 9-11-22]

310:2-7-2. Notice of Violation ("NOV")

Administrative penalty proceedings must be preceded by a written Notice of Violation (NOV) informing the Respondent of the regulatory requirement at issue, unless otherwise provided by law. This NOV must be served upon the Respondent and must state the factual allegations and particular standards or rules upon which the NOV is based. A letter, petition, consent order or final order may constitute a NOV for purposes of instituting administrative penalty proceedings, if it meets the requirements of this paragraph.

[Source: Amended at 16 Ok Reg 901, eff 1-5-99 (emergency); Amended at 16 Ok Reg 1389, eff 5-27-99]

310:2-7-3. Determining penalty

(a) **In general.** The following factors may be considered in determining the amount of penalty specified in an Administrative Compliance Order:

- (1) the value of efforts to comply with the regulations cited in the notice of violation;
- (2) the economic benefit to the violator of noncompliance with the regulations in question; and
- (3) an additional amount for deterrence purposes, based upon
 - (A) the likelihood of the development of adverse health effects caused by the violation,
 - (B) the severity of environmental degradation or public health effects caused or placed at risk by the violation,
 - (C) the degree of variance from the applicable standards,
 - (D) costs of correction of damage, and
 - (E) bad faith of the Respondent.

(b) **Small businesses.** If the violator is a "small business" as defined in 75 O.S. § 502, or is a for-profit enterprise consisting of fifty or fewer full-

time or part-time employees, the following additional factors may be considered in determining the amount of penalty specified in an Administrative Compliance Order, and whether the penalty should be reduced or waived altogether:

- (1) the small business corrects the violation within thirty (30) days or less after receipt of a notice of violation or citation; or
- (2) the violation was the result of an excusable misunderstanding of the Department's interpretation of a rule.

[Source: Amended at 20 Ok Reg 88, eff 10-29-02 (emergency); Amended at 20 Ok Reg 1180, eff 5-27-03]

310:2-7-4. Administrative Compliance Order

(a) **When issued.** Fifteen (15) days or more after service of any required Notice of Violation (NOV) upon the Respondent, or such reduced period as the Petitioner believes necessary to render the order reasonably effectual, the Commissioner of Health or his or her designee may issue an Administrative Compliance Order requiring compliance and specifying penalties for noncompliance. The entry of an Administrative Compliance Order initiates an individual proceeding under this Subchapter and shall meet the requirements of a petition as stated above.

(b) **Must specify.** The Administrative Compliance Order shall specify the facts and conclusions upon which it is based and shall set a time for the Respondent to comply with the applicable regulations. The Administrative Compliance Order shall specify the penalty, not to exceed the statutory maximum per day of non-compliance, to be assessed in the event that the Respondent fails to comply with the Order within the prescribed time.

(c) **Service.** The Administrative Compliance Order shall be served in accordance with OAC 310:2-21-4. The Order shall advise the Respondent that it shall become final unless a hearing is requested within fifteen (15) days of service of the Order. If a hearing is requested, proceedings shall promptly commence.

(d) **Hearing.** Based on the hearing, the Administrative Compliance Order will be sustained, modified, or dismissed. If the hearing process extends beyond any compliance deadline specified in the Administrative Compliance Order, fines specified in the Order for violations of the Order will continue to accrue during the hearing process unless the Hearing Officer stays the penalty upon request for good cause shown.

[Source: Amended at 16 Ok Reg 901, eff 1-5-99 (emergency); Amended at 16 Ok Reg 1389, eff 5-27-99 ; Amended at 38 Ok Reg 1916, eff 9-11-21]

310:2-7-5. Assessment Order

(a) **Failure to comply with Administrative Compliance Order.** After the Administrative Compliance Order is issued, proceedings may be conducted to determine whether the Respondent has failed to comply with the Order.

(b) **Application for compliance and penalty hearing.** Any time the Petitioner believes the Administrative Compliance Order has been violated, it may with reasonable promptness apply to the Hearing Officer

for a compliance and penalty hearing, alleging the period of noncompliance and the amount of the administrative fine that has accrued. The Petitioner shall provide a copy of the request to the Respondent.

(c) **Elements to consider.** The Commissioner, in deciding whether the Administrative Compliance Order has been violated and whether the penalties are appropriate, may consider efforts to comply with applicable requirements made by the Respondent after issuance of the Administrative Compliance Order.

(d) **Must request hearing within 7 days.** The Petitioner's application shall advise the Respondent that the Respondent's right to contest the determination of noncompliance and the amount of the fine is waived if the request for hearing is not made within seven calendar days of receiving notice. A request for hearing is deemed made when received by the Department. If timely requested, the hearing must be promptly set and held.

(e) **Issuance of Assessment Order.** An Assessment Order shall be issued by the Commissioner of Health or a designated Deputy Commissioner following the determination of the application. The Assessment Order must state the nature and period of the violation, and determine the amount of the fine. The fine is due and payable immediately upon issuance of the Assessment Order, unless otherwise provided therein. A copy of the Assessment Order will be provided to the Respondent.

(f) **Continuing violations.** If the Petitioner believes that violations of the Administrative Compliance Order continue after the issuance of an Assessment Order, the Petitioner may apply within a reasonable time for the issuance of additional Assessment Orders covering periods of violation since the period covered by the issuance of a previous Assessment Order.

SUBCHAPTER 11. CONSUMER HEALTH SERVICE LICENSE PROCESSING TIMES

310:2-11-1. Purpose and applicability

(a) **Purpose.** The rules in this Subchapter are intended to establish time periods for issuance or denial of licenses that are required by law.

(b) **Licenses included.** The provisions of this Subchapter apply to licenses reviewed by the Consumer Protection Division or the Occupational Licensing Division, both within Consumer Health Service.

[Source: Added at 10 Ok Reg 95, eff 10-13-92 (emergency); Added at 10 Ok Reg 1721, eff 7-1-93 ; Amended at 12 Ok Reg 2271, eff 6-26-95 ; Amended at 16 Ok Reg 901, eff 1-5-99 (emergency); Amended at 16 Ok Reg 1389, eff 5-27-99 ; Amended at 39 Ok Reg 1221, eff 9-11-22]

310:2-11-2. Definitions

The following words or terms, when used in this Subchapter shall have the following meanings, unless the context clearly indicates otherwise:

"Administratively complete" means an application that contains the information specified in the application form and rules in sufficient detail to allow the Department to begin regulatory review.

"Application" means a document prepared in accordance with the rules and the forms and instructions provided by Consumer Health Service and submitted with the expectation of providing that information necessary for review and determination of the permit. The application consists of the initial submittal and all supplements.

"Division" means those portions of the Department that are specified in Section 310:2-11-1 and are part of Consumer Health Service.

"Submittal" means each separately submitted document or document package that forms a part of an application.

"Supplement" means a response to a request for additional information following completeness and regulatory reviews, and information submitted voluntarily by the applicant.

[Source: Added at 10 Ok Reg 95, eff 10-13-92 (emergency); Added at 10 Ok Reg 1721, eff 7-1-93 ; Amended at 16 Ok Reg 901, eff 1-5-99 (emergency); Amended at 16 Ok Reg 1389, eff 5-27-99 ; Amended at 39 Ok Reg 1221, eff 9-11-22]

310:2-11-3. Application submittal

(a) **Application forms.** Each Division will make available to the public, for each type of permit or license required, a detailed, comprehensive application package, including rules, forms, checklists, instructions and guidance.

(b) **Filing.** Applications and submittals are filed with the respective Division.

(c) **Format.** Each submittal must be complete and legible, so required information can be easily found and to clearly preserve the chronology.

[Source: Added at 10 Ok Reg 95, eff 10-13-92 (emergency); Added at 10 Ok Reg 1721, eff 7-1-93 ; Amended at 16 Ok Reg 901, eff 1-5-99 (emergency); Amended at 16 Ok Reg 1389, eff 5-27-99 ; Amended at 39 Ok Reg 1221, eff 9-11-22]

310:2-11-4. Application processing and review

(a) **Filing of applications.** Unless otherwise provided in this Subchapter, upon the receipt of an application and the proper fee, each Division will:

- (1) file-stamp the application with the date of receipt, the Division name and the application number; and
- (2) assign each application to a named person who will do the review. This information will be timely logged.

(b) **Administrative completeness review.** Unless otherwise provided in this Subchapter, the reviewer has 30 calendar days to initially determine if the filed application is administratively complete.

(1) **Not complete.** Upon determining that the application is not administratively complete, the reviewer will immediately notify the applicant and indicate with reasonable specificity the inadequacies and measures necessary to complete the application. Such notification does not require or preclude further review of the application and further requests for specific information. If the reviewer fails to notify the applicant as specified in this Paragraph, the period for regulatory review will begin at the close of the administrative completeness review period.

(2) **Complete.** Upon a determination that the application is administratively complete, the regulatory review period begins.

(c) **Regulatory review.** Each Division involved will have 30 days from the date an application is determined to be administratively complete to review each application for compliance with the relevant regulations and reach a final determination.

(d) **When times are tolled.** The time period for regulatory review is tolled (the clock stops) during litigation, during public review (public meetings or hearings, administrative hearings, public comment periods, and review by other federal or State agencies) or when the Division has asked for supplemental information and advised the applicant that the time period is tolled pending receipt.

(e) **Supplements.** To make up for time lost in reviewing inadequate materials, a request for supplemental information may specify that up to 30 additional calendar days may be added to the deadline for regulatory review, unless the request for supplemental information is a second or later request that identifies new deficiencies not previously identified.

(f) **Failure to provide supplemental information.** An application is considered withdrawn, if an applicant fails to provide supplemental information within 180 days from the date of request. The 180 day time period may be extended by agreement for good cause.

(g) **Extensions.** Extensions may be allowed as provided by law or at Consumer Health Service's discretion.

310:2-11-5. Pending failures

(a) **Circumstances outside agency control.** Review times may be tolled when the Commissioner certifies that a failure to meet a deadline is imminent and is caused by circumstances outside the control of the Department. Such circumstances include, but are not limited to, acts of God, a substantial and unexpected increase in the number of applications filed, or additional review duties imposed on the Department from an outside source.

(b) **Other circumstances.** When the Department is unable to meet an application deadline for reasons within its control, the applicant can agree to an extension or withdraw the application and receive a refund for the application fee, unless the refund is prohibited by law.

SUBCHAPTER 15. APPLICATION FORMS

310:2-15-1. Required descriptions of forms

The descriptions of application forms in OAC 310:2-15 are presented to comply with the Oklahoma Administrative Procedures Act, 75 O.S., § 302.

[Source: Added at 16 Ok Reg 901, eff 1-5-99 (emergency); Added at 16 Ok Reg 1389, eff 5-27-99 ; Amended at 38 Ok Reg 1916, eff 9-11-21]

310:2-15-2. Uniform application for credentialing of providers

(a) The application described in OAC 310:002-15-2(b) is intended for use pursuant to Title 63 O.S. Supp. 1998, Section 1-106.2.

(b) The uniform application for credentialing of providers requests the following:

- (1) personal information;
- (2) education, including medical, dental and professional schools;
- (3) training, including internships, residencies, fellowships and preceptorships;
- (4) professional licenses;
- (5) certifications and registrations;
- (6) academic appointments;
- (7) health care affiliations;
- (8) other professional work history;

- (9) current professional practice;
- (10) office billing information;
- (11) attestation;
- (12) copies of required documents; and
- (13) any additional information needed to answer all questions fully.

[Source: Added at 16 Ok Reg 901, eff 1-5-99 (emergency); Added at 16 Ok Reg 1389, eff 5-27-99 ; Amended at 17 Ok Reg 687, eff 12-16-99 (emergency); Amended at 17 Ok Reg 2034, eff 6-12-00]

310:2-15-3. Uniform Employment Application for Nurse Aide Staff

- (a) The application described in OAC 310:2-15-3 is required for use pursuant to 63 O.S. § 1-1950.4 and shall be used for the purposes set forth in that statute.
- (b) The uniform employment application for nurse aide staff requires the following:

- (1) personal information;
- (2) employment desired;
- (3) U.S. military record;
- (4) prior work history;
- (5) educational background;
- (6) certification;
- (7) references;
- (8) background information;
- (9) applicant's employment application certification and agreement;
- (10) previous certified nurse aide training;
- (11) applicant's signature certifying no previous conviction and authorizing criminal history record checks; and
- (12) Any additional information needed to answer all questions fully.

SUBCHAPTER 21. RULES OF PROCEDURE GOVERNING INDIVIDUAL PROCEEDINGS

310:2-21-1. Purpose and scope of Rules

These rules are promulgated to provide due process to parties appearing before the Department and are not to be construed inconsistently with the Oklahoma Administrative Procedures Act. The assigned administrative law judge has the discretion to waive, supplement or modify any requirement of the applicable law or rule of procedure where permitted by law and when the administration of justice requires.

[Source: Added at 24 Ok Reg 1896, eff 6-25-07]

310:2-21-2. Initiating an individual proceeding

(a) **In general.** Individual proceedings may be initiated before the Department by filing with the Office of Administrative Hearings a Petition, administrative order executed by the Commissioner or his designee, or other instrument which seeks any relief authorized by law to be granted by the Department.

(b) **Proceedings initiated by Petition.** *Each Petition shall name the Respondent and include a statement of the legal authority and jurisdiction under which the proceeding is to be held, a reference to the particular sections of the statutes and rules involved, a short and plain statement of the matters asserted giving a right to relief, the relief requested, and, unless provided in a separate written Notice of Hearing, the time, place and nature of the hearing. If the Department is unable to give a short and plain statement of the matters asserted at the time the notice is served, the initial notice may be limited to a statement of the issues involved.* [75 O.S. § 309]

(c) **Proceedings initiated by an administrative order.** Proceedings initiated by an administrative compliance order issued pursuant to 63 O.S. § 1-1701.1(A) must satisfy the requirements of that statute, the APA and this Chapter. If Section 1-1701.1(A) conflicts with provisions of the APA or this Chapter then Section 1-1701.1(A) shall control. Proceedings initiated by any other administrative order must comply with the APA and this Chapter.

[Source: Added at 24 Ok Reg 1896, eff 6-25-07]

310:2-21-3. Notice of Hearings

The Commissioner, the Chief Administrative Law Judge or the assigned administrative law judge shall schedule the date, time and place of any hearing in accordance with these rules. The Hearing Clerk shall notify the parties. The initial hearing shall be scheduled at least thirty (30) days after the date of service of the petition. The parties may agree to an earlier date. If a specific law requires a hearing in fewer days, that statute shall be followed. If an emergency exists, a hearing may be conducted without the filing of a petition and without prior notice to the Respondent. When such emergency hearing is held the Respondent shall be afforded a hearing within ten (10) days of the issuance of an emergency order to contest such an order.

[Source: Added at 24 Ok Reg 1896, eff 6-25-07]

310:2-21-4. Service of instruments initiating an administrative proceeding

Any instruments initiating an administrative proceeding must be served on every named Respondent by either personal service, certified mail, return receipt requested, restricted delivery, or issuing a report by hand-delivery. If service is being sent by certified mail, return receipt requested, and the intended Respondent refuses to sign the return receipt or otherwise does not sign or is unavailable to sign and accept service through the certified mail at the address identified on Department records, then Respondent is deemed to have been served. If service is by personal service, the person serving the instrument initiating an administrative proceeding shall file proof of service with the Hearing Clerk within twenty (20) days of service or before the date of the first hearing, whichever is sooner. If an inspection is performed, the report and/or the notice to correct violations issued by the inspectors/sanitarions to the license holder or to the person in charge, requesting a signed acknowledgement of receipt of the report or notice, shall constitute service of the report and/or notice. Acknowledgement in writing by the Respondent or appearing at the hearing without objection to service is equivalent to service.

[Source: Added at 24 Ok Reg 1896, eff 6-25-07 ; Amended at 37 Ok Reg 1354, eff 9-11-20]

310:2-21-5. Service of other papers and documents

Service of all other documents and papers connected with an individual proceeding shall be served on the parties or their counsel by delivering a copy or mailing a copy by first class mail, postage prepaid.

[Source: Added at 24 Ok Reg 1896, eff 6-25-07]

310:2-21-6. Responsive pleadings

Any party served with a petition, an application for an administrative fine, an administrative order or other instrument providing notice of a claim or defense to a claim initiating an individual proceeding before the Department shall file a written response or answer within twenty (20) days of receipt of the petition, application, order or other instrument initiating an individual proceeding. The original of the response must be filed with the Hearing Clerk of the Office of Administrative Hearings and a copy must be delivered or mailed to all other parties by 5:00 p.m. on the 20th day. Delivery to other parties must be made in person, by process server, or may be sent by certified mail, return receipt requested, restricted delivery. Every defense, in law or fact, to a claim for relief in any petition, application or administrative order initiating an administrative proceeding shall be asserted in the responsive pleading.

[Source: Added at 24 Ok Reg 1896, eff 6-25-07 ; Amended at 27 Ok Reg 2496, eff 7-25-10]

310:2-21-7. Appearance of parties

- (a) A party in any proceeding before the Department may appear pro se, by an attorney licensed to practice law in Oklahoma, by an out-of-state attorney admitted to practice before the Department pursuant to rules of the Oklahoma Bar Association, or by a licensed legal intern. Provided further, corporate entities, limited liability companies, other business entities and governmental units or entities may appear only by an attorney as provided within this subsection.
- (b) Attorneys who will appear before the Department on behalf of a party shall notify the Office of Administrative Hearings of their appearance by filing an entry of appearance.
- (c) Any other attorney who files an entry of appearance on behalf of any party in the case or who is identified as a substitute attorney pursuant to a notice of substitution of attorney shall also be considered an attorney of record. The Department shall send notices to all attorneys of record until a substitution of attorney has been filed or an Application for Leave to Withdraw as Attorney has been filed and granted by the administrative law judge assigned to a case. Various attorneys may appear before the Department in a matter, but notice shall be sent only to those attorneys who are an "attorney of record" as defined in this subsection.

[Source: Added at 24 Ok Reg 1896, eff 6-25-07]

310:2-21-8. Ex parte communications

Communication with the assigned administrative law judge or his office regarding scheduling and procedural matters is permitted. A

lawyer shall have no ex parte communication on the substance of a pending matter or proceeding with the assigned administrative law judge.

[Source: Added at 24 Ok Reg 1896, eff 6-25-07]

310:2-21-9. Initial scheduling conference

The Chief Administrative Law Judge or the assigned administrative law judge may set the dates for appearances and deadlines in a Scheduling Conference Order or in his discretion schedule a scheduling conference to be attended by the parties. The Chief Administrative Law Judge or the assigned administrative law judge may authorize such to occur by teleconference. The subjects and objectives of scheduling conferences shall be similar to those for pretrial proceedings in the district courts.

[Source: Added at 24 Ok Reg 1896, eff 6-25-07]

310:2-21-10. Pre-hearing procedure

(a) **Purpose.** All matters pending before the Office of Administrative Hearings are subject to pre-hearing procedures determined by the assigned administrative law judge to be appropriate for a prompt and efficient resolution to matter. At least one pre-hearing conference will routinely be ordered unless the assigned administrative law judge determines the same to be unnecessary.

(b) **Pre-hearing Conference procedure.** The assigned administrative law judge shall provide notice to the parties of the date, time, and place of any pre-hearing conference at least ten (10) days prior to the scheduled date. The conference shall be informal, structured by the assigned administrative law judge, and not open to the public. If a record is deemed advisable by the assigned administrative law judge or requested by the parties, the conference may be recorded by audio tape and/or transcribed by a court reporter at the requesting party's expense. The pre-hearing conference shall be used to resolve any dispute or matter the resolution of which would promote the orderly and prompt conduct of the pre-hearing process or the hearing on the merits. The administrative law judge shall issue an order reciting any agreements made by the parties as to any matter considered. No witnesses shall appear or present evidence. The assigned administrative law judge may convert a pre-hearing conference into a scheduling conference, which may be held telephonically.

(c) **Final Pre-hearing Conference.** The assigned administrative law judge may hold more than one pre-hearing conferences or a final pre-hearing conference to formulate the final plan to streamline the hearing on the merits. If a final pre-hearing conference is ordered, the attorneys and any unrepresented parties shall confer prior to the final pre-hearing conference and prepare a single suggested Pre-hearing Conference Order for use during the conference and the hearing on the merits. Any party unable to secure the cooperation of another party may submit their own Proposed Final Pre-hearing Conference Order and, if the other

party's cooperation is shown to be without cause, request that the other party's Proposed Final Pre-hearing Conference Order be stricken. The Final Pre-hearing Conference Order may follow substantially the form provided in Rule 5 of the Rules for District Court, 12, O.S., Ch.2, App. Such order, when entered, controls the subsequent course of the proceeding, unless modified to prevent manifest injustice. The assigned administrative law judge may waive the requirement of a pre-hearing conference order unless such order is requested by a party.

[Source: Added at 24 Ok Reg 1896, eff 6-25-07 ; Amended at 27 Ok Reg 2496, eff 7-25-10 ; Amended at 39 Ok Reg 1221, eff 9-11-22]

310:2-21-11. Continuances

Each party is entitled to a single continuance of the hearing on the merits upon request submitted at least three (3) days in advance of the hearing unless exigent circumstances make such notice impractical. Additional continuances may be granted only upon good cause. Motions for a continuance based upon cause shall be in writing and filed with the Hearing Clerk with a copy to the parties and the assigned administrative law judge. A motion for a continuance shall state the reason(s) for the request and specify the length of time requested.

[Source: Added at 24 Ok Reg 1896, eff 6-25-07]

310:2-21-12. Subpoenas

(a) **Issuance.** Subpoenas for the attendance of witnesses, the furnishing of information and the production of evidence shall be issued by the Office of Administrative Hearings upon request by a party. The requesting party must submit the subpoena to the hearing clerk to be issued. Filing a formal request for the issuance of subpoenas shall not be required. Subpoenas shall be served and a return made in the same manner as provided in the Oklahoma Pleading Code.

(b) **Failure to obey.** The Commissioner or Petitioner may seek an appropriate judicial proceeding to compel compliance by persons who fail to obey a subpoena, who refuse to be sworn or make an affirmation at a hearing or who refuse to answer a proper question during a hearing. The hearing shall proceed despite any such refusal but the assigned administrative law judge may, in his discretion at any time, continue the proceedings as necessary to secure a court ruling.

(c) **Motions to quash.** Motions to quash subpoenas may be filed with the Office of Administrative Hearings and may be decided by the assigned administrative law judge or the Chief Administrative Law Judge.

[Source: Added at 24 Ok Reg 1896, eff 6-25-07]

310:2-21-13. Record

(a) **To be made.** An electronic recording of the hearing proceedings shall be made. The recording will not be transcribed as a matter of course. The Department's electronic recording of the hearing shall be the official record of the individual proceeding. Copies of the official record shall be

provided to a party upon written request.

(b) **Court reporter.** A party may have the proceeding, or any part thereof, transcribed by a certified court reporter at the expense of the party. Each party requesting copies shall make such arrangements with a reporter, including costs, as required. The parties may agree to have the proceedings recorded and memorialized by a certified court reporter or may file a transcript prepared by a certified court reporter as a supplemental aid to the official record.

(c) **Maintained.** The record of a proceeding and the file containing the notices and the pleadings will be maintained in a location designated by the Office of Administrative Hearings. All pleadings, motions, orders and other papers submitted for filing in such a proceeding shall be date/file-stamped by the Hearing Clerk upon receipt. The burden of showing substantial prejudice by any failure to correctly file-stamp any submission shall be upon the party asserting same.

(d) **Designation on appeal.** On appeal, the parties may designate and counter-designate portions of the record pursuant to the APA.

[Source: Added at 24 Ok Reg 1896, eff 6-25-07]

310:2-21-14. Hearings open to the public

All hearings conducted by the Department shall be open to the public unless otherwise provided by law or these rules. The use of cameras or other audio-visual recording equipment during a hearing may be permitted at the discretion of the assigned administrative law judge.

[Source: Added at 24 Ok Reg 1896, eff 6-25-07]

310:2-21-15. Hearing procedure

(a) **APA Governs.** The order of procedure in hearings in all individual proceedings shall be governed by the Oklahoma APA and this Chapter. At the hearing, each party may make a brief opening statement; present witnesses, documents and exhibits on its behalf; cross-examine adverse witnesses. The right to make a closing statement or argument shall be at the discretion of the assigned administrative law judge. The rules of evidence shall be those specified by the APA. At the discretion of the assigned administrative law judge, any party may reopen the case in chief, even after the adverse party has rested. Parties may stipulate to any lawful matter.

(b) **Rulings.** The assigned administrative law judge shall rule on the admissibility of evidence and objections to evidence, on motions or objections raised during hearings. All objections shall be made promptly or be deemed waived. Parties shall be deemed to have taken exception to any adverse ruling.

(c) **Standards of Proof.** The standard of proof in all individual proceedings affecting or prejudicing an individual's license, registration, permit, certification or other authorization to engage in a given livelihood or occupation shall be clear and convincing evidence. In all other matters the standard of proof shall be a preponderance of the evidence.

(d) **Findings and conclusions.** The assigned administrative law judge shall hear all evidence and arguments applicable in a case and shall prepare the final order in the proceeding, which shall include Findings of Fact and Conclusions of Law, separately stated. The record of the proceedings may be deemed to be closed when the parties announce that the matter has been fully submitted to the assigned administrative law judge. The assigned administrative law judge may allow the parties to submit briefs or proposed findings of fact and conclusions of law before ruling on the matter at issue. The assigned administrative law judge shall specify the time of filing and must rule on each proposed finding of fact and conclusion of law. The assigned administrative law judge may take the cause of action under advisement for a period not to exceed fifteen (15) days and will then issue a final order in writing to the parties.

[Source: Added at 24 Ok Reg 1896, eff 6-25-07]

310:2-21-16. Signatures upon documents filed or submitted

(a) Any document, correspondence or order submitted to the Office of Administrative Hearings, or to any administrative law judge, shall be typed or printed legibly and shall bear the typed or printed name and the signature of the person who prepared the document or correspondence; the firm name if applicable; the complete mailing and office address, including the zip code; the telephone number, including the area code; and the assigned case number. If the document or correspondence has been prepared by an attorney, the attorney's Oklahoma Bar Association number shall also be listed.

(b) The signature of an attorney or party constitutes the following:

- (1) a certification that the form, motion or other paper has been read;
- (2) that to the best of the attorney's or party's knowledge, information and belief formed after reasonable inquiry, it is well grounded in fact and is warranted by existing law or a good faith argument for the extension, modification or reversal of existing law; and
- (3) that it is not interposed for any improper purpose, such as to harass or to cause unnecessary delay or needless increase in the cost of litigation.

(c) Any document or correspondence submitted to the tribunal shall include a certificate of service to all parties.

[Source: Added at 24 Ok Reg 1896, eff 6-25-07 ; Amended at 27 Ok Reg 2496, eff 7-25-10]

310:2-21-17. Motions, applications and other written submissions

(a) **Margins and page length.** All written submissions shall be typewritten in clear type not less than 12-point, with single spaced lines of quoted matter and double spaced lines of unquoted matter. The margins of the printed page shall be one and one-quarter (1¼) inches on the left side and one (1) inch on the other three sides.

(b) **Accompanied by proposed order.** Motions and applications are to be accompanied by a proposed order.

(c) **Length.** All motions, applications and responses thereto, including briefs, shall not exceed ten (10) pages in length, excluding exhibits, without prior permission of the assigned administrative law judge. A request for enlargement of page length may accompany the written instrument filed. Reply briefs shall be limited to five (5) pages in length. Page limitations herein exclude only the cover, if used, index, appendix, signature line and accompanying information identifying attorneys and parties, and certificate of service. No further briefs shall be filed without prior permission of the assigned administrative law judge. Exceptions to this requirement are not favored.

(d) **When responses are due.** Unless otherwise ordered by the assigned administrative law judge, objections to motions or responses to written submissions are due within fifteen (15) days of receipt. Replies to objections or to responses to written submissions are due within ten (10) days of receipt. Exceptions to this requirement may be granted upon application and for good cause shown.

(e) **Hearings upon motions or applications.** The assigned administrative law judge shall decide any motion or application without hearing based upon the written submissions of the parties unless the assigned administrative law judge determines that an evidentiary hearing is necessary for a proper resolution of the issue(s) submitted.

(f) **Disposition of unopposed motions.** Dispositive motions that are unopposed may be deemed to be confessed and, where appropriate, may result in the summary disposition of a claim or defense as applicable.

(g) **Motions filed close to hearing.** Motions may not be filed within ten (10) days of hearing unless based upon a sudden emergency of facts that could not have been previously known. Copies of such motions must be hand delivered to all parties of record.

(h) **Motions will not stay discovery.** Motions to Dismiss or for Summary Judgment will not stay any discovery deadline unless by a written agreement of the parties that has been communicated to the assigned administrative law judge.

(i) **Citations of authority.** Legal citations are to be made in accordance with subsections c,d and e of Rule 1.200 the Oklahoma Supreme Court Rules. If an unpublished case or a case cited by a special reporter is cited as persuasive authority a copy must be attached to the document citing the case.

[Source: Added at 24 Ok Reg 1896, eff 6-25-07 ; Amended at 27 Ok Reg 2496, eff 7-25-10]

310:2-21-18. Default

Any Respondent or other person who fails to appear as directed, after service of the instrument initiating an administrative proceeding as provided by these rules, may be determined to have waived the right to appear and present a defense to the allegations contained in the instrument that initiates the individual proceeding. A final order in such proceeding may be issued by the assigned administrative law judge or the Commissioner granting by default the relief prayed for in the petition.

[Source: Added at 24 Ok Reg 1896, eff 6-25-07]

310:2-21-19. Final Order

Following the hearing, the assigned administrative law judge or hearing officer shall issue a Final Order resolving all of the issues submitted by the parties or identified by the assigned administrative law judge or hearing officer. The final order must comply with 75 O.S. § 312 and contain findings of fact and conclusions of law. Parties shall be notified by the Hearing Clerk either personally or by certified mail, return receipt requested, of the issuance of a Final Order. Upon request, a copy of the order shall be delivered or mailed to each party and to his attorney of record.

[Source: Added at 24 Ok Reg 1896, eff 6-25-07]

310:2-21-20. Proposed Final Orders

In any case or matter in which the Commissioner has decided, or is required by law, to issue a Final Order the parties may submit a proposed final order.

[Source: Added at 24 Ok Reg 1896, eff 6-25-07]

310:2-21-21. Reconsideration

Any party may petition for rehearing, reopening or reconsideration of any decision in an individual proceeding within ten days of its entry, pursuant to 75 O.S. § 317. Nothing shall prevent reconsideration of a matter in accordance with other statutory provisions.

[Source: Added at 24 Ok Reg 1896, eff 6-25-07]

310:2-21-22. Settlement agreements and consent orders

(a) **Settlement agreements.** The resolution of an administrative proceeding that is reduced to writing by the parties shall be considered a settlement agreement. Settlement agreements may be approved by the assigned administrative law judge by agreement of the parties. Settlement agreements may be executed and tendered to the assigned administrative law judge at any time. The Department may retain jurisdiction of any settlement agreement, and the case may be re-opened if a breach of the agreement is alleged by any party. The settlement agreement may be used as evidence in any proceeding subsequent to an allegation of breach.

(b) **Consent orders.** The resolution of an administrative proceeding that is reduced to writing by the parties and submitted to the assigned administrative law judge or Commissioner for approval shall be considered a Consent Order. Consent Orders must conform to the requirements of OAC 310:2-21-19. A Consent Order may substitute for a settlement agreement at any time by agreement of the parties. A consent order shall constitute a Final Order in the case. By agreeing to the entry of a consent order, the parties expressly agree not to seek judicial review.

Consent orders may be enforced as judgments in District Court as provided by law.

[Source: Added at 24 Ok Reg 1896, eff 6-25-07]

310:2-21-23. Emergency actions

When the Commissioner of Health or an assigned administrative law judge finds that the public health, safety or welfare requires that action be taken immediately and when such a finding is incorporated in an order, emergency action or summary suspension of a license may be ordered pending the filing of a petition and/or the outcome of an individual proceeding.

[Source: Added at 24 Ok Reg 1896, eff 6-25-07]

310:2-21-24. Sanctions for noncompliance

The assigned administrative law judge may take any action allowed by law against any party as a sanction for any non-compliance with the rules in this chapter, including, but not limited to, assuming an adverse evidentiary inference, continuing any proceeding, striking any pleading, imposition of costs and fees, including attorneys fees, granting default, as applicable.

[Source: Added at 24 Ok Reg 1896, eff 6-25-07]

310:2-21-25. Time

(a) **Computation.** In computing any period of time prescribed or allowed by this Subchapter or by order of an administrative law judge made pursuant to this Subchapter, the day of the act, event, or default from which the designated period of time begins to run shall not be included. The last day of the period so computed shall be included, unless it is a legal holiday as defined by Section 82.1 of Title 25 of the Oklahoma Statutes or any other day when the offices of the Department do not remain open for public business until the regularly scheduled closing time, in which event the period runs until the end of the next day which is not a legal holiday or a day when the office of the Department does not remain open for public business until the regularly scheduled closing time. When the period of time prescribed or allowed is less than then (10) days, intermediate legal holidays and any other day when the offices of the Department does not remain open for public business until the regularly scheduled closing time, shall be excluded from the computation. The assigned administrative law judge may at any time in its discretion alter any period of prescribed or allowed time with prior notice to the parties.

(b) **Use of Mail.** When a party has the right or is required to do some act within a prescribed period after the service of a notice or other paper upon the party and the notice or paper is served upon the party by mail or third-party commercial carrier or like means, three (3) days shall be added to the prescribed period.

[Source: Added at 27 Ok Reg 2496, eff 7-25-10]

310:2-21-26. Protective orders

At the time that a matter has been filed with the Office of Administrative Hearings all personal health information of any party or witness that comes into the possession of a party to pending matter is subject to an automatic protective order. The automatic protective order generally limits any party in possession of such information from publishing the information to any third party without first making application to the assigned administrative law judge supported by good cause. Third parties shall not include any person employed or affiliated with an attorney or his office who is representing a party to the individual proceeding.

[Source: Added at 27 Ok Reg 2496, eff 7-25-10]

310:2-21-27. Filing by electronic means

(a) **General requirements.** Documents may be filed by facsimile or other electronic mail transmission ("e-mail") directly to the Clerk of the Office of Administrative Hearings. Litigants are encouraged to limit the use of facsimile or e-mail filings to those of a time-critical nature only. The e-mail address or facsimile number may be obtained from the Clerk. Filing by facsimile or e-mail does not relieve a party from providing a copy of the filing to all other parties in the case. Filing with the Office of Administrative Hearings does not constitute notice to the Oklahoma State Department of Health Office of General Counsel or any other party. Submissions received after 5:00 p.m., CST or CDT, shall be deemed filed on the next regular business day.

(b) **Use of facsimile transmission.** Facsimile transmissions are limited to not more than ten (10) pages. A single document may not be split into multiple facsimile transmissions to avoid the page limitation. Each facsimile transmission sent shall be accompanied by a Facsimile Transmission Cover Sheet. The cover sheet shall be the first page transmitted, followed by any special processing instructions. A cover sheet is required for each fax and is NOT considered part of the ten (10) page limitation. The cover sheet must contain the name, mailing address, telephone number and return fax number for the transmitting party. Reference must be made to the identity of the case by number and/or names of parties. The number of pages being transmitted MUST be on the cover sheet. The submission must include a visible hand-written signature on the document to be filed.

(c) **Use of electronic mail.** Filings by e-mail must be made as an attachment to the e-mail and not contained in the body of the e-mail. They must be in an electronic format compatible with Microsoft Word or PDF. The name, mailing address, e-mail address and telephone number of the person filing must be on the document filed. The subject description of the e-mail must include a reference to the case by case number. The submission must include a visible hand-written signature or the signature line must show a signature in electronic form as follows: /s/ First and

Last Name. Electronic signatures shall be deemed authentic and be considered the signature of the person filing the document.

(d) **Other considerations.** Filing a document by facsimile or e-mail constitutes implied consent for the Office of Administrative Hearings and other parties in the case to notify and deliver documents to that party by facsimile or e-mail. A party who files by fax or e-mail shall retain the original source document in his or her possession or control during the pendency of the action in exactly the same format and content as transmitted and shall produce such document upon request by the assigned administrative law judge or any party to the action. Upon failure to produce the original source document when requested, the assigned administrative law judge may refuse to consider the fax or e-mail as a properly filed instrument. The quality of the original document transmitted shall be clear and dark enough to be transmitted legibly. The Department will not be responsible for events that disrupt or render impossible the receipt of documents transmitted electronically.

[Source: Added at 27 Ok Reg 2496, eff 7-25-10]

310:2-21-28. Videoconference hearings

(a) **General.** Any hearing may be held by videoconference technology. The proceedings will be conducted in a manner that is similar to those conducted when all parties are in the same room. A participant is required to sit in front of a device (e.g. phone, laptop, computer monitor, television) that allows the person to see the parties at the other locations.

(b) **Procedure.** At the commencement of a videoconference the presiding administrative law judge, hearing clerk or video coordinator will check that the link has been established. The administrative law judge will confirm that the remote participants can be seen and heard clearly and in like manner verify that the remote participants can clearly see and hear the participants and administrative law judge at the hearing venue. The assigned administrative law judge will decide and explain the procedure for the videoconference prior to testimony being taken. Identification for each participant, such as a driver's license or photo I.D., may be required. At the beginning of the docket, each case will be called and the parties will be given the number in which their case will be heard. Only the case being heard by the presiding administrative law judge will be in video contact with the tribunal. The administrative law judge may dismiss witnesses prior to conclusion of the hearing.

(c) **Hearing procedure.** The administrative law judge will be in charge of the proceedings. Parties will be sworn in and testimony taken as in a courtroom proceeding. The entire proceeding will be recorded using both audio and video means. Only one person shall talk at a time as directed by the administrative law judge.

(d) **Recesses.** If a recess is taken, the administrative law judge will indicate for the record when it starts and stops and when the record is to continue. The administrative law judge will also note the presence or absence of those attending and previously identified prior to the recess.

(e) **Exhibits.** All exhibits that a party intends to present at a hearing must be submitted to the administrative hearing clerk and opposing

party/counsel at least five (5) days prior to the hearing. All exhibits must be identified numerically and indicate if the exhibit is by petitioner or respondent. (Example: Respondent's Exhibit 1). If the author of a document is not present to provide a foundation for admission, and the document does not otherwise qualify for an exception, it may be denied admission into evidence unless the administrative law judge determines it has probative value to the issues of the case. Other than a request for a hearing letters to the tribunal or letters to the Department are not part of the evidence unless offered by one of the parties and admitted.

(f) **Witnesses.** In some cases, witnesses may be required to wait outside the hearing room at a remote venue because of limitations on space or because of a procedural requirement. In most cases, all witnesses will be sworn in at the beginning of the hearing and admonished not to discuss their testimony with other witnesses.

(g) **Continuances.** A request to continue a video-teleconference hearing must be made no later than five (5) days before the hearing unless there is a showing of good cause. The request must be in writing and either mailed, faxed or emailed to the hearing clerk within the time specified. The request must explain why a continuance is necessary, must indicate the person requesting the continuance, and must indicate if the opposing counsel has been contacted and whether opposing counsel objects to the continuance request. If the hearing is continued, it will be scheduled on the next available docket.

(h) **Technical difficulties.** If a video link is interrupted or cannot be established, the hearing may be postponed or proceed as a telephone hearing at the discretion of the tribunal.

[Source: Added at 27 Ok Reg 2496, eff 7-25-10 ; Amended at 39 Ok Reg 1221, eff 9-11-22]

310:2-21-29. Reconsideration of long-standing interpretations by the Department and final orders

(a) **Long-standing interpretations.** If the Department certifies that an interlocutory decision made by an assigned administrative law judge reverses or materially alters a long-standing interpretation of a rule or statute that is within the administrative or regulatory purview of the Department and that such interpretation would materially affect the outcome of a proceeding, upon request by the Department, the administrative law judge shall grant the Department an evidentiary hearing to demonstrate the longevity and appropriateness of the long-standing interpretation before pronouncing the interlocutory decision. The interlocutory decision shall uphold the Department's long-standing interpretation if the Department successfully demonstrates that the interpretation has been adhered to for at least the last five (5) years, or since the statute or rule was passed or last amended if less than five (5) years since enactment, and that the Department's interpretation is reasonably based upon the language of the statute or rule at issue. Each party may file a Memorandum of Law not to exceed five (5) pages in length regarding the matter in dispute within five (5) days of the assigned administrative law judge's initial, disputed ruling. The Memoranda shall be submitted simultaneously and no reply or response

will be permitted. The administrative law judge shall render a decision on the matter within five (5) days of submission of the Memoranda or the evidentiary hearing, whichever is later.

(b) **Final decisions.** If the Department is aggrieved by a final agency order the Department may request reconsideration of the decision to the Commissioner of Health. The Commissioner of Health, or his designee, shall receive an Application for Reconsideration with a brief in support that complies with section 310:2-21-17 within ten (10) days of the entry of the final agency order. Any party opposing the application may file a response and brief in support that complies with section 310:2-21-17 within ten (10) days of the date the application is filed. The grounds for such application shall be governed by 75 O.S. § 317. The Commissioner of Health may hold a hearing on the matter and shall render a decision on the application within twenty (20) days of its submission and the decision rendered by the Commissioner of Health shall be considered the final agency order in the proceeding before the Department.

[Source: Added at 27 Ok Reg 2496, eff 7-25-10]

310:2-21-30. Requirements of parties filing petitions for judicial review

Any party appealing a final agency decision of an administrative law judge or the Commissioner of Health must promptly file a file-stamped copy of the Petition For Judicial Review or other document initiating appellate review with the Hearing Clerk of the Office of Administrative Hearings in order to provide sufficient notice to prepare and transfer the record to the reviewing court in compliance with 75 O.S. § 320. Any party may submit by electronic means in PDF compatible format to the Office of Administrative Hearings and the opposing counsel a suggested Index of Record of Proceedings to be used by the Hearing Clerk in preparing the record for transmittal to the district court. If part of the administrative record is subject to a protective order, or includes a stipulation by the parties to limit the administrative record for purposes of judicial review, the suggested Index of Record must specifically describe any part of the record subject to the protective order or to the stipulation. Electronic recordings of an individual proceeding will be submitted to the reviewing court without transcription, unless otherwise required by the reviewing court; in such case, the expense of transcription shall be taxed and assessed pursuant to Article II of the Oklahoma Administrative Procedures Act.

[Source: Added at 27 Ok Reg 2496, eff 7-25-10]

310:2-21-31. Summary adjudication and resolution

(a) **General.** The tribunal may resolve any dispute or controversy by full or partial summary adjudication when the tribunal is satisfied that there is no reasonable dispute as to a material fact, or the reasonable inferences that may be drawn from material facts, or if only questions of law are involved. A final agency order rendered as a result of this section must contain findings of fact and conclusions of law as required by 75

O.S. § 312 and include special findings of fact supporting the tribunal's determination that there is no reasonable dispute as to a material fact, the reasonable inferences that may be drawn from the material facts, or if only questions of law are involved. If the tribunal's summary adjudication and resolution does not dispose of all the issues pending in the action then it must recite the issues remaining for determination in its decision granting partial summary relief.

(b) **Procedure.** The motion for summary adjudication and resolution may be filed by Respondent at any time after commencement of the action and by Petitioner at any time after twenty (20) days have passed from commencement of the action or after Respondent serves a motion for summary adjudication and resolution. The motion may be filed with or without supporting affidavits or other admissible evidence on all or part of the claims or defenses at issue in the proceeding. The motion must be served on the opposing party at least ten (10) days before the day set for the hearing on the merits. An opposing party may serve opposing affidavits or other admissible evidence before the hearing day. The facts and issues determined by the tribunal to not be at issue and resolved by a summary decision must be treated as established in the action.

(c) **Affidavits and testimony.** A supporting or opposing affidavit must be made on personal knowledge, set out facts that would be admissible into evidence according to 75 O.S. § 310, and show that the affiant is competent to testify on the matters stated. If a paper or part of a paper is referred to in an affidavit, a sworn or certified copy must be attached to or served with the affidavit. The tribunal may permit an affidavit to be supplemented or opposed by admissions, depositions, answers to interrogatories, or additional affidavits. When a motion for summary adjudication and resolution is properly made and supported, an opposing party may not rely merely on allegations or denials in its own pleadings; rather, its response must, by affidavits or as otherwise provided in this rule, set out specific facts showing a genuine issue for hearing or further proceeding. If the opposing party does not so respond, a summary decision should, if appropriate, be entered against that party.

(d) **When affidavits are unavailable.** If a party opposing the motion shows by affidavit that, for specified reasons, it cannot present facts essential to justify its opposition, the tribunal may deny the motion, order a continuance to enable affidavits to be obtained, depositions to be taken, or other discovery to be undertaken or issue any other just order.

SUBCHAPTER 23. REQUESTS FOR DECLARATORY RELIEF AND RULEMAKING

310:2-23-1. Purpose and scope

This Subchapter shall govern the procedure for requesting declaratory relief or rulemaking action by the Department. These rules are promulgated to provide due process to parties appearing before the Department and are not to be construed inconsistently with the

Oklahoma Administrative Procedures Act. The assigned administrative law judge has the discretion to waive, supplement or modify any requirement of the applicable law or rule of procedure where permitted by law and when the administration of justice requires.

[Source: Reserved at 24 Ok Reg 1896, eff 6-25-07 ; Added at 27 Ok Reg 2496, eff 7-25-10]

310:2-23-2. Rules of procedure generally applicable

Unless expressly provided otherwise in this Subchapter, the rules of procedure set forth in Subchapter 21 shall be generally applicable to all actions before the Department where declaratory relief has been requested.

[Source: Added at 27 Ok Reg 2496, eff 7-25-10]

310:2-23-3. Initiating a proceeding for declaratory ruling

Proceedings for declaratory ruling upon the applicability of any rule or order of the agency may be initiated before the Department by filing with the Office of Administrative Hearings a Petition which seeks relief authorized by 75 O.S. § 307. Each petition shall be styled "In re the request of _____, Petitioner, for a declaratory ruling." The person or entity filing the Petition shall be denominated the Petitioner and the Department shall be denominated the Respondent. The petition shall include a statement of the legal authority and jurisdiction under which the proceeding is to be held, a reference to the particular sections of the rules or orders involved, a short and plain statement of the matters asserted giving a right to relief and the relief requested.

[Source: Added at 27 Ok Reg 2496, eff 7-25-10]

310:2-23-4. Initiating a proceeding seeking rulemaking

(a) **General.** Proceedings seeking rulemaking by the Department may be initiated before the Department by filing with the Office of Administrative Hearings a Petition which seeks relief authorized by 75 O.S. § 305. Each petition shall be styled "In re the request of _____, Petitioner, for adoption, amendment or repeal of a rule." The person or entity filing the Petition shall be denominated the Petitioner and the Department shall be denominated the Respondent.

(b) **Contents of the petition.** The petition shall include a statement of the legal authority and jurisdiction under which the proceeding is to be held, a reference to the particular sections of the statutes and rules involved, a short and plain statement of the rule language the Petitioner seeks to add, amend or delete.

(c) **Emergency rulemaking.** A petition seeking or requesting an emergency rule must include a separate statement describing the circumstances or conditions constituting an imminent peril threatening the preservation of the public health, safety, or welfare, or a compelling public interest requiring the adoption of an emergency rule, or the amendment or repeal of an existing rule.

(d) **Notice of hearing.** If the Department determines that the petitioner's request will proceed to hearing notice shall be issued to the petitioner and any other person who may have requested notice regarding said petition.

(e) **Denial.** *If the Department fails to initiate rulemaking proceedings in accordance with the Oklahoma Administrative Procedures Act within thirty (30) calendar days after the filing of a petition, the petition shall be deemed to have been denied.* [75 O.S. § 305.]

[Source: Added at 27 Ok Reg 2496, eff 7-25-10]

SUBCHAPTER 25. DISCOVERY

310:2-25-1. Purpose and scope

(a) This Subchapter shall govern the procedure for discovery in matters before the Department to provide for the just, speedy and inexpensive determination of actions. Each party shall participate in the discovery process, to the maximum extent possible, without intervention by the Office of Administrative Hearings. If a dispute over discovery should arise between the parties, the parties shall in good faith attempt to resolve their differences informally, without resort to motion or request filed with the Department. Subsequent to such attempt, any request or motion to compel discovery must be accompanied by a verified affidavit from the party seeking discovery, stating that informal conference did not resolve the dispute, and the reasons why such resolution was not achieved.

(b) Discovery may be obtained by interrogatories (written questions), requests for production of documents or entry on land for inspection and other purposes, requests for admission, and depositions. Discovery may be obtained on any matter, not privileged, which is relevant to the subject matter involved in the pending case, and which is reasonably calculated to lead to the disclosure of admissible evidence. It is not a ground for objection that an answer relates to an ultimate fact in the case or the application of law to fact.

(c) A request, response or objection to discovery shall be signed by the party or the party's attorney. A party responding to a request that was complete when it was made shall supplement the response if and when it is discovered that the response was incorrect when made, or that the response is no longer true.

(d) An evasive or incomplete answer to a discovery request may be treated as a failure to answer. If a party or his or her attorney knowingly fails to obey an order to provide or permit discovery, the assigned administrative law judge may issue such order(s) which are just and will remediate the failure to obey, including an order that the party or other person failing to act pay reasonable discovery fees and costs, including attorney fees. Failure to act as described in this section may not be excused on the ground that the discovery sought was objectionable.

[Source: Added at 24 Ok Reg 1896, eff 6-25-07 ; Amended at 27 Ok Reg 2496, eff 7-25-10]

310:2-25-2. Commencing discovery; time for completion

(a) The parties may begin discovery at any time after a scheduling order has been entered in the case; or, if no scheduling order is entered, discovery may begin once the matter has been set for hearing on the merits.

(b) Discovery shall be completed in accordance with the scheduling order entered in the case. If no scheduling order is entered, the parties shall complete their discovery on or before the date of the pre-hearing conference. If no pre-hearing conference is ordered, discovery shall be completed at least ten (10) days prior to hearing on the merits.

[Source: Added at 24 Ok Reg 1896, eff 6-25-07]

310:2-25-3. Discovery conference

A discovery conference may be ordered and conducted by the assigned administrative law judge or the Chief Administrative Law Judge. Special protective orders may be entered if deemed advisable, which may limit the information sought and/or the manner in which it will be provided.

[Source: Added at 24 Ok Reg 1896, eff 6-25-07 ; Amended at 27 Ok Reg 2496, eff 7-25-10]

310:2-25-4. Methods of discovery

(a) **Interrogatories.** A party may serve on any other party written questions not to exceed 20 in number, including discrete subparts. Interrogatories inquiring as to the names and locations of witnesses, or the existence, location and custodian of documents or physical evidence shall be construed as one interrogatory. All other interrogatories, including subdivisions of one numbered interrogatory, shall be construed as separate interrogatories. Each question shall be answered separately and fully in writing or shall be objected to by the person making the answer. If objected to, the reasons shall be stated. Answers or objections shall be made within twenty (20) calendar days after service unless a shorter or longer time is ordered or agreed upon by the parties. Where the answer to a question may be obtained from the records kept by a party, it is a sufficient answer to specify the records from which the answer may be obtained. The answer shall afford the party making the request an opportunity to examine, audit or inspect such records.

(b) **Requests for Production or entry upon land.** A party may serve on any other party a request to produce, inspect and copy any designated documents not confidential or privileged; or to permit entry upon designated land or other property in the possession or control of the party upon whom the request is served for the purpose of inspection and measuring, surveying, photographing, testing or sampling the property or any designated object or operation thereon. A request shall describe with particularity the items to be produced or inspected and shall indicate a reasonable time, place and manner of making the inspection and performing any related acts. A written response to each item or category shall be made within twenty (20) calendar days after the service

of a request unless a shorter or longer time is ordered or agreed upon by the parties. The response shall either state that the production or inspection will be permitted, or if objected to, the reasons shall be stated. A party who produces documents for inspection shall produce them as they are kept in the usual course of business or shall organize and label them to correspond with the categories in the request.

(c) **Requests for Admission.** A party may serve on any other party written requests for admissions, not to exceed 20 in number, regarding the truth of any matters that relate to statements or opinions of fact or of the application of law to fact. This includes the genuineness of any documents described in the request. Copies of documents shall be served with the request unless they have otherwise been furnished or made available for inspection and copying. Each matter for which an admission is requested shall be answered separately. The answer shall admit or deny the matter or state why the answering party can not admit or deny the matter. A written response shall be made within twenty (20) calendar days after the service of a request unless a shorter or longer time is ordered or agreed upon by the parties. If an objection is made the reasons shall be stated. Any matter admitted is established unless withdrawal or amendment of the admission is permitted by the assigned administrative law judge.

(d) **Depositions.** A party may ask questions of any other party or person, under oath, before a person authorized to administer such oath. A written transcript shall be made by the person seeking the deposition and that person shall provide a copy to the other party or person. The requirements for conduct of depositions set forth in 12 O.S. § 3230 shall be applicable to depositions in cases before the Department, unless such would conflict with the Administrative Procedures Act, or these rules. At the discretion of the assigned administrative law judge, depositions may be taken by videoconference and/or recorded on videotape or other electronic medium. Depositions so taken shall also be transcribed by stenographic means. The admissibility of video deposition evidence shall be at the discretion of the assigned administrative law judge. Video depositions for purposes of submission as testimony at the hearing, where the witness is unavailable, may be permitted on a case by case basis, subject to approval of the assigned administrative law judge.

310:2-25-5. Enforcement of discovery rules and orders

The sanctions available in OAC 310:2-21-24 are applicable to this Subchapter, and failure or refusal to comply with a discovery order may result in the imposition of one or more sanctions against the offending party. In addition, the Department may seek enforcement by District Court order if deemed necessary for the proper and just disposition of the case.

[Source: Added at 24 Ok Reg 1896, eff 6-25-07 ; Amended at 27 Ok Reg 2496, eff 7-25-10 ; Amended at 39 Ok Reg 1221, eff 9-11-22]

310:2-25-6. Time

Unless expressly provided otherwise in this Subchapter, the computation of time provisions in OAC 310:2-21-25 are applicable to this Subchapter.

[Source: Added at 27 Ok Reg 2496, eff 7-25-10]

310:2-25-7. Protected health information

Discovery requests for medical records or other records containing protected health information of a party or a person who is not a party to a proceeding, shall be subject to the following requirements:

- (1) Information contained in party's medical records shall be disclosed only to counsel of record in this action or only to individuals certified by such counsel as employed by or assisting counsel in preparation for, or at the trial of this action. For the purposes of compliance with this rule, medical records shall mean any note, memorandum, or any other form of information, including information in electronic form, that is covered by the HIPAA Privacy Rule, 45 CFR § 164.xx, et seq.
- (2) Any such documents or information obtained shall be used only for the purpose of litigation before the Department in the case in which the information was collected.
- (3) The production of such documents or information concerning a resident's medical records shall not constitute a waiver of any privilege or other claim or right of withholding or confidentiality which resident may have.
- (4) It shall be the responsibility of the parties to maintain all confidential information in a secure place designed to prevent any third party from access.
- (5) Copies of all documents containing such information should reflect that they are protected, privileged or confidential within the spirit of this Order, including any portion of a hearing transcript, exhibit, brief or other document containing such information, and shall be filed and transmitted using sealed envelopes or other appropriate containers clearly marked as being confidential and protected.
- (6) To the extent possible, all pleadings and other documents used in an administrative hearing shall be redacted to exclude the name of a patient. For the purpose of clarity in hearings, parties may file a letter with the Office of Administrative Hearings identifying any redacted party. Upon conclusion of the case, the letter shall be placed in a sealed envelope and kept with the tribunal file.

[Source: Added at 27 Ok Reg 2496, eff 7-25-10]

SUBCHAPTER 27. CONTRACTS WITH CHARITABLE HEALTH CARE PROVIDERS

310:2-27-1. Purpose

The rules of this Subchapter are adopted to implement Senate Bill 930, Oklahoma Sessions 2007, for the administration of contracts between charitable health care providers and the Oklahoma State Department of Health or a city-county health department for the benefit of Oklahoma residents who are medically indigent. These rules establish eligibility criteria for charitable health care providers and medically indigent persons, procedures for entering into and revoking contracts between the Oklahoma State Department of Health or a city-county health department and a charitable health care provider and responsibilities and obligations pursuant to such contracts.

[Source: Added at 25 Ok Reg 507, eff 12-04-07 (emergency); Added at 25 Ok Reg 2387, eff 7-11-08]

310:2-27-2. Definitions

The following words or terms used in this Subchapter shall have the meaning described below unless the context clearly indicates otherwise:

"Charitable health care provider" or "charitable provider" *means a person who is licensed, certified, or otherwise authorized by the laws of this state to administer health care in the ordinary course of business or the practice of a profession and who provides care to a medically indigent person, as defined in this subchapter, with no expectation of or acceptance of compensation of any kind.* [51 O.S.Supp.2007, § 152(3)]

"Charitable provider contract" means an annual agreement executed in compliance with this subchapter between a charitable health care provider and a contracting agency for the provision of health care services to the medically indigent.

"Claim" as used in 'claims history' means any written demand presented by a claimant or the claimant's authorized representative to recover money as compensation for an act or omission committed by a person who provides health care.

"Claims history" means a summary of the claims made against the applicant for a charitable provider contract with a contracting agency, including the number of claims, a brief description of each claim, the type of health care services being provided that precipitated each claim, and the money that was paid, or is being paid, for each claim, if any.

"Commissioner" means the Commissioner of Health and the chief executive officer of the Oklahoma State Department of Health.

"Contracting agency" means either the Oklahoma State Department of Health or a city-county health department.

"Department" means the Oklahoma State Department of Health.

"Free clinic" means a facility where the health care professional receives no form of compensation as provided at 76 O.S.Supp.2004, § 32 and the clinic requires no form of compensation from any patient.

"Medically indigent" *means a person requiring medically necessary hospital or other health care services for the person or the dependents of the person who has no public or private third-party coverage, and whose personal resources are insufficient to provide for needed health care.* [51 O.S.Supp.2007, § 152(8)]

"Person" means a human being or natural person, and does not include governmental agencies, corporations or other business entities.

"Person whose personal resources are insufficient to provide for needed health care" means a person who has declared that the person, or family of the person seeking health care services, does not have sufficient resources to pay for the needed health care.

"Risk Management" means the Office of the Risk Management Administrator of the Department of Central Services as provided at 51 O.S.Supp.2006, § 156.

[Source: Added at 25 Ok Reg 507, eff 12-04-07 (emergency); Added at 25 Ok Reg 2387, eff 7-11-08]

310:2-27-3. Contingency

The execution or continuation of a contract between a contracting agency and a charitable health care provider, as defined within and provided for in this subchapter, is contingent upon funding being available to the contracting agency for this purpose, and nothing within this subchapter shall be construed to grant to a charitable health care provider any greater rights than those otherwise provided by law.

[Source: Added at 25 Ok Reg 507, eff 12-04-07 (emergency); Added at 25 Ok Reg 2387, eff 7-11-08]

310:2-27-4. Application to contract as a charitable health care provider

(a) The Department shall develop and provide an application form for a person to use when applying with a contracting agency to enter into a charitable provider contract.

(b) A person may apply to enter into a charitable provider contract as a charitable health care provider if such applicant:

(1) is licensed, certified, or otherwise authorized by the laws of Oklahoma to administer, in the ordinary course of business or in the practice of a profession, the health care that is the subject of the charitable health care contract;

(2) will provide health care to the medically indigent, as defined in section 310:2-27-2; and

(3) submits a complete application to a contracting agency requesting to enter into a charitable provider contract, and the application must include:

(A) the scope of service the applicant will provide to the medically indigent; and

(B) the applicant's claims history for the last ten (10) years.

(c) State Risk Management will determine the amount of the insurance premium the Department would be required to pay into the State's self-insurance pool and manage claims related to the program, if and when they occur.

(d) A health care provider whose application to be granted a charitable provider contract from a contracting agency is denied may re-submit the application with a different scope of service.

[Source: Added at 25 Ok Reg 507, eff 12-04-07 (emergency); Added at 25 Ok Reg 2387, eff 7-11-08 ; Amended at 36 Ok Reg 1649, eff 9-13-19]

310:2-27-5. Charitable provider responsibilities

- (a) The charitable provider is responsible for determining the patient is medically indigent before providing health care services by confirming that the person seeking services has:
- (1) no health insurance;
 - (2) not been informed that he or she is Medicaideligible; and
 - (3) insufficient income to pay for the needed health care services.
- (b) All professional services rendered by the charitable provider to the medically indigent must be provided gratuitously and with no expectation or acceptance of compensation of any kind.
- (c) Upon receipt of a claim by the charitable health care provider indicating that the claimant is seeking compensation for an act or omission by the charitable provider occurring when rendering professional services to a medically indigent person at, or on referral from, a free clinic, the charitable health care provider shall submit the claim to Risk Management and the contracting agency and shall not submit such claims to a professional malpractice insurance carrier.
- (d) The charitable provider shall keep records related to the performance of the charitable health care contract during the term of the contract for a period of two years after the contract ends. Upon request, the charitable provider shall make these records available to the contracting agency or Risk Management.

[Source: Added at 25 Ok Reg 507, eff 12-04-07 (emergency); Added at 25 Ok Reg 2387, eff 7-11-08]

310:2-27-6. Termination or rescission of charitable health care contracts

- (a) Charitable health care contracts may be terminated or rescinded by the Department in the event of noncompliance with any provision of the charitable provider contract or this subchapter or the unavailability of funding for such contracts. Before terminating or rescinding a contract, the Department will give the charitable health care provider thirty (30) days written notice and request information as to why the charitable health care contract should not be terminated or rescinded.
- (b) Upon completing the review of any information submitted in reconsideration of terminating or rescinding the charitable provider contract, the Department will provide the charitable health care provider its decision in writing. This final decision is not appealable.

[Source: Added at 25 Ok Reg 507, eff 12-04-07 (emergency); Added at 25 Ok Reg 2387, eff 7-11-08]

SUBCHAPTER 29. CRIMINAL HISTORY BACKGROUND CHECKS

310:2-29-1. Purpose

These rules implement the Long Term Care Security Act as established at Title 63 O.S. Section 1-1944 et seq., as amended, and eligibility appellate procedures for those Chapters under Title 310, which provide for denials of eligibility for a license, certification, or permit based on criminal history.

[Source: Added at 31 Ok Reg 417, eff 2-1-14 (emergency); Added at 31 Ok Reg 1577, eff 9-12-14 ; Amended at 37 Ok Reg 1354, eff 9-11-20]

310:2-29-2. [RESERVED]

[Source: Reserved at 31 Ok Reg 417, eff 2-1-14 (emergency); Reserved at 31 Ok Reg 1577, eff 9-12-14]

310:2-29-3. Implementation

(a) **Authority.** Title 63 O.S. Section 1-1947(Y) authorized the Department to establish through rulemaking the effective dates of subsections D through V of Section 1-1945 of Long Term Care Security Act, by category of employer.

(b) **Effective dates.** The effective dates for subsections D through V of Section 1-1947 (relating to screening and fingerprint based background checks) are defined below.

(1) For the following, compliance may begin February 1, 2014, but shall be required no later than March 1, 2014:

(A) Adult Day Care Centers as defined by Section 1-872 of Title 63 of the Oklahoma Statutes; and

(B) Residential care homes as defined by Section 1-820 Title 63 of the Oklahoma Statutes.

(2) For Specialized Nursing Facilities licensed pursuant to Title 63 O.S. Section 1-1901 et seq., compliance may begin February 1, 2014, but shall be required no later than April 1, 2014:

(3) For the following employers, compliance may begin February 1, 2014, but shall be required no later than May 1, 2014:

(A) Applicants for employment with the State Department of Health and Department of Human Services whose responsibilities include working inside long term care facilities, pursuant to Title 63 O.S. Section 1-1947(A)(1); and

(B) Nursing Facilities licensed pursuant to Title 63 O.S. Section 1-1901 et seq.,

(4) For the following employers compliance may begin February 1, 2014, but shall be required no later than June 1, 2014:

(A) Continuum of Care or Assisted Living facilities licensed pursuant to Title 63 O.S. Section 1-890.1 et seq.; and

(B) Hospice programs licensed pursuant to Title 63 O.S. Section 1-860.1 et seq.

(5) For Medicare Certified Home Care Agencies licensed pursuant to Title 63 O.S. Section 1-1960 et seq., compliance may begin February 1, 2014, but shall be required no later than July 1, 2014.

(6) For all other employers defined in Title 63 O.S. Section 1-1945(4), compliance may begin February 1, 2014, but shall be required no later than August 1, 2014.

(7) For Nurse Aide Scholarship Programs operated under contract with the Oklahoma Health Care Authority compliance may begin July 1, 2014, but shall be required no later than August 1, 2014.

(8) For staffing agencies or independent contractors as defined in Title 63 O.S. Section 1-1945(4), compliance shall match the contracted employer.

(9) Pursuant to Title 63 O.S. Section 1-1947(I)(5), *Medicaid home and community-based services waived providers as defined in Section 1915 (c) or 1915 (i) of the federal Social Security Act may voluntarily participate in the submission of fingerprints for applicants. In lieu of fingerprinting, said providers shall obtain a name-based state criminal history record check from the [Oklahoma State Bureau of Investigation] at the fee established in Section 150.9 of Title 74 of the Oklahoma Statutes. No other fees shall apply to said providers relying on a name-based state criminal history record check. The determination of employment eligibility shall be made by said providers based on the criteria established in subsection Dof*[Title 63 O.S. Section 1-1947].

(c) **Nurse Aide Scholarship Programs.** For the purposes of complying with Title 63 O.S. Section 1-1947(G) (related to conducting a registry screening and criminal history record check), the Nurse Aide Scholarship Program may refer the applicant's application and release to the Department for registry screening and authorization to collect fingerprints.

(d) **Alternate Name Based Background Check.** Where the Department is unable to authorize the collection and submission of fingerprints through an authorized collection site pursuant to Title 63 O.S. Section 1-1947(I), the Department shall conduct a name based search of the applicant in the criminal history database maintained by the Oklahoma State Bureau of Investigation.

[Source: Added at 31 Ok Reg 417, eff 2-1-14 (emergency); Added at 31 Ok Reg 1577, eff 9-12-14]

310:2-29-4. [RESERVED]

[Source: Reserved at 31 Ok Reg 417, eff 2-1-14 (emergency); Reserved at 31 Ok Reg 1577, eff 9-12-14]

310:2-29-5. Appeals

(a) **Notice.** A determination by the Department that finds an applicant not eligible for a license, certification, permit or employment will result in a notice to the applicant to include the reasons why the applicant is not eligible for license, certification, permit or employment and a statement that the applicant has a right to appeal the decision made by the Department regarding the eligibility. The notice shall also include information regarding where to file and describe the appellate procedures.

(b) **Days to initiate an appeal.**

(1) Pursuant to Title 63 O.S. 1-1947(T)(1), any individual who has been disqualified from or denied employment by an employer pursuant to Title 63 O.S. Section 1-1947 may file an appeal with

the Department within thirty (30) days of the receipt of the notice of disqualification. An applicant under 63 O.S. 1-1947(T)(1) may receive an extension of the thirty (30) days allowed to appeal where good cause is shown.

(2) An individual who has been found not eligible for a license, certification, or permit based on their criminal history may file an appeal with the Department at any time following receipt of the notice of disqualification.

(c) **Types of appeals.** An applicant may appeal the determination by:

- (1) Challenging the finding that the applicant is the true subject of the results from a name-based registry background check;
- (2) Challenging the criminal history record as inaccurate;
- (3) Requesting a waiver which gives the applicant the opportunity to demonstrate that the applicant should be allowed to work because he or she does not pose a risk to patients, facilities or their property; or
- (4) Requesting a reconsideration of eligibility, which may be considered no sooner than twelve (12) months from the previous appeal of a determination of ineligibility.

(d) **Inaccuracy of criminal history record.** To demonstrate that the criminal history record is inaccurate, the applicant shall submit to the Department written documents, issued and certified by a governmental entity that demonstrate that the information contained in the criminal history report is inaccurate.

(e) **Criteria for consideration in a waiver review.** The Department shall consider the following criteria in considering whether the applicant merits a waiver of the applicant's determination of ineligibility:

- (1) The time elapsed since the disqualifying criminal conviction, whether the applicant has fulfilled the sentence requirements, and whether there are any subsequent arrests or convictions of any nature;
- (2) Any extenuating circumstances such as the offender's age at the time of conviction, substance abuse history and treatment, or mental health issues and treatment;
- (3) Rehabilitation as demonstrated by character references and recommendation letters from past employers, the applicant's record of employment history, education, and training subsequent to conviction;
- (4) The relevancy of the particular disqualifying information with respect to the proposed employment of the individual to include the job type and duties, and the extent to which the applicant has unsupervised access to service recipients; and
- (5) For appeals under the authority of 63 O.S. 1-1947(T)(2), whether the crime was committed against a vulnerable child or adult, and whether the conviction was related to an employer subject to the requirements of the Long Term Care Security Act.

(f) **Where to file.** The applicant's appeal shall be submitted in writing to the Administrative Hearings Clerk for the Oklahoma State Department of Health, 1000 Northeast 10th Street, Oklahoma City, OK 73117, and shall address the criteria specified in (d) of this Section and how the applicant

merits a waiver of the disqualification from employment.

(g) **Conduct of hearing.** The appeal shall be conducted as an individual proceeding pursuant to this Chapter and the Administrative Procedures Act.

[Source: Added at 31 Ok Reg 417, eff 2-1-14 (emergency); Added at 31 Ok Reg 1577, eff 9-12-14 ; Amended at 37 Ok Reg 1354, eff 9-11-20]

SUBCHAPTER 31. HUMAN SUBJECTS PROTECTION

310:2-31-1. General purpose

The Oklahoma State Department of Health (OSDH) Institutional Review Board (IRB) has been established to comply with federal regulations to protect the rights and welfare of human research participants in accordance with Title 45 of the Code of Federal Regulations Part 46 (45 C.F.R. Part 46). The OSDH IRB has the responsibility to assure that the risks of proposed research are justified by the potential benefits to the participants and to society, and that risks are minimized to the extent possible consistent with sound research design. The OSDH IRB must assure that the risks of research do not fall disproportionately on one group while the potential benefits accrue to another.

[Source: Added at 36 Ok Reg 1649, eff 9-13-19 ; Amended at 38 Ok Reg 1916, eff 9-11-21]

310:2-31-2. Scope

This subchapter applies to all individuals at the OSDH engaged in research involving human subjects. The Commissioner retains final authority to determine whether a particular activity is subject to this policy. This subchapter applies to any person paid by, under the control of, or affiliated with the OSDH, such as scientists, trainees, technicians and other staff members, students, fellows, guest researchers, or collaborators at OSDH.

[Source: Added at 36 Ok Reg 1649, eff 9-13-19 ; Amended at 38 Ok Reg 1916, eff 9-11-21]

310:2-31-3. Definitions [REVOKED]

[Source: Added at 36 Ok Reg 1649, eff 9-13-19 ; Revoked at 38 Ok Reg 1916, eff 9-11-21]

310:2-31-4. Incorporations by reference

(a) This subchapter hereby incorporates by reference Part 46 of Title 45 of the Code of Federal Regulations (45 C.F.R. Part 46) as if fully set forth herein.

(b) This subchapter hereby incorporates by reference Part 50 and 93 of Title 42 of the Code of Federal Regulations (42 C.F.R. Parts 50 and 93) as if fully set forth herein.

[Source: Added at 36 Ok Reg 1649, eff 9-13-19]

310:2-31-5. Conditions of Federalwide Assurance

- (a) The conditions of the Federalwide Assurance apply whenever:
 - (1) the OSDH IRB provides review and oversight of federally-supported human subject research, regardless of where the research takes place or by whom it is conducted; or
 - (2) the OSDH becomes engaged in federally supported human subject research.
- (b) The OSDH becomes so engaged whenever:
 - (1) OSDH employees or agents intervene or interact with living individuals for purposes of federally supported research;
 - (2) OSDH employees or agents obtain, release, or access individually identifiable private information for purposes of federally-supported research; or
 - (3) The OSDH receives a direct federal award to conduct human subject research, directly or where all activities involving human subjects are carried out by a subcontractor or collaborator.
- (c) Information provided under the Federalwide Assurance will be updated on schedule in order to maintain an active Assurance.

[Source: Added at 36 Ok Reg 1649, eff 9-13-19]

310:2-31-6. Authority of IRB

- (a) All human subject research will be reviewed, prospectively approved, and subject to continuing oversight by the OSDH IRB.
- (b) The OSDH IRB will have authority to approve, require modifications in, disapprove, suspend or terminate the covered human subject research.
- (c) The OSDH IRB will maintain IRB registration under the Office of Human Research Protections (OHRP) to permit the review of federally funded research.

[Source: Added at 36 Ok Reg 1649, eff 9-13-19 ; Amended at 38 Ok Reg 1916, eff 9-11-21]

310:2-31-7. IRB procedures

- (a) All approved IRB research projects, whether approved by OSDH IRB or an external IRB, are subject to a review by OSDH Data Use Review Committee (DURC) to ensure release of OSDH data is allowable, limited to, and meets the statutory provisions pertaining to public health data sharing. Release of data will be dependent on the DURC's findings.
- (b) The OSDH and the OSDH IRB will established written procedures to ensure conformity with the requirements of 45 C.F.R. Part 46.

[Source: Added at 36 Ok Reg 1649, eff 9-13-19 ; Amended at 38 Ok Reg 1916, eff 9-11-21]

310:2-31-8. Training

The OSDH IRB will ensure the existence of adequate education and oversight mechanisms (appropriate to the nature and volume of the research being conducted) to verify that research investigators, IRB members and staff, and other relevant personnel maintain continuing

knowledge of, and comply with, relevant Federal regulations, OHRP guidance, other applicable guidance, state and local law, and IRB determinations and policies for the protection of human subjects.

[Source: Added at 36 Ok Reg 1649, eff 9-13-19 ; Amended at 38 Ok Reg 1916, eff 9-11-21]

310:2-31-9. Compliance and knowledge of local context [REVOKED]

[Source: Added at 36 Ok Reg 1649, eff 9-13-19 ; Revoked at 38 Ok Reg 1916, eff 9-11-21]

310:2-31-10. Institutional support of the IRB

The institution will provide the OSDH IRB with resources, professional staff, and support staff sufficient to carry out their responsibilities efficiently and effectively.

[Source: Added at 36 Ok Reg 1649, eff 9-13-19]

310:2-31-11. FDA regulated research [REVOKED]

[Source: Added at 36 Ok Reg 1649, eff 9-13-19 ; Revoked at 38 Ok Reg 1916, eff 9-11-21]

310:2-31-12. Usage of procedures for allegation of possible misconduct in science

This section establishes procedure that will be followed when an allegation of possible misconduct in science is received by an OSDH official. Procedures will be in accordance with 42 C.F.R. Part 93 and are subject to Office of Research Integrity (ORI) approval. Particular circumstances in an individual case may dictate variation from this procedure deemed in the best interests of OSDH and U.S. Public Health Service (PHS). Any change from these procedures also must ensure fair treatment to the subject of the inquiry or investigation. The Commissioner should approve any significant variation in advance.

[Source: Added at 36 Ok Reg 1649, eff 9-13-19 ; Amended at 38 Ok Reg 1916, eff 9-11-21]

310:2-31-13. Research Integrity Officer (RIO)

(a) The Commissioner will appoint the Research Integrity Officer (RIO) who will have primary responsibility for implementation of these procedures. The RIO Officer will be an OSDH employee who is well qualified to handle the procedural requirements involved and is sensitive to the varied demands made on those who conduct research, those who are accused of misconduct, and those who report apparent misconduct in good faith.

(b) The RIO will appoint the inquiry and investigation committees and ensure that necessary and appropriate expertise is secured to carry out a thorough and authoritative evaluation of the relevant evidence in an inquiry or investigation. The RIO will do everything possible to ensure that confidentiality is maintained.

(c) The RIO will assist inquiry and investigation committees and all employees in complying with these procedures and with applicable standards imposed by government or external funding sources. The RIO shall maintain files of all documents and evidence.

(d) The RIO reports to ORI will keep ORI apprised of any developments during the course of the inquiry or investigation that may affect current or potential Department of Health and Human Services (DHHS) funding for the individual(s) under investigation or that PHS needs to know to ensure appropriate use of federal funds and otherwise protect the public interest.

(e) The RIO has the responsibility under 42 C.F.R. Part 50 and 93 for the completion and submission of the institution's annual report to the federal ORI.

[Source: Added at 36 Ok Reg 1649, eff 9-13-19 ; Amended at 38 Ok Reg 1916, eff 9-11-21]

310:2-31-14. Whistleblower

(a) The whistleblower will have the opportunity to:

- (1) Testify before the committees;
- (2) Review portions of the reports pertinent to his/her allegations or testimony;
- (3) Be informed of the results of the inquiry and investigation;
- (4) Be protected from retaliation.

(b) If the RIO has determined that the whistleblower may be able to provide pertinent information on any portions of the draft report, these portions will be given to the whistleblower for comment.

(c) The whistleblower is responsible for making allegations in good faith, maintaining confidentiality, and cooperating with an inquiry or investigation.

[Source: Added at 36 Ok Reg 1649, eff 9-13-19 ; Amended at 38 Ok Reg 1916, eff 9-11-21]

310:2-31-15. Respondent

(a) The respondent will:

- (1) Be informed of the allegations when an inquiry is opened;
- (2) Be notified in writing of the final determinations and resulting actions;
- (3) Be interviewed by and present evidence to the inquiry and investigation committees;
- (4) Review the draft inquiry and investigation reports;
- (5) Have the right to advice of counsel or a non-lawyer personal advisor (who is not a principal or witness in the case) to seek advice and may bring the counsel or personal advisor to interviews or meetings on the case.

(b) The respondent is responsible for maintaining confidentiality and cooperating with the conduct of an inquiry or investigation. If the respondent is not found to have engaged in scientific misconduct, he or she has the right to receive assistance from OSDH in restoring his or her reputation.

[Source: Added at 36 Ok Reg 1649, eff 9-13-19 ; Amended at 38 Ok Reg 1916, eff 9-11-21]

310:2-31-16. Deciding official

The Deciding Official (DO) will be appointed by the Commissioner and will receive the inquiry and/or investigation report and any written comments made by the respondent or the whistleblower on the draft report. The DO will consult with the RIO or other appropriate officials and will determine whether to conduct an investigation, whether misconduct occurred, whether to impose sanctions, or whether to take other appropriate administrative actions.

[Source: Added at 36 Ok Reg 1649, eff 9-13-19 ; Amended at 38 Ok Reg 1916, eff 9-11-21]

310:2-31-17. Responsibility to report misconduct

All employees or individuals associated with OSDH should report observed, suspected, or apparent misconduct in science to the RIO. If an individual is unsure whether a suspected incident falls within the definition of scientific misconduct, he or she may call the RIO to discuss the suspected misconduct informally. If the circumstances described by the individual do not meet the definition of scientific misconduct, the RIO will refer the individual or allegation to other offices or officials with responsibility for resolving the problem. At any time, an employee may have confidential discussions and consultations about concerns of possible misconduct with the RIO and will be counseled about appropriate procedures for reporting allegations.

[Source: Added at 36 Ok Reg 1649, eff 9-13-19 ; Amended at 38 Ok Reg 1916, eff 9-11-21]

310:2-31-18. Protecting the whistleblower

- (a) The RIO will monitor the treatment of individuals who bring allegations of misconduct or of inadequate institutional response, and those who cooperate in inquiries or investigations.
- (b) The RIO will ensure that these persons will not be retaliated against in the terms and conditions of their employment or other status at the institution and will review instances of alleged retaliation for appropriate action. A grievance may be filed by the RIO for the whistleblower or the whistleblower may file for him or herself.
- (c) Employees should immediately report any alleged or apparent retaliation RIO.
- (d) OSDH shall protect the privacy, positions and reputations of those who report misconduct in good faith to the maximum extent possible. The whistleblower will be advised that if the matter is referred to an investigation committee and the whistleblower's testimony is required, anonymity may no longer be guaranteed.

[Source: Added at 36 Ok Reg 1649, eff 9-13-19 ; Amended at 38 Ok Reg 1916, eff 9-11-21]

310:2-31-19. Protecting the respondent

Inquiries and investigations will be conducted in a manner that will ensure fair treatment to the respondent(s) in the inquiry or investigation and confidentiality to the extent possible without compromising public health and safety or thoroughly carrying out the inquiry or investigation.

[Source: Added at 36 Ok Reg 1649, eff 9-13-19 ; Amended at 38 Ok Reg 1916, eff 9-11-21]

310:2-31-20. Cooperation with inquiries and investigations

OSDH employees will cooperate with the RIO and other OSDH officials in the review of allegations and the conduct of inquiries and investigations. Employees have an obligation to provide relevant evidence to the RIO or other OSDH officials on misconduct allegations.

[Source: Added at 36 Ok Reg 1649, eff 9-13-19]

310:2-31-21. Preliminary assessment of allegations

Upon receiving an allegation of scientific misconduct, the RIO will immediately assess the allegation to determine whether there is sufficient evidence to warrant an inquiry, whether PHS support or PHS applications for funding are involved, and whether the allegation falls under the PHS definition of scientific misconduct.

[Source: Added at 36 Ok Reg 1649, eff 9-13-19]

310:2-31-22. Conducting the inquiry

(a) **Initiation and purpose of the inquiry.** If the RIO determines that the allegation provides sufficient information, involves PHS support, and is within the PHS definition of scientific misconduct, they will immediately initiate the inquiry process. The RIO should identify the original allegation and any related issues that should be evaluated in the initial inquiry. The purpose of the inquiry is to make a preliminary evaluation of the available evidence and testimony of the respondent, whistleblower, and key witnesses to determine whether there is sufficient evidence of possible scientific misconduct to warrant an investigation. The findings of the inquiry will be documented in an inquiry report.

(b) **Sequestration of the research records.** After determining that an allegation falls within the definition of misconduct in science and involves PHS funding, the RIO must ensure that all original research records and materials relevant to the allegation are immediately secured.

(c) **Appointment of the inquiry committee.**

(1) The RIO will appoint an inquiry committee and committee chair within ten (10 days) days of the initiation of the inquiry. The inquiry committee will consist of individuals who:

- (A) Do not have real or apparent conflicts of interest in the case;
- (B) Are unbiased; and
- (C) Have the necessary expertise to evaluate the evidence and issues related to the allegation.
- (D) May be scientists, subject matter experts, administrators, lawyers, or other qualified persons, and

- they may be from inside or outside the institution.
- (2) The Inquiry Committee will interview the principals and key witnesses, and conduct the inquiry.
 - (3) The RIO will notify the respondent of the proposed committee membership in ten (10 days). days.
 - (4) If the respondent submits a written objection to any appointed member of the inquiry committee or expert based on bias or conflict of interest within five (5 days), days, the RIO will determine whether to replace the challenged member or expert with a qualified substitute.
- (d) **Charge to the committee.** The RIO will prepare a charge for the inquiry committee that describes the allegations and any related issues and states that the purpose of the inquiry is to make a preliminary evaluation to determine whether there is sufficient evidence of possible scientific misconduct to warrant an investigation as required by the PHS regulation.
- (e) **Inquiry process.** The inquiry committee will interview the whistleblower, the respondent, and key witnesses as well as examining relevant research records and materials. The inquiry committee will evaluate the evidence and testimony obtained. After consultation with the RIO and OSDH counsel, the committee members will decide whether there is sufficient evidence of possible scientific misconduct to recommend further investigation.

[Source: Added at 36 Ok Reg 1649, eff 9-13-19 ; Amended at 38 Ok Reg 1916, eff 9-11-21]

310:2-31-23. The inquiry report

- (a) **Elements of the inquiry report.** A written inquiry report will be provided to ORI in accordance with the requirements in 42 CFR Part 93.309.
- (b) **Comments on the draft report by the respondent and the whistleblower.** After first redacting the identity of the whistleblower, the RIO will provide the respondent with a copy of the redacted draft inquiry report for comment and rebuttal, and will provide the whistleblower, if he or she is identifiable, with portions of the draft inquiry report that address the whistleblower's role and opinions in the investigation.
- (c) **Receipt of comments.** Within fourteen (14), calendar days of their receipt of the draft report, the whistleblower and respondent will provide their comments, if any, to the inquiry committee. Any comments that the whistleblower or respondent submits on the draft report will become part of the final inquiry report and record. Based on the comments, the inquiry committee may revise the report as appropriate.

[Source: Added at 36 Ok Reg 1649, eff 9-13-19 ; Amended at 38 Ok Reg 1916, eff 9-11-21]

310:2-31-24. Inquiry decision, notification, and confidentiality

- (a) **Decision by DO.** The inquiry is completed when the DO makes a determination as to whether or not an investigation is justified. This determination will be made within sixty (60) days of the first meeting of the inquiry committee. Any extension of this period will be based on good

cause and recorded in the inquiry file.

(b) **Notification.** The RIO will notify both the respondent and the whistleblower in writing of the DO's decision of whether to proceed to an investigation. The RIO will also notify all appropriate institutional officials of the DO's decision.

(c) **Confidentiality.** A decision recommending further investigation pursuant to subsection (a) above shall be deemed to be confidential pursuant to 51 O.S. § 24A.12 and shall not be publicly disseminated beyond the persons identified in subsection (b) above.

[Source: Added at 36 Ok Reg 1649, eff 9-13-19 ; Amended at 38 Ok Reg 1916, eff 9-11-21]

310:2-31-25. Time limit for completing the inquiry report

The inquiry committee will normally complete the inquiry and submit its report in writing to the RIO no more than 60 calendar days following its first meeting, unless the RIO approves an extension for good cause. If the RIO approves an extension, the reason for the extension will be entered into the records of the case and the report. The respondent also will be notified of the extension.

[Source: Added at 36 Ok Reg 1649, eff 9-13-19]

310:2-31-26. Conducting the investigation

(a) **Purpose of the investigation.** The purpose of the investigation is to explore in detail the allegations, to examine the evidence in depth, and to determine specifically whether misconduct has been committed, by whom, and to what extent. The investigation will also determine whether there are additional instances of possible misconduct that would justify broadening the scope beyond the initial allegations. The findings of the investigation will be set forth in an investigation report.

(b) **Sequestration of the research records.** The RIO will immediately sequester any additional pertinent research records that were not previously sequestered during the inquiry.

(c) **Appointment of the Investigation Committee.** The RIO, in consultation with other OSDH officials as appropriate, will appoint an investigation committee and the committee chair within ten (10) days of the notification to the respondent that an investigation is planned or as soon as practicable. The makeup of the investigation committee will follow the same requirements outlined for the inquiry committee. Individuals appointed to the investigation committee may also have served on the inquiry committee. The RIO will notify the respondent of the proposed committee membership within five (5) days. If the respondent submits a written objection to any appointed member of the investigation committee or expert, the RIO will determine whether to replace the challenged member or expert with a qualified substitute.

(d) **Charge to the committee.** The RIO will define the subject matter of the investigation in a written charge to the committee that describes the allegations and related issues identified during the inquiry, defines scientific misconduct, and identifies the name of the respondent. The charge will state that the committee is to evaluate the evidence and

testimony of the respondent, whistleblower, and key witnesses to determine whether, based on a preponderance of the evidence, scientific misconduct occurred and, if so, to what extent, who was responsible, and its seriousness. During the investigation, if additional information becomes available that substantially changes the subject matter of the investigation or would suggest additional respondents, the committee will notify the RIO, who will determine whether it is necessary to notify the respondent of the new subject matter or to provide notice to additional respondents.

(e) **Investigation process.** The investigation committee will be appointed and the process initiated within 30 days of the completion of the inquiry and the determination that an investigation is warranted. The investigation will involve examination of all documentation including, but not necessarily limited to, relevant research records, computer files, proposals, manuscripts, publications, correspondence, memoranda, and notes of telephone calls. Whenever possible, the committee should interview the whistleblower(s), the respondents(s), and other individuals who might have information regarding aspects of the allegations. Interviews of the respondent should be tape recorded or transcribed. All other interviews should be transcribed, tape recorded, or summarized. Summaries or transcripts of the interviews should be prepared, provided to the interviewed party for comment or revision, and included as part of the investigatory file.

[Source: Added at 36 Ok Reg 1649, eff 9-13-19 ; Amended at 38 Ok Reg 1916, eff 9-11-21]

310:2-31-27. The investigation report

(a) **Elements of the investigation report.** The final report will be in accordance with the requirements in 42 C.F.R. Section 93.313 (Institutional investigation report).

(b) **Comments on the draft report.**

(1) **Respondent.** After first redacting the identity of the whistleblower, the RIO will provide the respondent with a copy of the redacted draft investigation report for comment and rebuttal. The respondent will be allowed five (5) days to review and comment on the draft report. The respondent's comments will be attached to the final report. The findings of the final report should take into account the respondent's comments in addition to all the other evidence.

(2) **Whistleblower.** The RIO will provide the whistleblower, if he or she is identifiable, with those portions of the draft investigation report that address the whistleblower's role and opinions in the investigation. The report should be modified, as appropriate, based on the whistleblower's comments.

(3) **Institutional counsel.** The draft investigation report will be transmitted to the institutional counsel for a review of its legal sufficiency.

(4) **Confidentiality.** In distributing the draft report, or portions thereof, to the respondent and whistleblower, the RIO will inform the recipient of the confidentiality under which the draft report is

made available and may establish reasonable conditions to ensure such confidentiality. The identity of the whistleblower will be subject to public disclosure only as the RIO may determine is reasonable and appropriate by balancing the needs of the whistleblower to remain confidential with the needs of the IRB to comply with federal regulations enacted to protect the rights and welfare of human research participants.

- (c) **Institutional review and decision.** Based on the evidence, the DO will make the final determination whether to accept the investigation report, its findings, and the recommended institutional actions. If this determination varies from that of the investigation committee, the DO will explain in detail the basis for rendering a decision different from that of the investigation committee in the institution's letter transmitting the report to ORI. The Deciding Official's explanation should be consistent with the PHS definition of scientific misconduct, the institution's policies and procedures, and the evidence reviewed and analyzed by the investigation committee. The DO may also return the report to the investigation committee with a request for further fact- finding or analysis. The DO's determination, together with the investigation committee's report, constitutes the final investigation report for purposes of ORI review. When a final decision on the case has been reached, the RIO will notify both the respondent and the whistleblower in writing. In addition, the DO will determine whether law enforcement agencies, professional societies, professional licensing boards, editors of journals in which falsified reports may have been published, collaborators of the respondent in the work, or other relevant parties should be notified of the outcome of the case. The RIO is responsible for ensuring compliance with all notification requirements of funding or sponsoring agencies.
- (d) **Transmittal of the final investigation report to ORI.** After comments have been received and the necessary changes have been made to the draft report, the investigation committee should transmit the final report with attachments, including the respondent's and whistleblower's comments, to the DO, through the RIO.
- (e) **Time limit for completing the investigation report.** An investigation should ordinarily be completed with submission to ORI within 120 days of its initiation, with the initiation being defined as the first meeting of the investigation committee.

[Source: Added at 36 Ok Reg 1649, eff 9-13-19 ; Amended at 38 Ok Reg 1916, eff 9-11-21]

310:2-31-28. Requirements for reporting to ORI

- (a) An institution's decision to initiate an investigation must be reported in writing to ORI, on or before the date the investigation begins. At a minimum, the notification should include the name of the person(s) against whom the allegations have been made, the general nature of the allegation as it relates to the PHS definition of scientific misconduct, and the PHS applications or grant number(s) involved. ORI must also be notified of the final outcome of the investigation and must be provided with a copy of the investigation report. Any significant variations from the provisions of the institutional policies and procedures should be

explained in any reports submitted to ORI.

(b) If an institution plans to terminate an inquiry or investigation for any reason without completing all relevant requirements of the PHS regulation, the RIO will submit a report of the planned termination to ORI, including a description of the reasons for the proposed termination.

(c) If the institution determines that it will not be able to complete the investigation in 120 days, the RIO will submit to ORI a written request for an extension that explains the delay, reports on the progress to date, estimates the date of completion of the report, and describes other necessary steps to be taken. If the request is granted, the RIO will file periodic progress reports as requested by the ORI.

(d) When PHS funding or applications for funding are involved and an admission of scientific misconduct is made, the RIO will contact ORI for consultation and advice. Normally, the individual making the admission will be asked to sign a statement attesting to the occurrence and extent of misconduct. When the case involves PHS funds, the institution cannot accept an admission of scientific misconduct as a basis for closing a case or not undertaking an investigation without prior approval from ORI.

(e) The RIO will notify ORI at any stage of the inquiry or investigation if:

- (1) there is an immediate health hazard involved;
 - (2) there is an immediate need to protect Federal funds or equipment;
 - (3) there is an immediate need to protect the interests of the person(s) making the allegations or of the individual(s) who is the subject of the allegations as well as his/her co-investigators and associates, if any;
 - (4) it is probable that the alleged incident is going to be reported publicly; or
 - (5) the allegation involves a public health sensitive issue; or
 - (6) there is a reasonable indication of possible criminal violation.
- In this instance, the institution must inform ORI within 24 hours of obtaining that information.

[Source: Added at 36 Ok Reg 1649, eff 9-13-19 ; Amended at 38 Ok Reg 1916, eff 9-11-21]

310:2-31-29. Institutional administrative actions

(a) OSDH will take appropriate administrative actions against individuals when an allegation of misconduct has been substantiated. If the DO determines that the alleged misconduct is substantiated by the findings, they will decide on the appropriate actions to be taken, after consultation with the RIO. The actions may include:

- (1) withdrawal or correction of all pending or published abstracts and papers emanating from the research where scientific misconduct was found.
- (2) removal of the responsible person from the particular project, letter of reprimand, special monitoring of future work, probation, suspension, salary reduction, or initiation of steps leading to possible rank reduction or termination of employment;
- (3) restitution of funds as appropriate.

(b) Termination of OSDH employment or resignation prior to completing inquiry or investigation. The termination of the respondent's institutional employment, by resignation or otherwise, before or after an allegation of possible scientific misconduct has been reported, will not preclude or terminate the misconduct procedures. If the respondent, without admitting to the misconduct, elects to resign his or her position prior to the initiation of an inquiry, but after an allegation has been reported, or during an inquiry or investigation, the inquiry or investigation will proceed. If the respondent refuses to participate in the process after resignation, the committee will use its best efforts to reach a conclusion concerning the allegations, noting in its report the respondent's failure to cooperate and its effect on the committee's review of all the evidence.

(c) Restoration of the respondent's reputation. If the institution finds no misconduct and ORI concurs, after consulting with the respondent, the RIO will undertake reasonable efforts to restore the respondent's reputation if necessary. Depending on the particular circumstances, the RIO should consider notifying those individuals aware of or involved in the investigation of the final outcome, publicizing the final outcome in forums in which the allegation of scientific misconduct was previously publicized, or expunging all reference to the scientific misconduct allegation from the respondent's personnel file. Any institutional actions to restore the respondent's reputation must first be approved by the DO.

(d) Protection of the whistleblower and others. Regardless of whether the institution or ORI determines that scientific misconduct occurred, the RIO will undertake reasonable efforts to protect whistleblowers who made allegations of scientific misconduct in good faith and others who cooperate in good faith with inquiries and investigations of such allegations. Upon completion of an investigation, the DO will determine, after consulting with the whistleblower, what steps, if any, are needed to restore the position or reputation of the whistleblower. The RIO is responsible for implementing any steps the DO approves. The RIO will also take appropriate steps during the inquiry and investigation to prevent any retaliation against the whistleblower.

(e) Allegations not made in good faith. If relevant, the DO will determine whether the whistleblower's allegations of scientific misconduct were made in good faith. If an allegation was not made in good faith, the DO will determine whether any administrative action should be taken against the whistleblower.

(f) Interim administrative actions. Institutional officials will take interim administrative actions, as appropriate, to protect Federal funds and ensure that the purposes of the Federal financial assistance are carried out.

[Source: Added at 36 Ok Reg 1649, eff 9-13-19 ; Amended at 38 Ok Reg 1916, eff 9-11-21]

310:2-31-30. Record retention

After completion of a case and all ensuing related actions, the RIO will prepare a complete file, including the records of any inquiry or investigation and copies of all documents and other materials furnished to the RIO or committees. The RIO will maintain and dispose of the

records of any inquiry or investigation in compliance with the approved records retention schedule for the office of the Commissioner. The ORI or other authorized DHHS personnel will be given access to the records upon request. These records are subject to public review or copying unless otherwise exempt from disclosure pursuant to the Oklahoma Open Records Act.

SUBCHAPTER 35. TANNING FACILITIES REQUIREMENTS

310:2-35-1. Purpose

This Chapter applies to tanning facilities and their owners or operators. The rules are to implement the provisions of 63 O.S. Section 7302.

[Source: Added at 36 Ok Reg 1649, eff 9-13-19]

310:2-35-2. Sign contents for entrances to tanning rooms or tanning establishments

(a) **Posting signage.** At least one (1) sign shall be posted in a place readily visible to persons entering a facility where a tanning device is operated. The sign shall be black text on white or other highly visible contrasting colors and include the language provide in 63 O.S. § 7302(C) in letters at least 1/2 inch high . The sign shall have dimensions not less than 8 ½ inches by 11 inches.

(b) Signs shall have the following statements:

- (1) It is unlawful for a tanning facility or operator to allow a person under eighteen (18) years of age to use any tanning device;
- (2) A tanning facility or operator that violates the provision shall be subject to a civil penalty;
- (3) An individual may report a violation of one or more provisions to the local law enforcement agency; and
- (4) The health risks associated with tanning include, but are not limited to, skin cancer, premature aging of skin, burns to the skin, and adverse reactions to certain medications foods, and cosmetics.

(c) **Placing Signs.** Signs shall be in place within 30 days of the effective date of these rules.

[Source: Added at 36 Ok Reg 1649, eff 9-13-19]

310:2-35-3. Unlawful act

It shall be unlawful for any person under eighteen (18) years of age to use any tanning device of any tanning facility in this state.

[Source: Added at 36 Ok Reg 1649, eff 9-13-19]

310:2-35-4. Signage

For any tanning facility, the owner, operator or lessee shall see that signage is posted as required in this Subchapter.

SUBCHAPTER 37. INITIAL DETERMINATION ON CRIMINAL HISTORY AS A DISQUALIFICATION FOR LICENSE OR CERTIFICATION

310:2-37-1. Purpose

These rules implement Section 4000.1 of Title 59 (2019) of the Oklahoma Statutes relating to processes to request an initial determination of whether an applicant's criminal history record would potentially disqualify him or her from obtaining an occupational license or certification. This process shall apply to all occupational licenses, permits or certifications issued by the Oklahoma State Department of Health.

[Source: Added at 37 Ok Reg 1354, eff 9-11-20]

310:2-37-2. Requesting a determination

The process for requesting a determination of whether an applicant's criminal history record would potentially disqualify him or her from obtaining an occupational license, permit or certification is defined in the Oklahoma Statutes at Title 59, Section 4000.1.

[Source: Added at 37 Ok Reg 1354, eff 9-11-20]

310:2-37-3. Fee

The fee for requesting a determination of whether an applicant's criminal history record would potentially disqualify him or her from obtaining an occupational license, permit or certification is forty-five dollars (\$45.00) for each initial determination.

[Source: Added at 37 Ok Reg 1354, eff 9-11-20]

SUBCHAPTER 39. MILITARY RECIPROCITY LICENSURE

310:2-39-1. Purpose

These rules implement Section 4100.8 of Title 59 (2019) of the Oklahoma Statutes relating to processes to request *an expedited*

temporary, reciprocal or comity license or certification for their currently held valid license or certification. This process shall apply to all occupational licenses, permits or certifications issued by the Oklahoma State Department of Health.

[Source: Added at 37 Ok Reg 1354, eff 9-11-20]

310:2-39-2. Requesting a temporary, reciprocal or comity license

Active duty military personnel and their spouses seeking a temporary, reciprocal or comity license shall complete an application as established by the occupational program and shall provide satisfactory evidence of equivalent education, training and experience from another state program. The Department shall evaluate an applicant's *education, training and experience in the manner most favorable toward satisfying the qualifications for issuance of the requested license or certification in this state* [59 O.S. 4100.8(B)].

[Source: Added at 37 Ok Reg 1354, eff 9-11-20]

310:2-39-3. Fee

Pursuant to Title 59 O.S. 4100.8(D), there will be no application fee for a temporary, reciprocal or comity license for active duty military personnel and the license or certification fee for the first period of issuance is waived.

[Source: Added at 37 Ok Reg 1354, eff 9-11-20]

310:2-39-4. Appeals

Pursuant to Title 59 O.S. 4100.8(C), any active duty military applicant, and their spouses, receiving a notice of denial of full licensure or certification shall have the right *to obtain and submit the documentation required to complete full license or certificate requirements in this state* or to appeal the denial determination pursuant to the Administrative Procedures Act [75 O.S. 250 et seq.] and OAC 310:2-21, relating to Department procedure governing individual proceedings.

CHAPTER 4. CERTIFICATE OF NEED REGULATIONS

[**Authority:** 63 O.S., §§ 1-104, 1-850 et seq., and 1-880.1 et seq.; 75 O.S., §§ 250 et seq.]
[**Source:** Codified 12-31-91]

SUBCHAPTER 1. GENERAL

310:4-1-1. Purpose

The purpose of this Chapter is to implement the following laws:

- (1) Title 63 O.S. Sections 1-850 et seq., (Long-term Care Certificate of Need Act);
- (2) Title 63 O.S. Sections 1-880.1 et seq., (Psychiatric and Chemical Dependency Facility Certificate of Need Act); and
- (3) Title 75 O.S. Sections 250.1 through 323, (Administrative Procedures Act).

310:4-1-2. Applicability and burden of proof

(a) This Chapter applies to the following types of Certificate of Need applications that are reviewed by the State Commissioner of Health (Commissioner) or the State Department of Health (Department):

- (1) long-term care facilities as defined in 63 O.S. Section 1-851.1;
- (2) psychiatric or chemical dependency facilities, services or units developed or offered in hospitals or related institutions as defined in 63 O.S. Sections 1-701 et seq.;
- (3) Intermediate Care Facility/Individuals with Intellectual Disabilities (ICF/IID) beds and that is in a facility that has more than 16s and subject to 63 O.S. Sections 1-850 et seq.; and
- (4) Licensed nursing facility (LNF) beds as defined in 63 O.S. Sections 1-1901 et seq. (Nursing Home Care Act), excluding any facility certified for service to individuals with intellectual disabilities.

(b) The applicant has the burden of proof to demonstrate compliance with all rules and conformance with all applicable standards stated in this Chapter.

[**Source:** Amended at 10 Ok Reg 3437, eff 7-1-93 (emergency); Amended at 11 Ok Reg 2609, eff 6-25-94 ; Amended at 12 Ok Reg 3025, eff 7-27-95 ; Revoked at 14 Ok Reg 2247, eff 6-12-97]

310:4-1-5. Review process

This Section governs the review of Certificate of Need applications.

(1) **Capital Cost.** For purposes of determining filing fees, capital cost means one or more of the following:

(A) For construction, the total cost of the project includes the following components as applicable:

- (i) land acquisition and site development;
- (ii) soil survey and investigation ;
- (iii) construction ;
- (iv) equipment ;
- (v) architect fees ;
- (vi) engineering fees ;
- (vii) supervision ;
- (viii) performance and payment bonds ;
- (ix) contingency ; and
- (x) inflation factor.

(B) For acquisition by purchase, the total cost of the project is the greater of the building and equipment's current book value or total contract price, including any exchanges or other consideration.

(C) For acquisition by lease, the total cost of the project is the current book value of the facility to be leased plus any additional capital expenditures, such as equipment purchases.

(D) For a sale and leaseback, or a combination lease and purchase, the total cost of the project is the greater of the purchase cost or the facility's current book value.

(E) For a non-monetary transfer of stock, the total capital cost of the project is zero dollars (\$0).

(F) For a transfer of stock in which one party pays or exchanges other consideration to acquire the stock of another party, the total cost of the project is the greater of the value of the consideration given for the stock or the facility's book value on the seller's books.

(G) For a management contract the capital cost is zero dollars (\$0), if it includes none of the following:

- (i) purchase;
- (ii) lease ;
- (iii) donation ;
- (iv) transfer of stock ;
- (v) corporate merger ;and
- (vi) assignment or foreclosure of building, equipment or other assets.

(H) For any other type of project, the project cost is the greater of the book value or the fair market value of the assets required to accomplish the project. This includes but is not limited to an addition of beds through conversion of a previously constructed physical plant,.

(I) For any type of project in which book value is used to establish the capital cost, the book value is based on

audited financial statements or upon generally accepted accounting principles.

(2) **Applicant.** The applicant for a Certificate of Need must include:

(A) for a long-term care facility:

- (i) the person or entity that is or will be the owner, as defined in 63 O.S. Section 1-1902;
- (ii) the person or entity that is or will be the licensee, as defined in 63 O.S. Section 1-1902;
- (iii) the person or entity that is or will be the manager as defined in OAC 310:675-1-2; and
- (iv) any person with a controlling interest as defined in 63 O.S. Section 1-851.1; or

(B) for a hospital, the entity operating the hospital as defined in OAC 310:667-1-3.

(3) **Application fees and refunds.** The applicant must use the Department's form and pay the appropriate filing fee to the Department.

(A) The following fees are required to be submitted in accordance with 63 O.S. Section 1-852.1.

- (i) the application fee for a new Certificate of Need is three thousand dollars (\$3,000.00); and
- (ii) an application for acquisition of healthcare facility fee is one half of one percent (.50%) of the capital cost of the project with a maximum fee of five thousand dollars (\$5,000.00).

(B) The Psychiatric and Chemical Dependency Facility Certificate of Need Act's application fee is three-fourths of one percent (.75%) of the capital cost of the project, with a minimum of One Thousand Five Hundred Dollars (\$1,500.00) and a maximum of Ten Thousand Dollars (\$10,000.00).

(C) If an application is withdrawn before the Department approves or denies the application, one of the following refunds will apply:

- (i) The refund is seventy five percent (75%) of the fee paid when an application is withdrawn before the Department determines if the application is complete or incomplete.
- (ii) The refund is fifty percent (50%) of the fee paid when an application is withdrawn before the "participation by parties" deadline, as defined in subparagraph (6) of this subsection.
- (iii) The refund is twenty five percent (25%) of the fee paid when an application is withdrawn before the Commissioner issues a final decision.

(D) The applicant's refund, in accordance with subparagraph (3)(C) of this subsection will not cause the total fee paid by the applicant to be less than the applicable minimum fee set in 63 O.S. Section 1-852.1 or subparagraph (3)(B) of this subsection.

(4) Completing the application.

(A) Within fifteen (15) days after the application is filed, the Department must determine if the application is complete, clear, consistent and accurate.

(B) When the Department determines an application is incomplete, it will send the applicant written notice requesting the additional or clarifying information needed to complete the application.

(C) The applicant must submit all requested information to the Department within 90 days after the date of the notice of incomplete application. If the applicant fails to do so, then the application is summarily dismissed.

(D) The Department's finding of completeness does not prevent the Department from subsequently denying a Certificate of Need based on such incompleteness, lack of clarity, inconsistency, or inaccuracy that may be discovered by the Department as the result of the investigation conducted pursuant to 63 O.S. Section 1-852 or 63 O.S. Section 1-880.6.

(5) Notice of readiness for review. When the Department determines that an application is complete and ready for review, it will send the following notices:

(A) mail the applicant notification that the application is determined complete and ready for review.

(B) mail health care facilities that provide the same type of service in the service area notification that an application is complete and ready for review.

(C) publish notice in a newspaper of general circulation near the facility, and in a newspaper of general circulation in the area where the application is available for inspection.

(D) These notices must include:

(i) the name and location of the facility,

(ii) a brief description of the project,

(iii) information on where the full application can be viewed, and

(iv) an explanation of how parties may participate in the review.

(6) Participation by parties. Any person or agency may participate in the review process. Any evidence or argument that a participating party proposes to have the Commissioner consider before making a final decision shall be submitted to the Department in writing within twenty (20) days after the date of publication of the paid public notice as described in subparagraph (5) (C) of this subsection.

(7) Decision deadlines.

(A) The decision to approve or deny a Certificate of Need for acquisition of a psychiatric or chemical dependency facility is made within fifteen (15) days after the deadline for submitting evidence and argument as provided in subparagraph (6) of this subsection.

(B) The decision to approve or deny any other type of Certificate of Need application, except the Certificate of Need listed in subparagraph (7)(A) of this subsection, is made within forty-five (45) days after the deadline for submitting evidence and argument as provided in subparagraph (6) of this subsection.

(8) Report of investigation.

(A) If the Department's investigation indicates that the application is inconsistent with applicable criteria and standards, then the Department will notify the applicant in writing of the inconsistencies before the decision deadline stated in paragraph (7) of this subsection.

(B) The applicant shall be offered an opportunity to respond in writing to the Department's notice. To allow the applicant sufficient time to respond, the decision deadline may be extended to a date certain by agreement between the Department and the applicant.

(C) On receipt of the applicant's response, the Department may amend the investigation report but is not required to offer the applicant a second opportunity to respond.

(D) The Commissioner will consider the applicant's response when making a decision on the Certificate of Need application.

(E) The provisions of this subsection do not apply if any person has knowingly given false, misleading, or intentionally incomplete information in the application.

310:4-1-7. Conduct of public hearings [REVOKED]

[Source: Revoked at 14 Ok Reg 2247, eff 6-12-97]

310:4-1-7.1. Applicant's holdings and history

During the investigation under 63 O.S. Section 1-852(G) and findings under 63 O.S. Section 1-853(D), the Department and the Commissioner will consider the following:

(1) If the licensee has not established a record of performance in long-term care facility operations in the State of Oklahoma for at least sixty (60) months immediately preceding the filing of the application, then the Department and the Commissioner will investigate and make required findings on the holdings and long-term care facility operations of each person with a controlling interest. In determining the relevance of prior holdings and

operations, the Commissioner will consider whether the person as an individual:

- (A) has authority to adopt or substantially influence governing policies that affect the financial performance or quality of care of the proposed facility for which a Certificate of Need has been applied; and
 - (B) had authority to adopt or substantially influence governing policies that affected the financial performance or quality of care of the prior holding or operation.
- (2) A history of noncompliance as defined in 63 O.S. Section 1-851.1(6).

[Source: Added at 14 Ok Reg 2247, eff 6-12-97 ; Amended at 18 Ok Reg 2468, eff 6-25-01 ; Amended at 22 Ok Reg 2363, eff 7-11-05 ; Amended at 38 Ok Reg 1929, eff 9-11-21]

310:4-1-8. Reconsideration of decision

The applicant or any party may request reconsideration of the Commissioner's decision to issue or deny a Certificate of Need.

(1) **Filing a request.** The request for reconsideration must be written and received by the Department within the applicable time frame specified in 63 O.S. Sections 1-853 and 1-880.7. The request must demonstrate conformity to at least one (1) of the grounds for a reconsideration hearing specified in 75 O.S. Section 317 of the Administrative Procedures Act.

(2) **Determining good cause.** Within ten (10) days after receipt of the request, the Commissioner will approve or deny the request for reconsideration, based on whether or not the request has shown good cause for reconsideration.

(A) If good cause is not shown, the Commissioner will notify the applicant and other parties of this fact. No further action will be taken by the Commissioner.

(B) If the Commissioner does find good cause for reconsideration, the Commissioner will notify the applicant and other parties, and schedule a public hearing.

[Source: Amended at 14 Ok Reg 2247, eff 6-12-97 ; Amended at 18 Ok Reg 2468, eff 6-25-01 ; Amended at 38 Ok Reg 1929, eff 9-11-21]

310:4-1-9. Judicial review [REVOKED]

[Source: Revoked at 14 Ok Reg 2247, eff 6-12-97]

310:4-1-10. Ex parte contacts

Applicants and other parties must not attempt to discuss the merits of a particular case with the Commissioner or the hearing officer except during a preliminary conference or public hearing. Contacts concerning Certificate of Need projects may be directed to the Department staff.

(1) **Procedure.** If the Commissioner or hearing officer is a party to a discussion on the merits of a particular case, then they must document the contact in writing in the record of the case with the

names of the parties and the essence of the conversation.

(2) **Penalty.** Any party who attempts to make an improper ex parte communication with the Commissioner or the hearing officer may be disqualified from further participation in the review of the case.

[Source: Amended at 14 Ok Reg 2247, eff 6-12-97 ; Amended at 38 Ok Reg 1929, eff 9-11-21]

310:4-1-11. Effectiveness of issued Certificates of Need

A Certificate of Need can only be issued to the person who applied for the Certificate. A Certificate of Need cannot be transferred in whole or part to another person. Any transfer of a Certificate of Need renders the certificate invalid.

(1) The process for reviewing a plan cannot exceed twelve (12) months from preliminary or initial plan submittal to the Department's approval. If the applicant's submitted plan does not satisfy requirements to receive approval within twelve (12) months, then the Certificate of Need is void. The review process is as follows:

(A) Preliminary plans and outline specifications must be submitted to the Department within six (6) months after approval of a Certificate of Need. The plans and specifications must include sufficient information to establish the following:

- (i) scope of project;
- (ii) project location;
- (iii) required fire-safety and exiting criteria;
- (iv) building-construction type, compartmentation showing fire and smoke barriers, bed count and services; and
- (v) the assignment of all spaces, areas, and rooms for each floor level, including the basement.

(B) A proposed construction document must be submitted and include final drawings and specifications adequate for proposed contract purposes. All final plans and specifications must be appropriately sealed and signed by an architect registered by the State of Oklahoma. All construction modifications of approved documents are subject to review and approval, and must be submitted timely.

(C) All construction project submittals must be reviewed and approved or disapproved within 30 calendar days after receipt by the Department.

(2) Commencement of construction for a new or relocated facility, or for an addition to an existing facility, is evidenced by the following:

- (A) a building permit, if one is required by local government;
- (B) proof of excavations for foundations, footings or pilings; and

(C) proof of an incurred financial obligation in the form of an invoice for the excavation work, dated not later than the required construction start date.

(3) For a new or relocated facility, the Department and applicant or applicant's representative, will visit the new or relocated facility site together. The applicant shall agree to be present or represented at the visit.

(4) For a construction project that does not involve the addition of space, the start of construction is demonstrated with a building permit, if one is required locally, and an invoice for construction work done at the facility.

(5) Completion of a facility structure or modification must include at least the completion of exterior walls, all interior load-bearing members, and the facility roof. The Department will visit the facility site within fifteen (15) working days after receiving a written request from the applicant to confirm the completion of the structure.

[Source: Amended at 14 Ok Reg 2247, eff 6-12-97 ; Amended at 19 Ok Reg 2042, eff 6-27-02 ; Amended at 20 Ok Reg 2352, eff 7-11-03 ; Amended at 38 Ok Reg 1929, eff 9-11-21]

310:4-1-12. Penalties

(a) No person may acquire, establish, construct, expand, or begin to acquire, establish, construct or expand a covered health care facility unless that person has first obtained a required Certificate of Need or an exemption from review.

(b) Any person who engages in a reviewable activity without first having obtained a Certificate of Need is subject to an administrative penalty of not less than One Hundred Dollars (\$100.00) and not more than Five Hundred Dollars (\$500.00).

(c) Each day the person continues a reviewable activity without a Certificate of Need to acquire, establish, construct, or expand the health care facility service is treated as a separate offense, and additional fines may be imposed.

(d) An administrative penalty may also be imposed through an order by the Department after notice and opportunity for hearing as required in the Administrative Procedures Act.

[Source: Amended at 18 Ok Reg 2468, eff 6-25-01 ; Amended at 38 Ok Reg 1929, eff 9-11-21]

310:4-1-13. Description of application forms

(a) **Standard Application.** The standard application for a Certificate of Need requires the following:

- (1) The names and addresses of the facility and contact person;
- (2) Disclosure of the applicant's identity and information sufficient for the Department to determine whether *the applicant has been convicted of a felony criminal offense related to the operation or management of a long-term care facility* [63:1-853(D)(2)(d)], including but not limited to:

(A) Sworn and notarized statements confirming the lack of any such conviction from the applicant and each person

with controlling interest;

(B) Social security numbers for the applicant and each person with a controlling interest;

(C) Birth dates for the applicant and each person with a controlling interest;

(D) Copies of certificates of incorporation, bylaws, articles of organization, company operating agreements, certificates of limited partnership, or equivalent documents maintained pursuant to state or federal law, and any amendments of such documents. In lieu of submitting a document that is not a public record previously filed with a local, state or federal government agency, an applicant may submit a sworn and notarized statement that includes all of the following information:

(i) Name and date of the document;

(ii) Name and address of each person or entity that has current or proposed interests, responsibilities or participation in the ownership, operation or management of the facility or that otherwise makes or influences any decision relating to expenditures or operations affecting the facility, whether the person or entity is identified in the disclosed document by proper name or by function;

(iii) Description of the interest, responsibility, and nature of participation of each person and entity named pursuant to (a)(2)(D)(ii) of this Section; and

(iv) Location, address, and telephone number of the place of business in Oklahoma where the applicant will make the documents available for inspection by the Department, upon the Department's written request;

(3) Historical operating and financial information for the applicant and the facility;

(4) Residents council and family council minutes for the applicant's facilities;

(5) A detailed description of the project;

(6) Projections of personnel needs and identification of the medical director;

(7) Construction and building information;

(8) Justification of need for the project; and

(9) Data and projections on financial and economic feasibility, including but not limited to the following as applicable:

(A) For conventional, bank, seller-carried, third party, or bond financing, a statement of the proposed principal amount, interest rate and repayment terms, and that the applicant has access to the required funds, signed under oath by a representative of the lending institution, seller, third party, or authority;

(B) For equity financing:

(i) An attested balance sheet for the applicant that is dated within the past twelve (12) months that

reflects cash or cash equivalents sufficient to fund the project; or

(ii) A certificate of deposit or other proof that funds are available and have not been pledged for another purpose.

(C) For financing or other funding from or guaranteed by a third party that is not duly authorized or chartered as a bank:

(i) An attested balance sheet, certificate of deposit or other attested proof that is dated within the past twelve (12) months for the third party, unless the third party is a licensed insurer or surplus lines insurer, the United States of America, a state of the United States of America, or an agency or instrumentality thereof; and

(ii) Copies of organizational documents and contracts necessary to substantiate the relationship between the applicant and the third party.

(b) Exemption for ten (10) beds or ten percent (10%) expansion.

The Certificate of Need application for exemption for a ten (10) bed or ten percent (10%) expansion of a licensed nursing or specialized facility requires the following:

- (1) The names and addresses of the facility and contact person;
- (2) Disclosure of the applicant's identity;
- (3) Historical occupancy information for the facility;
- (4) The number and types of beds to be added; and
- (5) The projected capital cost.

(c) Facility replacement exemption. The Certificate of Need application for exemption for facility replacement requires the following:

- (1) The names and addresses of the facility and contact person;
- (2) Disclosure of the applicant's identity;
- (3) A detail of the number of beds to be replaced;
- (4) The projected capital cost;
- (5) A plan for future use of the facility to be replaced; and
- (6) The distance from the current and proposed sites and a map of the area.

(d) Facility acquisition. The Certificate of Need application for facility acquisition requires the following:

- (1) The names and addresses of the facility and contact person;
- (2) Disclosure of the applicant's identity and information sufficient for the Department to determine whether *the applicant has been convicted of a felony criminal offense related to the operation or management of a long-term care facility* [63:1-853(D)(2)(d)], and all items as fully described in paragraph (a)(2) of this Section.
- (3) A description of the proposed transaction and a copy of the contract or agreement;
- (4) A plan for operating the facility including identification of the medical director;
- (5) The projected capital cost;

- (6) Financial proof of the applicant's ability to complete the acquisition and to continue services and staffing; and
- (7) Residents council and family council minutes for the applicant's facilities.

(e) **Notice of decrease of beds or change in continuum of care.** The Certificate of Need notice for a decrease of beds or a change in continuum of care at a psychiatric or chemical dependency treatment facility or unit requires the following:

- (1) The names and addresses of the facility and contact person;
- (2) A description of the change in beds or change in continuum of care; and
- (3) The anticipated date of the decrease or change.

(f) **Exemption for management agreement.** The Certificate of Need application for exemption of a management agreement requires the following:

- (1) The names and addresses of the facility, manager and contact person;
- (2) A copy of the executed management agreement that details the manager's responsibilities and duties;
- (3) Disclosure of the applicant's identity and experience that is sufficient to determine if the management entity and any person with a controlling interest has a history of noncompliance;
- (4) Copies of the business entity documents as described in paragraph (a)(2)(D) of this Section.
- (5) The anticipated date of commencement of the management agreement.

(g) **Exemption for ownership change or transfer.** The Certificate of Need application for exemption for ownership change or transfer requires the following:

- (1) The names and addresses of the facility and contact person; and
- (2) A description of the transfer and disclosure of persons and entities involved or affected;
- (3) Copies of agreements or contracts by which ownership is changed or transferred; and
- (4) Copies of the business entity documents as described in paragraph (a)(2)(D) of this Section.

(h) **Attest.** For the purpose of this Section, the term "attest" has the same meaning as it is defined in 59 O.S. Section 15.1A.

[Source: Added at 14 Ok Reg 2247, eff 6-12-97 ; Amended at 18 Ok Reg 2468, eff 6-25-01 ; Amended at 19 Ok Reg 2042, eff 6-27-02 ; Amended at 22 Ok Reg 2363, eff 7-11-05 ; Amended at 38 Ok Reg 1929, eff 9-11-21]

310:4-1-14. Confidentiality of records

Financial data submitted by an applicant for the purpose of obtaining a Certificate of Need is not considered a "record" as defined in Title 51 O.S. Section 24A.3, and is therefore not subject to public inspection, copying, or mechanical reproduction.

[Source: Added at 19 Ok Reg 2042, eff 6-27-02 ; Amended at 38 Ok Reg 1929, eff 9-11-21]

310:4-1-15. Management contract exemption [REVOKED]

SUBCHAPTER 3. STANDARDS FOR HEALTH CARE FACILITY ACQUISITIONS

310:4-3-1. Financial

The applicant must provide proof of sufficient financial resources to complete the acquisition and to maintain services and staffing that meet licensure standards for at least twelve (12) months following the acquisition.

(1) **Financial proof of acquisition.** Proof of sufficient financial resources to complete the acquisition must be provided in the following forms, as applicable:

(A) Conventional, bank, seller-carried, third party, or bond financing, see 310:4-1-13(a)(9)(A);

(B) Equity financing, see 310:4-1-13 (a)(9)(B); and

(C) Financing or other funding from or guaranteed by a third party that is not duly authorized or chartered as a bank, see 310:4-1-13(a)(9)(C).

(2) **Projected budget.** Each application must include a projected budget of revenues and expenses for the first 12 months of operation of the facility after the anticipated issuance of the Certificate of Need. The Department may require the applicant to justify the difference between the applicant's projected budget and the facility's expenses and revenues as reported to the Oklahoma Health Care Authority pursuant to 56 O.S. Section 2002 or OAC 317:30-5.

(3) **Balance sheets.** All balance sheets must include a release authorizing the Department to verify the financial information submitted in the Certificate of Need application. The Department may make independent inquiry into the financial condition of the applicant.

(4) **Financial proof for services and staffing.** To ensure the maintenance of services and staffing, the applicant must prove the availability of reserves equivalent to the average monthly projected expenses, in addition to funds needed to complete the acquisition. The amount of the average monthly expenses is calculated based on a per-month average of the projected twelve (12) month budget of revenues and expenses submitted with the application. Proof of the availability of reserves must conform to the following:

(A) for reserves to be provided or maintained through letter of credit, line of credit, or conventional, bank or bond financing:

(i) a statement of the proposed principal amount, interest rate and repayment terms, and that the

- applicant has access to the required funds, signed under oath by a representative of the lending institution or authority;
 - (ii) a statement of provisions for terminating or rescinding a letter of credit or line of credit;
 - (B) for reserves to be maintained through the applicant's equity or net worth:
 - (i) an attested balance sheet that is dated within the past twelve (12) months for the acquiring party and that reflects cash or cash equivalents sufficient to meet the one-month reserves requirement; or
 - (ii) a certificate of deposit or other proof that funds are available and have not been pledged for some other purpose;
 - (C) for reserves to be funded or guaranteed by a third party that is not duly authorized or chartered as a bank:
 - (i) an attested balance sheet, certificate of deposit or other attested proof that is dated within the past twelve (12) months for the third party, unless the third party is a licensed insurer or surplus lines insurer, the United States of America, a state of the United States of America, or an agency or instrumentality thereof; and
 - (ii) copies of organizational documents and contracts necessary to substantiate the relationship between the applicant and the third party.
- (5) **Attested documents.** For the purpose of this Section, the term "attest" has the same meaning as it is defined in 59 O.S. Section 15.1A.

[Source: Added at 38 Ok Reg 1929, eff 9-11-21]

310:4-3-2. Staffing

The applicant must provide documentation that sufficient personnel will be retained or employed to meet the needs of all residents to comply with all requirements for state licensure and Medicare/Medicaid certification, if applicable. The documentation of staffing must include written statements from the administrator, the director of nursing, the pharmacist, and the medical director, indicating the intention to contract or accept employment with the applicant.

[Source: Added at 38 Ok Reg 1929, eff 9-11-21]

310:4-3-3. Experience

If the applicant has less than sixty (60) months experience in health care facility operation immediately preceding the filing of the application, the applicant must provide a plan that details how experienced and competent staffing and leadership will be responsible for the facility operations. The operational plan must include:

- (1) Organizational papers, bylaws, articles of incorporation, partnership agreements, business plans, or other documents which confirm the applicant's claims about the policies, rights, duties and responsibilities of the applicant and its principals;
- (2) Statements from the person or persons who will fill management or administrative staffing and leadership positions, including but not limited to the director of nursing, the medical director, the administrator, and the applicant's policy body, with said statements to specifying the minimum amount of time those persons will spend working at the facility; and
- (3) A statement from the applicant agreeing to advise the Department before any change in the staffing and leadership during the first six (6) months of operation after the acquisition is finalized; and
- (4) A statement from the applicant agreeing that any person added to or replacing another person in the staffing or leadership plan during the first six (6) months of operation will comply with 63 O.S. Section 1-853(D) and OAC 310:4-1-7.1.

[Source: Added at 38 Ok Reg 1929, eff 9-11-21]

310:4-3-4. Description of notice to residents and families

The form used to notify residents and families as required in 63 O.S. Section 1-852(I) requires the following information:

- (1) The name of the applicant;
- (2) The name and location of the facility to be acquired;
- (3) A brief explanation of the public's opportunity to participate in the review of the Certificate of Need application;
- (4) The location where and the times when the Certificate of Need application will be available for public inspection; and
- (5) The address and deadline for submitting written comments to the Department.

[Source: Added at 38 Ok Reg 1929, eff 9-11-21]

SUBCHAPTER 5. CERTIFICATE OF NEED STANDARDS FOR ICF/IID

310:4-5-1. Service area

For review purposes under the standards in this Subchapter 5, the service area for an Intermediate Care Facility/Individuals with Intellectual Disabilities (ICF/IID) is the service region or area, as designated by the State Department of Human Services, in which it is located or proposed for location. If an application for Certificate of Need is considered for a specialized ICF/IID facility for which only one or two facilities may be needed, or where no service area is designated, then the Department may treat the entire State as the service area.

[Source: Added at 38 Ok Reg 1929, eff 9-11-21]

310:4-5-2. Standards for ICF/IID

- (a) No new ICF/IID beds, except ICF/IID 16s and smaller, will be approved in the service area unless the total number of ICF/IID beds in the service area falls below the following standard: eighty four (84) ICF/IID beds per one hundred thousand (100,000) general population;
- (b) An application for ICF/IID beds will not be approved unless the applicant demonstrates familiarity with and understanding of certification standards for an ICF/IID, specified in 42 CFR Section 442.400, relating to Standards for Payment to Nursing Facilities and Intermediate Care Facilities for Individuals with Intellectual Disabilities.
- (c) The identity of the licensed administrator of the existing or proposed facility must be provided by the applicant as a prerequisite to issuance of a Certificate of Need.
- (d) No additional ICF/IID beds, whether proposed through construction or conversion of existing space, will be approved for any existing ICF/IID unless it has maintained an occupancy rate of at least ninety five percent (95%), based upon a calculation of occupancy reflected in the monthly average daily census reports of the Department of Human Services, or the Department, for the most recent six (6) month period for which official data is available when the application is filed.
- (e) Any ICF/IID beds approved, but not yet in place in the service area, must be included in the evaluation for determining bed need specified in subsection (a) of this Section.
- (f) Any existing ICF/IID that proposes an expansion of beds by conversion or construction and which has a record of questionable quality of care, as demonstrated through complaint investigation records, or other means, may be denied a Certificate of Need despite the conformity of the proposal to other standards delineated herein.
- (g) The Department will consider the relationship of a Certificate of Need application to any plan adopted by the Department of Human Services concerning the distribution and allocation of services for individuals with intellectual or developmental disabilities.

[Source: Added at 38 Ok Reg 1929, eff 9-11-21]

SUBCHAPTER 7. STANDARDS FOR LICENSED NURSING FACILITY BEDS

310:4-7-1. Service areas

(a) The service area for a Licensed Nursing Facility (LNF) is presumed to be a map mileage of fifteen (15) miles from the location of the facility, except that the service area is a radius of seven and one half (7.5) miles for any facility located in the corporate limits of Tulsa or Oklahoma City, and any municipality contiguous with boundaries of Tulsa or Oklahoma City.

- (1) The map mileage for LNFs is calculated based on the minimum distance on hard surface, all weather roads from LNF to LNF using the State Transportation Department Planning

Division's current official General Highway Map by County or City which provides sufficient detail for calculations of the distance between facilities.

(2) The calculation of the service area population includes population data for the cities and towns that fall within the service area, and an estimate of the service area population that does not live in area cities or towns. If detailed official population data is not available for a rural portion of the service area, the estimate of the rural population is a prorated share of the county's rural population based on the geographic size of the portion of the county which is included in the facility's service area.

(b) An applicant may define and describe a service area other than that presumed in (a) of this Section by showing through a clear and convincing demonstration one or more of the following:

(1) the facility is providing or will provide services exclusively to religious groups in which membership is restricted;

(2) the facility is responding or will respond to a regional, statewide or national population with special health service needs;

(3) the facility is or will be a qualified continuing care facility as such term is defined in Internal Revenue Code Section 7872(g)(4)(A) and is serving or will serve individuals who are residing or will reside in a separate independent living unit owned by the applicant;

(4) the facility is serving or will serve a rural area where residents must drive more than 30 minutes to reach adequate nursing facility services; or

(5) the facility is the nursing care component of a life care community.

[Source: Added at 38 Ok Reg 1929, eff 9-11-21]

310:4-7-2. Standards for LNF beds

(a) The applicant must demonstrate that existing licensed nursing facility beds are not and will not be adequate in the service area described in 310:4-7-1, based on the need of the population.

(1) The applicant must demonstrate that there are persons who need services in the area but are unable to obtain those services due to the inadequacy of existing LNF facilities in the area.

(2) The applicant must demonstrate the probable impact of the proposed beds on the ratio of LNF beds to the number of persons age seventy-five (75) and over statewide. The applicant must show that the proposed new beds likely will not cause the statewide ratio to exceed one hundred seventy-nine (179) beds per one thousand (1000) persons age seventy-five (75) and over, and that the project is consistent with the achievement of an optimal target ratio of one hundred fifty-two (152) beds per one thousand (1000) persons age seventy-five (75) and over.

(3) The applicant must demonstrate the probable impact of the proposed beds on the ratio of LNF beds to the number of persons age seventy-five (75) and over in the service area. The application cannot cause an excessive increase in the bed to population ratio of a service area. The determination of whether or not an increase is excessive is based on the percentage of increase a project will cause in an area's bed to population ratio, and on a comparison of the area's bed to population ratio against the statewide ratio.

(4) The most recent population data published at the time the application is filed must be used. The source of population projections for current and future years is based on year 2000 census data as published by the Oklahoma Department of Commerce.

(5) If the applicant proposes a special service area under 310:4-7-1, then the applicant must demonstrate that the target population will have access to the proposed services through public or private transportation.

(b) The applicant must demonstrate that alternative or substitute services are not and will not be available or are and will be inadequate to meet the needs of the population.

(1) An overall mean occupancy rate of eighty-five percent (85%) should be maintained in LNF beds in the service area described in OAC 310:4-7-1.

(A) This mean is based on data from all similarly-licensed facilities in the service area using monthly reports filed with the Department of Health, taking into consideration the following:

(i) any specialized facility for individuals with intellectual disabilities or intermediate care facility for individuals with intellectual disabilities in the area is excluded;

(ii) in the case of a nursing facility application, any hospital-based skilled nursing unit shown to serve a different health service need is excluded;

(iii) in the case of a hospital-based skilled nursing unit application, any nursing facility shown to serve a different health service need is excluded;

(iv) in the case of a facility demonstrating a special service area under OAC 310:4-7-1(b), each facility not shown to be adequate or appropriate to meet the needs of the facility's special population is excluded.

(B) The mean is calculated using data for the most recent six (6) month period reports are published by the Department of Health, as of the first day of the month during which an application is initially filed.

(i) Beds reserved for residents who were temporarily absent from facilities for hospitalization or other therapeutic purposes is considered to have been occupied.

(ii) The area bed capacity used to calculate the occupancy rate is reduced by the number of beds that are not available because rooms licensed for multiple occupants have been reserved for single occupants throughout the six (6) month period.

(C) In determining the service area's conformity to the occupancy goal specified in this subsection, the Department will investigate the causes for low-occupancy operation of other facilities in the service area. The Department must exclude such low-occupancy facility from the service area calculations if the facility has been in operation continuously under the current licensee for 24 or more months and:

(i) The facility's state license or federal certification during the sixty (60) months preceding the filing of the application has been revoked, rescinded, canceled, terminated, involuntarily suspended or refused renewal;

(ii) The facility has a history of noncompliance as defined in 63 O.S. Section 1-851.1(6); or

(iii) The facility has not complied with all lawful orders of suspension, temporary management, or administrative penalty issued by the Department, another state agency, or by the federal Health Care Financing Administration;

(iv) The facility's owner, operator, manager, or medical director has been convicted of a criminal offense related to the operation or management of a long-term care facility; or

(v) The facility has been assessed an administrative penalty above the level of deficiency with one or more of the following unfavorable factors:

(I) The administrative penalty included a citation of immediate jeopardy or actual harm to a resident;

(II) The circumstance cited in connection with a civil money penalty or other administrative penalty resulted in the death of a resident; or

(III) Multiple civil money penalties, denials of payment, or other administrative penalty have been assessed based on findings of substandard quality of care, actual harm, or potential for more than minimal harm, at the facility within the preceding sixty (60) months.

(2) The applicant must demonstrate that the proposed beds are needed in addition to any beds previously approved under the State Certificate of Need laws but not yet in operation in the service area.

- (3) The applicant's demonstration must include consideration of the adequacy of such alternative services as residential care facilities, eldercare, home health care, hospice, assisted living and adult day care.
- (c) The applicant must demonstrate adequate financial resources for the new or expanded long-term care services and for the continued operation thereof.
- (1) Reimbursement is structured to realistically provide for care and services to persons living in the service area.
 - (2) The proposed charges must be in line with the prevailing rate of similar institutions and services within the health service area.
 - (3) The projected utilization rates are sufficient to maintain cost-effectiveness.
 - (4) The projected cash flow must give the proposed project financial viability within three years.
 - (5) The relationship of the institution's assets to liabilities cannot be increased by the proposed project to the point of threatening the financial viability of the institution.
 - (6) The applicant must supply a cost/benefit analysis to justify the cost-effectiveness of the proposed project.
- (d) The applicant must demonstrate that sufficient personnel will be available to properly staff and operate the proposed new or expanded long-term care service.
- (1) A proposal to provide new or expanded long-term care service must provide assurances that the appropriate numbers and types of staff will be available to comply with licensure requirements.
 - (2) Professional and paraprofessional staffing of new or expanded long-term care services must not compromise the staffing of existing long-term care services.
 - (3) The applicant must disclose all current and prior experience in the operation of health care facilities, giving names of facilities, locations, and dates. If the applicant has less than sixty (60) months experience in health care facility operations immediately preceding the filing of the application, then the applicant must:
 - (A) Provide a plan that details how experienced and competent staffing and leadership, including but not limited to the director of nursing, the medical director, the administrator, and the applicant's policy body, will be placed in charge of facility operations; and
 - (B) Agree to advise the Department, before any change in the staffing and leadership during the first six (6) months of operation of the new or expanded facility.

[Source: Added at 38 Ok Reg 1929, eff 9-11-21]

SUBCHAPTER 9. STANDARDS FOR PSYCHIATRIC AND CHEMICAL DEPENDENCY SERVICE BEDS

310:4-9-1. Definitions

The following words or terms, when used in this subchapter, shall have the following meaning, unless the context clearly indicates otherwise:

"Appropriate transfer" means a transfer in which the transferring hospital or unit provides the required treatment within its capability which minimizes the risks to the person's life, health and safety and such risks that may relate to others; and, in which the receiving hospital or unit has available space and qualified personnel for the psychiatric or chemical dependency treatment of persons under eighteen (18) years of age, and has agreed to accept transfer of the patient and to provide the indicated treatment.

"Emergency" means the urgent need to admit a person under eighteen (18) years of age for psychiatric or chemical dependency treatment services due to the imminent threat to life, health and/or safety of the person to be admitted and/or others.

"Temporary" means the period of time, but not to exceed seventy-two (72) hours, from when a person under eighteen (18) years of age presents at the hospital for emergency psychiatric or chemical dependency treatment services in a bed ordinarily used for an adult until the earliest time as determined by the physician that the person can be transferred appropriately within the hospital to a bed that is certified for persons under eighteen (18) years of age, or to another hospital where such a bed is available, or the emergency ceases.

[Source: Added at 38 Ok Reg 1929, eff 9-11-21]

310:4-9-2. Service area

The service area for a psychiatric or chemical dependency application is the mental health service area in which the service will be located. The mental health service areas as most recently adopted by the Department of Mental Health and Substance Abuse Services are shown in Appendix A.

(1) **Alternative service areas.** The Department may consider an alternative service area if the applicant clearly demonstrates the applicability of a different service area, based on the following factors:

- (A) The availability or lack of practicing psychiatrists, psychologists, and other counseling or support personnel.
- (B) The existence of an underserved population large enough to support an adequately sized hospital-based and/or freestanding psychiatric or chemical dependency service.
- (C) The availability of appropriate community mental health services to ensure a continuum of treatment.

(2) **Determination of beds.** In determining the number and occupancy of existing beds in a service area, licensed beds from one of the three state hospitals is prorated to the service area based upon the service area population as a percentage of the population of the Hospital Service Region in which the service area is located. The Hospital Service Regions maintained by the Oklahoma Department of Mental Health and Substance Abuse

Services may be obtained from that state agency.

(3) **Excluded beds.** In determining the number and occupancy of existing beds in a service area, beds which are dedicated to Department of Corrections patients is excluded.

[Source: Added at 38 Ok Reg 1929, eff 9-11-21]

310:4-9-3. Population-based need

The applicant must demonstrate that existing psychiatric and chemical dependency service beds are not and will not be adequate to meet the needs in the service area described in 310:4-9-2.

(1) **Need.** The applicant must demonstrate that there are persons who need services in the area but are unable to obtain those services due to the inadequacy of existing psychiatric and chemical dependency service beds.

(2) **Impact.** The applicant must demonstrate the probable impact of the proposed beds on the ratio of psychiatric and chemical dependency beds to the population statewide. The statewide ratio must not exceed one hundred forty-five (145) beds per one hundred thousand (100,000) persons, while moving towards an optimal target ratio of one hundred seventeen (117) beds per one hundred thousand (100,000) persons.

(3) **Ratio.** The applicant must demonstrate the probable impact of the proposed beds on the ratio of psychiatric and chemical dependency beds to the population in the service area. The application cannot cause an excessive increase in the bed to population ratio of a service area. The determination of whether or not an increase is excessive is based on the percentage of increase a project will cause in an area's bed to population ratio, and on a comparison of the area's bed to population ratio against the statewide ratio.

(4) **Population projection.** The most recent published population figures are used for the application. The source of population projections for current and future years is based on year 2000 census data as published by the Oklahoma Department of Commerce.

(5) **Target population.** If the applicant proposes a special service area under 310:4-9-2, then the applicant must demonstrate that the target population will have access to the proposed services through public or private transportation.

[Source: Added at 38 Ok Reg 1929, eff 9-11-21]

310:4-9-4. Availability of alternative services

The applicant must demonstrate that alternative or substitute services are not and will not be available or are and will be inadequate to meet the needs of the population.

(1) **Alternatives.** The applicant's demonstration must include consideration of residential, halfway house, outpatient, day hospitalization, or other less restrictive care settings in the

service area.

(2) **Mean occupancy.** An overall mean occupancy rate of seventy-five percent (75%) must be maintained in psychiatric and chemical dependency beds in the service area described in 310:635-9-2, as a prerequisite to the approval of additional beds whether in new or existing facilities. This mean must be based upon data from all psychiatric and chemical dependency beds in the service area using month reports submitted to the Department. This mean must be calculated using data for the most recent six (6) month period for which reports are available as of the first day of the month during which an application is initially filed.

(3) **Outstanding beds.** The applicant must demonstrate that the proposed beds are needed in addition to any beds previously approved or exempted from review under the State Certificate of Need law but not yet in operation in the service area.

(4) **Availability.** The applicant must demonstrate the availability of appropriate linkages such as referral protocols or joint venture agreements with similar or complementary services.

[Source: Added at 38 Ok Reg 1929, eff 9-11-21]

310:4-9-5. Financial resources

(a) The applicant must demonstrate adequate financial resources for the new or expanded services and for the continued operation thereof.

(b) Sufficient capital must be available to initiate and operate the proposed project.

(c) Financial arrangements must be reasonable and secure.

(d) The project must be financially viable through three years beyond completion.

(e) Proposed charges must be in line with prevailing rates of similar institutions providing similar services in the general area.

[Source: Added at 38 Ok Reg 1929, eff 9-11-21]

310:4-9-6. Staffing

The applicant must demonstrate that sufficient personnel will be retained or employed to meet the needs of all residents and to comply with all requirements for licensure and/or certification, if applicable. That demonstration must include documentation of the availability or plans for recruitment of the following personnel as applicable to meet the program's needs.

(1) The medical administrator (supervisor) or treatment coordinator must be a psychiatrist in a psychiatric program, and may be an internist or family practice physician for chemical dependency programs. This person may be retained on contract, or used through referral for non-medical subacute programs. The number of medical administrators or treatment coordinators must be sufficient to meet program needs.

- (2) The Director/Administrator may be in lieu of or in addition to the medical administrator, subject to training and experience.
- (3) The numbers of case workers, family therapists, psychologists, and social workers must be adequate to meet the demands of the program design.
- (4) The activities assistant will organize and supervise occupational and recreational programming.
- (5) The applicant must provide for at least one R.N. on duty at all times, with additional R.N.s adequate to meet program needs.
- (6) Psychiatric technicians/mental health workers may be non-licensed staff in addition to licensed nursing staff, and the number corresponding with the intensity of illness to be treated.
- (7) Medical records clerks sufficient to meet program needs.
- (8) The applicant must provide an education specialist for school age patients.
- (9) Clerical and support staff sufficient to meet program needs.
- (10) Ancillary support personnel sufficient to meet program needs.

[Source: Added at 38 Ok Reg 1929, eff 9-11-21]

310:4-9-7. Other

- (a) A ten (10) bed psychiatric or chemical dependency unit is assumed to be the minimum size to sustain services and staffing for an acute care hospital based psychiatric or chemical dependency unit.
- (b) If coordination with a teaching or training program in the area is a part of the proposed project, the applicant must submit documentation of the participation by, and the probable impact on, health personnel teaching or training programs.

[Source: Added at 38 Ok Reg 1929, eff 9-11-21]

310:4-9-8. Temporary emergency admissions

(a) Any temporary emergency must be fully documented by the physician and the hospital to include:

- (1) an explanation of the emergency;
- (2) the services rendered to the patient;
- (3) an explanation of why an adult bed was used; and
- (4) the length of stay in the bed ordinarily used for an adult.

(b) A report on each admission under the provisions for temporary emergency must be made to the Department at the end of the month of such admission. The report must be on a form provided by the Department. The form includes:

- (1) length of stay;
- (2) discharge date;
- (3) diagnosis; and
- (4) patient record number.

(c) An admission in accordance with the rules governing temporary emergencies, when utilized and fully documented by the admitting physician and hospital, is not considered a violation of the act.

SUBCHAPTER 3. [RESERVED]

CHAPTER 9. HEALTH CARE INFORMATION

[**Authority:** 63 O.S., §§ 1-104 et seq. and 1-118]
[**Source:** Codified 6-25-99]

SUBCHAPTER 1. GENERAL PROVISIONS

310:9-1-1. Purpose

The purpose of this Chapter is to establish the rules for a uniform set of health care data as established by Section 1-117 of Title 63 of the Oklahoma Statutes.

[**Source:** Added at 16 Ok Reg 2451, eff 6-25-99]

310:9-1-2. Definitions

The following words and terms, when used in this Chapter, shall have the following meaning, unless the context clearly indicates otherwise:

"Ambulatory care data" means data elements required by the Department regarding persons treated by hospitals, free-standing ambulatory surgery centers, or other health care providers, for less than 24 hours.

"Ambulatory surgery center" means a hospital-based or free-standing center providing surgery with patient stays of less than 24 hours, licensed under 63 O.S. Section 2657 et seq.

"Custom Data Set" means a subset of the Public Use Data File developed by the Department on special request.

"Custom report" means a compilation or study developed by the Department on special request.

"Data element" means the specific information collected and recorded for the purpose of health care and health care service delivery. Data elements include information to identify the individual, the health care provider, the data supplier, the services provided, charges for service, payor source, medical diagnosis, medical treatment and other data as requested.

"Data file" means an electronic file containing data elements.

"Data submission manual" means a manual developed by the Department containing data elements required to be submitted by information providers.

"Data use agreement" means a document that must be submitted in order to obtain the public use data file or any anonymous patient-level data. The document assures the Department that the user will not attempt to identify or contact any person included in the data set.

"Department" means the Oklahoma State Department of Health.

"Direct Patient Identifiers" Data elements that directly identify a patient (e.g. name, SSN, etc).

"Division" means the Health Care Information Division of the Oklahoma State Department of Health.

"Facility" means hospital or ambulatory surgery center.

"Health care information system" means the system for receipt, collection, analysis, evaluation, processing, utilization and dissemination of health care data established and maintained by the Health Care Information Division pursuant to the Oklahoma Health Care Information System Act.

"Health care provider" means hospitals, nursing facilities, ambulatory surgery centers, and any other health care provider licensed or certified by the Department or any other state agency; doctors as defined in Section 725.2 of Title 59 of the Oklahoma Statutes; or physical therapists, physician assistants, pharmacists, nurses and home health care providers licensed pursuant to the laws of this state.

"Hospital" means a hospital licensed under 63 O.S. Section 1-704.

"Hospital discharge data" means data elements required by the Department regarding persons admitted to and discharged from a hospital.

"Identifying information" means information that could uniquely identify an individual.

"Information provider" means all health care providers and the third-party payor or public-supported provider as defined in Section 1-116 of Title 63 of the Oklahoma Statutes.

"Public use data file" means an electronic file for public use containing data elements from the hospital discharge or ambulatory surgery data file that do not directly or indirectly identify an individual or physician.

"Standard information provider report" means a compilation of data submitted by an information provider that is generated by the Division for the information provider.

"Standard report" means a compilation or study developed to display information on selected topics, published periodically.

"Third-party payor" means any entity, other than a purchaser, which is responsible for payment either to the purchaser or the health care provider for health care services rendered by the health care provider.

[Source: Added at 16 Ok Reg 2451, eff 6-25-99 ; Amended at 18 Ok Reg 2472, eff 6-25-01 ; Amended at 37 Ok Reg 3, eff 8-1-19 (emergency); Amended at 37 Ok Reg 1356, eff 9-11-20 ; Amended at 40 Ok Reg 1541, eff 9-11-23]

310:9-1-3. Fees and charges

(a) The fee for special reports shall be \$50.00 per staff hour for creating or generating reports.

(b) The fee for Public Use Data Files shall be as follows:

(1) *Most Current Two (2) Years/each:*

(A) Participating Hospitals \$ 0.00 - 1st copy at no charge

(B) Non-Profit/Research \$ 50.00

(C) For Profit/Commercial \$7,500.00 full data year or
\$0.030/rec + \$50/hr for custom datasets

(2) *Earlier Years/each:*

(A) Participating Hospitals \$ 0.00 - 1st copy at no charge

(B) Non-Profit/Research \$50.00

- (C) For Profit/Commercial \$3,750.00 full data year or \$0.015/rec + \$50/hr for custom datasets
- (c) The Department will accept cash, checks, or money orders for payment of fees. The check or money order must be made payable to the Oklahoma State Department of Health.

[Source: Added at 16 Ok Reg 2451, eff 6-25-99 ; Amended at 19 Ok Reg 376, eff 11-19-01 (emergency); Amended at 19 Ok Reg 2657, eff 7-11-02 ; Amended at 27 Ok Reg 2506, eff 7-25-10]

SUBCHAPTER 3. REQUIRED INFORMATION

310:9-3-1. Required information to be collected from information providers

- (a) The Department is required by law to collect the following types of information from information providers:
- (1) Financial information including, but not limited to, consumption of resources to provide services, reimbursement, costs of operation, revenues, assets, liabilities, fund balances, other income, rates, charges, units of service, wage and salary data;
 - (2) Service information including, but not limited to,
 - (A) occupancy, capacity, and special and ancillary services;
 - (B) Physician profiles in the aggregate by clinical specialties and nursing services;
 - (C) Discharge data, including but not limited to, completed discharge data sets or comparable information for each patient discharged from the facility after the effective date of this act; and
 - (D) Ambulatory care data including, but not limited to, provider-specific and encounter data.
- (b) The data elements to be submitted by information providers for hospital inpatient discharges include, but are not limited to the data elements defined in the current version of the National Uniform Bill
- (c) The data elements to be submitted by information providers for ambulatory surgery and emergency department patients include, but are not limited to the data elements defined in the current version of the National Uniform Bill and the CMS-1500
- (d) Data file formats that will be accepted include:
- (1) XML format as defined by the Division,
 - (2) Other formats agreed upon by OSDH and the data provider prior to submission.
- (e) Formats containing the appropriate fields without adhering to the appropriate format shall be considered unreadable and will be returned to the provider.

[Source: Added at 16 Ok Reg 2451, eff 6-25-99 ; Amended at 18 Ok Reg 2472, eff 6-25-01 ; Amended at 18 Ok Reg 3589, eff 8-22-01 (emergency); Amended at 19 Ok Reg 376, eff 11-19-01 (emergency); Amended at 19 Ok Reg 2657, eff 7-11-02 ; Amended at 26 Ok Reg 2000, eff 6-25-09 ; Amended at 37 Ok Reg 3, eff 8-1-19 (emergency); Amended at 37 Ok Reg 1356, eff 9-11-20]

310:9-3-2. Data files

(a) When a data file is received from an information provider, the Department will notify the facility acknowledging receipt of the data.

(b) As hospital discharge or ambulatory care data files are received by the Department, the data will be processed and checked for errors. This process will include error checking for out of range, or invalid data elements as specified in the data submission manual. Upon processing the submitted data file, the Department will send the information provider:

- (1) A standard information provider report developed from the provider's data; and
- (2) A list of errors in that information provider's data file and will request the information provider correct errors associated with their data within 30 days of receipt electronically to the Department.

[Source: Added at 16 Ok Reg 2451, eff 6-25-99 ; Amended at 18 Ok Reg 2472, eff 6-25-01 ; Amended at 37 Ok Reg 3, eff 8-1-19 (emergency); Amended at 37 Ok Reg 1356, eff 9-11-20]

310:9-3-3. Periodic schedule for submission of information

- (a) Hospital discharge data files must be submitted to the Department within 60 days after the end of each calendar quarter, beginning calendar year 2020.
- (b) Ambulatory surgery data files must be submitted to the Department within 60 days after the end of each calendar quarter, beginning with calendar year 2020.
- (c) Emergency department data files must be submitted to the Department within 45 days after the end of each month, beginning with calendar year 2020.
- (d) The Department may grant an extension on written request from the information provider on a case-by-case basis.

[Source: Added at 16 Ok Reg 2451, eff 6-25-99 ; Amended at 18 Ok Reg 2472, eff 6-25-01 ; Amended at 37 Ok Reg 3, eff 8-1-19 (emergency); Amended at 37 Ok Reg 1356, eff 9-11-20]

SUBCHAPTER 5. COLLECTION AND RELEASE OF INFORMATION

310:9-5-1. Confidentiality

(a) All information collected from any source will remain confidential and will not be public records as defined in the Open Records Act except as provided in 63 O.S. 1998 Supp. Section 1-119. Under no circumstances shall the information in the database or any records from which this database is maintained be used for any purpose other than the compilation of aggregate data or the creation of anonymous medical case histories for statistical reporting and data analysis. Prior to release of any information, all identifying information shall be removed which might directly or indirectly reveal the identity of any person. This information may not be released voluntarily or in response to any legal process

unless the Department is directed to release it by a court of competent jurisdiction, granted after application showing good cause.

(b) The Department will develop internal procedures to ensure the collection, analysis and dissemination of information is in compliance with all provisions of state and federal laws and regulations, including this Chapter.

(c) State agencies, boards and commissions are required to make information authorized under the Oklahoma Health Care Information System Act available to the Department without charge to the Department. Except as otherwise provided by the Health Care Information System Act, information which is required by state or federal law to be confidential will not be transferred to any entity by the Department unless a separate written agreement for such transfer has been executed by the Department with the state agency, board or commission.

[Source: Added at 16 Ok Reg 2451, eff 6-25-99]

310:9-5-2. Release and dissemination of information

After approval by the Department, aggregate compilations prepared for release or dissemination from the data collected shall be public record. However, reports prepared at the request of an individual information provider containing information concerning only its transactions, shall not be public record.

[Source: Added at 16 Ok Reg 2451, eff 6-25-99]

310:9-5-2.1. Public Use Data File

(a) The Department will annually make available for purchase a Public Use Data File(s) (PUDF) containing a calendar year of record level data with anonymous case files (i.e., direct patient identifiers removed).

(b) The hospital inpatient discharge data PUDF includes the following data elements:

- (1) Record Identifier (Synthetic)
- (2) Patient state of residence
- (3) Patient zip code
- (4) Patient county of residence
- (5) Patient gender
- (6) Patient race
- (7) Patient marital status
- (8) Patient age group
- (9) Hospital ID
- (10) Hospital Type
- (11) Admission year
- (12) Admission month
- (13) Admission day of week
- (14) Discharge year
- (15) Discharge month
- (16) Discharge day of week
- (17) Length of stay in days

- (18) Type and source of admission
- (19) Patient discharge status
- (20) Payer classification
- (21) Total charges
- (22) Diagnosis Related Group (DRG)
- (23) Major Disease Category (MDC)
- (24) Birth weight group
- (25) Admitting diagnosis
- (26) External cause of injury codes (E-code)
- (27) Principal diagnosis
- (28) Other diagnosis codes
- (29) Principal procedure code
- (30) Other procedure codes
- (31) Present upon Admission (POA)

(c) The hospital outpatient surgery data PUDF includes the following data elements:

- (1) Record Identifier (Synthetic)
- (2) Patient state of residence
- (3) Patient zip code
- (4) Patient county of residence
- (5) Patient gender
- (6) Patient race
- (7) Patient marital status
- (8) Patient age group
- (9) Hospital ID
- (10) Admission year
- (11) Admission month
- (12) Admission day of week
- (13) Admission hour
- (14) Discharge year
- (15) Discharge month
- (16) Discharge day of week
- (17) Discharge hour
- (18) Length of stay in days
- (19) Type and source of admission
- (20) Patient discharge status
- (21) Total charges
- (22) External cause of injury codes (E-code)
- (23) Principal diagnosis
- (24) Other diagnosis codes
- (25) Principal procedure CPT code
- (26) Other procedure CPT codes
- (27) Payer classification
- (28) Ambulatory payment classification (APC)

(d) The ambulatory surgery center data PUDF includes the following data elements:

- (1) Record Identifier (Synthetic)
- (2) Patient state of residence
- (3) Patient zip code
- (4) Patient county of residence
- (5) Patient gender

- (6) Patient race
- (7) Patient marital status
- (8) Patient age group
- (9) Facility ID
- (10) Admission year
- (11) Admission month
- (12) Admission day of week
- (13) Admission hour
- (14) Discharge year
- (15) Discharge month
- (16) Discharge day of week
- (17) Discharge hour
- (18) Length of stay in days
- (19) Total charges
- (20) Principal diagnosis
- (21) Other diagnosis codes
- (22) Principal procedure CPT code
- (23) Other procedure CPT codes
- (24) Payer Classification
- (25) Ambulatory payment classification (APC)

(e) The hospital emergency department data PUDF includes the following data elements:

- (1) Record Identifier (Synthetic)
- (2) Patient state of residence
- (3) Patient zip code
- (4) Patient county of residence
- (5) Patient gender
- (6) Patient race
- (7) Patient marital status
- (8) Patient age group
- (9) Hospital ID
- (10) Admission year
- (11) Admission month
- (12) Admission day of week
- (13) Admission hour
- (14) Discharge year
- (15) Discharge month
- (16) Discharge day of week
- (17) Discharge hour
- (18) Length of stay in days
- (19) Type and source of admission
- (20) Patient discharge status
- (21) Total charges
- (22) External cause of injury codes (E-code)
- (23) Principal diagnosis
- (24) Other diagnosis codes
- (25) Principal procedure CPT code
- (26) Other procedure CPT codes
- (27) Payer classification
- (28) Ambulatory payment classification (APC)

(f) Entities requesting the PUDF must sign and complete the Data Use Agreement. The completed Data Use Agreement must be included with the request.

[Source: Added at 18 Ok Reg 2472, eff 6-25-01 ; Amended at 19 Ok Reg 376, eff 11-19-01 (emergency); Amended at 19 Ok Reg 2657, eff 7-11-02 ; Amended at 26 Ok Reg 2000, eff 6-25-09 ; Amended at 26 Ok Reg 3001, eff 8-27-09 ; Amended at 37 Ok Reg 3, eff 8-1-19 (emergency); Amended at 37 Ok Reg 1356, eff 9-11-20]

310:9-5-2.2. Custom data sets

The Department will compile custom data sets (CDS) based on the data elements contained in the PUDF.

- (1) Requests for CDS must be made in writing to the Department using the Special Request Form.
- (2) Entities requesting custom data sets from the PUDF must sign and complete the Data Use Agreement. The signed Data Use Agreement must be included with the request.
- (3) The application fee must be received by the Department with the request.

310:9-5-3. Standard information provider reports [REVOKED]

[Source: Added at 16 Ok Reg 2451, eff 6-25-99 ; Revoked at 37 Ok Reg 3, eff 8-1-19 (emergency); Revoked at 37 Ok Reg 1356, eff 9-11-20]

310:9-5-4. Standard reports

- (a) The charge for standard reports will be reproduction costs that are based on the Department's fee schedule.
- (b) Standard reports may not be published or sold by another entity without written consent of the Department.
- (c) Standard reports will include, but are not limited to, aggregate information regarding:
 - (1) Patterns and trends in the health status of Oklahomans;
 - (2) Utilization, costs and outcomes; and
 - (3) Capacity of the various components of the health care industry to provide needed services.

[Source: Added at 16 Ok Reg 2451, eff 6-25-99]

310:9-5-5. Custom reports

- (a) Requests for custom reports are handled on a case-by-case basis. The Department reserves the right to refuse any request for a custom report that could threaten the confidentiality of an individual.
- (b) All custom reports, except reports prepared at the request of an individual information provider containing information concerning only its transactions, are public record.
- (c) Requests for custom reports must be made in writing to the Department using the Special Request Form.

- (d) Special reports may not be published or sold without written consent of the Department.
- (e) The application fee must be received by the Department with the request.

CHAPTER 15. CLINICAL TRIALS ON THE USE OF CANNABIDIOL

[**Authority:** 63 O.S., §§ 1 through 104; 63 O.S., §§ 2-801 through 2-805]
[**Source:** Codified 9-11-16]

SUBCHAPTER 1. PURPOSE AND DEFINITIONS

310:15-1-1. Purpose

The rules in this Chapter implement the Commissioner of Health's authorities established in Enrolled House Bill Number 2154, from the 1st Session of the 55th Oklahoma Legislature (2015) known as "Katie and Cayman's Law" and codified at 63 O.S. §§ 2-801 through 2-805.

[**Source:** Added at 33 Ok Reg 451, eff 1-13-16 (emergency); Added at 33 Ok Reg 1519, eff 9-11-16]

310:15-1-2. Definitions

The following words and terms, when used in this Chapter, shall have the following meaning, unless the context clearly indicates otherwise.

"Clinical Trial" means a trial at an academic medical center of the use of cannabidiol at an academic medical center on patients pursuant to the requirements of Katie and Cayman's Law, codified at 63 O.S. §§ 2-801 through 2-805.

"O.S." means Oklahoma Statute.

"Severe forms of epilepsy" means refractory epilepsy that is not adequately treated by traditional medical therapies, including Lennox-Gastaut Syndrome and Dravet Syndrome, also known as Severe Myoclonic Epilepsy of Infancy.

[**Source:** Added at 33 Ok Reg 451, eff 1-13-16 (emergency); Added at 33 Ok Reg 1519, eff 9-11-16 ; Amended at 34 Ok Reg 1275, eff 10-1-17]

SUBCHAPTER 3. PHYSICIAN APPLICATION AND REPORTING

310:15-3-1. Physician application

Any physician, who has been designated a principal investigator of a clinical trial concerning *Lennox-Gastaut Syndrome*, also known as *Severe Myoclonic Epilepsy of Infancy*; any other severe form of epilepsy not adequately treated by traditional medical therapies (63 O.S. § 2-101 (23)), or any other form of refractory epilepsy that is not adequately treated by traditional medical therapies, spasticity due to multiple sclerosis or due to paraplegia; intractable nausea and vomiting; or appetite stimulation with chronic wasting diseases (63 O.S. § 2-801 (5)) on individuals, and who requests approval from the Commissioner of Health, or designee shall:

- (1) Submit an application on a form provided by the Commissioner of Health, which shall include the name, address

- and other contact information for the principal investigator;
- (2) Submit a statement from either the Oklahoma State Board of Medical Licensure or the Oklahoma State Board of Osteopathic Examiners that the physician is licensed and in good standing with said licensure board;
- (3) Submit a copy of the documents from the United States Food and Drug Administration naming the physician as the principal investigator;
- (4) Submit a copy of the license obtained by the United States Drug Enforcement Administration;
- (5) Submit and maintain a current Oklahoma State Bureau of Narcotics and Dangerous Drugs Control registration;
- (6) Demonstrate registration with the Oklahoma State Bureau of Narcotics and Dangerous Drugs Control;
- (7) Submit the names, addresses and other contact information of any subinvestigators who will be assisting the principal investigator and include with the submission:
- (A) A copy of the license obtained by the United States Drug Enforcement Administration; and
 - (B) Information demonstrating registration of the subinvestigator with the Oklahoma State Bureau of Narcotics and Dangerous Drugs Control;
- (8) Submit the following information concerning the clinical trial to be performed:
- (A) Name, address and contact information of the academic medical center where the clinical trial will occur;
 - (B) Statement from Institutional Review Board (IRB) of the academic medical center where the clinical trial will occur, concurring with the requirements for said clinical trial;
 - (C) Statement from the United States Food and Drug Administration allowing cannabidiol to be used as a investigation new drug on qualified patients with severe forms of epilepsy;
 - (D) Name, address and other contact information of the source of the cannabidiol to be used for the study. The submission of the information of the source of the cannabidiol shall include:
 - (i) Information that the cannabidiol was manufactured at a facility in the United States or in a foreign country that was approved by the United States Food and Drug Administration; and
 - (ii) Information that the cannabidiol has been tested on animals to:
 - (I) demonstrate preliminary effectiveness; and
 - (II) ensure the cannabidiol is safe to administer to humans;
 - (E) Submit a statement that the clinical trial will be performed at the highest standards of clinical research; and

- (F) Submit a statement that the clinical trial will conclude no later than December 31, 2017;
- (9) Submit a statement that the principal investigator and all subinvestigators shall adhere to the rules and regulations established by the relevant Institutional Review Board for the clinical trial; and
- (10) Submit an attestation by the principal investigator as to the accuracy and completeness of the information provided in the application.

[Source: Added at 33 Ok Reg 451, eff 1-13-16 (emergency); Added at 33 Ok Reg 1519, eff 9-11-16 ; Amended at 34 Ok Reg 1275, eff 10-1-17]

310:15-3-2. Physician reporting

(a) Any physician approved by the Commissioner of Health or designee to perform a clinical trial, pursuant to this Chapter shall submit annual reports, and a final report, to the Commissioner of Health. The report shall include:

- (1) Data from the clinical trial; and
- (2) Summary of findings from the clinical trial.

(b) Any physician, approved by the Commissioner of Health or designee to perform a clinical trial pursuant to this Chapter shall immediately report to the Commissioner of Health and to the Director of the Oklahoma State Bureau of Narcotics and Dangerous Drugs Control any adverse outcomes or injuries to any subjects participating in the clinical trial.

CHAPTER 96. OKLAHOMA ADVANCE DIRECTIVE REGISTRY

[**Authority:** 63 O.S., §§ 1-104 and 3102.1]

[**Source:** Codified 7-25-10]

SUBCHAPTER 1. GENERAL PROVISIONS

310:96-1-1. Purpose

The purpose of this Chapter is to establish and maintain the Advance Directives Registry which shall be accessible through the OSDH website for the purpose of storing Advance Directives of individuals and regulating access to the Registry.

[**Source:** Added at 27 Ok Reg 2506, eff 7-25-10]

310:96-1-2. Definitions

When used in this Chapter, the following words or terms shall have the following meaning unless the context of the sentence requires another meaning:

"Registry" means the Oklahoma Advance Directive Registry

[**Source:** Added at 27 Ok Reg 2506, eff 7-25-10]

310:96-1-3. Fees [RESERVED]

[**Source:** Reserved at 27 Ok Reg 2506, eff 7-25-10]

SUBCHAPTER 3. SUBMISSION REQUIRMENTS

310:96-3-1. Advance Directive Forms

The Advance Directive Form submitted for initial filing or amendment in the Registry may be substantially in the format contained in Title 63 O.S. §3101.4 or in the format available on the Oklahoma State Department of Health Website.

[**Source:** Added at 27 Ok Reg 2506, eff 7-25-10]

310:96-3-2. Document format

The Advance Directive forms submitted for filing in the Registry shall be in a PDF (Portable Document Format) document.

[**Source:** Added at 27 Ok Reg 2506, eff 7-25-10]

SUBCHAPTER 5. RELEASE OF ADVANCE DIRECTIVES

310:96-5-1. Release of Advance Directives

Release of the Advance Directive form on file with the Registry shall be limited to the subject of the record or an individual authorized by the subject of the record as identified in the Registry or a health care provider treating the subject of the record.

CHAPTER 99. SECONDHAND TOBACCO SMOKE [EXPIRED]

Editor's Note: *On July 23, 2002, the District Court of the 24th Judicial District of the State of Oklahoma issued a Temporary Injunction prohibiting the Oklahoma State Department of Health from enforcing these emergency rules, which were approved by the Governor on June 26, 2002, with an effective date of July 1, 2002. [See Veterans of Foreign Wars, Post 1320 and Hoyaka, L.T.D. v. State of Oklahoma, Case No. CJ-02-705 (Creek County District Court, 7-23-02) (Temporary Injunction)] On July 14, 2003, the emergency rules expired without being superseded by permanent rules.*

CHAPTER 100. LICENSURE OF CREMATORIES [REVOKED]

Editor's Note: *Effective 11-1-01, the authority to "promulgate rules necessary for the licensing, inspection, and regulation of crematories" [63 O.S.2001, § 1-331.1 (Laws 2001, c. 75, § 3)] was transferred from the State Commissioner of Health to the Oklahoma State Board of Embalmers and Funeral Directors (name later changed to Oklahoma Funeral Board). The Funeral Board subsequently enacted a new rule at OAC 235:10-14-1 on 6-25-09, and the Department of Health later revoked its rules regulating crematories in this Chapter 100 on 9-12-14.*

CHAPTER 105. VITAL STATISTICS

[**Authority:** 63 O.S., §§ 1-104 and 1-301 et seq.]

[**Source:** Codified 12-31-91]

SUBCHAPTER 1. PURPOSE, FORMS, AND FEES

310:105-1-1. Purpose

The rules in this Chapter implement the provisions of Article 3 of the Public Health Code, pertaining to vital statistics.

310:105-1-2. Completion and filing of forms and records

(a) All certificates and records filed under the act and this Chapter shall be typewritten or legibly written in black, nonfading ink.

(b) All blanks and forms shall be prepared in accordance with instructions of the Commissioner of Health. No form or blank shall be considered complete and correct or acceptable for filing that:

- (1) Does not supply all of the items of information called for thereon, or satisfactorily account for their omission.
- (2) Contains alterations or erasures.
- (3) Does not contain genuine signatures.
- (4) Is marked "copy" or "duplicate".
- (5) Is a carbon copy.
- (6) Is prepared on an improper form.
- (7) Contains any data relative to the putative father of a child born out of wedlock without his written consent, or unless determined by a court of competent jurisdiction.

[**Source:** Amended at 17 Ok Reg 2924, eff 7-13-00]

310:105-1-3. Fees for Services, Identification requirements and Certified Copies

(a) Identification prescribed by the Department, shall be required for issuance of birth, death, and stillbirth certificates. Documentation is subject to verification with the issuing authority and shall include:

- (1) Government issued photographic identification; or
- (2) At least two alternative forms of identification; or
- (3) An alternative electronic process.

(b) Alternative forms may include, but are not limited to letters from government or social agencies; pay statement; utility bills; or other items prescribed by the Department.

(c) Delegation of personal legal powers to request or amend a birth certificate by an eligible applicant as established in 63 O.S. § 1-323, shall be on a form prescribed by the Department in order to protect the integrity of the records, ensure their proper use, and to efficiently administer the vital statistics system.

(d) Attestation to the identity of another person who is applying for his/her own record shall be on a form prescribed by the Department.

(e) Except as otherwise provided in law or regulation, the following schedule of fees is adopted for services provided, certified copies of Vital Records, or for a search of files when no copy is made:

(1) Search of files or issuance of one (1) certified copy if record is found:

(A) Birth Certificates - \$15.00; additional certified copies requested - \$15.00 per copy.

(B) Death Certificates - \$15.00; additional certified copies requested - \$15.00 per copy.

(2) Delayed Registration:

(A) Initial search of files - \$15.00

(B) Certified copies after establishment of delayed registration - \$40.00 (\$40.00 fee includes a \$25.00 processing fee and credit for initial \$15.00 search fee.)

(3) Birth record substitution:

(A) Adoptions:

(i) Search of records - \$15.00

(ii) Certified copy after substitution - \$40.00 (\$40.00 fee includes a \$25.00 processing fee and credit for initial \$15.00 search fee.)

(B) Legitimations:

(i) Search of records - \$15.00

(ii) Certified copy after substitution - \$40.00 (\$40.00 fee includes a \$25.00 processing fee and credit for initial \$15.00 search fee.)

(C) Certificate of Foreign Born:

(i) Search of records - \$15.00

(ii) Certified copy after preparation of and/or substitution of record - \$40.00 (\$40.00 fee includes \$25.00 processing fee and credit for initial \$15.00 search fee.)

(4) Amendments to Vital Records and Paternities:

(A) Initial search of birth records - \$15.00

(B) Certified copies of birth certificates after amended or paternity completed - \$40.00 (\$40.00 fee includes a \$25.00 processing fee and credit for initial \$15.00 search fee.)

Paternities which are submitted at the time of original filing by the hospital and meet all the requirements for filing are not subject to the amendment fee.

(C) Search of records and certified copies of amended death certificates - \$15.00.

(D) Certified copies of death certificates after amendment or correction completed - \$35.00 (\$35.00 fee includes a \$20.00 processing fee and credit for initial \$15.00 search fee) unless the requested amendment is to change the medical certification data. In this case, there is no amendment fee.

310:105-1-4. Waiver of fees

- (a) Upon the Governor's declaration of a natural disaster within Oklahoma, the Commissioner of Health may declare a waiver of the fee for death and birth certificates of the victims of the disaster.
- (b) Upon receipt of a written application and proper identification from a member of a state or federal law enforcement agency, authorized to investigate matters involving the public's safety, it shall be lawful for the division to issue verification of death at no cost to the agency.

[Source: Added at 16 Ok Reg 3486, eff 7-30-99 (emergency); Added at 17 Ok Reg 2034, eff 6-12-00 ; Amended at 19 Ok Reg 2056, eff 6-27-02]

310:105-1-5. Definitions

The following words or terms, when used in this Chapter, shall have the following meaning, unless the context clearly indicates otherwise:

"Delayed Registration" shall mean the registration of the birth of a person one year or more after the date of birth.

[Source: Added at 17 Ok Reg 2924, eff 7-13-00]

SUBCHAPTER 3. BIRTH REGISTRATION

310:105-3-1. Birth registration

(a) Every live birth which shall occur in this state shall be registered on a standard certificate of live birth and shall be filed with the local registrar of the district in which the birth occurred within seven (7) days after the date of birth.

(1) Data, other than that discussed in rule 105-3-3(b), omitted from the original certificate may be added to the original certificate by a supplementary report presented to the State Registrar not more than twelve (12) months after the date of birth. Certificates so completed shall not be considered "altered" or amended.

(2) If the mother was married at the time of conception or birth, the name of the husband shall be entered on the certificate as the father of the child unless paternity has been determined otherwise by a court of competent jurisdiction, in which case the name of the father as determined by the court shall be entered.

(3) If the mother was not married at the time of conception or birth, the name of the father shall not be entered on the certificate of birth without a sworn acknowledgment of paternity signed by the mother and the person to be named as the father, or a determination of paternity has been made by a court of competent jurisdiction, in which case the name of the father as determined by the court shall be entered. In such cases, the mother will sign the certificate attesting to the personal data as shown on the certificate as being true. When a certificate of birth is completed by the attendant to indicate the father's name in

accordance with the above provisions, the sworn acknowledgment of paternity or a certified copy of the court determination of paternity shall be attached to the certificate of birth and forwarded with the birth certificate to the state office of Vital Records, where such evidence will be placed in the permanent confidential files, sealed and subject to inspection only upon order of a court of competent jurisdiction.

(b) If either parent is unable due to physical limits absence or death, the health care facility shall type the name of the parent in the place of the actual signature.

[Source: Amended at 17 Ok Reg 2924, eff 7-13-00]

310:105-3-2. Delayed birth certificates

(a) **When delayed birth certificate required.** If a live birth is not registered before the person has reached or passed his first birthday, the birth shall be registered on the delayed certificate of birth form.

(b) **Facts to be established.** In filing a delayed registration of birth, the facts of the date and place of birth along with the parentage of birth shall be established.

(c) **Evidence required.**

(1) **Age one year to ten years.** For a registrant who has reached or passed his first birthday but has not reached his tenth birthday, the facts of birth shall be established by two records, one of which may be an affidavit signed by a parent or guardian and the other an affidavit signed by the health care provider. If the birth was not attended by a health care provider, a record of the birth made at or near the birth may be used as the second record to establish the facts of the birth. If no record of the birth can be produced, the Department shall investigate the facts of the birth before accepting the delayed birth certificate for registration.

(2) **Older than ten years.** For the registrant who has reached or passed his tenth birthday, the facts of birth shall be established by three (3) records, each from a different and independent source. To be acceptable as proof the records must have been made ten (10) years or more prior to the filing of the certificate, with the exception of the affidavit, and must contain information about the registrant to support the facts shown on the delayed certificate. An affidavit of personal knowledge may be used as one, but only one, of the three records of proof. All three records shall indicate the name of the registrant, the correct birth date or age of registrant, and at least two of the records shall reflect the birthplace of the registrant to be Oklahoma, and one of the records shall indicate the parentage as claimed by the registrant.

(3) **Signature.** The registrant or his parent, if a minor at the time of application, shall sign the affidavit on the face of the delayed birth certificate form before a Notary Public attesting to the authenticity of the information as set forth on the face of the form. In those instances where the registrant is unable to sign his name, he shall make his mark and two witnesses shall sign

verifying the same, all before a Notary Public.

(4) **Investigation.** The Commissioner may investigate the facts of any birth for which a delayed birth certificate is filed. No copies of the registration shall be made until the Commissioner is satisfied that the facts as listed in the registration can be adequately established.

(5) **Unacceptable application.** A delayed birth certificate form shall not be registered and no copies shall be issued when it is known that the registrant is deceased.

(6) **Fraudulent application.** At any time the State Commissioner of Health or the State Registrar of Vital Statistics finds that a delayed certificate of birth has been established by using fraudulent documents or affidavits, the Commissioner or State Registrar shall "void" such certificate by stamping the face of said certificate "void".

(7) **Duplicate certificates.** In those instances where it is found that a registrant has filed a delayed certificate of birth and also has another certificate of birth already on file, the Commissioner or State Registrar shall "void" the delayed certificate filed most recently by stamping the face of said certificate as "void".

(8) **Copies of voided certificates.** In instances where certificates have been voided, certified copies shall not be issued.

(9) **Amendments.** Delayed certificates of birth shall not be amended except in cases of judicial determination of parentage.

[Source: Amended at 17 Ok Reg 2924, eff 7-13-00]

310:105-3-3. Additions and amendments to birth certificates and records

(a) **No alterations on face of certificate-application to amend.** After its acceptance for filing, no birth certificate or other record made in compliance with statutes or this Chapter shall be altered or changed in any respect on its face, except as provided in paragraph (b) of this Section.

(b) **Name added to certificate if item blank.** The addition of the registrant's name to a birth certificate within the first twelve (12) months after the date of birth may be made by writing the name in the space provided, upon receipt by the State Registrar of the required documents, if the name is blank on the certificate originally filed.

(c) **Erroneous entries.** When a name is erroneously entered by the attendant on a certificate of birth, the certificate may be amended to indicate the name the registrant has used since birth when sufficient documentation is presented to prove the same. Such documentation shall consist of a statement from the hospital where the birth occurred on a certificate from the attendant at birth that completed the certificate of birth, or if unable to obtain either of the above at least two records indicating the correct name will be required, one of which shall have been established at least ten (10) years prior to the date the amendment is requested.

(d) **Refusal to amend.** In the event the State Registrar finds reason to believe that an attempt is being made to circumvent the provisions of Oklahoma Statutes concerning legally changing a name, the State Registrar shall not amend the certificate based on documentary evidence but shall advise the registrant of the necessity of obtaining a legal change of name as provided for in Oklahoma Statutes.

(e) **Other Changes.** Any applicant that desires to make a change, alteration or amendment not provided for in paragraphs (a) through (d) of this section may file a petition with the Administrative Hearing Clerk pursuant to OAC 310:2 and seek a final decision by an Administrative Law Judge granting the relief requested. The applicant shall bear the burden of proof, by clear and convincing evidence that the proposed change, alteration or amendment sought by the Applicant corrects an error or misstatement of fact as to any non medical information supplied to the State Registrar by the parent(s), facility or attendant.

[Source: Amended at 17 Ok Reg 2924, eff 7-13-00 ; Amended at 24 Ok Reg 1905, eff 6-25-07]

310:105-3-4. Birth certificate for children born out of wedlock; confidentiality

In those instances where a child is born out of wedlock, a full copy of the certificate may be issued under the following conditions:

- (1) A written request is received signed by the mother specifically requesting the same if the registrant is a minor.
- (2) A written request is received signed by the registrant, if of legal age - 18 years or older.
- (3) A written request is received signed by an attorney stating that the full copy is necessary for presentation to the courts for adoption purposes.
- (4) A written request is received by an individual, a licensed child placing agency, or other entity that has legal custody or guardianship of a child born out of wedlock.
- (5) Upon order of a court of competent jurisdiction.

[Source: Amended at 24 Ok Reg 1905, eff 6-25-07]

310:105-3-5. New certificates of birth

(a) **Legitimacy of child born out of wedlock.** The State Commissioner of Health shall establish a new certificate of birth for a person born in this State and whose birth certificate indicates the birth occurred out of wedlock when he receives a written request from the person, or either of the parents, and evidence proving that such person has been legitimated. Such evidence shall consist of a sworn statement by the mother and the husband that he is the natural father of the child whose certificate is to be replaced. The above-mentioned sworn statement must be accompanied by a certified copy of the parents' marriage license. The sworn acknowledgement of the parents and the certified copy of the marriage license shall be retained with the original certificate of birth in the confidential files of the Vital Records Division and shall not be subject to inspection, except upon order of a court of competent jurisdiction.

(b) **Adoption.** The State Commissioner of Health shall establish a new certificate of birth for a person born in this State when furnished with an adoption certificate as provided in the Uniform Adoption Act, or a certified copy of the decree of adoption together with the information necessary to identify the original certificate of birth and to establish a new certificate of birth.

(c) When the State Commissioner of Health or the State Registrar receives an adoption certificate or a certified copy of the Decree of Adoption from a court for a person born outside this State, such record shall be forwarded to the appropriate State Registrar or registration authority in the State of birth.

(d) **Adoption of foreign born; certificate of birth.**

(1) The State Commissioner or State Registrar may upon request prepare and register a certificate of birth in this State for a person born in a foreign country who is not a citizen of the United States and who was adopted under the provisions of Oklahoma Statutes in this State. The certificate may be established upon receipt of an adoption certificate as provided for in the Uniform Adoption Act, or a certified copy of the decree of adoption. The information contained in the certificate of or decree of adoption shall set forth the actual date of the adopted persons birth. A request must also be made to the State Registrar by the Court, the adopting parents, or their attorney, or the adopted person if of legal age that such a certificate be prepared. Such "Certificate of Foreign Birth" shall be on a form prescribed by the State Registrar and shall be labeled "Certificate of Foreign Birth" and shall show the actual country of birth and actual date of birth. A statement shall also be included on the certificate indicating that it is not evidence of United States Citizenship for the person for whom it is issued.

(2) After registration of the "Certificate of Foreign Birth" in the new name of the adopted person, the State Registrar shall seal and file the evidence of adoption and it shall not be subject to inspection except upon order of a court of competent jurisdiction.

(3) A "Certificate of Foreign Birth" registered in accordance with the above provisions shall not be amended except upon order of a court of competent jurisdiction. Such a certificate shall then be "amended" only by adding a page providing the Court's findings. Upon receipt of notice of annulment of adoption, from a court of competent jurisdiction in this State, the State Registrar shall so mark the "Certificate of Foreign Birth" and shall follow the directive of the court.

(4) The evidentiary value of a "Certificate of Foreign Birth" shall be determined by the judicial or administrative body or official before when the certificate is offered as evidence.

(5) The State Registrar shall establish a system for filing, preserving and issuance of certified copies of "Certificate of Foreign Birth" shall so indicate the same as well as the actual country of birth and the fact the certificate is "not proof of United States Citizenship."

SUBCHAPTER 5. DEATH REGISTRATION

310:105-5-1. Death registration

(a) **Certificate properly filed; when.** An attending physician's certificate of death, medical examiner's certificate of death, or fetal death shall be considered properly filed when all items thereon have been satisfactorily and definitely answered in accordance with the instructions of the Commissioner of Health and when the certificate has been presented to the local registrar in the registration district in which death occurred or the body was found.

(b) **Fetal death defined.** A gestation period of twenty (20) weeks or more is hereby prescribed in defining the term "fetal death."

310:105-5-2. Delayed death certificates

When a death has occurred in this State and has not been registered with the Vital Records Division, it may be registered by using the current certificate of death form when one of the following conditions is met:

- (1) The certificate of death is signed by the attending physician in charge of the patient's care for the illness or condition which resulted in death.
- (2) If death occurred in a hospital and the attending physician is no longer available, the medical certification may be completed on the basis of information contained in the permanent files of the hospital and signed by the medical records librarian. In such cases, it shall be noted on the face of the certificate that the information as shown is taken from the hospital records.
- (3) If death was due to an accident, the medical examiner that originally investigated the case and who originally had the responsibility for certifying the cause of death shall sign a medical examiner's certificate of death.
- (4) If death was due to an accident and the medical examiner originally responsible for completion is not available, then the Chief Medical Examiner may sign the certificate and certify the cause of death on the basis of information concerning the deceased contained in his files.
- (5) All certificates filed more than twelve (12) months after the date of death shall be filed as a delayed filing and shall indicate the date signed by the physician or hospital personnel and shall indicate the date placed on permanent file. It shall be indicated on the face of the certificate that it is a delayed filing by the State Registrar when placing on permanent file.

310:105-5-3. Coordination of birth and death certificates

When the State Registrar receives a death certificate or notification of death of a person born in the State of Oklahoma, any copies of the birth certificate shall indicate that the person is deceased.

[Source: Added at 17 Ok Reg 2924, eff 7-13-00]

310:105-5-4. Amendments of death registrations

(a) **Causes of death.** The cause of death or any other medical portion of the death certificate may be amended only upon the application of the medical examiner or the certifying physician, advanced practice registered nurse or physician assistant as authorized by Title 63 O. S. § 1-317.

(b) **Minor corrections.** Minor corrections to a death certificate shall be made only upon the application of the funeral home which must attest that the corrections are being made based on mistake made by the funeral home.

(c) **Other corrections.** Any applicant that desires to make a change, alteration or amendment not provided for in paragraphs (a) through (b) of this section may file a petition with the Administrative Hearing Clerk pursuant to OAC 310:2 and seek a final decision by an Administrative Law Judge granting the relief requested. The applicant shall bear the burden of proof, by clear and convincing evidence that the proposed change, alteration or amendment sought by the Applicant corrects an error or misstatement of fact as to any information supplied to the State Registrar by the funeral home.

[Source: Added at 17 Ok Reg 2924, eff 7-13-00 ; Amended at 24 Ok Reg 1905, eff 6-25-07 ; Amended at 40 Ok Reg 1543, eff 9-11-23]

SUBCHAPTER 7. BODIES AND RELOCATION OF CEMETERIES

310:105-7-1. Transportation of bodies

(a) **Bodies shipped by common carrier.** The body of any person dead of a disease that is not contagious, infectious, or communicable may be shipped by common carrier subject to the following conditions:

(1) Provided the body is encased in a sound coffin or casket, enclosed in a strong outside shipping case, and provided it can reach destination within the specified number of hours from the time of death, applicable both to place of shipment and destination.

(2) When shipment cannot reach destination within the number of hours specified, the body shall either

(A) Be embalmed, encased in a sound coffin or casket, and enclosed in a strong outside case for shipment, or

(B) When embalming is not possible, or if the body is in a state of decomposition, it shall be shipped only after enclosure in an airtight coffin or casket, enclosed in proper shipping container.

(3) A burial transit permit shall be attached in a strong envelope to the shipping case.

(b) **Transportation of certain diseased bodies.** The body of any person dead of smallpox, Asiatic cholera, louse-borne typhus fever, plague, yellow fever or any other contagious, infectious or communicable disease shall not be transported unless:

(1) Such body has been embalmed, properly disinfected and encased in an airtight zinc, tin, copper, or lead-lined coffin or iron casket, all joints and seams hermetically soldered or sealed and all encased in a strong, tight outside shipping case.

(2) Disinterred remains are considered as infectious and shall be enclosed in a hermetically sealed metal or metal-lined casket, enclosed in proper shipping container.

(3) Bodies deposited in receiving vaults must be treated and considered the same as disinterred remains with respect to shipping.

310:105-7-2. Permit required for disinterment

No person shall disinter the dead body of a human being for removal from one grave to another in the same cemetery, for removal to another cemetery, for cremation, or for any other purpose without obtaining a permit therefor from the State Commissioner of Health. The permit shall be signed by the next of kin of the deceased and a licensed Oklahoma funeral director responsible for performing the disinterring. In the event the next of kin's signature cannot be obtained a certified copy of a court order from a court of competent jurisdiction approving the disinterment shall be required. The permit shall be denied by the Commissioner of Health, if, in his opinion, the disinterment would be hazardous to the public health. The removal of bodies prepared by licensed embalmers and deposited in receiving vaults shall not be regarded as disinterments until the expiration of thirty (30) days.

310:105-7-3. Opening sealed caskets of disinterred remains

A hermetically sealed casket containing the disinterred remains of any person, dead from any cause and shipped into the State of Oklahoma for burial, shall not be opened except when so ordered by a court of competent jurisdiction.

310:105-7-4. Relocation of cemeteries

For the removal and reinterment of bodies now buried in cemeteries, graveyards and family lots located in territory to be affected directly by highway construction, water or buildings as a result of the erection of dams by the official authority or for any other reason where it is necessary to relocate an existing cemetery, the following rules are herewith promulgated to meet the exigencies of this particular situation.

(1) Upon application to the State Department of Health, the official authority will be granted a blanket permit for the disinterment of all deceased persons buried within the project area when he has completed the Disinterment and Removal Application and Permit for each grave in the cemetery in accordance with the preceding regulations provided in Part VI, Paragraph 1. When the signature of the next of kin cannot be

obtained, or in those instances when graves contain bodies for which the name of the deceased is "unknown," it shall be necessary that a person or agency requesting the permit obtain a court order from a court of competent jurisdiction setting forth the necessity for relocating the existing cemetery and giving approval for the same. Upon receipt of a certified copy of such a court order, the State Commissioner of Health or the State Registrar of Vital Statistics shall issue the permit in accordance with the directions of the court.

(2) The rules and regulations of the Oklahoma State Department of Health governing the removal and transportation of dead bodies will remain in full force and effect, except that all bodies now buried in graves that are affected in any manner shall be immediately upon disinterment encased in a suitable casket or coffin, and that bodies dead less than six (6) months as a result of smallpox, Asiatic cholera, typhoid fever, leprosy, bubonic plague, anthrax, glanders, or tularemia must be placed in a metal or metal-lined casket and hermetically sealed. All disinterring and reinterment shall be done under the direction of a licensed Oklahoma funeral director.

(3) All excavations in old grave locations shall be performed by hand digging and shall be to the necessary depth and dimensions of not less than three (3) feet by four (4) feet. At this location, if no remains have been found, the person charged with the disinterring shall collect not less than one-half (1/2) cubic foot of the material at the bottom of the excavation and reinter such as the last remains. All of the body or last remains, including such jewelry, identification marks, hinges or any other objects, casket, coffin, or other container shall be removed from each grave and transferred and suitably buried in the new grave.

(4) Before the disinterment of any body or bodies in graves described in this Section, a statement from the local health officer in the area of reinterment must be furnished to the State Department of Health setting forth that each proposed site for the reinterment of said bodies has been approved by the said local health officer.

(5) Extra precaution shall be exercised by those charged with the disinterment, transportation, and reinterment of said bodies in the case of persons dead less than six (6) months prior to disinterment as a result of smallpox, typhoid fever, Asiatic cholera, leprosy, bubonic plague, anthrax, glanders, or tularemia. For the purpose of determining just which persons died of any of the above diseases during the above-prescribed periods of time, the person in charge of the disinterment and removal of said bodies shall contact the State Registrar of the state where the death occurred to determine if a death certificate is on file, and if so, the cause of death as entered on the death certificate. In the event no death certificate can be located, then the person in charge of the disinterment shall contact the local health officer of the area to determine if his records reflect information pertaining to deaths from the disease listed above. When it shall be

determined that any person has died of any of the above diseases within the above period of time, then it shall be the duty of those in charge of the removal of said bodies to advise the public to refrain from coming into close proximity of the place where and when said bodies are being disinterred, removed or reinterred in order that the possibility of infection may be eliminated. If deemed necessary for the protection of public health, the local authorities are empowered to safeguard the interest of the public. The managers or trustees of any cemetery, or those in charge of the disinterment, removal or reinterment of the bodies are empowered to appoint an agent to exercise the powers of police officers within said cemetery, and within one hundred (100) yards of said cemetery grounds.

(6) The official authority shall, after completion of reinterment of said bodies, submit a report to the State Department of Health setting forth, as far as possible, a list of the names of all deceased persons. The list shall contain the following: name of deceased; date of death; name and location of original place of burial; name and location of place to which the body was removed; provided, however, that such report may consist of a set of plans and prints used in performing said disinterments and reinterments that have been corrected to show the work finally performed.

CHAPTER 110. FEE AND FINE SCHEDULE FOR OCCUPATIONAL LICENSING [REVOKED]

310:110-5-5. Schedule of fines for the alarm and locksmith industry [REVOKED]

[**Source:** Added at 14 Ok Reg 933, eff 1-8-97 through 7-14-97 (emergency); Added at 14 Ok Reg 3123, eff 7-25-97 ; Amended at 24 Ok Reg 1907, eff 6-25-07 ; Revoked at 38 Ok Reg 1945, eff 9-11-21]

310:110-5-6. Schedule of fines for the Home Inspection Industry [REVOKED]

310:110-5-6.¹ Schedule of fines for the Home Inspection Industry [REVOKED]

[**Source:** Added at 20 Ok Reg 502, eff 1-6-03 (emergency); Added at 20 Ok Reg 1611, eff 6-12-03 ; Amended at 23 Ok Reg 2345, eff 6-25-06 ; Revoked at 38 Ok Reg 1945, eff 9-11-21]

Editor's Note: ¹*Effective 11-1-08, the authority to "adopt, amend, repeal, and promulgate rules as may be necessary to regulate . . . home inspectors" was transferred from the Oklahoma State Department of Health to the Construction Industries Board [see 59 O.S., § 1000.4]. The Construction Industries Board promulgated emergency rules on 11-14-08 [see 26 Ok Reg 387 and 390], and subsequently superseded those emergency rules with permanent rules at OAC 158:70 on 7-11-09 [see also OAC 158:10-3-1 for related fines]. The Department of Health later revoked the rules regulating home inspectors at OAC 310:276, effective 9-12-14. However, as of the cutoff date for the 2016 Edition of the OAC, the Department of Health had not revoked the rule regulating home inspectors in this Section 310:110-5-6. For additional information about this transfer, see Laws 2008, c. 405.*

310:110-5-7. Schedule of fines for the Barber Industry [REVOKED]

CHAPTER 205. ALARM AND LOCKSMITH INDUSTRY [REVOKED]

Editor's Note: *Effective 11-1-12, the authority to "promulgate, adopt, amend, and repeal rules consistent with the provisions of the Alarm and Locksmith Industry Act for the purpose of governing the establishment and levying of administrative fines and the examination and licensure of alarm or locksmith companies, managers, technicians, and salespersons" [SB 1866 (2012), § 19] was transferred from the State Board of Health to the Commissioner of Labor. See OAC 380:75 for rules promulgated by the Commissioner of Labor, effective 7-11-13. See OAC 310:205 in the 2011 Edition of the OAC for full text of rules as last promulgated by the State Board of Health.*

CHAPTER 210. BARBER [TRANSFERRED]

Editor's Note: *Effective 11-1-13, as set forth in House Bill 1467 (2013), "[a]ll powers, duties, responsibilities . . . of the State Board of Health, the State Department of Health, the State Commissioner of Health, and the State Barber Advisory Board relating exclusively to the regulation of licensed barbers in this state as provided in Sections 61.1 et seq. of Title 59 of the Oklahoma Statutes shall be placed under the authority of the State Board of Cosmetology and Barbering" [HB 1467 (2013), § 80(A)]. The following provisions in HB 1467 address the disposition of related rules:* • *Section 80 (not to be codified in the Oklahoma Statutes) provides that "[u]pon the effective date of this legislation, all administrative rules promulgated by the State Board of Health relating to the licensing and regulating of barbers shall be transferred to and become a part of the administrative rules of the State Board of Cosmetology and Barbering" [HB 1467 (2013), § 80(F)]. HB 1467 directed the Office of Administrative Rules to place the transferred rules under the Administrative Code section of the Board of Cosmetology and Barbering [see Editor's Notice published at 32 Ok Reg 108]. Therefore, on 11-1-13, the rules in this Chapter 210 of the Oklahoma State Department of Health's Title 310 [OAC 310:210] were transferred to a new Chapter 15 of the State Board of Cosmetology and Barbering's Title 175 [OAC 175:15]. See Editor's Note at beginning of Chapter 15 of Title 175 [OAC 175:15]. For the text of rules that were effective prior to the transfer of these rules to OAC 175:15 on 11-1-13, see Chapter 210 of the Department of Health's Title 310 [OAC 310:210], as published in the 2011 Edition of the OAC and updated in the 2013 OAC Supplement.* • *Section 81 (amending 59 O.S., § 61.1) authorizes the State Board of Cosmetology and Barbering to "promulgate rules which govern the examining and licensing of barbers, barber apprentices, barber instructors, and barber colleges; . . . the sanitary operation and sanitation of barber shops and barber colleges; and the establishment and levying of administrative fines . . . " [HB 1467 (2013), § 81(A)]. The State Board of Cosmetology and Barbering promulgated permanent amendments to Chapters 1 and 10 in their Title 175 to address the regulation and licensing of barbers, effective 11-1-14. [See OAC 175:1 and 175:10]*

CHAPTER 215. BEDDING REGULATIONS

[**Authority:** 63 O.S., §§ 1-1001 et seq.]

[**Source:** Codified 12-31-91]

SUBCHAPTER 1. GENERAL PROVISIONS

310:215-1-1. Purpose

The rules in this Chapter implement the Bedding act, 63 O.S. Supp. 1996, Section 1-1001.1 et seq.

[**Source:** Amended at 14 Ok Reg 2254, eff 6-12-97]

310:215-1-2. Definitions

The following words or terms, when used in this Chapter, shall have the following meaning, unless the context clearly indicates otherwise:

"Act" means Title 63 O.S. Supp 1996, Section 1001.1 et seq.

"Bedding" means mattresses, upholstered springs, sleeping bags, pads, comforters, pillows, and cushions. The term "bedding" also includes dual purpose furniture such as sofa beds, studio couches, and futons.

"Cat tail plant fiber" mean plant fibers from the named plant used as fill.

"Cellulose", **"cellulose fiber"**, and **"cellulose"** mean cellulosic products containing not more than four per cent (4%) lignin and twelve per cent (12%) pentosans.

"Cellulose fiber pad" means a pad made of cellulose.

"Chicken feathers" mean feathers of any kind of chicken, which are whole in physical structure.

"Chopped feathers" in conjunction with the name of the fowl from which the feathers came means the feathers which have been processed through a chopping machine which has cut the feathers into small pieces, e.g., "chopped duck feathers."

"Comber" means the tangled fibers removed during the combing process of textile fibers.

"Cotton by-products" mean the by-products removed from the various machine operations necessary in the manufacture of cotton yarn up to but not including the process of spinning, and shall include the following materials commonly known in cotton-mill terms as cotton card strips or cotton vacuum strips, cotton comber, cotton fly, and cotton picker.

"Cotton linters" mean the fibrous growth removed from cottonseed subsequent to the usual process of ginning.

"Cotton waste" means any material of cotton origin containing more than ten per cent (10%) of hull, leaf, stem, and pulp.

"Crushed feathers" in conjunction with the name of the fowl from which the feathers came mean feathers which have been processed through a so-called curling machine which has changed the original form of the feathers, but has not removed the quill, e.g., "crushed duck feathers."

"Down" means the soft undercoating of waterfowl, consisting of the light fluffy filaments grown from one quill-point but without any quill-shaft.

"Duck feathers" means feathers of any kind of duck, which are whole in physical structure, with the natural form and curvature of the feather.

"Excelsior" means curled wood shreds.

"Excelsior pad" means a pad made of curled wood shreds.

"Felt" means material that has been carded in layers or sheets by a garnett or felting machine.

"Filling" **"filling material"** and **"materials"** mean materials used as filling in the manufacture, repair, or renovation of bedding.

"Fly" means the fibers which come off the machines during carding, drawing, or similar textile operations.

"Goose feathers" means feathers of any kind of goose, which are whole in physical structure, with the natural form and curvature of the feather.

"Hair" means the course filamentous epidermal outgrowth of such mammals as horses, cattle, sheep, hogs, and goats.

"Jute fibers" mean jute of which no prior use has been made.

"Jute pad" means a pad made from jute fibers.

"Kapok" means the fibers obtained from the seeds of the kapok tree.

"Label" means a label required to be on or affixed to bedding products by the Act and Regulations and on which the information required is to appear.

"Latex foam rubber" means foam products made from rubber latex which previously has not been coagulated or solidified.

"Mattress" includes padding or cushioning material which is used in conjunction with water bed liners, bladders or cylinders, but does not include water bed liners, bladders or cylinders.

"Mixed cotton" means a mixture of staple cotton, cotton linters, and cotton by-products in any proportion which has not been garnetted or felted.

"Napper" means the lint removed during the process of raising the face of a cloth.

"Noils" means the short fibers removed during the combing process.

"Paper" means wood pulp materials used as fill material.

"Quill" means the main shaft or axis of a feather.

"Quill feather" means a flight feather or tail feather.

"Rubber" as used in these regulations shall apply to synthetic rubber as well as natural rubber.

"Second-hand", as defined in the Act, does not apply to new materials subjected to manufacturing processes or to new materials which are the by-product of manufacturing processes.

"Sisal fibers" means sisal of which no prior use has been made.

"Sisal pad" means a pad made from sisal fibers.

"Sponge rubber" means sponge products made from rubber which has previously been coagulated or solidified.

"Staple cotton" means the staple fibrous growth as removed from the cottonseed in the usual process of ginning (first-cut from the seed) containing no foreign material.

"Steel batting" means steel fibers that have been passed through some form of garnetting machine and carded in layers or sheets.

"Steel fiber pads" means steel fibers that have been passed through some form of garnetting machine and carded in layers or sheets.

"Steel fibers" means steel fibers that have not been garnetted.

"Synthetic fibers" mean manufactured fibers as opposed to natural fibers from animal, fowl, or plant origin.

"Synthetic foam" means a polymerized cellular material made from an organic base other than rubber.

"Textile by-products" means any of the fibrous by-products produced during the processing of textile fibers up to but not including the spinning of yarns.

"Turkey feathers" mean feathers of any kind of turkey, which are whole in physical structure.

"Water-fowl feathers" mean any mixture of goose and duck feathers.

"Wool" or "virgin wool" means the fleece of the sheep or lamb, which has been scoured or scoured and carbonized. It shall not be the by-product of any process of manufacture nor shall it have sustained prior use.

"Wool waste" means all by-products and wastes of machines in any process of manufacture employing only new wool fibers and shall also include wool pills and shank and tag wools.

[Source: Amended at 14 Ok Reg 2254, eff 6-12-97]

310:215-1-3. Adopted statutory terms

The definition of terms contained in the Bedding act shall be applicable also to such terms when used in rules promulgated under the Act.

310:215-1-4. Applicability; general tagging requirements; use of percentages in rules

(a) **Application.** The regulations of this Chapter shall apply to all persons, partnerships, corporations, and associations engaged in the business of manufacturing, repairing, renovating, germicidally treating, and selling items of bedding. These regulations do not apply to persons who make, renovate, and germicidally treat bedding for their own use.

(b) **Labels.**

(1) Each item of bedding shall be labeled in conformity with the requirements of the Act and Regulations. All labels shall be attached at the factory. Space shall be provided on the label for the affixation of a revenue stamp and the permit holder's registration number shall appear on the label. Articles of bedding that are packaged in clear packaging material shall have the label visible without opening the packaging. Articles of bedding that are packaged in packaging material that cannot be seen through

shall attach a duplicate label outside the package.

(2) It shall be unlawful to make any false or misleading statement on the label required by the Act and Regulations; it shall be unlawful for any person to remove, deface, or alter any label or statement thereon, or cause the same to be done, for the purpose of defeating the provisions of the Act and Regulations.

(3) The terms used on the label to describe materials used in filling shall be restricted to those defined in the regulations (Chapter 215) or in the Act.

(4) The presence of an innerspring unit in an article of bedding shall be designated on the label. If the number of coils is stated, the statement must be true and correct.

(5) If an article of bedding contains more than one kind of filling material, the percentage of each material shall be clearly stated on the label.

(6) Filling materials in pre-built border constructions used in the manufacture of mattresses and similar bedding products need not be stated on the label provided the filling material does not exceed ten per cent (10%) of the material in the article to which the border construction is affixed.

(7) When the filling material contained in a quilted ticking affixed to the cover of an article of bedding is in excess of ten per cent (10%) of the weight of the entire filling material of the article of bedding, such material shall be designated on the label and its percentage given.

(8) Burlap, muslin, webbing, and tape, when less than ten per cent of the filling material, need not be stated on the label.

(9) The terms "all," "pure," "100%," or terms of similar import are permitted only if the material is as stated.

(10) Any new stiffening material, such as fiberboard, wood, or paper when present in an amount exceeding ten per cent (10%) by weight of the entire filling material of an article of bedding shall be designated on the label and its percentage given.

(11) Any filling material containing more than 5% oil shall be designated on the label as "oily".

(12) The presence of silicates in excess of 5% in any filling material shall be designated on the bedding-label as "clay" and the actual percentage thereof contained in the filling material shall be stated on the label.

(c) Percentages.

(1) When percentages are required in the regulations of this Chapter it shall mean percentage by weight in lieu of percentage by volume. Wood frames, metal springs, and parts shall be excluded when calculating percentages.

(2) To allow for unintentional variations, a tolerance or variation not in excess of ten per cent (10%) by weight from the amount stated on the label shall be allowed.

SUBCHAPTER 3. LABELING

310:215-3-1. Label requirements and recommendations

The following are label requirements and recommendations for bedding:

(1) Hair.

(A) When used in the manufacture of bedding, hair (including wool products) shall be clean, properly cured, free from epidermis, excreta, or foreign or objectionable substances or odors.

(B) Hair used in the manufacture of bedding shall be identified on the label as to the animal origin of the hair. When hair of different origins is used in a blend, the kind and percentage by weight of each shall be stated on the label.

(C) When any material of whatever origin other than hair is used, in a mixture or blend with hair, the kind and percentage weight of each such material shall be designated on the label.

(2) Feathers and down.

(A) The presence of loose down fibers in excess of ten per cent (10%) shall be designated as "down fibers."

(B) Feather mixtures shall be designated by the name, character, and percentage of each material used or the entire mixture shall be designated by the name of the lowest grade of material used. The grades of materials in descending order are as follows: goose down, duck down, goose feathers, duck feathers, turkey feathers, chicken feathers.

(C) Articles of bedding containing feathers and down shall be labelled to indicate the feathers have been germicidially treated and the permit number of the facility providing the treatment.

(3) Rubber and foam.

(A) Generic terms together with the word "foam" may be used in lieu of the term "synthetic foam." If generic terms are used, they must be true and correct, e.g., "urethane foam," "polystyrene foam," "vinyl foam."

(B) When latex foam rubber, sponge rubber or synthetic foam is cut, broken or shredded, they shall be preceded by the term "pieces of" or "shredded".

(C) When any one of the materials described in (B) of this paragraph have been molded into the form in which they are intended to be used, they may be further defined as "molded".

(D) When any one of the materials described (B) of this paragraph have been either cut or broken into pieces of indefinite size or subjected to a shredding process and subsequently cemented together, whether or not this is

done in a mold, the resulting product shall be further defined as "cemented." The term "molded" shall not be used.

(4) **Synthetic fibers.** Generic terms for manufactured fibers may be used in lieu of the term "synthetic fibers." If generic terms are used, they must be true and correct.

[Source: Amended at 14 Ok Reg 2254, eff 6-12-97]

310:215-3-2. Felt padding

The following requirements apply to labelling felt padding used in bedding:

(1) **Felt.**

(A) The term "felt" or "felted" by itself shall not be used but shall be combined with the name of the material from which it is made. The use of the term "batting" instead of "felt" is permissible, e.g., "blended cotton felt," "jute felt," "wool batting."

(B) Felt shall not include felt scraps or repicked felt.

(C) Felt made of "mixed cotton" may be designated on the tag as "blended cotton felt."

(D) Felt made entirely of staple cotton shall be designated as "staple cotton felt."

(2) **Vinyl treatment.** Felt impregnated with vinyl or any other resin shall be defined as designated on the tag with the words "resin-treated blended cotton felt."

[Source: Amended at 14 Ok Reg 2254, eff 6-12-97]

310:215-3-3. Statutory label requirements

The following described labels are required by these regulations as authorized by the Act:

(1) **All new material.** Bedding meeting all requirements for new materials shall carry the white "New Materials Label," and no other label is required.

(2) **Second-hand material.** The original label shall be removed and a yellow label to be affixed by the manufacturer or renovator only is required on all second-hand materials renovated, remade, manufactured, germicidially treated, or offered for sale regardless of whether they have been renovated or remade. This label is required on all articles manufactured, renovated, or remade, using second-hand materials. A bedding stamp shall be affixed to this label.

(3) **Second-hand material sanitized.** A yellow label is to be attached by the person holding germicidal treatment permit to every article of bedding or material undergoing the process of sterilization, regardless of the conditions requiring sterilization. A bedding stamp must be affixed to this label when treatment is performed for an article intended to be sold at retail.

(4) **Owner's own material.** A yellow label is required on all articles of bedding to renovated or remade for the owner. Bedding stamp must be affixed by the renovator permit holder.

[Source: Amended at 14 Ok Reg 2254, eff 6-12-97]

SUBCHAPTER 5. GERMICIDAL TREATMENT

310:215-5-1. General requirements

(a) A person shall not sell, offer for sale, or include in a sale any article of second-hand bedding or any article of bedding manufactured in whole, or in part, from second-hand material, unless such bedding has been cleaned, stains and odors removed, and germicidally treated by a method approved by the Department. Articles of bedding removed from a retail establishment to be used as bedding and returned to the establishment are considered second-hand bedding.

(b) A person shall not use in the manufacture, renovation or repair of bedding any material which has been obtained from dump grounds, landfills, junk yards, or hospitals within or without the State of Oklahoma.

[Source: Amended at 14 Ok Reg 2254, eff 6-12-97]

310:215-5-2. Methods of treatment

(a) Washing and drying.

(1) **Pillows.** Feather pillows will be considered as having been germicidally treated when the feathers and ticking are kept intact without opening, and washed by a commercial laundry method with subsequent drying to remove moisture.

(2) **Mattresses.** Hair mattresses will be considered as having been germicidally treated when the hair is removed from the ticking and washed by a commercial laundry method and subsequently dried to remove all moisture, and where the ticking is washed and subsequently dried.

(b) **Other methods.** Any other method of germicidal treatment may be used in germicidally treating bedding and materials, provided it has first been approved by the Department. The methods for germicidal treatment of used or soiled articles of bedding for lease or resale, are approved by the Oklahoma State Health Department, as provided by Sections 310:215-5-1 and 310:215-5-2. Any person desiring to use either of these methods of germicidal treatment shall apply to the Consumer Protection Service, Oklahoma State Health Department for a permit and for approval of the techniques they plan to use. The following wording shall be printed or stamped on the "Second-Hand Material, Sanitized" label, below the word "Sanitized": THE SURFACE OF THIS SECOND-HAND ARTICLE HAS BEEN CLEANSED AND GERMICIDALLY TREATED BY THE METHOD INDICATED BELOW.

(c) **Dry/wet physical cleansing.** The following Dry/Wet Physical Cleansing methods for germicidal treatment of used or soiled articles of

bedding for lease or resale shall consist of:

- (1) A physical cleaning technique followed by,
- (2) the application of a germicidal agent and an insecticide and
- (3) adequate drying before lease or resale.

(d) **Dry method.** The dry method shall include the following:

- (1) The article(s) of bedding shall be physically brushed so as to dislodge loose dirt and debris. This brushing shall be followed by a thorough vacuuming so as to remove this dirt and debris.
- (2) An approved germicidal agent shall be applied to thoroughly dampen the surface of the article(s) of bedding.
- (3) An approved insecticide shall be applied to the surface of the article of bedding.
- (4) The article(s) of bedding shall be thoroughly aired and dried before offering for lease or resale.
- (5) This method shall not be used if the article(s) of bedding is stained with body fluids and/or excrement. If particles of soil (not stain) can not be removed by this dry method, the wet method must be used.

(e) **Wet method.** The wet method shall include the following:

- (1) The surface of the article(s) of bedding shall be washed thoroughly with detergent and warm or hot water. This washing may be accomplished by hand brush, rug or furniture shampoo or steam-cleaning type applicators or other similar applicators.
- (2) One or more clear water rinses shall be applied to the surface of the article(s) of bedding so as to remove all accumulated detergent and dislodged soil. The application may be by similar applicators as the wash cycle.
- (3) An approved germicidal agent shall be applied to the article(s) of bedding so as to thoroughly dampen the surface.
- (4) An approved insecticide shall be applied to the article of bedding so as to thoroughly dampen the surface.
- (5) The article(s) of bedding shall be thoroughly aired and dried before offering for lease or resale.

(f) **Germicidal and insecticidal agents.**

- (1) The germicidal and insecticidal agents may be added to the wash water, the rinse water or may be applied separately. These agents must be applied to the article of bedding so as to cause total surface contact. The agents shall be registered with the U.S Environmental Protection Agency and the Oklahoma State Department of Agriculture for these intended purposes.
- (2) Any approved germicidal agent used for treating articles of bedding must have an additive product which provides florescent particles when viewed under ultraviolet light (black light) and magnification. The purpose for this requirement, is to provide a uniform method for detection of the presence of the germicidal treatment agent on articles of bedding, by enforcement officials.
- (3) Records shall be kept by the permit holder to show the amount of germicidal and/or insecticidal agent used on each article of bedding in addition to other applicable records required under Rule VI, Section "L". The words "Physical Cleaning-Dry" or "Physical Cleaning-Wet," shall be used to describe these methods

on the label "Second-hand Material Sanitized" which shall be affixed to each article of bedding.

(g) Treatment devices.

(1) Germicidal treatment devices shall be properly housed to afford protection to the device and to allow for adequate working space around the device. Adequate space shall be provided for storage and segregation of treated and untreated bedding and materials. All rooms shall be clean, and germicidal treatment devices shall be cleaned and maintained in good repair and proper working condition.

(2) Accurate records shall be kept by the operator of the germicidal treatment device, and such records shall show the following information concerning each article treated.

(A) Date germicidally treated

(B) Lot number (chart number)

(C) Tag number (article number)

(D) Name and address of buyer, if any

(3) All records and charts and/or information thereon shall be available to the Department.

[Source: Amended at 14 Ok Reg 2254, eff 6-12-97]

SUBCHAPTER 7. PREMISE, PERMIT AND IDENTIFICATION REQUIREMENTS

310:215-7-1. Sanitary premises

Every person engaged in the business of manufacturing, repairing, or renovating bedding shall keep his place of business in a sanitary condition by complying with the rules that follow.

(1) Adequate housing and floor space shall be provided to prevent crowding of materials and equipment and to allow for the practice of cleanliness and sanitation.

(2) All work rooms shall be well ventilated.

(3) All work rooms shall be lighted.

(4) The floors of all rooms in which materials are stored, processed, or otherwise used in the manufacturing or renovating of bedding, shall be of such construction as to be easily cleaned, and shall be kept clean and in good repair.

(5) Walls and ceilings of all rooms where materials are stored, processed, or otherwise used in the manufacturing or renovating of bedding, shall be of such construction as to be easily cleaned, and shall be kept clean and in good repair.

(6) All buildings, rooms therein, and immediate surroundings shall be kept in neat and clean condition. All rooms and surroundings shall be free of rubbish, trash, discarded equipment, or other unnecessary articles which may promote insanitary conditions.

(7) There shall be no living quarters in the rooms, or opening directly into the rooms, where materials are stored, processed, or otherwise used in the manufacturing of bedding.

(8) Clean toilet facilities of a type approved by the Department shall be provided.

(9) Adequate and clean hand washing facilities shall be provided. One lavatory (wash basin) with adequate and acceptable water supply shall be provided for every twenty (20) employees or portion thereof up to one hundred (100) persons and one lavatory (wash basin) for each additional twenty-five (25) persons or portion thereof. Soap or a suitable cleaning agent shall be provided at each lavatory.

[Source: Amended at 14 Ok Reg 2254, eff 6-12-97]

310:215-7-2. Permits

(a) A person shall not engage in the business of manufacturing, repairing, and selling bedding unless he has obtained an authorizing permit from the Department.

(b) A person shall not germicidally treat bedding unless he has obtained an authorizing permit from the Department.

(c) Permits required by the Act and Regulations must be renewed annually on a fiscal year basis, i.e., July 1.

(d) Permit fees are as follows:

(1) Initial Bedding Permit -\$ 5.00

(2) Renewal Bedding Permit -\$ 5.00

(3) Initial Germicidal Treatment Permit -\$ 25.00

(4) Renewal Germicidal Treatment Permit -\$ 5.00

310:215-7-3. Adhesive revenue stamps

(a) A person shall not manufacture, renovate, and/or sell, or have in his possession with intent to sell, any bedding unless there be affixed to the label required by the Act and Regulations an adhesive stamp prepared and issued by the Department. Adhesive stamps shall be affixed to label by the person manufacturing, renovating, selling, or germicidally treating items of bedding.

(b) Adhesive revenue stamps are valued at 5 cents each and shall be issued to authorized permit holders by the Department in multiples of 100. The smallest quantity of stamps which can be issued is 100 for \$5.00.

(c) Persons applying for initial permits shall also purchase not less than 100 adhesive stamps unless the applicant has stamps on hand as the result of a previously assigned permit.

(d) A non-stamp bedding permit can be obtained for establishments that sell 100 articles or more per quarter in the State.

[Source: Amended at 14 Ok Reg 2254, eff 6-12-97]

310:215-7-4. Material identification

(a) Persons engaged in the manufacture, repair, and renovation of bedding shall keep new and second-hand materials segregated and identified; when new and second-hand materials are mixed, the entire mixture shall be regarded as second-hand.

(b) Persons engaged in the manufacture, repair, renovation and/or germicidal treatment of bedding shall label or mark all second-hand bedding and materials prior to manufacture, renovation, or germicidal treatment to show name and address of owner and reason for possession.

SUBCHAPTER 3. LABELING [REVOKED]

310:220-3-1. Labeling requirements [REVOKED]

[**Source:** Added at 16 Ok Reg 682, eff 1-5-99 (emergency); Added at 16 Ok Reg 1398, eff 5-27-99 ; Revoked at 41 Ok Reg, Number 22, effective 8-11-24]

CHAPTER 225. BOTTLED DRINKING WATER REGULATIONS

[**Authority:** 63 O.S.1981, §§ 1-1915 et seq. and 1-1101 et seq.]
[**Source:** Codified 12-31-91]

SUBCHAPTER 1. GENERAL PROVISIONS

310:225-1-1. Purpose

The rules in this Chapter implement the Bottled Drinking Water Regulations, 63 O.S. 1981, Section 1-1915 et seq. and 1-1101 et seq.

310:225-1-2. Definitions

The following words or terms, when used in this Chapter, shall have the following meaning, unless the context clearly indicates otherwise:

"Approved laboratory" means a laboratory approved by the Commissioner of Health or certified by the U.S. Environmental Protection Agency ("EPA"), or certified (accredited) by a third-party organization acceptable to the Commissioner of Health.

"Approved source" when used in reference to a bottled water plant's product water or water used in the plant's operations, means the source of the water whether it be from a spring, artesian well, drilled well, public water system or any other source that has been inspected and the water sampled, analyzed, and found to be of a safe and sanitary quality. Bottled water covered by these rules and regulations must be from a source which is permitted in accordance with the design standards for public water supply facilities.

"Artesian water" means bottled water from a well tapping a confined aquifer in which the water level stands above the water table. "Artesian Water" shall meet the requirements of "Natural Water".

"Bottled water" means water that is placed in a sealed container or package and is offered for sale for human consumption or other consumer uses.

"Bottled water plant" means any place or establishment in which bottled water is prepared for sale.

"Carbonated water" or **"sparkling water"** means bottled water containing carbon dioxide.

"Distilled water" means bottled water which has been produced by a process of distillation and meets the definition of purified water in the most recent edition of the United States Pharmacopeia.

"Drinking water" means bottled water obtained from an approved source that has at minimum undergone treatment consisting of filtration (activated carbon or particulate) and ozonation or an equivalent disinfection process.

"Fluoridated water" means bottled water containing fluoride. The label shall specify whether the fluoride is naturally occurring or added. Any water which meets the definition of this paragraph shall contain no less than 0.8 milligrams per liter fluoride ion and otherwise comply with the Food and Drug Administration ("FDA") quality standards in Section

103.35(d) (2) of Title 21 of the Code of Federal Regulations ("C.F.R.").

"Mineral water" means bottled water that contains not less than 500 parts per million total dissolved solids. "Natural Mineral Water" shall meet the requirements of "Natural Water".

"Natural water" means bottled spring, mineral, artesian, or well water which is derived from an underground formation and is not derived from a municipal system or public water supply.

"Plant operator" means any person who owns or operates bottled water plant.

"Purified water" means bottled water produced by distillation, deionization, reverse osmosis, or other suitable process and that meets the definition of purified water in the most recent edition of the United States Pharmacopeia. Water which meets the definition of this paragraph and is vaporized, then condensed, may be labeled "distilled water".

"Spring water" means water derived from an underground formation from which water flows naturally to the surface of the earth. "Spring Water" shall meet the requirements of "Natural Water".

"Water dealer" means any person who imports bottled water or causes bulk water to be transported for bottling for human consumption or other consumer uses.

"Well water" means water from a hole bored, drilled, or otherwise constructed in the ground which taps the water of an aquifer. "Well Water" shall meet the requirement of "Natural Water".

310:225-1-3. Soda water/soft drink exemptions

Bottled soft drinks, soda or seltzer or other products commonly recognized as soft drinks and labeled with a common or usual name other than one of those specified in Section 310:225-1-2 are exempt from the requirements of these regulations. Water that is not in compliance with the requirements of these regulations may not be labeled as "Artesian Water", "Bottled Water", "Distilled Water", "Drinking Water", "Fluoridated Water", "Mineral Water", "Purified Water", "Spring Water", or "Well Water".

[Source: Amended at 8 Ok Reg 3127, eff 7-18-91 (emergency); Amended at 9 Ok Reg 1421, eff 5-1-92]

310:225-1-4. Severability

If any provision or application of any provision of the rules of this Chapter is held invalid, that invalidity shall not affect other provisions or applications of these rules.

SUBCHAPTER 3. PRODUCT QUALITY

310:225-3-1. Source approval

All bottled water shall be from an approved source and shall not contain any constituent in quantities that may be injurious to health, as established through rulemaking by the Oklahoma State Department of Health. All bottled water shall meet the standards prescribed by the FDA

in 21 C.F.R. Section 103.35, except that the total dissolved solids limitation of Section 103.35(d) shall not apply to mineral water.

310:225-3-2. Maximum contaminant level

Except as provided in Section 310:225-3-1, bottled water, including mineral water, shall not exceed any Maximum Contaminant Level ("MCL") established by EPA under the Safe Drinking Water Act if adopted by FDA or by the State Board of Health for any organic or inorganic chemicals.

**SUBCHAPTER 5. GOOD MANUFACTURING PRACTICES
AND OPERATIONAL REQUIREMENTS**

310:225-5-1. Process standards

All bottled water, including mineral water, shall be filtered or processed and packaged in accordance with, and in facilities which comply with, the FDA Good Manufacturing Practice Regulations ("GMPs") 21 C.F.R. Parts 110 and 129.

310:225-5-2. Microbiological control standards

Bottled water production, including transporting, processing, packaging and storage, shall be conducted under such conditions and controls as are necessary to minimize the potential for microbiological contamination of the finished product. These conditions shall include the following:

- (1) Bottled water shall be subject to effective germicidal treatment by ozonation or carbonation at a minimum of three volumes of carbon dioxide or other equivalent disinfection;
- (2) Bottled water shall not be transported or stored in bulk tanks or processed or bottled through equipment or lines used for any non-food product.

310:225-5-3. Multi-food equipment

(a) For optimum consumer protection, in order to minimize the potential for microbiological contamination of the finished product, it is recommended that non-carbonated bottled water not be transported, stored, processed or bottled in or through lines or equipment through which any food product other than water is passed.

(b) Bottled water shall not be transported, stored, processed or bottled through lines or equipment through which any food product other than water is passed except under procedures that prevent the potential for microbiological contamination in bottled water.

310:225-5-4. Cleaning and sanitizing procedures

(a) Non-dairy foods.

- (1) Where foods other than milk or dairy products have been transported, stored, processed or bottled, each time before water is transported, stored, processed or bottled through the same

lines or equipment all product contact surfaces shall be thoroughly cleansed and sanitized using appropriate procedures as specified in 21 C.F.R. Section 129.80. Where noncarbonated bottled water is processed or bottled, cleansing and sanitizing of the filler shall be manually, after disassembly, and all product contact surfaces of the filler shall be sanitized with 50 ppm chlorine for one minute at 75 degrees F. or equivalent.

(2) Subject to Department review and approval, for equipment, lines and filler machines designed for cleaning-in-place, in lieu of the aforementioned disassembly, cleaning and sanitizing procedure, said product contact surfaces may be cleaned in place and sterilized with saturated steam at 252 degrees F. for ten minutes.

(b) Dairy foods.

(1) Where milk or other dairy products are processed or bottled through the same lines or equipment as bottled water, the feed line used to convey water to the filler shall be dedicated to water only.

(2) Each time before water is processed or bottled all other product contact surfaces shall be disassembled and manually cleaned in accordance with procedures specified in 21 C.F.R. 129.80 and shall then be sanitized with 50 ppm chlorine for one minute at 75 degrees F., or equivalent.

(3) Subject to Department review and approval, for equipment, lines and filler machines designed for cleaning-in-place, in lieu of the aforementioned disassembly, cleaning and sanitizing procedure, said product contact surface may be cleaned in place and sterilized with saturated steam at 252 degrees F. for ten minutes.

(4) All product contact surfaces of tanks used for storage or transport of both dairy product and water shall be thoroughly cleaned in accordance with 21 C.F.R. 129.80 and sterilized with saturated steam at 252 degrees F. for ten minutes.

(c) Ozone resistant material. Where ozone is used as a germicidal agent for bottled water, all gaskets, o-rings and similar flexible material shall be made of silicone rubber, teflon or other ozone resistant material. These flexible parts shall be replaced whenever they show evidence of surface deterioration.

310:225-5-5. Product recall procedures

Each bottled water plant operator and water dealer shall develop and maintain a procedure for product recall and shall implement said procedure for any product for which the operator or dealer knows or has reason to believe circumstances exist that may adversely affect its safety for the consumer.

SUBCHAPTER 7. WATER MONITORING

310:225-7-1. Approved source sampling and analysis

- (a) The bottled water plant operator shall be responsible for sampling and analysis of all approved sources for the contaminants specified in Section 310:225-3-1 to assure that product water derived from approved sources continues to comply with Section 310:225-3-1. Such monitoring shall be at least annually, except that analysis for microbiological contaminants shall be weekly if the source is other than a public water system.
- (b) Approved sources shall be monitored every five years for the contaminants for which U.S. EPA under the Safe Drinking Water Act or the Department requires source water monitoring.
- (c) Source monitoring shall not be required of a plant using an approved public drinking water supply.
- (d) The required source water sampling shall be performed by qualified personnel and required analysis shall be performed by an approved laboratory. Records of the required sampling and analyses shall be maintained on file at the plant for not less than two years and shall be available for official review upon request of the Department.

310:225-7-2. Possible source contamination

- (a) Where a bottled water plant operator, water dealer or regulatory agency knows or has reason to believe that a contaminant not otherwise monitored is present in the source water because of a spill, release of a hazardous substance or otherwise, and its presence would create a potential health hazard to consumers, the plant operator or water dealer upon receipt of such information shall monitor the source water for said contamination.
- (b) Detection of contaminant(s) in source monitoring required pursuant to this Subchapter shall be followed immediately by a program of periodic monitoring to confirm the presence in the source water of said contaminant(s). If such listed unregulated contaminant(s) is confirmed to be present in the source water at a concentration that exceeds a published U.S. EPA Health Advisory, or a U.S. EPA or Department Action Level for drinking water, the plant operator or water dealer shall employ appropriate treatment techniques to remove or to reduce said contaminant in the product water below said concentration and shall employ a program of periodic monitoring for said contaminant in the source water until such time as said contaminant is not detectable in the source water.

310:225-7-3. Finished product monitoring

To assure that bottled water complies with Section 310:225-3-2, the following product monitoring using representative samples derived from the bottled product shall be performed:

- (1) For microbiological contaminants specified in Section 310:225-3-2 analyze weekly a representative sample from a batch or segment of a continuous production run for each type of bottled water produced by the plant.
- (2) For chemical, physical and radiological contaminants specified in Section 310:225-3-2 analyze annually a representative sample from a batch or segment of continuous product run for each type

of bottled drinking water produced by the plant.

310:225-7-4. Finished product sampling and analysis

(a) The required product water sampling shall be performed by qualified personnel and required analysis shall be performed by approved laboratory.

(b) Records of required sampling and analysis shall be maintained at the plant not less than two years and shall be available for official review upon request of the Department.

SUBCHAPTER 9. LABELING REQUIREMENTS

310:225-9-1. Labeling requirements

All bottled water shall conform to applicable federal and state labeling laws and be labeled in compliance with the following standards:

(1) Mineral water may be labeled "Mineral Water". Bottled water to which minerals are added shall be labeled so as to disclose that minerals are added, and may not be labeled "Natural Mineral Water".

(2) Spring water may be labeled "Spring Water" or "Natural Spring Water".

(3) Water containing carbon dioxide that emerges from the source and is bottled directly with its entrapped gas or from which the gas is mechanically separated and later reintroduced at a level not higher than naturally occurring in the water may bear on its label the words "Naturally Carbonated" or "Naturally Sparkling".

(4) Bottled water which contains carbon dioxide other than that naturally occurring in the source of the product shall be labeled with the words "Carbonated", "Carbonated Added" or "Sparkling" when the carbonation is obtained from a natural or manufactured source.

(5) Well water may be labeled "Well Water" or "Natural Well Water".

(6) Artesian water may be labeled "Artesian Water", or "Natural Artesian Water".

(7) Purified water shall be labeled "Purified Water" and the method of preparation shall be stated on the label, except that purified water produced by distillation may be labeled as "Distilled Water".

(8) Drinking water may be labeled "Drinking Water".

(9) Any bottler, distributor or vendor of bottled water whose corporate name, brand name or trademark contains the words "Spring", "Well", "Artesian", "Mineral", or "Natural" or any derivative of those words shall label each bottle with the type of bottled water as defined in Section 310:225-1-2 in typeface at least equal to the size of the typeface of the corporate name, brand name or trademark, if the type of the bottled water is different from the type stated or implied in the corporate name, brand name or trademark.

(10) The use of word "Spring", or any derivative thereof other than a trademark, trade name or company name to describe water that is not spring water as defined herein shall be prohibited.

(11) A product meeting more than one definition as stated in Section 310:225-1-2 may be identified by any one of the applicable product types defined in Section 310:225-1-2, except where otherwise specifically prohibited.

(12) Supplemental printed information and graphics concerning recognized uses of the water may appear on the label but shall not imply properties of the product or preparation methods which are not factual.

SUBCHAPTER 11. LICENSES TO PROCESS, SELL OR DISTRIBUTE BOTTLED WATER

310:225-11-1. Licenses to process, sell, or distribute bottled water

Any person desiring to operate a bottled water plant, or to sell or distribute bottled water, in Oklahoma shall make application to the State Commissioner of Health for a permit, and obtain a valid license prior to the operation of the bottled water plant or the distribution and sale of bottled water. Application for such license shall be on a form supplied by the Commissioner and shall contain such information as the Commissioner deems necessary to determine that the operation of the bottled water plant or sale of bottled water will in no manner be injurious or hazardous to the health or safety of the people of the state. Each application for a license and license renewal shall be accompanied by the proper fee. The fee paid and license issued shall be for the particular bottled water plant to be operated and shall not be transferred to another person or location.

310:225-11-2. Out-of-state licenses

Out-of-State licenses to process, sell, or distribute bottled water shall be issued, upon receipt of the following:

- (1) Documentation from the State where the facility is located that the facility is in compliance with their laws;
- (2) Receipt of a signed application along with the appropriate fee.

310:225-11-3. Plan review

Before any bottled water plant is constructed, reconstructed, or extensively altered, properly prepared plans shall be approved by the State Commissioner of Health.

310:225-11-4. Access

Representatives of the Oklahoma State Department of Health, after proper identification, shall be permitted to enter any bottled water facility at any reasonable time for the purpose of making inspections to determine compliance with the rules of this Chapter. The representative

shall be permitted to examine the records of the facility to obtain information pertaining to the operation of the facility.

310:225-11-5. License revocation and suspension

Procedures for revocation and suspension of licenses to process, sell, or distribute bottled water are stated in the Oklahoma Administrative Procedures Act.

310:225-11-6. Inspection

As a condition of receiving a license, and annually thereafter, the water bottler shall receive a plant inspection demonstrating compliance with the Good Manufacturing Practices and Operational Requirements of these regulations. Said inspection shall be conducted by the State in which the bottling facility is located, by the FDA, or by a third party inspection organization (such as NSF) acceptable to the Department.

CHAPTER 233. BODY PIERCING AND TATTOOING

[**Authority:** 21 O.S., §§ 842.1 et seq.; 63 O.S., §§ 1-104 et seq.]

[**Source:** Codified 6-25-99]

SUBCHAPTER 1. GENERAL PROVISIONS

310:233-1-1. Purpose

This Chapter implements the provisions of 21 O.S. Sections 842.1, 842.2 and 842.3.

[**Source:** Added at 16 Ok Reg 1701, eff 3-23-99 (emergency); Added at 16 Ok Reg 2458, eff 6-25-99 ; Amended at 24 Ok Reg 186, eff 11-1-06 (emergency); Amended at 24 Ok Reg 1928, eff 6-25-07 ; Amended at 39 Ok Reg 1224, eff 9-11-22]

310:233-1-2. Definitions

The following words and terms, when used in this Chapter, shall have the following meaning unless the context clearly indicates otherwise:

"Aftercare" means written instructions given to the client, specific to the body piercing or tattooing procedure(s) rendered, on caring for the body piercing or tattoo and surrounding area.

"Antiseptic" means an agent that destroys disease-causing microorganisms on human skin or mucosa.

"Apprentice" means *any person who is training under the supervision of a licensed tattoo artist. That person cannot independently perform the work of tattooing. Apprentice also means any person who is training under the supervision of a licensed body piercing artist. That person cannot independently perform the work of body piercing* [21:842.1(D)(6)].

"Apprentice program" means an approved body piercing or tattooing training program conducted by an approved sponsor.

"Apprentice sponsor" means an individual approved by the Department to sponsor a body piercing or tattooing apprentice program.

"Artist" means *the person who actually performs the body piercing or tattooing procedure* [21:842.1(D)(5)].

"Aseptic technique" means a hygienic practice which prevents and hinders the direct transfer of microorganisms, regardless of pathogenicity, from one person or place to another person or place.

"Autoclave" means a piece of medical equipment that employs the steam under pressure method of sterilization.

"Bloodborne pathogen certification" means a training program that shall contain a general explanation of epidemiology and symptoms of bloodborne diseases.

"Body piercing" means *a procedure in which an opening is created in a human body solely for the purpose of inserting jewelry or other decoration; provided, however, the term does not include ear piercing* 21:842.1(D)(1).

"Body piercing operator" means *any person who owns, controls, operates, conducts, or manages any permanent body piercing establishment, whether actually performing the work of body piercing or*

not [21:842.1(C)(3)].

"Church" means *an establishment, other than a private dwelling, where religious services are usually conducted* [21:842.3(C)(3)(b)].

"Client" means a person requesting the application of a body piercing or tattoo.

"Contaminated waste" means any liquid or semi-liquid blood or other potentially infectious materials; contaminated items that would release blood or other potentially infectious materials in a liquid or semi-liquid state if compressed; items that are caked with dried blood and other potentially infectious materials, as defined in 29 Code of Federal Regulations Part 1910.1030, known as "Occupational Exposure to Bloodborne Pathogens".

"CPR Certification" means Cardiopulmonary Resuscitation and shall include instruction for the basic adult CPR training.

"Department" means the Oklahoma State Department of Health.

"Disinfection" means the destruction of disease-causing microorganisms on inanimate objects or surfaces, thereby rendering these objects safe for use or handling; a process of reducing the number of microorganisms on cleaned procedure surfaces and equipment to a safe level with germicidal solution as has been approved by the Department.

"Ear piercing" means puncturing the lobe of the ear not to include cartilage.

"Ear piercing gun" means a device that pierces an individual's ear lobe using a single-use stud and clasp ear piercing system.

"Equipment" means all machinery, including fixtures, containers, vessels, tools, devices, implements, furniture, display and storage areas, sinks and all other apparatus and appurtenances used in connection with body piercing and tattooing procedures.

"First aid certification" means a training program that includes instruction in injury and acute illness.

"Germicidal solution" means a cleansing agent that kills disease-causing microorganisms on hard surfaces and is a disinfectant or sanitizer registered with the Environmental Protection Agency.

"Germicidal soap" means an agent designed for use on the skin that kills disease-causing microorganisms.

"Handwashing facility" means a sink equipped with hot and cold or tempered running water under pressure, used for washing hands, arms or other portions of the body.

"Hot water" means water that attains at least 100°F.

"Integrator strips" means strips or devices used in pouches or autoclave chambers that prove the condition of sterilization has been met.

"Jewelry" means any personal ornament inserted into a newly pierced area.

"License" means written approval by the Department for an artist to perform body piercing or tattooing or written approval by the Department to operate a body piercing or tattoo establishment.

"Operator" means:

(A) body piercing operator, which is *any person who owns, controls, operates, conducts, or manages any permanent*

body piercing establishment, whether actually performing the work of body piercing or not. A mobile unit, including, but not limited to, a mobile home, recreational vehicle, or any other nonpermanent facility, shall not be used as a permanent body piercing establishment [21 O.S. § 84201(D)(3)]; or

(B) tattoo operator, which is any person who owns, controls, operates, conducts, or manages any permanent tattooing establishment whether performing the work of tattooing or not, or a temporary location that is a fixed location at which an individual tattoo operator performs tattooing for a specified period of not more than seven (7) days in conjunction with a single event or celebration, where the primary function of the event or celebration is tattooing [21 O.S. § 84201(D)(4)].

"Procedure surface" means any part of furniture or fixtures designed to contact the client's body during a body piercing or tattooing procedure or any surface where instruments and equipment have come into contact with the client during the procedure.

"Regulatory authority" means a representative, such as an onsite inspector, of the Department.

"Sharps" means any object (sterile or contaminated) that may purposefully or accidentally cut or penetrate the skin or mucosa including, but not limited to, pre-sterilized single use piercing or tattooing needles and razor blades.

"Sharps container" means a puncture-resistant, leak-proof container that is labeled or color coded that can be closed for disposal.

"Single use" means products or items that are intended for one-time, one-person use and are disposed of after use on each client including, but not limited to, cotton swabs or balls, tissues or paper products, paper or plastic cups, gauze and sanitary coverings, razors, piercing and tattooing needles and protective gloves.

"Skills challenge" means a testing mechanism that enables persons who have received training in tattooing and have experience in performing tattooing procedures to challenge the training requirements by satisfactorily completing the written examination.

"Spore test" means a biological monitoring process in which a third party laboratory culturing service is engaged to monitor spore growth on media processed in an autoclave.

"Statim autoclave" means a brand of autoclave utilizing the steam flush pressure pulse method of sterilization.

"Sterilization" means a process resulting in the destruction of all forms of microbial life, including highly resistant bacterial spores.

"Student" means an individual approved for the curriculum portion of the training program and cannot perform tattoo or body piercing procedures on a human.

"Tattooing" means *the practice of producing an indelible mark or figure on the human body by scarring or inserting a pigment under the skin using needles, scalpels, or other related equipment; provided that medical micropigmentation, performed pursuant to the provisions of the Oklahoma Medical Micropigmentation Regulation Act, shall not be*

construed to be tattooing [21:842.1(C)(2)].

"Temporary artist license" means a person that is not licensed through the State of Oklahoma that is a body piercing artist or tattoo artist doing temporary work at a licensed body piercing or tattoo establishment not to exceed 30 days.

"Ultrasonic cleaning unit" means a piece of medical equipment utilizing ultrasound energy to thoroughly clean instruments for body piercing or tattooing.

"Universal precautions" means an approach to infection control that treats all human blood and certain human body fluids as if known to be infectious for Human Immunodeficiency Virus (HIV), Hepatitis B Virus (HBV), Hepatitis C Virus (HCV), and other bloodborne pathogens.

310:233-1-3. Prohibited acts

(a) In addition to the prohibited acts stated in 21 O.S. §§ 842.1, 842.2, and 843.3, an artist can only use an ear-piercing gun on the portion of the earlobe that does not contain any cartilage.

(b) Artist shall not perform body piercing or tattoo procedures:

- (1) Without a valid artist license in the appropriate category issued by the Department;
- (2) Outside of a licensed body piercing or tattooing establishment or event;
- (3) Upon another person if the other person is under the influence of alcohol or a controlled substance;

(c) Tattoo and body piercing establishments shall not:

- (1) Operate or solicit business as a body piercing or tattoo establishment without a valid establishment license, in the appropriate category, issued by the Department;
- (2) Allow eating or drinking by anyone within the procedure areas;
- (3) Allow smoking or vaping of any substance within the establishment;
- (4) Allow a person with an exposed infectious sore to work in any area of the establishment where there is a likelihood that they could contaminate instruments, supplies, or procedure surfaces with body substances or pathogenic organisms; and
- (5) Allow animals of other than fish in a fish tank except service animals used by persons with disabilities as defined in 28 CFR § 36.104.

(d) Tattoo procedures shall not be performed on a person under eighteen (18) years of age.

(e) Body Piercing procedures shall not be performed on a person under eighteen (18) years of age unless the legal parent or legal guardian of such a child gives written consent and is present for the procedure.

(f) No person shall be allowed to purchase or possess tattoo equipment or supplies without being licensed either as an Oklahoma Medical Micropigmentologist or as an Oklahoma tattoo artist.

(g) A mobile unit, including, but not limited to, a mobile home, recreational vehicle, cargo trailer or any other non-permanent facility, shall not be used as a body piercing or tattoo establishment.

SUBCHAPTER 3. BODY PIERCING ARTIST AND TATTOO ARTIST STANDARDS

310:233-3-1. Records [REVOKED]

[Source: Added at 16 Ok Reg 1701, eff 3-23-99 (emergency); Added at 16 Ok Reg 2458, eff 6-25-99 ; Amended at 24 Ok Reg 186, eff 11-1-06 (emergency); Amended at 24 Ok Reg 1928, eff 6-25-07 ; Revoked at 39 Ok Reg 1224, eff 9-11-22]

310:233-3-1.1. Hygienic standards

(a) **General.** An artist must comply with all hygienic practices and procedures described in this section.

(b) **Personal Hygiene.** When performing procedures an artist maintains a high degree of personal cleanliness, wears clean clothes, and closed-toe shoes.

(c) **Washing and Drying Hands.** To properly wash and dry hands, an artist will:

- (1) thoroughly wash his/her hands in warm running water that is at least 100 °F with germicidal soap;
- (2) rinse his/her hands in warm running water that is at least 100 °F; and
- (3) dry with disposable paper towels.

(d) **When to Wash and Dry Hands.** An artist will wash and dry his/her hands as described in (c) of this Section:

- (1) immediately before donning gloves to perform a procedure;
- (2) immediately after removing gloves at the conclusion of a procedure;
- (3) when leaving the work area;
- (4) as soon as feasibly possible after potential contact with a contaminated surface; and
- (5) after eating, drinking, vaping, or smoking.

(e) **Disposable Gloves.** An artist wears disposable exam gloves to minimize the possibility of transmitting infection to the client. Exam gloves are put on and removed in accordance with aseptic technique.

(1) At least one new pair of exam gloves is used for each of the following stages:

- (A) Hard surface disinfection;
- (B) Setup of instruments;
- (C) Preparation of the body art area; and
- (D) The procedure.

(2) If the glove is pierced or torn while performing a procedure, then the contaminated gloves are discarded immediately, and the artist's hands are washed and dried as described in (c) of this

Section before a fresh pair of gloves are applied.

(f) **Item or Instrument Contamination.** Any item or instrument that has come into contact with a surface other than the procedure surface or the client during the procedure is discarded and replaced immediately with a new disposable item or a new sterilized instrument.

(g) **Disinfect Surface Area.** All procedure surfaces are disinfected with a germicidal solution immediately after completing a procedure.

[Source: Added at 39 Ok Reg 1224, eff 9-11-22]

310:233-3-2. Prohibited acts [REVOKED]

[Source: Added at 16 Ok Reg 1701, eff 3-23-99 (emergency); Added at 16 Ok Reg 2458, eff 6-25-99 ; Amended at 24 Ok Reg 186, eff 11-1-06 (emergency); Amended at 24 Ok Reg 1928, eff 6-25-07 ; Amended at 27 Ok Reg 2507, eff 7-25-10 ; Revoked at 39 Ok Reg 1224, eff 9-11-22]

310:233-3-2.1. Preparation and care of the body art area

(a) Before a procedure is performed, the immediate and surrounding area of the skin shall be prepared with an approved antiseptic skin preparation.

(b) Oral piercing shall be prepared with an oral antiseptic mouth rinse.

(c) If shaving is necessary, single use disposable razors shall be used and discarded into a sharps container.

(d) Any utensil used for marking the skin shall be single use and disposed of after the procedure.

(e) Any skin or mucosa surface being prepared for a procedure shall be free of rashes or any visible signs of infection.

(f) Any jewelry inserted into a fresh piercing shall be:

(1) Autoclave sterilized while fully disassembled; and

(2) Inspected and found free of nicks, scratches or irregular surfaces before insertion into a fresh body piercing.

(g) Jewelry shall be made of:

(1) 316L or 316LVM stainless steel;

(2) Solid 14k or 18k yellow or white nickel-free gold;

(3) Niobium;

(4) Titanium or platinum;

(5) Poly Tetra Fluoro Ethylene (PTFE); or

(6) Tygon.

[Source: Added at 39 Ok Reg 1224, eff 9-11-22]

310:233-3-3. Standards [REVOKED]

[Source: Added at 16 Ok Reg 1701, eff 3-23-99 (emergency); Added at 16 Ok Reg 2458, eff 6-25-99 ; Amended at 24 Ok Reg 186, eff 11-1-06 (emergency); Amended at 24 Ok Reg 1928, eff 6-25-07 ; Amended at 27 Ok Reg 2507, eff 7-25-10 ; Revoked at 39 Ok Reg 1224, eff 9-11-22]

310:233-3-3.1. Reusable equipment

(a) **General.** After each use, non-disposable instruments and reusable equipment must comply with the cleaning and sterilizing processes and procedures stated in this Section.

(b) **Preclean.** To remove residue an instrument is pre-cleaned either manually or mechanically.

(1) Manual scrubbing is performed by thoroughly scrubbing with an appropriate detergent and water solution with items fully submerged. While manually scrubbing, the person will wear appropriate personal protective equipment including:

- (A) full length sleeves;
- (B) elbow-high gloves;
- (C) apron; and
- (D) face mask with eye protection.

(2) Mechanical cleaning consists of following the instructions provided with the device.

(c) **Enzyme Cleaner in Ultrasonic Devise.** After precleaning and rinsing the instruments, they are then placed in an ultrasonic cleaning unit and submerged in a protein-dissolving enzyme cleaner or detergent per the manufacturer's instructions.

(d) **Packaging.** After the instruments have been placed in an ultrasonic cleaner, all packaged, non-disposable instrument are instruments are dried and packed individually in sterilized pouches. These sterilized pouches contain either an indicator or integrator strip. Additionally, the expiration date stated on the pouch cannot exceed 6 months from when the instrument was packed into the sterilized pouch.

(e) **Autoclave.** All packaged, non-disposable instruments are sterilized in a steam autoclave. The autoclave is used, cleaned, and maintained according to the manufacturer's instructions. A copy of the manufacturer's recommended procedures for the autoclave is kept on site and available for inspection.

(g) **Storing.** After properly packaged, instruments are immediately stored in a dry, clean cabinet or tightly covered container reserved for the storage of such instrument. All instruments remain properly stored in their sterile pouches until just before performing a procedure. Sterile equipment can only be handled with clean gloves and cannot be used if the package has been breached or after the expiration date without first repackaging and resterilizing.

(h) **Statim Autoclave Option.**

(1) For establishments utilizing a Statim autoclave, an operator will need to take monthly spore tests that are verified through an independent laboratory to confirm that the Statim autoclave is capable of attaining sterilization.

(2) The reusable items are sterilized in a bulk load without sterilization pouches, just before the procedure.

(3) Items are used immediately after opening the Statim autoclave cassette.

(4) The items contained in the cassette are used for one client only and include the use of an integrator strip.

(i) **Assembling.** When assembling instruments, the artist will wear disposable exam gloves and use aseptic techniques to ensure that the instruments and gloves are not contaminated.

310:233-3-4. Exemptions [REVOKED]

[Source: Added at 16 Ok Reg 1701, eff 3-23-99 (emergency); Added at 16 Ok Reg 2458, eff 6-25-99 ; Amended at 24 Ok Reg 186, eff 11-1-06 (emergency); Amended at 24 Ok Reg 1928, eff 6-25-07 ; Revoked at 39 Ok Reg 1224, eff 9-11-22]

310:233-3-4.1. Single use items

Single use items cannot be used on more than one client for any reason. After use, all needles, razors and other sharps shall be immediately disposed of in an approved sharps container.

[Source: Added at 39 Ok Reg 1224, eff 9-11-22]

310:233-3-5. Public notification requirements [REVOKED]

[Source: Added at 16 Ok Reg 1701, eff 3-23-99 (emergency); Added at 16 Ok Reg 2458, eff 6-25-99 ; Amended at 24 Ok Reg 186, eff 11-1-06 (emergency); Amended at 24 Ok Reg 1928, eff 6-25-07 ; Revoked at 39 Ok Reg 1224, eff 9-11-22]

310:233-3-5.1. Client identification

(a) Acceptable forms of government issued identification shall include the client's name, picture, and date of birth.

(b) To pierce a minor, the identification in (a) of this section is required from the legal parent or legal guardian. Identification for the minor shall include an original birth certificate and a photo ID of the minor, or court documentation verifying legal guardianship and a photo ID of the minor.

[Source: Added at 39 Ok Reg 1224, eff 9-11-22]

310:233-3-6. Client records [REVOKED]

[Source: Added at 16 Ok Reg 1701, eff 3-23-99 (emergency); Added at 16 Ok Reg 2458, eff 6-25-99 ; Amended at 24 Ok Reg 186, eff 11-1-06 (emergency); Amended at 24 Ok Reg 1928, eff 6-25-07 ; Revoked at 39 Ok Reg 1224, eff 9-11-22]

310:233-3-6.1. Consent form

(a) A client must sign a consent form before receiving a body piercing or tattoo. The consent form summarizes the procedure information. It shall include:

- (1) The name, and address of the establishment;
- (2) The name, date of birth, and address of the client;
- (3) The date of the procedure;
- (4) Identification and location of procedure(s) performed;
- (5) The artist's name and license number;
- (6) The signature of the artist; and
- (7) The signature of the client or guardian.
- (8) A photocopy of the client's government issued photo identification, or
- (9) A photocopy of the guardian's government issued photo identification if the client is a minor.

(b) In order for the artist to properly evaluate the client's condition prior to a procedure, the following questions shall be asked of the client in the consent form:

- (1) Does the client have a history of:
 - (A) Diabetes;
 - (B) Hemophilia or excessive bleeding;
 - (C) Skin disease, skin lesions or skin sensitivities to soaps or disinfectants;
 - (D) Allergies, adverse reactions or other skin sensitivities;or
- (E) Epilepsy, seizures, fainting or narcolepsy.
- (2) If the client is:
 - (A) Taking medications such as anticoagulant;
 - (B) Pregnant and/or nursing; and
 - (C) When the client last ate.
- (3) Other pertinent medical history or condition that might affect the healing process.

[Source: Added at 39 Ok Reg 1224, eff 9-11-22]

310:233-3-7. Preparation and care of the body art area [REVOKED]

[Source: Added at 16 Ok Reg 1701, eff 3-23-99 (emergency); Added at 16 Ok Reg 2458, eff 6-25-99 ; Amended at 24 Ok Reg 186, eff 11-1-06 (emergency); Amended at 24 Ok Reg 1928, eff 6-25-07 ; Revoked at 39 Ok Reg 1224, eff 9-11-22]

310:233-3-7.1. Aftercare instructions

Before starting the procedure, the operator or artist, shall provide verbal and written aftercare instructions regarding the procedure to include:

- (1) The name, address, and telephone number of the establishment;
- (2) The artist name;
- (3) That it is still possible to have transmission of a bloodborne disease or infection as a result of a body piercing or tattoo;
- (4) To consult a physician at the first sign of infection;
- (5) That the establishment complies with this Chapter;
- (6) That complaints may be filed with the department; and
- (7) Caring for the body piercing or tattoo and surrounding area.

[Source: Added at 39 Ok Reg 1224, eff 9-11-22]

310:233-3-8. Records retention

The following information shall be kept on file on the premises of a body-piercing or tattooing establishment and shall be available for inspection by the regulatory authority:

- (1) A complete definition of all body piercing procedures performed;
- (2) An inventory of all instruments and supplies, including body jewelry, sharps used for any and all body piercing or tattooing

procedures, including names of manufacturers and serial or lot numbers, if applicable, which may be satisfied by retaining invoices or orders;

(3) Autoclave testing records as described in OAC 233 3-3.1.

(4) Signed consent forms for all body piercing or tattoo procedures administered;

(5) Client records of procedures performed shall be

(A) Confidential;

(B) Made available to the regulatory authority upon request;

(C) Retained for three (3) years; and

(D) Destroyed by shredding or other appropriate destruction methods after three (3) years.

SUBCHAPTER 7. REQUIREMENTS FOR PREMISES

310:233-7-1. Physical construction and maintenance [REVOKED]

[Source: Added at 16 Ok Reg 1701, eff 3-23-99 (emergency); Added at 16 Ok Reg 2458, eff 6-25-99 ; Amended at 24 Ok Reg 186, eff 11-1-06 (emergency); Amended at 24 Ok Reg 1928, eff 6-25-07 ; Revoked at 39 Ok Reg 1224, eff 9-11-22]

310:233-7-1.1. Establishment physical construction

(a) A mobile unit, including, but not limited to, a mobile home, recreational vehicle, cargo trailer or any other non-permanent facility, shall not be used as a body piercing or tattoo establishment.

(b) All walls, floors, and procedure surfaces of an establishment shall be smooth, free of open holes or cracks, washable, in good repair, and clean.

(c) Establishments shall be completely separated by solid walls, with no doors or windows, from any room used for human habitation, where food is prepared or served other than an employee break room, where services other than body piercing or tattooing is provided such as hair,

nails and tanning services, or other such activity which may cause potential contamination of procedure surfaces.

(d) Establishments must comply with all applicable building laws.

(e) Reusable cloth items cannot be used in the licensed establishment.

(f) Establishment shall have an area which may be screened from public view for clients requesting privacy.

(g) Artificial light equivalent to at least twenty (20) foot candles shall be provided in all areas.

(h) A restroom with at least 1 toilet and not fewer than the toilets required by law shall be provided.

(1) The restroom shall be completely enclosed and provided with a self-closing door.

(2) A restroom used by females shall be provided with a covered receptacle for sanitary napkins.

(3) A supply of toilet tissue shall be available at each toilet.

(4) It shall be equipped with a handwashing sink with:

(A) Hot and cold running water, under pressure;

(B) Liquid germicidal soap;

(C) Disposable paper towels; and

(D) A covered waste receptacle.

[Source: Added at 39 Ok Reg 1224, eff 9-11-22]

310:233-7-2. Location requirements and limitations [REVOKED]

[Source: Added at 24 Ok Reg 186, eff 11-1-06 (emergency); Added at 24 Ok Reg 1928, eff 6-25-07 ; Amended at 27 Ok Reg 2507, eff 7-25-10 ; Revoked at 39 Ok Reg 1224, eff 9-11-22]

310:233-7-2.1. Procedure areas

(a) Multiple procedure areas shall be separated from each other by a wall or rigid divider to visually define the space and limit potential contamination of neighboring procedure areas.

(b) Each procedure area shall:

(1) Have a minimum of forty-five (45) square feet of floor space;

(2) Have a sharps container available;

(3) Be equipped with a handwashing facility with:

(A) Hot and cold running water, under pressure;

(B) Wrist or foot operated controls;

(C) Liquid germicidal soap;

(D) Disposable paper towels; and

(E) A covered waste receptacle.

(c) All procedure area surfaces, including client chairs and benches shall be cleaned and disinfected after each client.

(d) Artificial light equivalent to at least one hundred (100) foot candles of intensity shall be provided.

[Source: Added at 39 Ok Reg 1224, eff 9-11-22]

310:233-7-3. Decontamination room

(a) The establishment shall have a separate:

(1) Fully enclosed room for the decontamination and packaging of contaminated instruments; and

(2) An area or room where the autoclave is housed and utilized that is only exposed to contaminated, packaged instruments that are loaded directly into the autoclave from the decontamination room.

(A) This decontamination room shall contain all equipment and supplies used for decontaminating instruments; and

(B) Will be where all steps of the sterilization process take place until the transfer of the packaged contaminated instruments to the autoclave.

(b) The area or room that contains the autoclave shall not be part of the procedure room or area where clients have access.

[Source: Added at 39 Ok Reg 1224, eff 9-11-22]

310:233-7-4. Waste disposal

(a) Contaminated waste which may release liquid blood or body fluids when compressed or may release dried blood or body fluids when handled shall be placed in a biohazard bag or container which is properly labeled and disposed of consistent with OAC 252:515.

(b) Sharps ready for disposal shall be placed in a sharps container and disposed of consistent with OAC 252:515.

[Source: Added at 39 Ok Reg 1224, eff 9-11-22]

SUBCHAPTER 9. LICENSE REQUIREMENTS

310:233-9-1. Body piercing or tattoo license [REVOKED]

[Source: Added at 16 Ok Reg 1701, eff 3-23-99 (emergency); Added at 16 Ok Reg 2458, eff 6-25-99 ; Amended at 24 Ok Reg 186, eff 11-1-06 (emergency); Amended at 24 Ok Reg 1928, eff 6-25-07 ; Amended at 27 Ok Reg 2507, eff 7-25-10 ; Revoked at 39 Ok Reg 1224, eff 9-11-22]

310:233-9-1.1. Artist and establishment license

(a) The license holder must be a minimum of eighteen (18) years of age to be eligible for a license.

(b) A license will need to be renewed annually as it expires one year from the date of issuance, unless it is revoked or suspended by the Department before the expiration date.

(c) Each license shall be posted in a prominent and conspicuous area where it can be readily observed by clients.

(d) A license for a body piercing or tattoo establishment is issued for the physical location of the establishment. The license cannot be transferred to another owner or location.

[Source: Added at 39 Ok Reg 1224, eff 9-11-22]

310:233-9-2. Artist license [REVOKED]

[Source: Added at 16 Ok Reg 1701, eff 3-23-99 (emergency); Added at 16 Ok Reg 2458, eff 6-25-99 ; Amended at 24 Ok Reg 186, eff 11-1-06 (emergency); Amended at 24 Ok Reg 1928, eff 6-25-07 ; Amended at 27 Ok Reg 2507, eff 7-25-10 ; Amended at 34 Ok Reg 1276, eff 10-1-17 ; Revoked at 39 Ok Reg 1224, eff 9-11-22]

310:233-9-2.1. Event and establishment license application

(a) A completed application shall include:

(1) For the applicant:

- (A) Name;
- (B) Mailing address;
- (C) Telephone number; and
- (D) E-mail address.

(2) For the establishment:

- (A) Name;
- (B) If tattooing, body piercing, or both are to be conducted;
- (C) Information specifying whether the establishment is owned by an association, corporation, individual, partnership, or other legal entity;
- (D) Mailing address;
- (E) Physical address;
- (F) Telephone number; and
- (G) E-mail.
- (H) Other information as required by the Department.

(b) **Event.** In addition to the information identified in OAC 310:233-9-3.1, an event application shall be submitted at least thirty (30) days prior to the event and include:

- (1) Event Operator Name;
- (2) The physical location of the event;
- (3) The purpose of the event;
- (4) The start and end time of the event; and
- (5) The names and license numbers of the artists participating.

(c) **Issuance.** The Department will issue a license to the event or establishment after:

- (1) A properly completed application is received;
- (2) The required fees are received; and
- (3) A pre-licensing inspection shows that the event or establishment is in compliance with this Chapter and meets the Department's criteria for licensure.

[Source: Added at 39 Ok Reg 1224, eff 9-11-22]

310:233-9-3. Prohibitions [REVOKED]

[Source: Added at 16 Ok Reg 1701, eff 3-23-99 (emergency); Added at 16 Ok Reg 2458, eff 6-25-99 ; Amended at 24 Ok Reg 186, eff 11-1-06 (emergency); Amended at 24 Ok Reg 1928, eff 6-25-07 ; Revoked at 39 Ok Reg 1224, eff 9-11-22]

310:233-9-3.1. Event license

(a) An event license may be issued for body piercing or tattoo procedures for the purposes of:

- (1) Product demonstration;
- (2) Industry trade shows; or
- (3) Educational reasons.

(b) The event shall:

- (1) Be for a specified period not to exceed three (3) consecutive days;
- (2) Be a single event, where the primary function of the event is body piercing or tattooing;
- (3) Be affiliated with an establishment that has a current license issued by the Department;
- (4) Be contained in a completely enclosed, non-mobile environment;
- (5) Have artists that meet the requirements outlined in OAC 310:233-9-4.1; and
- (6) Ensure a safe and sanitary environment by:
 - (A) Providing facilities to properly sterilize instruments; or
 - (B) Only using single use, prepackaged, sterilized equipment.

(c) Temporary licenses are not transferable from one special event to another.

310:233-9-4. Body piercing or tattoo operators surety bond [REVOKED]

[Source: Added at 24 Ok Reg 186, eff 11-1-06 (emergency); Added at 24 Ok Reg 1928, eff 6-25-07 ; Revoked at 27 Ok Reg 2507, eff 7-25-10]

310:233-9-4.1. Individual license and certificate applications

(a) The complete application for any individual license or certificate shall include:

- (1) Name;
- (2) License number if applicable;
- (3) List of Alias;
- (4) Date of birth;
- (5) Sex;
- (6) Residence address;
- (7) Mailing address;
- (8) Email address;
- (9) Telephone number;
- (10) Location of current practice Identified;
- (11) The license type, tattooing or body piercing, Identified;
- (12) Copy of the applicant's certificate of birth;
- (13) Copy of the applicant's government-issued photo identification (e.g. a valid driver's license, passport, etc.);
- (14) Other information as required by the Department; and
- (15) Any applicable fees.

(b) **Documents.** In addition to the information identified in (a) of this section, an initial application for apprentice, permanent, or temporary artist shall include:

- (1) Current certification from a recognized nationally accredited program for:
 - (A) Bloodborne pathogens;
 - (B) First aid certification; and
 - (C) CPR certification.
- (2) Proof of experience such as:
 - (A) Proof of the successful completion of an apprentice program as described in OAC 310:233-9-8.1, or
 - (B) Documentation of two (2) years of appropriate licensure by another government entity such as:
 - (i) Copies of licenses,
 - (ii) Statements from the state's regulatory authority,
 - (iii) Statements from the facility operator where the applicant worked,
 - (iv) Membership in an entity for which practice as an artist is a requisite, or
 - (v) Government forms such as tax returns filed by the artist showing employment as an artist;

(c) **Skills challenge.** A person who has acceptable proof of experience or training as required in (a) or (b) of this section, may be approved by the Department to take the skills challenge to obtain an apprentice or permanent license.

- (1) Within thirty (30) days after receipt of a completed application, the Department shall notify the applicant of its decision to approve or disapprove the applicant to take the examination.
- (2) An applicant who is eligible for the skills challenge must present a letter of notification from the Department to administer the test given by Oklahoma Department of Career and Technology Education.
- (3) The Department shall accept the test administered by the Oklahoma Department of Career and Technology Education with results to be evidenced by a completed testing verification provided to the Department by the Oklahoma Department of Career and Technology Education.
- (4) The written examination will include:
 - (A) Knowledge of Anatomy;
 - (B) Physiology, and Disease;
 - (C) Theory and application;
 - (D) Safety and Aseptic Technique;
 - (E) Professionalism; and
 - (F) Client Consultation Services.
- (5) Minimum passing score for the written examination is 70%.
- (6) A candidate who does not meet this score may retest up to two (2) times, however
 - (A) They must wait at least seven (7) days before retesting; and

- (B) After three attempts are required to repeat the student program.
- (d) **Renewals.** In addition to the information identified in (a) of this section, a renewal of an artist license shall include current certification from a recognized nationally accredited program for:
- (1) Bloodborne pathogens;
 - (2) First aid certification; and
 - (3) CPR certification.
- (e) **Student and apprentice.** In addition to the information identified in (a) of this section, a student or apprentice shall identify their sponsor.
- (f) **Sponsor.** In addition to the information identified in (a) of this section, a sponsor shall provide:
- (1) An approved curriculum; or
 - (2) A proposed curriculum if none has been approved prior.
 - (3) The applicant for a sponsor certification shall meet the following qualifications:
 - (A) Holds a current Oklahoma artist license in the appropriate field;
 - (B) Provides documentation of legally practicing in the appropriate field for at least five (5) years;
 - (C) Supervises no more than one student in each curriculum at any one time;
 - (D) Supervises no more than one apprentice in each curriculum at any one time.

310:233-9-5. Apprentice sponsor [REVOKED]

[Source: Added at 24 Ok Reg 186, eff 11-1-06 (emergency); Added at 24 Ok Reg 1928, eff 6-25-07 ; Revoked at 39 Ok Reg 1224, eff 9-11-22]

310:233-9-5.1. License and certificate fees

(a) Tattoo or body piercing artist license and registration fees are as follows:

- (1) Student: \$0;
- (2) Sponsor: \$0;
- (3) Apprentice: \$250.00;
- (4) Initial: \$250.00;
- (5) Renewal: \$250.00;
- (6) Renewal thirty (30) days after expiration: \$350.00; and
- (7) Temporary: \$50.00;
 - (A) Not to exceed seven (7) consecutive days; and
 - (B) Not to exceed thirty (30) total days per year.

(b) Establishment license fees are as follows:

- (1) Tattoo:
 - (A) Initial: \$1,000.00.
 - (B) Renewal: \$500.00.
 - (C) Renewal thirty (30) days after expiration: \$750.00.
 - (D) Event: \$500.00.
- (2) Body piercing:

- (A) Initial: \$500.00.
- (B) Renewal: \$250.00.
- (C) Renewal thirty (30) days after expiration: \$350.00.
- (D) Event: \$250.00.

310:233-9-6. Apprentice program [REVOKED]

[Source: Added at 24 Ok Reg 186, eff 11-1-06 (emergency); Added at 24 Ok Reg 1928, eff 6-25-07 ; Revoked at 39 Ok Reg 1224, eff 9-11-22]

310:233-9-6.1. Student curriculum

(a) Curriculum requirements shall be taught over 1500 hours over the course of one year to include the following:

- (1) Microbiology;
- (2) Sanitation and disinfection;
- (3) Safety;
- (4) Bloodborne pathogen standards;
- (5) Professional standards; and
- (6) Body piercing or tattooing procedures based on the field of teaching.

(b) The sponsor shall sign off on the successful completion of the student curriculum with the completion of 1500 hours.

(c) The sponsor shall sign off on the successful completion of the Apprentice program with the completion of one (1) year of supervised, licensed work.

(d) The licensed apprentice procedures shall be under the direct face to face supervision of their apprentice sponsor.

[Source: Added at 39 Ok Reg 1224, eff 9-11-22]

310:233-9-7. Apprentice [REVOKED]

[Source: Added at 24 Ok Reg 186, eff 11-1-06 (emergency); Added at 24 Ok Reg 1928, eff 6-25-07 ; Revoked at 39 Ok Reg 1224, eff 9-11-22]

310:233-9-7.1. Suspension or withdrawal of sponsor certificate

(a) A sponsor certificate may be withdrawn or suspended temporarily by the Department for failure of the sponsor to comply with this chapter.

(b) The sponsor shall be notified in writing by the Department of the action and the ability to challenge the decision.

310:233-9-8. License application and review process [REVOKED]

[Source: Added at 24 Ok Reg 186, eff 11-1-06 (emergency); Added at 24 Ok Reg 1928, eff 6-25-07 ; Revoked at 39 Ok Reg 1224, eff 9-11-22]

SUBCHAPTER 11. ENFORCEMENT

310:233-11-1. General requirements [REVOKED]

[Source: Added at 16 Ok Reg 1701, eff 3-23-99 (emergency); Added at 16 Ok Reg 2458, eff 6-25-99 ; Amended at 24 Ok Reg 186, eff 11-1-06 (emergency); Amended at 24 Ok Reg 1928, eff 6-25-07 ; Revoked at 39 Ok Reg 1224, eff 9-11-22]

310:233-11-1.1. Waivers and variances

- (a) The operator of an establishment may request that a waiver be granted on any nonconforming use that may then exist, on or before the effective date of the rule change, at the license holder's place of operation.
- (b) The operator of an establishment may request that a variance be granted to portions of this chapter.
- (c) Waivers and variances requested pursuant to this Subchapter are subject to approval by the Department.
- (d) An operator must submit a written request detailing:
 - (1) The nature of the nonconforming use;
 - (2) The relevant section of this Chapter; and
 - (3) A timeline for correction of the nonconforming use; and
 - (4) A justification of how any public health concerns will be addressed.
- (e) If a request is approved, then the Department will send a notice of approval. If the operator has not received a notice of approval within sixty (60) calendar days from when the request was submitted, then the request has been denied.
- (f) Waivers and variances are not considered to be part of the license and may be revoked at any time, for any reason, by the Department. The licensee is not entitled to a hearing prior to revocation of a waiver or variance, but will be provided written notice of any revocation along with instructions that the licensee must become compliant by a certain date.

[Source: Added at 39 Ok Reg 1224, eff 9-11-22]

310:233-11-2. Investigation, filing of actions and hearing procedures [REVOKED]

[Source: Added at 16 Ok Reg 1701, eff 3-23-99 (emergency); Added at 16 Ok Reg 2458, eff 6-25-99 ; Amended at 24 Ok Reg 186, eff 11-1-06 (emergency); Amended at 24 Ok Reg 1928, eff 6-25-07 ; Revoked at 39 Ok Reg 1224, eff 9-11-22]

310:233-11-2.1. Time frame for correction

The license holder shall correct violations by a date and time agreed to or specified by regulatory authority but no later than thirty (30) calendar days after the inspection.

[Source: Added at 39 Ok Reg 1224, eff 9-11-22]

310:233-11-3. Suspension or revocation of licenses [REVOKED]

[Source: Added at 16 Ok Reg 1701, eff 3-23-99 (emergency); Added at 16 Ok Reg 2458, eff 6-25-99 ; Amended at 24 Ok Reg 186, eff 11-1-06 (emergency); Amended at 24 Ok Reg 1928, eff 6-25-07 ; Revoked at 39 Ok Reg 1224, eff 9-11-22]

310:233-11-3.1. Investigation and enforcement

- (a) If the Department determines that a possible violation of the Body Piercing or Tattoo statutes or Rules has occurred, the Department may commence an investigation of the complaint.
- (b) Hearings and disciplinary actions are conducted in accordance with the Administrative Procedures Act and Chapter 2 of this Title.
- (c) The Department will specifically state the violation(s) and request the appropriate remedy. Remedies may include revocation or suspensions of a license, and/or an administrative penalty.
- (d) The total administrative penalty amount assessed for all violations found through an investigation cannot exceed \$10,000.00.
- (e) If the Department determines that a licensee or applicant for licensure has engaged in conduct of a nature that is detrimental to the health, safety, or welfare of the public, and which conduct necessitates immediate action to prevent further harm, the Commissioner may order a summary suspension of the establishment or artist's license or authorization for sponsoring a student or apprentice.
- (f) An applicant for licensure shall not:
 - (1) Knowingly make a false statement of material fact; or
 - (2) Fail to disclose a fact necessary to correct a misapprehension regarding the application for licensure or the matter under investigation; or
 - (3) Fail to comply with a request for information made by the Department or any designated representative thereof.
- (g) The Department may notify the district attorney of any violation of 21 O.S. §842.1 or this Chapter [21 O.S § 842.3]
- (h) Additionally, an individual can also report criminal acts directly to a district attorney's office.

310:233-11-4. Suspension or withdrawal of apprentice sponsor [REVOKED]

[Source: Added at 24 Ok Reg 186, eff 11-1-06 (emergency); Added at 24 Ok Reg 1928, eff 6-25-07 ; Revoked at 39 Ok Reg 1224, eff 9-11-22]

CHAPTER 234. MEDICAL MICROPIGMENTATION

[**Authority:** 63 O.S., §§ 1-104 and 1-1450 et seq.]

[**Source:** Codified 6-27-02]

SUBCHAPTER 1. GENERAL PROVISIONS

310:234-1-1. Purpose

The rules implement the provisions of the Oklahoma Medical Micropigmentation Regulation Act, 63 O.S. Section 1-1450 et seq.

[**Source:** Added at 19 Ok Reg 378, eff 11-19-01 (emergency); Added at 19 Ok Reg 2067, eff 6-27-02 ; Amended at 39 Ok Reg 1241, eff 9-11-22]

310:234-1-2. Definitions

The following words and terms, when used in this Chapter, shall have the following meaning, unless the context clearly indicates otherwise:

"Autoclave bag" means a bag for holding instruments or other items, which are to be put into an autoclave for sterilization.

"Certification" means written approval by the Department for a person to perform medical micropigmentation.

"Committee" means the Consumer Protection Licensing Advisory Council.

"Contaminated waste" means any liquid or semi-liquid blood or other potentially infectious materials; contaminated items that would release blood or other potentially infectious materials in a liquid or semi-liquid state if compressed; items that are caked with dried blood and other potentially infectious materials, as defined in the "Bloodborne Pathogens." [29 CFR § 1910.1030]

"Department" means the Oklahoma State Department of Health.

"Equipment" means all machinery, including fixtures, containers, vessels, tools, devices, implements, furniture, display and storage areas, sinks and all other apparatus and appurtenances used in connection with medical micropigmentation procedures.

"Handsink" means a lavatory equipped with hot and cold running water under pressure used solely for washing hands, arms or other portions of the body.

"Hot water" means water that attains and maintains a temperature of 100 °F.

"Instruments used for medical micropigmentation" means handpieces, needles, needle bars and other instruments that may contact a client's body or body fluids during medical micropigmentation.

"Licensing board" means *the Oklahoma State Board of Medical Licensure and Supervision, the State Board of Osteopathic Examiners and/or the Board of Dentistry.* [63 O.S. Section 1-1451(1)]

"Medical micropigmentation" means *a medical procedure in which any color or pigment is applied with a needle or electronic machine:*

(A) *To produce a permanent mark visible through the skin;*

(B) *Above the jawline and anterior to the ear and frontal hairline including but not limited to application of eyeliner, eye shadow, lips, eyebrows, cheeks, and scars; and/or*
(C) *For regimentation of areas involving reconstructive surgery or trauma.* [63 O.S. Section 1-1451(2)]

"Physician" means a person licensed to practice:

(A) *Allopathic medicine and surgery by the Oklahoma State Board of Medical Licensure and Supervision pursuant to the Oklahoma Allopathic Medical and Surgical Licensure and Supervision Act.*

(B) *Osteopathic medicine by the State Board of Osteopathic Examiners pursuant to the Oklahoma Osteopathic Medicine Act, or*

(C) *Dentistry by the Board of Dentistry pursuant to the State Dental Act.* [63 O.S. Section 1-1451(3)].

"Poses a reasonable threat" means *the nature of criminal conduct for which the person was convicted involved an act or threat of harm against another and has a bearing on the fitness or ability to serve the public or work with others in the occupation.* [63 O.S. Section 1-1451(E)(2)]

"Procedure surface" means any part of equipment designed to contact the client's unclothed body during a medical micropigmentation procedure.

"Sanitize" means a process of reducing the number of microorganisms on cleaned surfaces and equipment to a safe level and has been approved by the Department.

"Sharps" means any object (sterile or contaminated) that may purposefully or accidentally cut or penetrate the skin or mucosa including, but not limited to, pre-sterilized, single use needles, scalpel blades and razor blades.

"Sharps container" means a puncture-resistant, leak-proof container that can be closed for handling, storage, transportation and disposal and is labeled with the International Biohazard Symbol.

"Single use" means products or items that are intended for one-time, one-person use and are disposed of after use on each client including, but not limited to, cotton swabs or balls, tissues or paper products, paper or plastic cups, gauze and sanitary coverings, razors, piercing needles, and protective gloves.

"Skills area evaluation" means an evaluation given at the end of instruction for a particular skills area that consists of two parts: technique and theory. Mastery of technique shall be demonstrated by performing the skills on the job sheet(s) for that skills area in the presence of an approved evaluator (supervising physician or instructor) with 100% accuracy. A candidate demonstrates mastery of micropigmentation theory by scoring 85% or greater on a written test over the material in that skills area.

"Sterilization" means a process resulting in the destruction of all forms of microbial life, including highly resistant bacterial spores.

"Substantially relates" means *the nature of criminal conduct for which the person was convicted has a direct bearing on the fitness or ability to perform one or more of the duties or responsibilities necessarily*

related to the occupation. [63 O.S. 1451(E)(1)]

"Ultrasonic" means ultrasonic sound, which is pertaining to acoustic frequencies above the range audible to the human ear, or, above approximately 20,000 cycles per second. There are several types of ultrasonic devices.

"Written certification examination" means the state examination taken upon satisfactory completion of all skills area evaluations. An applicant demonstrates written competency by scoring 70% or greater on the written certification examination.

[Source: Added at 19 Ok Reg 378, eff 11-19-01 (emergency); Added at 19 Ok Reg 2067, eff 6-27-02 ; Amended at 24 Ok Reg 1177, eff 4-2-07 (emergency); Amended at 24 Ok Reg 1940, eff 6-25-07 ; Amended at 39 Ok Reg 1241, eff 9-11-22 ; Amended at 40 Ok Reg 1543, eff 9-11-23]

SUBCHAPTER 3. MEDICAL MICROPIGMENTATION CERTIFICATION

310:234-3-1. Practice limitations

On and after May 1, 2002, medical micropigmentation may only be performed in a physician's office by:

- (1) A physician as defined by the Oklahoma Medical Micropigmentation Regulation Act;
- (2) A registered nurse licensed by the Oklahoma Board of Nursing who holds a current certificate issued by the State Commissioner of Health pursuant to the provisions of the Oklahoma Medical Micropigmentation Regulation Act while working under supervision of a physician. The level of supervision shall be determined by the physician in whose office medical micropigmentation is being performed; and
- (3) A person who holds a current certificate issued by the State Commissioner of Health pursuant to the provisions of the Oklahoma Medical Micropigmentation Regulation Act while working under supervision of a physician. The level of supervision shall be determined by the physician in whose office medical micropigmentation is being performed. [63:1-1452]

[Source: Added at 19 Ok Reg 378, eff 11-19-01 (emergency); Added at 19 Ok Reg 2067, eff 6-27-02 ; Amended at 21 Ok Reg 1035, eff 5-13-04]

310:234-3-2. Certification requirements

(a) An individual shall be eligible to apply for a certificate to practice medical micropigmentation by satisfying all of the following criteria:

- (1) Applicant has received a high-school diploma or its equivalent;
- (2) Applicant is at least twenty-one years of age;
- (3) Applicant provides a copy of his/her driver's license or other similar photo identification;
- (4) Applicant provides a copy of his/her credentials and professional resume that documents years of practice and number of procedures performed (if applicable);

(5) Applicant provides proof of satisfactory completion of an OSDH-approved medical micropigmentation training and testing program.

(b) The State Commissioner of Health shall not issue a certificate or renew a certificate to perform medical micropigmentation procedures to persons as specified in Title 63, Section 1-1454(B).

(c) **Certification fees.** Fees to obtain a certificate to practice medical micropigmentation in Oklahoma are as follows:

(1) \$500.00 for a new application for certification;

(2) \$100.00 for a renewal of certification;

(3) \$375.00 for reinstatement of certification if the renewal is 30 days or more after the expiration date; or

(4) \$125.00 for the replacement of a certificate.

(5) Applicant shall be responsible for the cost of the examination or re-examination and background checks relating to licensing or certification.

(d) **Period of validity for certificate.** Certification is valid for one (1) year after date of issuance.

[Source: Added at 19 Ok Reg 378, eff 11-19-01 (emergency); Added at 19 Ok Reg 2067, eff 6-27-02 ; Amended at 24 Ok Reg 1177, eff 4-2-07 (emergency); Amended at 24 Ok Reg 1940, eff 6-25-07 ; Amended at 39 Ok Reg 1241, eff 9-11-22]

310:234-3-3. Training and testing

An individual shall satisfy the training and testing requirement for certification by meeting the following criteria: Satisfactory completion of an OSDH-approved medical micropigmentation training program and the certification testing process shall include skills area evaluations and written certification test.

[Source: Added at 19 Ok Reg 378, eff 11-19-01 (emergency); Added at 19 Ok Reg 2067, eff 6-27-02 ; Amended at 24 Ok Reg 1177, eff 4-2-07 (emergency); Amended at 24 Ok Reg 1940, eff 6-25-07 ; Amended at 39 Ok Reg 1241, eff 9-11-22]

310:234-3-3.1. Reciprocity

An applicant shall qualify for certification by reciprocity if the applicant:

(1) *Has qualifications and training comparable to those required under the Oklahoma Medical Micropigmentation Regulation Act;*

(2) *Provides documentation verifying two (2) years of experience and a minimum of two hundred (200) procedures;*

(3) *Has successfully completed the Oklahoma certification examination [63 O.S. Section 1-1455(E)]; and*

(4) *Provides documentation verifying possession of licensing or certification from another state in good standing.*

[Source: Added at 21 Ok Reg 238, eff 11-6-03 (emergency); Added at 21 Ok Reg 1035, eff 5-13-04 ; Amended at 24 Ok Reg 1177, eff 4-2-07 (emergency); Amended at 24 Ok Reg 1940, eff 6-25-07 ; Amended at 39 Ok Reg 1241, eff 9-11-22]

310:234-3-4. Certificate by completion of medical micropigmentation training program and certification testing

process

(a) Training in medical micropigmentation obtained through the Oklahoma Department of Career and Technology Education or other training course shall consist of at least 300 hours or equivalent of competency based instruction encompassing both theory and clinical training and is approved by the Department as meeting the training and curriculum requirements of this section.

(b) Medical Micropigmentation training shall be in the following skills area including theory and lab training:

- (1) Safety and Aseptic Technique;
- (2) Knowledge of Facial Anatomy, Physiology, and Disease;
- (3) Theory and Application of Micropigmentation;
- (4) Color Theory;
- (5) Client Consultation Services;
- (6) Professionalism; and
- (7) Micropigmentation procedures (eyeliner, lips, eyebrows, eye shadow, cheeks, scars, and/or reconstructive surgery, or trauma, or repigmentation of the areola):
 - (A) Basic procedures on clients (eyeliner, lips, and eyebrows),
 - (B) Advanced procedures (eye shadow, cheeks, scars, and/or reconstructive surgery, or trauma or repigmentation of the areola).

(c) The instructor for micropigmentation procedures and techniques shall be an Oklahoma Certified Micropigmentologist who has performed procedures for three (3) years that shall include eye procedures, full lip procedures, and eyebrow procedures.

(d) **Skills area evaluations.**

- (1) During the training program, a candidate must satisfactorily complete an evaluation for each skills area. The evaluation verifies that micropigmentation concepts and/or techniques presented in that skills area have been mastered.
- (2) Mastery of medical micropigmentation technique in a skills area shall be demonstrated when the candidate performs all skills presented on all job sheets contained within that skills area to the instructor with 100% accuracy.
- (3) Mastery of medical micropigmentation theory in a skills area shall be demonstrated when the candidate scores 85% on the written test over material covered in that skills area (if applicable).

(e) **Written certification examination.**

- (1) Candidates shall be eligible to sit for the written certification examination upon satisfactory completion of training and skills area evaluations.
- (2) A passing score of 70% shall be required to show competency. A candidate who does not meet this score can retest up to two (2) times. Candidates who do not pass the written certification examination must wait at least seven (7) days before retesting. Candidates who are unable to attain competency after three attempts shall be required to re-enroll in the medical micropigmentation training program.

(f) **Application for certification.** Upon satisfactory completion of the medical micropigmentation training and certification testing process, the applicant is eligible to apply for a Medical Micropigmentation Certificate. In order to apply for a Certification, the candidate must submit the following to OSDH:

- (1) Completed application;
- (2) Copy of the candidate's certificate of birth;
- (3) Copy of the candidate's driver's license or other similar form of photo ID;
- (4) Copy of the candidate's professional credentials; and
- (5) Completed Training and Testing Verification Form.

(g) **Issuance of certificates.** The State Commissioner of Health shall award a certificate to eligible applicants within thirty (30) days of receipt of the completed application and required documents.

[Source: Added at 19 Ok Reg 378, eff 11-19-01 (emergency); Added at 19 Ok Reg 2067, eff 6-27-02 ; Amended at 19 Ok Reg 3048, eff 8-22-02 (emergency); Amended at 20 Ok Reg 1613, eff 6-12-03 ; Amended at 21 Ok Reg 238, eff 11-6-03 (emergency); Amended at 21 Ok Reg 1035, eff 5-13-04 ; Amended at 24 Ok Reg 1177, eff 4-2-07 (emergency); Amended at 24 Ok Reg 1940, eff 6-25-07 ; Amended at 39 Ok Reg 1241, eff 9-11-22]

310:234-3-5. Certificate by skills challenge and certification testing [REVOKED]

SUBCHAPTER 5. SANITATION AND STERILIZATION PROCEDURES

310:234-5-1. Reusable equipment

(a) After each use, all non-single use, non-disposable instruments used for medical micropigmentation shall be cleaned thoroughly by scrubbing with an appropriate soap or disinfectant solution and hot water or by following the manufacturer's instructions to remove blood and tissue residue, and placed in an ultrasonic unit which shall be operated in accordance with the manufacturer's instructions.

(b) After cleaning, all non-disposable instruments used for body micropigmentation shall be packed individually in peel-packs and subsequently sterilized. All peel-packs shall contain either a sterilizer indicator or internal temperature indicator. Peel-packs must be dated with the date sterilized.

(c) All cleaned, non-disposable instruments used for medical micropigmentation shall be sterilized in a steam autoclave. The autoclave shall be used, cleaned, and maintained according to manufacturer's instructions. A copy of the manufacturer's recommended procedures for the operation of their sterilization unit shall be available for inspection by the Department. Sterile equipment shall not be used if the package has been breached without first repackaging and resterilizing. Sterilizers

shall be located away from areas used for cleaning of non-disposable instruments. If all single use, disposable instruments and products and sterile supplies are used, an autoclave shall not be required.

(d) Each holder of a medical micropigmentation certification shall demonstrate that the sterilizer used is capable of attaining sterilization by monthly spore destruction tests. These tests shall be verified through an independent laboratory. These test records shall be retained by the operator for a period of three (3) years and made available to the Department upon request.

(e) After sterilization, the instruments used for medical micropigmentation shall be stored in a dry, clean cabinet or other tightly covered container reserved for the storage of such instruments.

(f) All instruments used for medical micropigmentation shall remain stored in sterile packages until just before performing a micropigmentation procedure. When assembling instruments used for performing medical micropigmentation procedures, the operator shall wear disposable medical gloves and use medically recognized techniques to ensure that the instruments and gloves are not contaminated.

(g) All needles and equipment shall be specifically manufactured for performing medical micropigmentation procedures and shall be used according to manufacturer's instructions.

[Source: Added at 19 Ok Reg 378, eff 11-19-01 (emergency); Added at 19 Ok Reg 2067, eff 6-27-02]

310:234-5-2. Single use items

Single use items shall not be used on more than one client for any reason. After use, all single use needles and other sharps shall be immediately disposed of in approved sharps containers.

SUBCHAPTER 7. REQUIREMENTS FOR PREMISES

310:234-7-1. Physical facilities

Medical micropigmentation shall only be performed in a physician's office. The applicant or licensed medical micropigmentation person shall provide information to the Department in their application or renewal form stating who the supervising physician is with the dentist or physician('s) signature, address of the dentist or physician's office where the dentist or physician is supervising, and where the Certified Medical Micropigmentologist being supervised is performing medical micropigmentation.

[Source: Added at 19 Ok Reg 378, eff 11-19-01 (emergency); Added at 19 Ok Reg 2067, eff 6-27-02 ; Amended at 24 Ok Reg 1177, eff 4-2-07 (emergency); Amended at 24 Ok Reg 1940, eff 6-25-07 ; Amended at 39 Ok Reg 1241, eff 9-11-22]

310:234-7-2. Physical construction and maintenance

- (a) All walls, floors, ceilings and all procedure surfaces where medical micropigmentation is performed shall be smooth, free of open holes or cracks, washable, in good repair, and clean. All procedure surfaces, including client chairs/benches shall be of such construction as to be easily cleaned and sanitized after each client.
- (b) No animals of any kind shall be allowed in the area where medical micropigmentation is performed except service animals used by persons with disabilities.
- (c) The facility shall comply with OAC 158:40 (Plumbing Industry Regulations). In addition, a separate, readily accessible, handsink with hot and cold running water, under pressure, equipped with wrist or foot operated controls and supplied with liquid soap, and disposable paper towels shall be readily accessible to each individual performing medical micropigmentation.
- (d) At least one covered waste receptacle shall be provided in each medical micropigmentation area and each toilet room. All refuse containers shall be lidded, cleanable and kept clean.
- (e) All instruments and supplies shall be stored in clean, dry and covered containers.
- (f) Reusable cloth items shall be mechanically washed with detergent and dried after each use. The cloth items shall be stored in a dry, clean environment until used.
- (g) The facility shall comply with OAC 158:40 (Electrical Industry Regulations). In addition, the medical micropigmentation room shall have 10-foot candles of light at 30 inches above the floor and 30-foot candles on surfaces where micropigmentation is performed.
- (h) The facility shall comply with OAC 158:50 (Mechanical Industry Regulations).

SUBCHAPTER 9. STANDARDS FOR MEDICAL MICROPIGMENTATION

310:234-9-1. Records

The following information shall be kept on file three (3) years by the person performing medical micropigmentation and shall be available for inspection by the Department:

- (1) Proof that certified persons performing medical micropigmentation have either completed or were offered and declined, in writing, the hepatitis B vaccination series.
- (2) Current certification by the Department to perform medical micropigmentation.

[Source: Added at 19 Ok Reg 378, eff 11-19-01 (emergency); Added at 19 Ok Reg 2067, eff 6-27-02]

310:234-9-1.1. Medical Micropigmentation Records

An Oklahoma Certified Micropigmentologist shall provide the Oklahoma State Department of Health with the name, address, phone number, and licensure number of each of their supervising physicians; specifically identifying the Oklahoma State Board of Medical Licensure & Supervision, the Oklahoma State Board of Osteopathic Examiners and/or the Oklahoma State Board of Dentistry as the supervising physician's licensing authority. The Oklahoma Certified Micropigmentologist shall inform the Department of any and all changes thereto.

[Source: Added at 21 Ok Reg 238, eff 11-6-03 (emergency); Added at 21 Ok Reg 1035, eff 5-13-04 ; Amended at 39 Ok Reg 1241, eff 9-11-22]

310:234-9-2. Prohibited acts

- (a) Performing medical micropigmentation outside the confines of a physician's office.
- (b) Performing medical micropigmentation without a current certification or current licensure as a physician.
- (c) Smoking, eating, or drinking by anyone is prohibited in the area where medical micropigmentation is performed.
- (d) No person affected with an infectious disease shall work in any area where medical micropigmentation is performed if there is likelihood that they could contaminate equipment, supplies or working surfaces with body substances or pathogenic organisms.
- (e) Injection of local anesthesia shall only be administered by a certified micropigmentologist who is currently licensed as a nurse, a physician assistant or dental hygienist. The certified micropigmentologist not recognized by law to provide local anesthesia by other regulatory boards shall only administer infiltration by topical local anesthesia. These specified individuals may administer local anesthesia as allowed by their respective certified boards under which they practice.

[Source: Added at 19 Ok Reg 378, eff 11-19-01 (emergency); Added at 19 Ok Reg 2067, eff 6-27-02 ; Amended at 27 Ok Reg 2511, eff 7-25-10]

310:234-9-3. Standards

- (a) The person performing medical micropigmentation shall maintain a high degree of personal cleanliness, conform to hygienic practices and wear clean clothes when performing medical micropigmentation procedures. Before performing medical micropigmentation procedures, the certified person must thoroughly wash their hands in hot running water with liquid soap, then rinse hands and dry with disposable paper towels. This shall be done as often as necessary to remove contaminants.
- (b) In performing medical micropigmentation procedures, the certified person shall wear disposable medical gloves to minimize the possibility of transmitting infection to the person being pierced. Gloves must be changed if they become contaminated by contact with any non-clean surfaces or objects or by contact with a third person. The gloves shall be discarded after the completion of each procedure on an individual client and hands shall be washed before donning the next set of gloves. Under no circumstances shall a single pair of gloves be used on more than one person. The use of disposable medical gloves does not preclude or

substitute for hand washing procedures as part of a good personal hygiene program.

(c) If, while performing a medical micropigmentation procedure, the certified person's glove is pierced, torn or otherwise contaminated, the contaminated gloves shall be discarded immediately and the hands washed thoroughly before a fresh pair of gloves are applied. Any item or instrument that is contaminated during the procedure shall be discarded and replaced immediately with a new disposable item or a new sterilized instrument or item before the procedure resumes.

(d) Contaminated waste, which may release liquid blood or body fluids when compressed or may release dried blood or body fluids when handled, must be placed in a biohazard container, which is marked with the International Biohazard Symbol. Sharps ready for disposal shall be placed in an approved sharps container with the International Biohazard Symbol. Contaminated waste which may release blood, body fluids, dried blood or dried body fluids and sharps must be disposed of consistent with OAC 252:520. Contaminated waste, which does not release liquid blood or body fluids when compressed or does not release dried blood or body fluids when handled, may be placed in a covered receptacle and disposed of through normal disposal methods.

(e) Any skin or mucosa surface being prepared to receive medical micropigmentation shall be free of rash or any visible infection.

(f) Administration of medication or anesthesia, if appropriate, shall comply with 59 O.S. Section 481-524, 59 O.S. Section 328 et seq., 59 O.S. Section 620 et seq., or 59 O.S. Section 567 et seq., or applicable law or rule.

[Source: Added at 19 Ok Reg 378, eff 11-19-01 (emergency); Added at 19 Ok Reg 2067, eff 6-27-02]

310:234-9-4. Client records

(a) In order to aid the certified person in assessing and determining whether the client is a suitable candidate to receive a given medical micropigmentation procedure, information relative to the following conditions should be sought from the client:

- (1) Reason for procedure;
- (2) History of allergies, drug allergies, adverse reactions or other skin sensitivities; including but not limit to:
 - (A) Drugs,
 - (B) Foods,
 - (C) Latex,
 - (D) Medications, and
 - (E) Topic medications.
- (3) History of high blood pressure;
- (4) History of cancer;
- (5) History of cataracts;
- (6) History of chemo/radiation;
- (7) Diabetes;
- (8) History of epilepsy, seizures, fainting or narcolepsy;
- (9) History of fever blisters;
- (10) History of glaucoma;

- (11) History of heart murmur;
 - (12) History of hemophilia (bleeding);
 - (13) History of hepatitis;
 - (14) History of HIV/Aids;
 - (15) History of artificial joints;
 - (16) History of keloids;
 - (17) Taking medications such as anticoagulants, which interfere with blood clotting;
 - (18) History of mitral valve prolapse;
 - (19) History of pacemaker;
 - (20) Currently pregnant;
 - (21) History of intraocular lens transplants;
 - (22) History of RK/PRK lasik;
 - (23) History of shingles;
 - (24) History of skin disease, skin lesions or skin sensitivities to soaps or disinfectants; and
 - (25) History of artificial valves;
- (b) The certified person shall ask the client to sign a Release Form confirming that the above information was obtained or attempted to be obtained.
- (c) Each certified person shall keep records of all medical micropigmentation procedures administered, including name, date of birth, address of the client, signature of the client, date of the procedure, and identification and location of the medical micropigmentation procedure(s) performed. All client records shall be confidential, they shall be retained for a minimum of three (3) years, and they shall be made available to the Department upon request.

[Source: Added at 19 Ok Reg 378, eff 11-19-01 (emergency); Added at 19 Ok Reg 2067, eff 6-27-02]

310:234-9-5. Preparation and care of the target area

- (a) Before a medical micropigmentation procedure is performed, the immediate and surrounding area of the skin where the procedure is to be conducted shall be washed with soap and water or an approved surgical skin preparation. If shaving is necessary, single use disposable razors or safety razors with single service blades shall be used and discarded after each use and the reusable holder shall be autoclaved after use. Following shaving, the skin and surrounding area shall be washed with soap and water. The washing pad shall be discarded after a single use.
- (b) In case of blood flow, all products used to check the flow of blood or to absorb blood shall be single use and disposed of immediately after use.

[Source: Added at 19 Ok Reg 378, eff 11-19-01 (emergency); Added at 19 Ok Reg 2067, eff 6-27-02]

SUBCHAPTER 11. ENFORCEMENT

310:234-11-1. General requirements

The State Commissioner of Health shall not issue a certificate or renew a certificate to perform medical micropigmentation to a person

who has:

- (1) *Been convicted of or pled guilty or nolo contendere to a felony crime that substantially relates to the practice of medical micropigmentation and poses a reasonable threat to public safety;*
- (2) *Been determined to have engaged in unprofessional conduct as defined by the rules promulgated by the State Board of Health;*
- (3) *Made a materially false or fraudulent statement in an application or other document relating to certification pursuant to the provisions of the Oklahoma Medical Micropigmentation Regulation Act; or*
- (4) *Had a health-related license, certificate, or permit suspended, revoked or not renewed or had any other disciplinary action taken, or had an application for a health-related license, certificate, or permit refused by a federal, state, territory, or District of Columbia regulatory authority for intentionally falsifying information.* [63 O.S. Section 1-1454(B)]

[Source: Reserved at 19 Ok Reg 378, eff 11-19-01 (emergency); Added at 19 Ok Reg 2067, eff 6-27-02 ; Amended at 40 Ok Reg 1543, eff 9-11-23]

310:234-11-2. Suspension or revocation of certification

- (a) A certification issued under the provisions of OAC 310:234 may be suspended by the Department for failure of the holder to comply with the requirements OAC 310:234.
- (b) Whenever a certificate holder has failed to comply with any notice issued under the provisions of OAC 310:234, the certificate holder shall be notified in writing that the certificate is, upon service of this notice, suspended. A hearing shall be provided if a written request for a hearing is filed with the Department.
- (c) Any certification may be permanently revoked after a hearing if the certificate holder is found to have repeated or serious violations of any of the requirements of OAC 310:234 or for interference with Department personnel in the performance of their duties.

[Source: Added at 19 Ok Reg 378, eff 11-19-01 (emergency); Added at 19 Ok Reg 2067, eff 6-27-02]

310:234-11-3. Administrative penalties

- (a) The Department may assess administrative penalties as follows:
 - (1) Failure to obtain appropriate certification (i.e. performing Micropigmentation without a certificate), \$5,000.00 per violation;
 - (2) Failure to observe procedures to prevent the transmission of a bloodborne pathogen, \$500.00 per violation;
 - (3) Failure to maintain instruments used in medical micropigmentation in a sterile condition, \$500.00 per violation;
 - (4) Failure to install and maintain appropriate facilities for handwashing, \$500.00 per violation;
 - (5) Failure to maintain client records or monthly spore destruction test records, \$500.00 per violation; or
 - (6) Demonstrating unprofessional conduct, which includes but is not limited to:

- (A) Advertising to the public in any manner without the necessary certificate;
- (B) Habitual intemperance or the habitual use of habit-forming drugs;
- (C) All advertising of business in which statements are made which are grossly untrue or improbable and calculated to mislead the public;
- (D) Conviction or confession of a crime involving violation of:
 - (i) The laws of this state, or
 - (ii) The Oklahoma Medical Micropigmentation Regulation Act or this Chapter;
- (E) Failure to maintain an office record for each patient which accurately reflects the treatment of the patient;
- (F) Fraud or misrepresentation in applying for or procuring a micropigmentation certificate;
- (G) Cheating on or attempting to subvert the medical micropigmentation certification examination(s);
- (H) Conduct likely to deceive, defraud, or harm the public;
- (I) Practice or other behavior that demonstrates an incapacity or incompetence to practice medical micropigmentation; or
- (J) Has been finally adjudicated and found guilty or entered a plea of guilty or nolo contendere to a felony crime as described Section 310:234-11-1(1) of this Chapter, whether or not sentence is imposed, and regardless of the pendency of an appeal, penalty of \$500.00 for each violation above in section 310:234-11-3(6).

(b) Penalties shall double for repeat offenses.

(c) Continued non-compliance shall result in administrative action to revoke the certification or to order the person to cease violating the law.

(d) Each day an offense occurs shall be considered a separate offense.

[Source: Added at 19 Ok Reg 378, eff 11-19-01 (emergency); Added at 19 Ok Reg 2067, eff 6-27-02 ; Amended at 40 Ok Reg 1543, eff 9-11-23]

310:234-11-4. Inspection of Complaints

Upon receipt of a complaint by the Department or upon receipt of notice relating to an alleged violation of the Oklahoma Medical Micropigmentation Regulation Act or rules promulgated there under, that involves the practice of micropigmentation in the office of a dentist or physician, the Department shall notify the appropriate licensing board of the complaint and request a joint inspection.

CHAPTER 240. DRUGS, MEDICAL DEVICES AND COSMETICS REGULATIONS

[**Authority:** 63 O.S., §§ 1-1119 and 1-1401 et seq.]

[**Source:** Codified 12-31-91]

310:240-1-1. Purpose

The rules in this Chapter implement the Drugs, Medical Devices and Cosmetics Article of the Public Health Code, 63. O.S., Sections 1-1119 and 1-1401 et seq.

310:240-1-2. Expiration of license

A license for the manufacturing, processing, packing, holding, transporting or brokering of drugs shall expire one year from the date of its issuance unless canceled or revoked prior to its expiration. For purposes of determining the expiration date of all licenses under this section, the date of issuance shall be deemed to be the date that an approved application for licensure is first issued by a duly authorized representative of the Health Department.

310:240-1-3. Incorporation by reference

(a) Title 21, Parts 70, 71, 73 B through D, 74 B through D, 74 APP A, 80 through 82, 200 through 895 Code of Federal Regulations (CFR), as of April 1, 1991, issued under the Federal Food, Drug and Cosmetic Act of April 1, 1986 are hereby incorporated by reference into this Chapter, except parts 500 through 599 that relate to Animal Feeds and Related Products.

(b) For purposes of the provisions adopted by reference, references to the "Secretary" or "Commissioner" shall be deemed to mean the Commissioner of Health for the State of Oklahoma, and "Department" shall be deemed to mean the Oklahoma State Department of Health, unless the context clearly indicates otherwise.

(c) When a provision of the Code of Federal Regulations is incorporated by reference, all citations contained therein are also incorporated by reference, and the definitions contained therein shall apply.

(d) In the event that there are inconsistencies or duplications in the requirements of those provisions incorporated by reference from the CFR, and the requirements otherwise set forth in this Chapter, the provisions incorporated from the CFR shall prevail except where the regulations set forth in this Chapter are more stringent.

CHAPTER 250. FEE SCHEDULE FOR CONSUMER HEALTH SERVICE

[**Authority:** 63 O.S., §§ 1-104, 1-106.1, and 1-1118]
[**Source:** Codified 12-31-91]

SUBCHAPTER 1. GENERAL PROVISIONS

310:250-1-1. Purpose

The rules in this Chapter implement the fee provisions of the public health code, as they exist and may be amended.

310:250-1-2. Processing

Applications for licenses, permits or renewals which are received on the effective date of each of the rules in this Chapter or later shall not be processed until the fees of this Subchapter are paid, as applicable.

**SUBCHAPTER 3. LICENSE CLASSIFICATIONS AND
ASSOCIATED FEES FOR CONSUMER HEALTH
SERVICES**

310:250-3-1. Food establishments' fees

(a) The following are license classifications and associated fees for food establishments, manufacturers, or wholesalers regulated by Title 63 O.S. § 1-915, Title 63 O.S. § 1-1118, Title 63 O.S. § 1-1119, or Title 63 O.S. § 1-1120 et seq., and the rules promulgated thereunder.

(1) Food service, manufacturing, or wholesale.

(A) Initial - \$425.00

- (B) Renewal - \$335.00
 - (C) Late Renewal - \$375.00
- (2) State Operated, Non-Profit or Health Facilities not meeting exempt status.
 - (A) Initial - \$175.00
 - (B) Renewal - \$125.00
 - (C) Late Renewal - \$150.00
- (3) Seasonal is limited to an establishment that meets the definition of "Seasonal food establishment" outlined in OAC 310:257-1-2 where the license is valid for only one hundred eighty (180) consecutive days. Fee - \$250.00
- (4) Multi-Seasonal is limited to an establishment that meets the definition of "Multi-Seasonal food establishment" outlined in OAC 310:257-1-2 where the license is valid for three hundred and sixty-five (365) consecutive days.
 - (A) Initial - \$425.00
 - (B) Renewal - \$335.00
 - (C) Late Renewal - \$375.00
- (5) The fee for a temporary food establishment, as defined in OAC 310:257-1-2, shall be \$50.00 for the initial day of the temporary event plus \$25.00 for each additional consecutive day. The total fee for a single temporary event license shall not exceed \$250. No temporary event license shall be issued for more than fourteen (14) consecutive days.
 - (A) The total fee for a single temporary event license shall not exceed \$250.
 - (B) No temporary event license shall be issued for more than fourteen (14) consecutive days.
- (6) The fee for a temporary food establishment, as defined in OAC 310:257-1-2, at a county fair as defined in Title 2 O.S. §§ 15-51 et seq., shall be \$50.00 for a maximum of three (3) days.
- (7) The fee for a temporary food establishment, as defined in OAC 310:257-1-2, at a farmer's market as defined in OAC 310:257-1-2 shall be \$50.00 for a maximum of three (3) days.
- (b) An establishment qualifies for a fee exempt license if it is a "food establishment - fee exempt" as that term is defined in OAC 310:257-1-2.
- (c) Late renewal fees apply to any renewal application postmarked and/or received thirty (30) days after the expiration date of the license.
- (d) A license not renewed within ninety (90) days of the date shall be ineligible for the renewal. Thereafter, the establishment shall be required to pay an initial fee. The establishment that has not had a valid license for one (1) year is considered a new establishment.

310:250-3-2. Drug operational permits

The following are associated fees for over-the-counter wholesalers, brokers, and drug manufacturers regulated by the Drugs, Medical

Devices and Cosmetics Article of the Public Health Code, Title 63 O.S. Sections 1-1119 and 1-1401 et seq. and the rules promulgated thereunder. Drug Operational Category includes any over-the-counter wholesalers, brokers and manufacturers of drugs:

()

- (A) Initial - \$425.00
- (B) Renewal - \$335.00
- (C) Late Renewal - \$375.00

[Source: Added at 15 Ok Reg 4129, eff 7-29-98 (emergency); Added at 16 Ok Reg 2468, eff 6-25-99 ; Amended at 22 Ok Reg 739, eff 5-12-05 ; Amended at 26 Ok Reg 1475, eff 7-1-09 ; Amended at 34 Ok Reg 1278, eff 10-1-17 ; Amended at 36 Ok Reg 1675, eff 9-13-19]

310:250-3-3. Lodging establishment operational permits

The following are associated fees for lodging establishment operational permits regulated by the lodging establishment statute at Title 63 O.S. § 1-1201 and the rules promulgated thereunder.

- (1) Category A "Hotels and Motels" (Not more than 20 units):
 - (A) Initial - \$300.00
 - (B) Renewal - \$225.00
 - (C) Late Renewal - \$250.00
- (2) Category B "Hotels and Motels" (Not more than 100 units):
 - (A) Initial - \$350.00
 - (B) Renewal - \$275.00
 - (C) Late Renewal - \$300.00
- (3) Category C "Hotels and Motels" (More than 100 units):
 - (A) Initial - \$400.00
 - (B) Renewal - \$325.00
 - (C) Late Renewal - \$350.00

[Source: Added at 15 Ok Reg 4129, eff 7-29-98 (emergency); Added at 16 Ok Reg 2468, eff 6-25-99 ; Amended at 22 Ok Reg 739, eff 5-12-05 ; Amended at 26 Ok Reg 1475, eff 7-1-09 ; Amended at 34 Ok Reg 1278, eff 10-1-17]

310:250-3-4. Late renewal

(a) When a Consumer Health Service's license renewal fee is required by statute or regulation to be paid by a date certain and such fee was paid more than thirty (30) days after the date certain, there shall be assessed a late fee to cover the cost of non-routine processing. The late renewal fee unless specifically set shall equal one-half of the renewal fee for any given type and class, unless the maximum authorized by law would be exceeded thereby.

(b) Late renewal fees apply to renewal applications received by the Department more than thirty (30) days after the expiration date of the license.

(c) If the license holder does not file with the Department a renewal application and fee within ninety (90) days after the expiration date of the license, the Department shall not renew the license. The license may be re-instated with payment of an initial license fee.

[Source: Added at 15 Ok Reg 4129, eff 7-29-98 (emergency); Added at 16 Ok Reg 2468, eff 6-25-99 ; Amended at 22 Ok Reg 739, eff 5-12-05 ; Amended at 34 Ok Reg 1278, eff 10-1-17]

310:250-3-5. Radiation producing machine permits

(a) The annual permit fee for facilities to use radiation machines shall be based on type of facility and the number of x-ray tubes.

(1) All facilities except dental, podiatric and veterinary:

(A) each tube \$95.00; but

(B) a maximum permit fee of \$500.00.

(2) Dental and podiatric facilities:

(A) each tube \$30.00; but

(B) a maximum permit fee of \$500.00.

(3) Veterinary facilities:

(A) each tube \$25.00; but

(B) a maximum permit fee of \$500.00.

(b) Diagnostic radiation producing machine permit renewal fees for applications received by the Department more than thirty (30) days after the expiration date of the current permit shall be assessed a late fee to cover the cost of non-routine processing. The late renewal fee shall equal one-half of the renewal fee, unless the maximum authorized by law would be exceeded. If the permit holder does not file with the Department a renewal application and fee within ninety (90) days after the expiration date of the license, the Department shall not renew the permit. An initial permit application and initial permit fee shall be required.

[Source: Added at 15 Ok Reg 4129, eff 7-29-98 (emergency); Added at 16 Ok Reg 2468, eff 6-25-99 ; Amended at 34 Ok Reg 1278, eff 10-1-17]

310:250-3-6. Public bathing places

(a) The following are license classifications and associated fees for Public Bathing Places:

(1) Public Bathing Category I "Indoor Facility"

(A) Public Bathing Places Initial License Fee - \$125.00

(B) Public Bathing Places Renewal License Fee - \$75.00

(C) Public Bathing Places Re-inspection Fee - \$250.00

(2) Public Bathing Category O "Outdoor Facility"

(A) Public Bathing Places Initial License Fee - \$125.00

(B) Public Bathing Places Renewal License Fee - \$75.00

(C) Public Bathing Places Re-inspection Fee - \$250.00

(3) Pool Category M "Municipality of 5,000 or less population"

(A) Public Bathing Places Annual License Fee - \$50.00

(B) Public Bathing Places Re-inspection Fee - \$250.00

(b) Each filter system for a construction project shall require a separate permit. One project may contain several construction items and require more than one permit. The maximum fee for each public bathing place construction permit will be \$2000.00

(1) New Construction

(A) Pool - Rounded to the nearest 5000 gallons volume - \$100.00 per 5000 gallons (minimum \$500.00 fee)

(B) Spray Pool - Rounded to the nearest 5000 gallons volume - \$100.00 per 5000 gallons (minimum \$500.00 fee)

(C) Spas - Rounded to nearest 100 gallons volume - \$50.00 per 100 gallons (minimum \$250.00 fee)

(2) Modification to Existing Permit

(A) Pool - Rounded to the nearest 5000 gallons volume - \$50.00 per 5000 gallons (minimum \$250.00 fee)

(B) Spray Pool - Rounded to the nearest 5000 gallons volume -50.00 per 5000 gallons (minimum \$250.00 fee)

(C) Spas - Rounded to the Nearest 100 gallons volume - \$25.00 per 100 gallons (minimum \$125.00 fee)

(c) An annual securing fee of \$50.00 will be applied to each public bathing place that is placed out of service and is not maintaining annual licensure. This pertains to a secured public bathing place permanently out of service where the current owner has no intention to reopen and does not fill in the public bathing place. It also applies to a public bathing place closed for longer than a year with the intent of re-opening. A securing fee will be due at the same time as the original license expiration and each year thereafter while the facility remains permanently out of service. When a public bathing place resumes operation, the local county health department shall be notified by the owner and any remaining license fee will be required for that year of operation.

CHAPTER 257. FOOD ESTABLISHMENTS

[**Authority:** 63 O.S. §§ 1-104 et seq., 1-1101 et seq., and 1-1118 et seq.]

[**Source:** Codified 6-25-06]

SUBCHAPTER 1. PURPOSE AND DEFINITIONS

310:257-1-1. Purpose

The rules in this Chapter implement Article 11, 63 O.S. Section 1-1101 *et seq.* The purpose is to safeguard public health and provide to consumers food that is safe, unadulterated, and honestly presented. This Chapter establishes definitions; sets standards for management and personnel, food operations, and equipment and facilities; and provides for food establishment plan review, license issuance, inspection, employee restriction, and license suspension.

[**Source:** Added at 23 Ok Reg 2358, eff 6-25-06 ; Amended at 33 Ok Reg 1520, eff 9-11-16]

310:257-1-2. Definitions

The following words and terms, when used in this Chapter, shall have the following meaning, unless the context clearly indicates otherwise.

"Accredited program" means a food protection manager certification program that has been evaluated and listed by an accrediting agency as conforming to national standards for organizations that certify individuals. The American National Standards Institute - Conference for Food Protection (ANSI-CFP) Accreditation programs include but are not limited to: National Restaurant Association Solutions; LLC (ServeSafe); Prometric, Inc.; 360training.com; and National Registry of Food Safety Professionals.

(A) Accredited program refers to the certification process and is a designation based upon an independent evaluation of factors such as the sponsor's mission; organizational structure; staff resources; revenue sources; policies; public information regarding program scope, eligibility requirements, re-certification, discipline, and grievance procedures; and test development and administration.

(B) Accredited program does not refer to training functions or educational programs.

"Additive" as used in this Chapter shall have the same meaning for the following terms:

(A) **"Color additive"** has the meaning stated in the Federal Food, Drug, and Cosmetic Act, Section 201(t) and 21 CFR, Part 70.

(B) **"Food additive"** has the meaning stated in the Federal Food, Drug, and Cosmetic Act, Section 201(s) and 21 CFR, Part 170.

"Adulterated" means the definition in 63 O.S. Section 1-1109.

"Approved" means acceptable to the Department based on a determination of conformity with principles, practices, and generally recognized standards that protect public health.

"Asymptomatic" means without obvious symptoms; not showing or producing indications of a disease or other medical conditions, such as an individual infected with a pathogen but not exhibiting or producing any signs or symptoms of vomiting, diarrhea, or jaundice. Asymptomatic includes not showing symptoms because symptoms have resolved or subsided, or because symptoms never manifested.

" a_w " means water activity which is a measure of the free moisture in a food, is the quotient of the water vapor pressure of the substance divided by the vapor pressure of pure water at the same temperature, and is indicated by the symbol a_w .

"Balut" means an embryo inside a fertile egg that has been incubated for a period sufficient for the embryo to reach a specific state of development after which it is removed from incubation before hatching.

"Beverage" means a liquid for drinking, including water.

"Bottled drinking water" means water that is sealed in bottles, packages, or other containers and offered for sale for human consumption, including bottled mineral water.

"Casing" means a tubular container for sausage products made of either natural or artificial (synthetic) material.

"Certified applicator" means any individual who is certified under the Federal Insecticide, Fungicide, and Rodenticide Act, 7 U.S.C. Section 136 et seq. and/or by the Oklahoma State Department of Agriculture Food and Forestry as authorized to use or supervise the use of any pesticide that is classified for restricted use. Any applicator who holds or applies registered pesticides or uses dilutions of registered pesticides consistent with the product labeling only to provide a service of controlling pests without delivering any unapplied pesticide to any person so served is not deemed to be a seller or distributor of pesticides.

"Certification number" means a unique combination of letters and numbers assigned by a shellfish control authority to a molluscan shellfish dealer according to the provisions of the National Shellfish Sanitation Program.

"CFR" means Code of Federal Regulations. Citations in this Chapter to the CFR refer sequentially to the Title, Part, and Section numbers, such as 21 CFR 178.1010 refers to Title 21, Part 178, Section 1010.

"CIP" means cleaned in place by the circulation or flowing by mechanical means through a piping system of a detergent solution, water rinse, and sanitizing solution onto or over equipment surfaces that require cleaning, such as the method used, in part, to clean and sanitize a frozen dessert machine. It does not include the cleaning of equipment such as band saws, slicers, or mixers that are subjected to in-place manual cleaning without the use of a CIP system.

"Code of Federal Regulations" means the compilation of the general and permanent rules published in the Federal Register by the executive departments and agencies of the federal government which is

published annually by the U.S. Government Printing Office; and contains FDA rules in 21 CFR, USDA rules in 7 CFR and 9 CFR, EPA rules in 40 CFR, and Wildlife and Fisheries rules in 50 CFR.

"Commingle" means to combine shellstock harvested on different days or from different growing areas as identified on the tag or label, or to combine shucked shellfish from containers with different container codes or different shucking dates.

"Comminuted" means reduced in size by methods including chopping, flaking, grinding, or mincing and includes fish or meat products that are reduced in size and restructured or reformulated such as gefilte fish, gyros, ground beef, sausage; and a mixture of 2 or more types of meat that have been reduced in size and combined, such as sausages made from 2 or more meats.

"Commissary" means a facility used to maintain safe and sanitary operations for the cleaning and servicing of pushcarts, mobile retail units, or mobile food establishments; and for the storage of food and single service articles used in those units.

"Common dining area" means a central location in a group residence where people gather to eat at mealtime but does not apply to a kitchenette or dining area located within private living quarters.

"Conditional employee" means a potential food employee to whom a job offer is made, conditional on responses to subsequent medical questions or examinations designed to identify potential food employees who may be suffering from a disease that can be transmitted through food and done in compliance with Title 1 of the Americans with Disabilities Act of 1990.

"Confirmed disease outbreak" means a foodborne disease outbreak in which laboratory analysis of appropriate specimens identifies a causative agent and epidemiological analysis implicates the food as the source of the illness.

"Consumer" means a person who is a member of the public, takes possession of food, is not functioning in the capacity of an operator of a food establishment or food processing plant, and does not offer the food for resale.

"Cook/Chill" means the process of placing food, heated to a temperature as required in OAC 310:257-5-46 or OAC 310:257-5-48, and held at a temperature of 135°F or hotter, into an impermeable bag, then cooling the food to a temperature of 41°F or less as required under OAC 310:257-5-57.

"Co-Op" means an establishment meeting the requirements in the Cooperative Corporations Chapter at 18 O.S. §§ 421 et seq. and selling food products produced as described at 2 O.S. §§ 5-4.1 et seq.

"Core item" means a provision of this Chapter that is not designated as a priority item or priority foundation item and includes an item that usually relates to general sanitation, operational controls, sanitation standard operating procedures (SSOPs), facilities or structures, equipment design or general maintenance.

"Corrosion-resistant material" means a material that maintains acceptable surface cleanability characteristics under prolonged influence of the food to be contacted, the normal use of cleaning compounds and sanitizing solutions, and other conditions of the use environment.

"Counter-mounted equipment" means equipment that is not portable and is designed to be mounted off the floor on a table, counter, or shelf.

"Critical control point (CCP)" means a point or procedure in a specific food system where loss of control may result in an unacceptable health risk.

"Critical limit" means the maximum or minimum value to which a physical, biological, or chemical parameter must be controlled at a critical control point to minimize the risk that the identified food safety hazard may occur.

"Customer self-service" means customer selection and packaging of a bulk food product from a product module.

"Cut leafy greens" means fresh leafy greens whose leaves have been cut, shredded, sliced, chopped, or torn. The term "leafy greens" includes iceberg lettuce, romaine lettuce, leaf lettuce, butter lettuce, baby leaf lettuce (i.e., immature lettuce or leafy greens), escarole, endive, spring mix, spinach, cabbage, kale, arugula, and chard. The term "leafy greens" does not include herbs such as cilantro or parsley.

"Dealer" means a person who is authorized by a shellfish control authority for the activities of shellstock shipper, shucker-packer, repacker, reshipper, or depuration processor of molluscan shellfish according to the provisions of the National Shellfish Sanitation Program.

"Department" means the Oklahoma State Department of Health and a health department designated in writing by the State Commissioner of Health to perform official duties or other acts authorized under 63 O.S. § 101 et seq. and this Chapter, or an authorized agent thereof.

"Disclosure" means a written statement that clearly identifies the animal-derived foods which are, or can be ordered, raw, undercooked, or without otherwise being processed to eliminate pathogens, or items that contain an ingredient that is raw, undercooked, or without otherwise being processed to eliminate pathogens.

"Display area" means a location or locations, including physical facilities and equipment, where bulk food is offered for customer self-service.

"Drinking water" means water that meets criteria as specified in 40 CFR, Part 141 National Primary Drinking Water Regulations. It is traditionally known as "potable water." Drinking water includes the term "water" except where the term used connotes that the water is not potable, such as "boiler water," "mop water," "rainwater," "wastewater," and "nondrinking" water.

"Dry storage area" means a room or area designated for the storage of packaged or containerized bulk food that are not Time Temperature Control for Safety Foods and dry goods such as single-service items.

"Easily cleanable" means a characteristic of a surface that allows effective removal of soil by normal cleaning methods; is dependent on the material, design, construction, and installation of the surface; and varies with the likelihood of the surface's role in introducing pathogenic or toxigenic agents or other contaminants into food based on the surface's approved placement, purpose, and use. Easily cleanable includes a tiered

application of the criteria that qualify the surface as easily cleanable to different situations in which varying degrees of cleanability are required such as the appropriateness of stainless steel for a food preparation surface as opposed to the lack of need for stainless steel to be used for floors or for tables used for consumer dining; or the need for a different degree of cleanability for a utilitarian attachment or accessory in the kitchen as opposed to a decorative attachment or accessory in the consumer dining area.

"Easily movable" means portable; mounted on casters, gliders, or rollers; or provided with a mechanical means to safely tilt a unit of equipment for cleaning; and has no utility connection, a utility connection that disconnects quickly, or a flexible utility connection line of sufficient length to allow the equipment to be moved for cleaning of the equipment and adjacent area.

"Egg" means the shell egg of avian species such as chicken, duck, goose, guinea, quail, ratites, or turkey. Egg does not include a balut and it does not include reptile species such as alligator or an egg product.

"Egg product" means all, or a portion of, the contents found inside eggs separated from the shell and pasteurized in a food processing plant, with or without added ingredients, intended for human consumption, such as dried, frozen or liquid eggs. Egg product does not include food which contains eggs only in a relatively small proportion such as cake mixes.

"Employee" means the license holder, person in charge, food employee, person having supervisory or management duties, person on the payroll, family member, volunteer, person performing work under contractual agreement, or other person working in a food establishment.

"EPA" means the U.S. Environmental Protection Agency.

"Equipment" means an article that is used in the operation of a food establishment such as a freezer, grinder, hood, ice maker, meat block, mixer, oven, reach-in refrigerator, scale, sink, slicer, stove, table, temperature measuring device for ambient air, vending machine, or warewashing machine. It does not include items used for handling or storing large quantities of packaged foods that are received from a supplier in a cased or overwrapped lot, such as hand trucks, forklifts, dollies, pallets, racks, and skids.

"Event or celebration" means an occasional scheduled social gathering, with a designated event organizer in charge, which is open to the general public, and that has been organized for a special occasion or purpose, having a limited time or serving a specific function.

"Exclude" means to prevent a person from working as a food employee or entering a food establishment as an employee.

"Farmers Hub" means a designated area as described under 2 O.S. Section 5-3A.1 et seq.

"Farmers Market" means a designated area in which farmers, growers, or producers from a defined region gather on a regularly scheduled basis to sell at retail Non-Time/Temperature Control for Safety farm food products and whole shell eggs to the public as described under 2 O.S. Section 5-3A.1 et seq.

"FDA" means the U.S. Food and Drug Administration.

"Fish" means fresh or saltwater finfish, crustaceans, and other forms of aquatic life (including alligator, frog, aquatic turtle, jellyfish, sea cucumber, and sea urchin and the roe of such animals) other than birds or mammals, and all mollusks, if such animal life is intended for human consumption. Fish includes an edible human food product derived in whole or in part from fish, including fish that have been processed in any manner.

"Food" means a raw, cooked, or processed edible substance, ice, beverage, or ingredient used or intended for use or for sale in whole or in part for human consumption, or chewing gum.

"Foodborne disease outbreak" means the occurrence of two or more cases of a similar illness resulting from the ingestion of a common food.

"Food-contact surface" means a surface of equipment or a utensil with which food normally comes into contact; or a surface of equipment or a utensil from which food may drain, drip, or splash into a food, or onto a surface normally in contact with food.

"Food employee" means an individual working with unpackaged food, food equipment or utensils, or food-contact surfaces.

"Food establishment" means an operation that stores, prepares, packages, serves, vends food directly to the consumer, or otherwise provides food for human consumption such as a restaurant; satellite, commissary, or catered feeding location; catering operation if the operation provides food directly to a consumer or to a conveyance used to transport people; market; vending location; conveyance used to transport people; institution; or food bank; and that relinquishes possession of food to a consumer directly, or indirectly through a delivery service such as home delivery of grocery orders or restaurant takeout orders, or delivery service that is provided by common carriers.

(A) Food establishment includes: An element of the operation such as a transportation vehicle or a central preparation facility that supplies a vending location or satellite feeding location unless the vending or feeding location is permitted by the Department; or an operation that is conducted in a mobile, stationary, temporary, or permanent facility or location; where consumption is on or off the premises.

(B) Food establishment does not include:

- (i) Food processing plant; including those that are located on the premises of a food establishment;
- (ii) A kitchen in a private home that meets exemptions listed at OAC 310:257-1-4;
- (iii) A kitchen in a private home, such as a small family day-care provider; or a bed-and-breakfast operation that prepares and offers food to guests if the home is owner occupied, the number of available guest bedrooms does not exceed the number allowed by 63 O.S. §§ 1201 et seq., and breakfast is the only meal offered;
- (iv) A private home that receives catered or home-delivered food;

- (v) Incidental sales; or
- (vi) A produce stand that offers only whole, uncut and unprocessed fresh fruits, melons, vegetables and legumes and/or whole uncracked and unprocessed tree nuts.

"Food establishment - fee exempt" means a food establishment that utilizes non-paid persons by a nonprofit, civic, charitable, or religious organization primarily for benevolent purposes.

(A) Fee exempt licensees shall comply with the applicable sections of these rules depending upon the type of operation involved; e.g., food service, retail food, combination, temporary, or mobile.

(B) Fee exempt licenses, except temporary licenses, shall not expire but shall remain in full force and effect until revoked, suspended, annulled, or withdrawn by the Commissioner in accordance with applicable law.

(C) A license is not required for a non-profit civic, charitable or religious organization, using non-paid persons to prepare or serve food on its behalf, for occasional fund-raising events sponsored and conducted by the organization.

"Food processing plant" means a commercial operation that manufactures, packages, labels, or stores food for human consumption and provides food for sale or distribution to other business entities such as food processing plants or food establishments.

"Game animal" means an animal, the products of which are food, that is not included in the definitions of 2 O.S. Section 6-183 et seq. (cattle, bison, sheep, swine and goats). Equines are not included due to the provisions of Title 2 O.S. Section 6-192 (prohibits the use of equine for food), 2 O.S. Section 6-251 et seq. (poultry, including any domestic bird whether live or dead), 2 O.S. Section 6-280.1 et seq. (domesticated rabbits whether live or dead), 2 O.S. Section 6-290.3 et seq. (exotic livestock including commercially raised livestock and including but not limited to animals of the families bovidae, cervidae, antilocapridae or in the definitions of fish in this Section).

"General use pesticide" means a pesticide that is not classified by EPA for restricted use as specified in 40 CFR 152.175 Pesticides classified for restricted use.

"Grade A standards" means the requirements of the United States Public Health Service/FDA "Grade A Pasteurized Milk Ordinance" with which certain fluid and dry milk and milk products comply.

"HACCP" means Hazard Analysis Critical Control Point.

"HACCP plan" means a written document that delineates the formal procedures for following the Hazard Analysis Critical Control Point principles developed by The National Advisory Committee on Microbiological Criteria for Foods.

"Handwashing sink" means a lavatory, a basin or vessel for washing, a wash basin, or a plumbing fixture especially placed for use in personal hygiene and designed for washing of the hands. Handwashing sink includes an automatic handwashing facility.

"Hazard" means a biological, chemical, or physical property that may cause an unacceptable consumer health risk.

"Health practitioner" means a physician licensed to practice medicine, a nurse practitioner, physician assistant, or similar medical professional.

"Hermetically sealed container" means a container that is designed and intended to be secure against the entry of microorganisms and, in the case of low acid canned foods, to maintain the commercial sterility of its contents after processing.

"Highly susceptible population" means persons who are more likely than other people in the general population to experience foodborne disease because they are:

(A) Immunocompromised; preschool age children or older adults; and

(B) Obtaining food at a facility that provides services such as custodial care, health care, or assisted living, such as a child or adult day care center, kidney dialysis center, hospital or nursing home, or nutritional or socialization services such as a senior center.

"Imminent health hazard" means a significant threat or danger to health that is considered to exist when there is evidence sufficient to show that a product, practice, circumstance, or event creates a situation that requires immediate correction or cessation of operation to prevent injury based on the number of potential injuries, and the nature, severity, and duration of the anticipated injury.

"Impermeable" means incapable of allowing liquids to pass through the covering.

"Incidental sale" means the sale of food on the premises where food is not a primary reason to frequent the establishment, but where prepackaged, non-Time/Temperature Control for Safety Food from an approved source is offered for purchase as a convenience to the customer, and no product is kept in back stock.

"Injected" means manipulating meat in which a solution has been introduced into its interior by processes which are referred to as "injecting," "pump marinating," or "stitch pumping."

"Intact Meat" means a cut of whole muscle(s) meat that has not undergone comminution, injection, mechanical tenderization or reconstruction.

"Juice" means the aqueous liquid expressed or extracted from one or more fruits or vegetables, purées of the edible portions of one or more fruits or vegetables, or any concentrates of such liquid or purée. Juice does not include, for purposes of HACCP, liquids, purees, or concentrates that are not used as beverages or ingredients of beverages.

"Kitchenware" means food preparation and storage utensils.

"Law" means applicable local, state, and federal statutes, regulations, and ordinances.

"License" means the document issued by the Department that authorizes a person to operate a food establishment.

"License holder" means the entity that is legally responsible for the operation of the food establishment such as the owner, the owner's agent, or other person; and possesses a valid license to operate a food

establishment.

"Linens" means fabric items such as cloth hampers, cloth napkins, table cloths, wiping cloths, and work garments including cloth gloves.

"Major food allergen" means milk, egg, fish (such as bass, flounder, cod, and including crustacean, such as crab, lobster, or shrimp), tree nuts (such as almonds, pecans, or walnuts), wheat, peanuts, and soybeans; or a food ingredient that contains protein derived from a food specified above.

(A) Major food allergen does not include: Any highly refined oil derived from a food specified in Major Food Allergen definition and any ingredient derived from such highly refined oil; or

(B) Any ingredient that is exempt under the petition or notification process specified in the Food Allergen Labeling and Consumer Protection Act of 2004 (Public Law 108-282).

"Meat" means the flesh of animals used as food including the dressed flesh of cattle, bison, swine, sheep, or goats and other edible animals, except fish, poultry, and wild game animals.

"Mechanically tenderized" means meat manipulated with deep penetration by processes which may be referred to as: "blade tenderizing," "jaccarding," "pinning," "needling," or using blades, pins, needles, or any mechanical device. Mechanically tenderized does not include processes by which solutions are injected into meat. See the definition for injected.

"mg/L" means milligrams per liter, which is the metric equivalent of parts per million (ppm).

"Misbranding" means the definition contained in 63 O.S. Section 1-1110.

"Mobile food establishment" means a facility that prepares food and is vehicle mounted (is Department of Transportation road approved, including wheels and axles), is readily moveable and remains at one physical address for no more than twelve (12) hours at one time.

"Mobile pushcart" means a non-self propelled food unit that can be manually moved by one (1) average adult person.

"Mobile retail food establishment" means a unit which sells packaged foods from a stationary display at a location that is away from the unit but still at the same physical address, such as a table at a fair or farmer's market, for no more than twelve (12) hours, provided the licensed unit is on premise and readily available for inspection and the food has been prepared in a facility that is regulated by the Good Manufacturing Practices in Title 21 of the CFR or regulated as a license holder pursuant to OAC 310:260, Good Manufacturing Practice Regulations, Oklahoma Department of Agriculture, Food and Forestry, the United States Department of Agriculture, or this Chapter. Mobile food establishments selling only prepackaged foods and engaging in no preparation are not required to pay a plan review fee.

"Molluscan shellfish" means any edible species of fresh or frozen oysters, clams, mussels, and scallops or edible portions thereof, except when the scallop product consists only of the shucked adductor muscle.

"Multi-seasonal food establishment" means a facility that is under one ownership, is open year-round, and that shall serve snow cones and hot beverages with use of liquid milk.

"Non-continuous cooking" means the cooking of food in a food establishment using a process in which the initial heating of the food is intentionally halted so that it may be cooled and held for complete cooking at a later time prior to sale or service. Non-continuous cooking does not include cooking procedures that only involve temporarily interrupting or slowing an otherwise continuous cooking process.

"OAC" means Oklahoma Administrative Code.

"Occasional" means not habitual; random, irregularly or infrequent and used for special, occasional social gatherings for an event or celebration acting in a specified capacity from time to time, that does not exceed more than four (4) times per year, unless approved by the Department.

"O.S." means Oklahoma Statute.

"Packaged" means bottled, canned, cartoned, bagged, or wrapped, whether packaged in a food establishment or a food processing plant. Packaged does not include wrapped or placed in a carry-out container to protect the food during service or delivery to the consumer by a food employee upon consumer request.

"Person" means an association, a corporation, individual, partnership, other legal entity, government, or governmental subdivision or agency.

"Person in charge" means the individual present at a food establishment who is responsible for the operation at the time of the inspection.

"Personal care items" means items or substances that may be poisonous, toxic, or a source of contamination and are used to maintain or enhance a person's health, hygiene, or appearance. It may include items such as medicines; first aid supplies; other items such as cosmetics; and toiletries such as toothpaste and mouthwash.

"pH" means the symbol for the negative logarithm of the hydrogen ion concentration, which is a measure of the degree of acidity or alkalinity of a solution. Values between 0 and 7 indicate acidity and values between 7 and 14 indicate alkalinity. The value for pure distilled water is 7, which is considered neutral.

"Physical facilities" means the structure and interior surfaces of a food establishment including accessories such as soap and towel dispensers and attachments such as light fixtures and heating or air conditioning system vents.

"Plumbing fixture" means a receptacle or device that is permanently or temporarily connected to the water distribution system of the premises and demands a supply of water from the system; or discharges used water, waste materials, or sewage directly or indirectly to the drainage system of the premises.

"Plumbing system" means the water supply and distribution pipes; plumbing fixtures and traps; soil, waste, and vent pipes; sanitary and storm sewers and building drains, including their respective connections, devices, and appurtenances within the premises; and water-treating equipment.

"Poisonous or toxic materials" means substances that are not intended for ingestion and are included in 4 categories:

- (A) Cleaners and sanitizers, which include cleaning and sanitizing agents and agents such as caustics, acids, drying agents, polishes, and other chemicals;
- (B) Pesticides, except sanitizers, which include substances such as insecticides and rodenticides;
- (C) Substances necessary for the operation and maintenance of the establishment such as nonfood grade lubricants and personal care items that may be deleterious to health; and
- (D) Substances that are not necessary for the operation and maintenance of the establishment and are on the premises for retail sale, such as petroleum products and paints.

"Poultry" means any domesticated bird (chickens, turkeys, ducks, geese, ratites, guineas or squabs), whether live or dead, as defined in 9 CFR, Part 381 and any migratory waterfowl, game bird, such as pheasant, partridge, quail, grouse, or pigeon, whether live or dead, as defined in 9 CFR, Part 362.

"Premises" means:

- (A) The physical facility, its contents, and the contiguous land or property under the control of the license holder; or
- (B) The physical facility, its contents, and the land or property not under the control of the license holder, unless its facilities and contents are under the control of the license holder and may impact food establishment personnel, facilities, or operations, and a food establishment is only one component of a larger operation such as a health care facility, hotel, motel, school, recreational camp, or prison.

"Primal cut" means a basic major cut into which carcasses and sides of meat are separated, such as a beef round, pork loin, lamb flank, or veal breast.

"Priority item" means a provision in this Chapter the application of which contributes directly to the elimination, prevention, or reduction to an acceptable level of hazards associated with foodborne illness or injury and there is no other provision that more directly controls the hazards. Priority item includes an item with a quantifiable measure to show control of hazards such as cooking, reheating, cooling or handwashing.

"Priority foundation item" means a provision in this Chapter whose application supports, facilitates, or enables one or more priority items. "Priority foundation item" includes an item that requires the purposeful incorporation of specific actions, equipment, or procedures by industry management to attain control of risk factors that contribute to foodborne illness or injury such as personnel training, infrastructure, or necessary equipment, HACCP plans, documentation or record keeping, and labeling.

"Ratite" means a flightless bird such as an emu, ostrich, or rhea.

"Ready-to-eat food" means

(A) food that is in a form that is edible without additional preparation to achieve food safety, as specified under OAC 310:257-5-46(a)-(c) or OAC 310:257-5-47 or OAC 310:257-5-49, or is a raw or partially cooked animal food and the consumer is advised as specified under OAC 310:257-5-46(d)(1) and (3); or is prepared in accordance with a variance that is granted as specified under OAC 310:257-5-46(d)(4); and may receive additional preparation for palatability or aesthetic, epicurean, gastronomic, or culinary purposes and

(B) includes raw animal food that is cooked as specified under OAC 310:257-5-46 or OAC 310:257-5-47, or frozen as specified under OAC 310:257-5-49; raw fruits and vegetables that are washed as specified under OAC 310:257-5-27; fruits and vegetables that are cooked for hot holding, as specified under OAC 310:257-5-48; All Time/Temperature Control for Safety Food that is cooked to the temperature and time required for the specific food under OAC 310:257-5-46 through 310:257-5-48.1 and cooled as specified under OAC 310:257-5-57; Plant food for which further washing, cooking, or other processing is not required for food safety, and from which rinds, peels, husks, or shells, if naturally present are removed; substances derived from plants such as spices, seasonings, and sugar; a bakery item such as bread, cakes, pies, fillings, or icing for which further cooking is not required for food safety; The following products that are produced in accordance with USDA guidelines and that have received a lethality treatment for pathogens: dry, fermented sausages, such as dry salami or pepperoni; salt-cured meat and poultry products, such as prosciutto ham, country cured ham, and Parma ham; dried meat and poultry products, such as jerky or beef sticks; and foods manufactured according to 21 CFR Part 113, Thermally Processed Low-Acid Foods Packaged in Hermetically Sealed Containers.

"Reduced oxygen packaging" means:

(A) The reduction of the amount of oxygen in a package by removing oxygen; displacing oxygen and replacing it with another gas or combination of gases; or otherwise controlling the oxygen content to a level below that normally found in the atmosphere (approximately 21%) at sea level;

(B) A process as specified in paragraph (A) of this definition that involves a food for which hazards *Clostridium botulinum* or *Listeria monocytogenes* require control in the final packaged form;

(C) Reduced oxygen packaging includes vacuum packaging, in which air is removed from a package of food and the package is hermetically sealed so that a vacuum remains inside the package;

(D) Modified atmosphere packaging, in which the atmosphere of a package of food is modified so that its composition is different from air but the atmosphere may change over time due to the permeability of the packaging material or the respiration of the food. Modified atmosphere packaging includes: reduction in the proportion of oxygen, total replacement of oxygen, or an increase in the proportion of other gases such as carbon dioxide or nitrogen;

(E) Controlled atmosphere packaging, in which the atmosphere of a package of food is modified so that until the package is opened, its composition is different from air, and continuous control of that atmosphere is maintained, such as by using oxygen scavengers or a combination of total replacement of oxygen, nonrespiring food, and impermeable packaging material

(F) Cook chill packaging, as described in OAC 310:257-5-64(d)(E); and

(G) Sous vide packaging, as described in OAC 310:257-5-64(d)(D).

"Refuse" means solid waste not carried by water through the sewage system.

"Regulatory authority" means a representative, such as an onsite inspector, of the Department.

"Reminder" means a written statement concerning the health risk of consuming animal foods raw, undercooked, or without otherwise being processed to eliminate pathogens.

"Re-Service" means the transfer of food that is unused and returned by a consumer after being served or sold and in the possession of the consumer, to another person.

"Restrict" means to limit the activities of a food employee so that there is no risk of transmitting a disease that is transmissible through food, and the food employee does not work with exposed food, clean equipment, utensils, linens; and unwrapped single-service or single-use articles.

"Restricted egg" means any check, dirty egg, incubator reject, inedible, leaker, or loss as defined in 9 CFR, Part 590.

"Restricted use pesticide" means a pesticide product that contains the active ingredients specified in 40 CFR 152.175. Pesticides classified for restricted use, and that is limited to use by or under the direct supervision of a certified applicator.

"Risk" means the likelihood that an adverse health effect will occur within a population as a result of a hazard in a food.

"Safe material" means:

(A) An article manufactured from or composed of materials that may not reasonably be expected to result, directly or indirectly, in their becoming a component or otherwise affecting the characteristics of any food;

(B) An additive that is used as specified in Section 409 of the Federal Food, Drug, and Cosmetic Act; or

(C) Other materials that are not additives and that are used in conformity with applicable regulations of the Food and Drug Administration.

"Sanitization" means the application of cumulative heat or chemicals on cleaned food-contact surfaces that, when evaluated for efficacy, is sufficient to yield a reduction of 5 logs, which is equal to a 99.999% reduction of representative disease microorganisms of public health importance.

"Sealed" means free of cracks or other openings that allow the entry or passage of moisture.

"Seasonal food establishment" means a facility that is open no more than 180 consecutive days per physical address per year. The seasonal food establishment is limited to serving coffee and snow cones with use of liquid milk, individually packaged ice cream products, uncut raw fruits, uncut raw vegetables, nuts in the shell, and commercially bottled syrup, sorghum, honey, sweet cider, and other non-Time/Temperature Control for Safety Foods. Seasonal food establishments selling only prepackaged foods and engaging in no preparation are not required to pay a plan review fee.

"Service animal" means an animal such as a guide dog, signal dog, or other animal as allowed by the ADA, individually trained to provide assistance to an individual with a disability. Service animals are working animals, not pets. The work or task an animal has been trained to provide must be directly related to the person's disability. Animals whose sole function is to provide comfort or emotional support do not qualify as service animals under the ADA.

"Servicing area" means an operating base location to which a mobile food establishment or transportation vehicle returns regularly, for such things as vehicle and equipment cleaning, discharging liquid or solid wastes, refilling water tanks and ice bins, and boarding food.

"Sewage" means liquid waste containing animal or vegetable matter in suspension or solution and may include liquids containing chemicals in solution.

"Shellfish control authority" means a state, federal, foreign, tribal, or other government entity legally responsible for administering a program that includes certification of molluscan shellfish harvesters and dealers for interstate commerce.

"Shellstock" means raw, in-shell molluscan shellfish.

"Shiga toxin-producing *Escherichia coli* (STEC)" means any *E. coli* capable of producing Shiga toxins (also called verocytotoxins or "Shiga-like" toxins). STEC infections can be asymptomatic or may result in a spectrum of illness ranging from mild non-bloody diarrhea, to hemorrhagic colitis (i.e., bloody diarrhea) to hemolytic uremic syndrome (HUS-a type of kidney failure). Examples of serotypes of STEC include: *E. coli* O157:H7; *E. coli* O157:NM; *E. coli* O26:H11; *E. coli* O145:NM; *E. coli* O103:H2; and *E. coli* O111:NM. STEC are sometimes referred to as VTEC (verocytotoxigenic *E. coli*) or as EHEC (Enterohemorrhagic *E. coli*). EHEC are a subset of STEC which can cause hemorrhagic colitis or HUS.

"Shucked shellfish" means molluscan shellfish that have one or both shells removed.

"Single-service articles" means tableware, carry-out utensils, and other items such as: bags, containers, placemats, stirrers, straws, toothpicks, and wrappers that are designed and constructed for one time, one person use after which they are intended for discard.

"Single-use articles" means utensils and bulk food containers designed and constructed to be used once and discarded. "Single-use articles" includes items such as wax paper, butcher paper, plastic wrap, formed aluminum food containers, jars, plastic tubs or buckets, bread wrappers, pickle barrels, ketchup bottles, and number 10 cans which do not meet the materials, durability, strength, and cleanability specifications under OAC 310:257-7-1, OAC 310:257-7-13 and OAC 310:257-7-15 for multiuse utensils.

"Slacking" means the process of moderating the temperature of a food such as allowing a food to gradually increase from a temperature of -23°C (-10°F) to -4°C (25°F) in preparation for deep-fat frying or to facilitate even heat penetration during the cooking of previously block-frozen food such as shrimp.

"Smooth" means a food-contact surface having a surface free of pits and inclusions with a cleanability equal to or exceeding that of (100 grit) number 3 stainless steel; A nonfood-contact surface of equipment having a surface equal to that of commercial grade hot-rolled steel free of visible scale; and a floor, wall, or ceiling having an even or level surface with no roughness or projections that render it difficult to clean.

"Sous Vide" means a method of cooking in which raw or partially cooked food is vacuum packaged in an impermeable bag, cooked in the bag, rapidly chilled, and refrigerated at temperatures that inhibit the growth of psychrotrophic pathogens.

"Tableware" means eating, drinking, and serving utensils for table use such as flatware including forks, knives, and spoons; hollowware including bowls, cups, serving dishes, and tumblers; and plates.

"Temperature measuring device" means a thermometer, thermocouple, thermistor, or other device that indicates the temperature of food, air, or water.

"Tempered" means a mixture of hot and cold water between 100°F and 120°F.

"Temporary food establishment" means a food establishment where food is offered for sale or sold at retail from a fixed, temporary facility in conjunction with a single event or celebration not to exceed fourteen (14) consecutive days.

"Time/Temperature Control for Safety Food" means a food that requires time/temperature control for safety (TCS) to limit pathogenic microorganism growth or toxin formation.

(A) Time/Temperature Control for Safety Food includes:

- (i) An animal food that is raw or heat-treated; a plant food that is heat-treated or consists of raw seed sprouts, cut melons, cut leafy greens, cut tomatoes or mixtures of cut tomatoes that are not modified in a way so that they are unable to support pathogenic microorganism growth or toxin formation, or garlic-in-oil mixtures that are not modified in a way so that they are unable to

support pathogenic microorganism growth or toxin formation; and

(ii) Except as specified (B)(iv) of this definition, a food that because of the interaction of its aw and pH values is designated in the Product Assessment Required (PA) in Tables 1 or 2 of Appendix A of this Chapter:

(B) Time/Temperature Control for Safety Food does not include:

(i) An air-cooled hard-boiled egg with shell intact, or an egg with shell intact that is not hard-boiled, but has been pasteurized to destroy all viable *Salmonellae*;

(ii) A food in an unopened hermetically sealed container that is commercially processed to achieve and maintain commercial sterility under conditions of non-refrigerated storage and distribution;

(iii) A food that because of its aw or pH value, or interaction of aw and pH value, is designated as a non-TCS food as listed in Table 1 or 2 of Appendix A of this Chapter;

(iv) A food that is designated as Product Assessment Required (PA) in Table 1 or 2 of Appendix A of this Chapter and has undergone a Product Assessment showing that the growth or toxin information of pathogenic microorganisms that are reasonably likely to occur in that food is precluded due to:

(I) Intrinsic factors including added or natural characteristics of the food such as preservatives, antimicrobials, humectants, acidulants or nutrients;

(II) Extrinsic factors including environmental or operational factors that affect the food such as packaging, modified atmosphere such as reduced oxygen packaging, shelf-life and use, or temperature range of storage and use; or

(III) A combination of intrinsic and extrinsic factors; or

(v) A food that does not support the growth or toxin formation of pathogenic microorganisms in accordance with (B)(i) - (B)(iv) of this definition above, even though the food may contain a pathogenic microorganism or chemical or physical contaminant at a level sufficient to cause illness or injury.

"USDA" means the U.S. Department of Agriculture.

"Utensil" means a food-contact implement or container used in the storage, preparation, transportation, dispensing, sale, or service of food,

such as kitchenware or tableware that is multiuse, single-service, or single-use; gloves used in contact with food; temperature sensing probes of food temperature measuring devices; and probe-type price or identification tags used in contact with food.

"Variance" means a written document issued by the Department that authorizes a modification or waiver of one or more requirements of this Chapter, if, in the opinion of the regulatory authority, a health hazard or nuisance will not result from the modification or waiver.

"Vending machine" means a self-service device that, upon insertion of a coin, paper currency, token, card, key, or by electronic transaction, or by optional manual operation, dispenses unit servings of food in bulk or in packages without the necessity of replenishing the device between each vending operation.

"Vending machine location" means the room, enclosure, space, or area where one or more vending machines are installed and operated and includes the storage areas and areas on the premises that are used to service and maintain the vending machines.

"Warewashing" means the cleaning and sanitizing of utensils and food-contact surfaces of equipment.

"Whole-muscle, intact beef" means whole muscle beef that is not injected, mechanically tenderized, reconstructed, or scored and marinated, from which beef steaks may be cut.

310:257-1-4. Exemptions

(a) The food establishment definition does not include a food processing plant; a facility that sells only commercially pre-packaged, non-Time/Temperature Control for Safety Foods, from an approved source, which are incidental to the business, and does not have food in storage; a kitchen in a private home that is in compliance with 2 O.S. 5-4.1 et seq; a kitchen in a private home, such as a bed-and-breakfast operation that prepares and offers food to guests if the number of available guest bedrooms does not exceed the number allowed by 63 O.S. §§ 1201 et seq. and breakfast is the only meal offered; a lodging facility that is serving food according to OAC 310:285-3-14, Lodging Establishments; a private home that receives catered or home-delivered food; individual farmers' market vendors that are in compliance with the definition of a farmers' market and hold a food processors license from the Oklahoma Department of Health, small egg packer license, licensed by the Oklahoma Department of Agriculture, Food and Forestry; a produce stand that offers only whole, uncut and unprocessed fresh fruits, melons, vegetables and legumes and/or whole uncracked and unprocessed tree nuts; or other locations specifically exempted in law.

(b) Persons engaged solely in the sale of food products at a County Free fair as defined by Title 2 O.S. §§ 15-67 are not subject to the provisions of this Chapter.

(1) These persons are not exempted from Title 63 O.S. § 1-1118(B)

(3) in regards to licensure.

(2) The consumer shall be informed by a clearly visible placard, at least eight (8) inches by eleven (11) inches, at the sales or service location, which states "This food is prepared in a kitchen that is not inspected by the Oklahoma Department of Health".

SUBCHAPTER 3. MANAGEMENT AND PERSONNEL

310:257-3-1. Assignment

(a) Except as specified in (b) of this Section, the license holder shall be the person in charge or shall designate a person in charge and shall ensure that a person in charge is present at the food establishment during all hours of operation.

(b) In a food establishment with two or more departments that are the legal responsibility of the same license holder and that are located on the same premises, the license holder may, during specific time periods when

food is not being prepared, packaged, or served, designate a single person in charge who is present on the premises during all hours of operation, and who is responsible for the licensed food establishment. (c) The food establishment license holder through the certified food manager or person in charge shall develop and implement standard operating procedures that ensure compliance with OAC 310:257-15-7.

[Source: Amended at 28 Ok Reg 2289, eff 11-1-11 ; Amended at 33 Ok Reg 1520, eff 9-11-16]

310:257-3-1.1. Certified food protection manager

(a) At least one person may be a certified food protection manager who has shown proficiency of required information through passing a test that is part of an Accredited Program.

(b) This section does not apply to certain types of food establishments deemed by the regulatory authority to pose minimal risk of causing, or contributing to, foodborne illness based on the nature of the operation and extent of food preparation.

[Source: Added at 38 Ok Reg 1947, eff 9-11-21]

310:257-3-2. Demonstration

Based on the risks inherent to the food operation, during inspections and upon request a certified food manager or person in charge shall demonstrate to the regulatory authority knowledge of foodborne disease prevention, application of the Hazard Analysis Critical Control Point principles, and the requirements of this Chapter. The person in charge at the time of the inspection shall demonstrate this knowledge by:

- (1) Complying with this Chapter by having no priority items during the current inspection; or
- (2) Being a certified food protection manager who has shown proficiency of required information through passing a test that is part of an accredited program; or
- (3) Responding correctly to the inspector's questions as they relate to the specific food operation. The areas of knowledge include:
 - (A) Describing the relationship between the prevention of foodborne disease and the personal hygiene of a food employee;
 - (B) Explaining the responsibility of the person in charge for preventing the transmission of foodborne disease by a food employee who has a disease or medical condition that may cause foodborne disease;
 - (C) Describing the symptoms associated with the diseases that are transmissible through food;
 - (D) Explaining the significance of the relationship between maintaining the time and temperature of Time/Temperature Control for Safety Food and the prevention of foodborne illness;

(E) Explaining the hazards involved in the consumption of raw or undercooked meat, poultry, eggs, and fish;

(F) Stating the required food temperatures and times for safe cooking of Time/Temperature Control for Safety Food including meat, poultry, eggs, and fish;

(G) Stating the required temperatures and times for the safe refrigerated storage, hot holding, cooling, and reheating of Time/Temperature Control for Safety Food;

(H) Describing the relationship between the prevention of foodborne illness and the management and control of the following:

(i) Cross contamination,

(ii) Hand contact with ready-to-eat foods,

(iii) Handwashing, and

(iv) Maintaining the food establishment in a clean condition and in good repair;

(I) Describing foods identified as major food allergens and the symptoms that a major food allergen could cause in a sensitive individual who has an allergic reaction.

(J) Explaining the relationship between food safety and providing equipment that is:

(i) Sufficient in number and capacity, and

(ii) Properly designed, constructed, located, installed, operated, maintained, and cleaned;

(K) Explaining correct procedures for cleaning and sanitizing utensils and food contact surfaces of equipment;

(L) Identifying the source of water used and measures taken to ensure that it remains protected from contamination such as providing protection from backflow and precluding the creation of cross connections;

(M) Identifying poisonous or toxic materials in the food establishment and the procedures necessary to ensure that they are safely stored, dispensed, used, and disposed of according to law;

(N) Identifying critical control points in the operation from purchasing through sale or service that when not controlled may contribute to the transmission of foodborne illness and explaining steps taken to ensure that the points are controlled in accordance with the requirements of this Code;

(O) Explaining the details of how the person in charge and food employees comply with the HACCP Plan if a plan is required by law, this Code, or an agreement between the Department and the food establishment;

(P) Explaining the responsibilities, rights, and authorities assigned by this code to the:

(i) Food employee,

(ii) Conditional employee,

(iii) Person in charge,

(iv) Regulatory authority; and

(Q) Explaining how the person in charge, food employees, and conditional employees comply with reporting responsibilities and exclusion or restriction of food employees.

[Source: Added at 23 Ok Reg 2358, eff 6-25-06 ; Amended at 28 Ok Reg 2289, eff 11-1-11 ; Amended at 38 Ok Reg 1947, eff 9-11-21]

310:257-3-3. Person in charge

The person in charge shall ensure that:

- (1) Food establishment operations are not conducted in a private home or in a room used as living or sleeping quarters;
- (2) Persons unnecessary to the food establishment operation are not allowed in the food preparation, food storage, or warewashing areas, except that brief visits and tours may be authorized by the person in charge if steps are taken to ensure that exposed food; clean equipment, utensils, and linens; and unwrapped single-service and single-use articles are protected from contamination;
- (3) Employees and other persons such as delivery and maintenance persons and pesticide applicators entering the food preparation, food storage, and warewashing areas comply with this Chapter;
- (4) Employees are effectively cleaning their hands, by routinely monitoring the employees' handwashing;
- (5) Employees are visibly observing foods as they are received to determine that they are from approved or lawful sources, delivered at the required temperatures, protected from contamination, unadulterated, and accurately presented, by routinely monitoring the employees' observations and periodically evaluating foods upon their receipt;
- (6) Employees are verifying that foods delivered to the food establishment during non-operating hours are from approved or lawful sources and are placed into appropriate storage locations such that they are maintained at the required temperatures, protected from contamination, unadulterated, and accurately presented;
- (7) Employees are properly cooking Time/Temperature Control for Safety Food, being particularly careful in cooking those foods known to cause severe foodborne illness and death, such as eggs and comminuted meats, through daily oversight of the employees' routine monitoring of the cooking temperatures using appropriate temperature measuring devices properly scaled and calibrated;
- (8) Employees are using proper methods to rapidly cool Time/Temperature Control for Safety Foods that are not held hot or are not for consumption within four (4) hours, through daily oversight of the employees' routine monitoring of food temperatures during cooling;
- (9) Employees are properly maintaining the temperatures of Time/Temperature Control for Safety Foods during hot and cold holding through daily oversight of the employees' routine monitoring of food temperatures;

- (10) Consumers who order raw or partially cooked ready-to-eat foods of animal origin are informed that the food is not cooked sufficiently to ensure its safety;
- (11) Employees are properly sanitizing cleaned multiuse equipment and utensils before they are reused, through routine monitoring of solution temperature and exposure time for hot water sanitizing, and chemical concentration, pH, temperature, and exposure time for chemical sanitizing;
- (12) Consumers are notified that clean tableware is to be used when they return to self-service areas such as salad bars and buffets;
- (13) Except when otherwise approved, employees are preventing cross-contamination of ready-to-eat food with bare hands by properly using suitable utensils such as deli tissue, spatulas, tongs, single-use gloves, or dispensing equipment;
- (14) Employees are properly trained in food safety, including food allergy awareness, as it relates to their assigned duties;
- (15) Food employees and conditional employees are informed, in a verifiable manner, of their responsibility to report, in accordance with law, to the person in charge, information about their health and activities as they relate to diseases that are transmissible through food, as specified under OAC 310:257-3-4(a); and
- (16) Written procedures and plans, where specified by this Chapter and as developed by the food establishment, are maintained and implemented as required.

[Source: Added at 23 Ok Reg 2358, eff 6-25-06 ; Amended at 26 Ok Reg 1477, eff 6-11-09 ; Amended at 28 Ok Reg 2289, eff 11-1-11 ; Amended at 33 Ok Reg 1520, eff 9-11-16 ; Amended at 38 Ok Reg 1947, eff 9-11-21 ; Amended at 39 Ok Reg 1247, eff 9-11-22]

310:257-3-4. Responsibility of the license holder, person in charge, and employees

(a) **Employee reporting.** The license holder shall require food employees and conditional employees to report to the person in charge information about their health and activities as they relate to diseases that are transmissible through food. A food employee or conditional employee shall report the information in a manner that allows the person in charge to reduce the risk of foodborne disease transmission, including providing necessary additional information, such as the date of onset of symptoms and an illness, or of a diagnosis without symptoms, if the food employee or conditional employee:

- (1) **Reportable symptoms.** Has any of the following symptoms:
 - (A) Vomiting,
 - (B) Diarrhea,
 - (C) Jaundice,
 - (D) Sore throat with fever; or
 - (E) A lesion containing pus such as a boil or infected wound that is open or draining and is:
 - (i) On the hands or wrists, unless an impermeable cover such as a fingercot or stall protects the lesion and a single-use glove is worn over the

impermeable cover,

(ii) On exposed portions of the arms, unless the lesion is protected by an impermeable cover, or

(iii) On other parts of the body, unless the lesion is covered by a dry, durable, tight-fitting bandage;

(2) **Reportable diagnosis.** Has an illness diagnosed by a health practitioner due to:

(A) Norovirus,

(B) Hepatitis A virus,

(C) *Shigella* species,

(D) Shiga toxin-producing *Escherichia coli*,

(E) Typhoid fever (caused by *Salmonella* Typhi), or

(F) *Salmonella* (non-typhoidal);

(3) **Reportable past illness.** Had Typhoid fever, diagnosed by a health practitioner, within the past three (3) months, without having received antibiotic therapy, as determined by a health practitioner;

(4) **Reportable history of exposure.** Has been exposed to or is the suspected source of, a confirmed disease outbreak, because the food employee or conditional employee consumed or prepared food implicated in the outbreak, or consumed food at an event prepared by a person who is infected or ill with:

(A) Norovirus within the past forty-eight (48) hours of the last exposure,

(B) Shiga Toxin-Producing *Escherichia coli* or *Shigella* spp. within the past three (3) days of the last exposure,

(C) Typhoid fever within the past fourteen (14) days of the last exposure, or

(D) Hepatitis A virus within the past thirty (30) days of the last exposure; or

(5) **Reportable history of exposure.** Has been exposed by attending or working in a setting where there is a confirmed disease outbreak, or living in the same household as, and has knowledge about, an individual who works or attends a setting where there is a confirmed disease outbreak, or living in the same household as, and has knowledge about, an individual diagnosed with an illness caused by:

(A) Norovirus within the past forty-eight (48) hours of the last exposure,

(B) Shiga Toxin-Producing *Escherichia coli* or *Shigella* spp. within the past three (3) days of the last exposure,

(C) Typhoid fever (caused by *Salmonella* Typhi) within the past fourteen (14) days of the last exposure, or

(D) Hepatitis A virus within the past thirty (30) days of the last exposure.

(b) **Responsibility of person in charge to notify the regulatory authority.** The person in charge shall notify the regulatory authority within twenty-four (24) hours or the next business day, if the facility or regulatory authority is not open the following day, when a food employee is:

(1) Jaundiced, or

(2) Diagnosed with an illness due to a pathogen as specified under (a)(2) (A) through (F) of this Section.

(c) **Responsibility of the person in charge to prohibit a conditional employee from becoming a food employee.** The person in charge shall ensure that a conditional employee:

(1) **Has symptoms or diagnosis.** Who exhibits or reports a symptom, or who reports a diagnosed illness as specified under (a)(1) through (a)(3) of this Section, is prohibited from becoming a food employee until the conditional employee meets the criteria for the specific symptoms or diagnosed illness as specified under OAC 310:257-3-6; and

(2) **Had exposure.** Who will work as a food employee in a food establishment that serves a highly susceptible population and reports a history of exposure as specified under (a)(4) through (a)(5) of this Section, is prohibited from becoming a food employee until the conditional employee meets the criteria as specified under OAC 310:257-3-6(a)(10).

(d) **Responsibility of the person in charge to exclude or restrict.** The person in charge shall ensure that a food employee who exhibits or reports a symptom, or who reports a diagnosed illness or a history of exposure as specified under (a)(1) through (a)(5) of this Section is:

(1) **Exclusions.** Excluded as specified under OAC 310:257-3-5 (relating to exclusions and restrictions) and in compliance with OAC 310:257-3-6 (relating to removal, adjustment, or retention of exclusions and restrictions); or

(2) **Restrictions.** Restricted as specified under OAC 310:257-3-5 and in compliance with the provisions specified under OAC 310:257-3-6.

(e) **Responsibility of food employees and conditional employees to report.** A food employee or conditional employee shall report to the person in charge, prior to beginning duties in the food establishment, the information as specified under (a) of this Section.

(f) **Responsibility of food employees to comply.** A food employee shall:

(1) **Comply with exclusion.** Comply with the exclusion as specified under OAC 310:257-3-5 and with the provisions specified under OAC 310:257-3-6.

(2) **Comply with restrictions.** Comply with the restrictions as specified under OAC 310:257-3-5 and comply with the provisions specified under OAC 310:257-3-6.

[Source: Added at 23 Ok Reg 2358, eff 6-25-06 ; Amended at 28 Ok Reg 2289, eff 11-1-11 ; Amended at 33 Ok Reg 1520, eff 9-11-16 ; Amended at 38 Ok Reg 1947, eff 9-11-21]

310:257-3-5. Exclusions and restrictions

Conditions for exclusion or restriction. The person in charge shall exclude or restrict a food employee from a food establishment in accordance with the following:

(1) **Symptomatic with vomiting or diarrhea.** Except when the symptom is from a noninfectious condition, exclude a food employee if the food employee is:

- (A) Symptomatic with vomiting or diarrhea; or
- (B) Symptomatic with vomiting or diarrhea and diagnosed with an infection from Norovirus, *Shigella* spp, *Salmonella* (nontyphoidal), or Shiga toxin-producing *E. coli*.

(2) Jaundiced or diagnosed with hepatitis A infection.

Exclude a food employee who is:

- (A) Jaundiced and the onset of jaundice occurred within the last seven (7) calendar days, unless the food employee provides to the person in charge written medical documentation from a health practitioner specifying that the jaundice is not caused by hepatitis A virus or other fecal orally transmitted infection.
- (B) Diagnosed with an infection from hepatitis A virus within fourteen (14) calendar days from the onset of any illness symptoms, or within seven (7) calendar days of the onset of jaundice; or
- (C) Diagnosed with an infection from hepatitis A virus without developing symptoms.

(3) Diagnosed or reported previous illness with Typhoid fever.

Exclude a food employee who is diagnosed with Typhoid fever or reports having had Typhoid fever within the past three (3) months as specified under OAC 310:257-3-4(a)(3).

(4) Diagnosed with an asymptomatic infection from

Norovirus. If a food employee is diagnosed with an infection from Norovirus and is asymptomatic:

- (A) Exclude the food employee who works in a food establishment serving a highly susceptible population; or
- (B) Restrict the food employee who works in a food establishment not serving a highly susceptible population.

(5) Diagnosed with *Shigella* spp. infection and

asymptomatic. If a food employee is diagnosed with an infection from *Shigella* spp., and is asymptomatic:

- (A) Exclude the food employee who works in a food establishment serving a highly susceptible population; or
- (B) Restrict the food employee who works in a food establishment not serving a highly susceptible population.

(6) Diagnosed with Shiga toxin-producing *E. coli* (STEC) and

asymptomatic. If a food employee is diagnosed with an infection from Shiga Toxin Producing *E. coli* and is asymptomatic:

- (A) Exclude the food employee who works in a food establishment serving a highly susceptible population; or
- (B) Restrict the food employee who works in a food establishment not serving a highly susceptible population.

(7) Diagnosed with nontyphoidal *Salmonella* and

asymptomatic. If a food employee is diagnosed with an infection from *Salmonella* (nontyphoidal) and is asymptomatic, restrict the food employee who works in a food establishment serving a highly susceptible population or in a food establishment not serving a highly susceptible population.

(8) Symptomatic with sore throat with fever. If a food employee is ill with symptoms of acute onset of sore throat with

fever:

- (A) Exclude the food employee who works in a food establishment serving a highly susceptible population; or
- (B) Restrict the food employee who works in a food establishment not serving a highly susceptible population.

(9) **Symptomatic with uncovered infected wound or pustular boil.** If a food employee is infected with a skin lesion containing pus such as a boil or infected wound that is open or draining and not properly covered as specified under OAC 310:257-3-4 (a)(1)(E), restrict the food employee.

(10) **Exposed to foodborne pathogen and works in food establishment serving highly susceptible population.** If a food employee is exposed to a foodborne pathogen as specified in OAC 310:257-3-4 or OAC 310:257-3-5, restrict the food employee who works in a food establishment serving a highly susceptible population.

[Source: Added at 23 Ok Reg 2358, eff 6-25-06 ; Amended at 28 Ok Reg 2289, eff 11-1-11 ; Amended at 33 Ok Reg 1520, eff 9-11-16 ; Amended at 38 Ok Reg 1947, eff 9-11-21]

310:257-3-6. Removal, adjustment, or retention of exclusions and restrictions

(a) **Managing exclusions or restrictions.** The person in charge shall adhere to the following conditions when removing, adjusting, or retaining the exclusion or restriction of a food employee:

(1) **Conditions for diagnosis other than Typhoid fever or hepatitis A virus.** Except when a food employee is diagnosed with Typhoid fever or an infection from hepatitis A virus:

(A) **Removing exclusion for food employee who was symptomatic and not diagnosed.** Reinstate a food employee who was excluded as specified in OAC 310:257-3-5(a)(1)(A) if the food employee:

- (i) Is asymptomatic for at least twenty-four (24) hours; or
- (ii) Provides to the person in charge written medical documentation from a health practitioner that states the symptom is from a noninfectious condition.

(B) **Norovirus diagnosis.** If a food employee was diagnosed with an infection from Norovirus and excluded as specified in OAC 310:257-3-5(a)(1)(B):

- (i) **Adjusting exclusion for food employee who was symptomatic and is now asymptomatic.** Restrict the food employee, who is asymptomatic for at least twenty-four (24) hours and works in a food establishment not serving a highly susceptible population, until the conditions for reinstatement as specified in (a)(4)(A) or (a)(4)(B) of this Section are met; or
- (ii) **Retaining exclusion for food employee who was asymptomatic and is now asymptomatic**

and works in food establishment serving highly susceptible population. Retain the exclusion for the food employee, who is asymptomatic for at least twenty-four (24) hours and works in a food establishment that serves a highly susceptible population, until the conditions for reinstatement as specified in (a)(4)(A) or (a)(4)(B) of this Section are met; or

(C) **Shigella spp. diagnosis.** If a food employee was diagnosed with an infection from *Shigella* spp. and excluded as specified in OAC 310:257-3-5(a)(1)(B):

(i) **Adjusting exclusion for food employee who was symptomatic and is now asymptomatic.**

Restrict the food employee, who is asymptomatic for at least twenty-four (24) hours and works in a food establishment not serving a highly susceptible population, until the conditions for reinstatement as specified in (a)(5)(A) or (a)(5)(B) of this Section are met; or

(ii) **Retaining exclusion for food employee who was asymptomatic and is now asymptomatic.**

Retain the exclusion for the food employee who is asymptomatic for at least twenty-four (24) hours and works in a food establishment that serves a highly susceptible population, until the conditions for reinstatement as specified in (a)(5)(A) or (a)(5)(B) of this Section, or (a)(5)(A) and (a)(3)(A) of this Section are met.

(D) **STEC diagnosis.** If a food employee was diagnosed with an infection from Shiga toxin-producing *Escherichia coli* (STEC) and excluded as specified under OAC 310:257-3-5(a)(1)(B):

(i) **Adjusting exclusion for food employee who was symptomatic and is now asymptomatic.**

Restrict the food employee, who is asymptomatic for at least twenty-four (24) hours and works in a food establishment not serving a highly susceptible population, until the conditions for reinstatement as specified in (a)(6)(A) or (a)(6)(B) of this Section are met; or

(ii) **Retaining exclusion for food employee who was symptomatic and is now asymptomatic and works in food establishment serving highly susceptible population.**

Retain the exclusion for the food employee, who is asymptomatic for at least twenty-four (24) hours and works in a food establishment that serves a highly susceptible population, until the conditions for reinstatement as specified in (a)(6)(A) or (a)(6)(B) of this Section are met.

(E) **Nontyphoidal Salmonella diagnosis.** If a food employee was diagnosed with an infection from Salmonella (nontyphoidal) and excluded as specified under OAC 310:257- 3-5(a)(1)(B):

(i) **Adjusting exclusion for food employee who was symptomatic and is now asymptomatic.**

Restrict the food employee who is asymptomatic for at least thirty (30) days until conditions for reinstatement as specified under (7)(A) or (B) of this section are met; or

(ii) **Retaining exclusion for food employee that remains symptomatic.** Retain the exclusion for the food employee who is symptomatic until conditions for reinstatement as specified under (7) (A) or (7)(B) of this section are met.

(2) **Hepatitis A virus or jaundice diagnosis - removing exclusions.** Reinstatement a food employee who was excluded as specified in OAC 310:257-3-5(a)(2) if the person in charge obtains approval from the Department and one of the following conditions is met;

(A) **Jaundiced for more than seven (7) days.** The food employee has been jaundiced for more than seven (7) calendar days; or

(B) **Symptoms other than jaundice.** The anicteric food employee has been symptomatic with symptoms other than jaundice for more than fourteen (14) calendar days; or

(C) **Medical documentation - free of hepatitis A virus.** The food employee provides to the person in charge written medical documentation from a health practitioner stating that the food employee is free of hepatitis A virus infection.

(3) **Typhoid fever diagnosis - removing exclusions.** Reinstatement a food employee who was excluded as specified in OAC 310:257-3-5(a)(3) if:

(A) **Approval from Department.** The person in charge obtains approval from the Department; and

(B) **Medical documentation -free from Typhoid fever.** The food employee provides to the person in charge written medical documentation from a health practitioner that states the food employee is free from Typhoid fever.

(4) **Norovirus diagnosis - removing exclusion or restriction.** Reinstatement a food employee who was excluded as specified in OAC 310:257-3-5(a)(1)(B) or OAC 310:257-3-5(a)(4)(A) who was restricted under OAC 310:257-3-5(a)(4)(B) if the person in charge obtains approval from the Department and one of the following conditions is met:

(A) **Written medical documentation - free of Norovirus.** The excluded or restricted food employee provides to the person in charge written medical documentation from a health practitioner stating that the

food employee is free of a Norovirus infection;

(B) **Symptoms resolved and more than forty -eight (48) hours.** The food employee was excluded or restricted after symptoms of vomiting or diarrhea resolved, and more than forty-eight (48) hours have passed since the food employee became asymptomatic; or

(C) **Excluded or restricted food employee did not develop symptoms and more than forty-eight (48) hours have passed since diagnosis.** The food employee was excluded or restricted and did not develop symptoms and more than forty-eight (48) hours have passed since the food employee was diagnosed.

(5) **Shigella spp. diagnosis - removing exclusion or restriction.** Reinstate a food employee who was excluded as specified in OAC 310:257-3-5(a)(1)(B) or OAC 310:257-3-5(a)(5)(A) or who was restricted in OAC 310:257-3-5(a)(5)(B) if the person in charge obtains approval from the Department and one of the following conditions is met:

(A) **Written medical documentation - free of Shigella spp.** The excluded or restricted food employee provides to the person in charge written medical documentation from a health practitioner stating that the food employee is free of a *Shigella* spp. infection based on test results showing two (2) consecutive negative stool specimen cultures that are taken:

(i) Not earlier than forty-eight (48) hours after discontinuance of antibiotics, and

(ii) At least twenty-four (24) hours apart;

(B) **Symptoms resolved - more than seven (7) days passed.** The food employee was excluded or restricted after symptoms of vomiting or diarrhea resolved, and more than seven (7) calendar days have passed since the food employee became asymptomatic; or

(C) **Excluded or restricted food employee did not develop symptoms and more than seven (7) days passed since diagnosis.** The food employee was excluded or restricted and did not develop symptoms and more than seven (7) calendar days have passed since the food employee was diagnosed.

(6) **STEC diagnosis - removing exclusion or restriction.** Reinstate a food employee who was excluded or restricted as specified in OAC 310:257-3-5(a)(1)(B) or OAC 310:257-3-5(a)(6)(A) or who was restricted in OAC 310:257-3-5(a)(6)(B) if the person in charge obtains approval from the Department and one of the following conditions is met:

(A) **Written medical documentation - free of infection.** The excluded or restricted food employee provides to the person in charge written medical documentation from a health practitioner stating that the food employee is free of an infection from Shiga toxin-producing *Escherichia coli* (STEC) based on test results

that show 2 consecutive negative stool specimen cultures that are taken:

(i) Not earlier than forty-eight (48) hours after discontinuance of antibiotics; and

(ii) At least twenty-four (24) hours apart;

(B) **Symptoms resolved - more than seven (7) days passed.** The food employee was excluded or restricted after symptoms of vomiting or diarrhea resolved and more than seven (7) calendar days have passed since the food employee became asymptomatic; or

(C) **Excluded or restricted employee did not develop symptoms and more than seven (7) days passed since diagnosis.** The food employee was excluded or restricted and did not develop symptoms and more than seven (7) days have passed since the food employee was diagnosed.

(7) **Nontyphoidal Salmonella - removing exclusion or restriction.** Reinstate a food employee who was excluded as specified under OAC 310:257-3-5(a)(1)(B) or who was restricted as specified under OAC 310:257-3-5(a)(7) if the person in charge obtains approval from the Department and one of the following conditions is met:

(A) **Written medical documentation - free of infection.** The excluded or restricted food employee provides to the person in charge written medical documentation from a health practitioner stating that the food employee is free of a *Salmonella* (nontyphoidal) infection based on test results showing two (2) consecutive negative stool specimen Cultures that are taken:

(i) Not earlier than forty-eight (48) hours after discontinuance of antibiotics, and

(ii) At least twenty-four (24) hours apart;

(B) **Symptoms resolved - more than thirty (30) days passed.** The food employee was restricted after symptoms of vomiting or diarrhea resolved, and more than thirty (30) days have passed since the food employee became asymptomatic; or

(C) **Excluded or restricted employee did not develop symptoms and more than thirty (30) days passed since diagnosis.** The food employee was excluded or restricted and did not develop symptoms and more than thirty (30) days have passed since the food employee was diagnosed.

(8) **Sore throat with fever - removing exclusion or restriction.** Reinstate a food employee who was excluded or restricted as specified in OAC 310:257-3-5(a)(8)(A) or OAC 310:257-3-5(a)(8)(B) if the food employee provides to the person in charge written medical documentation from a health practitioner stating that the food employee meets one of the following conditions:

(A) Has received antibiotic therapy for *Streptococcus pyogenes* infection for more than twenty-four (24) hours;

- (B) Has at least one (1) negative throat specimen culture for *Streptococcus pyogenes* infection; or
- (C) Is otherwise determined by a health practitioner to be free of a *Streptococcus pyogenes* infection.

(9) **Uncovered infected wound or pustular boil - removing restriction.** Reinstate a food employee who was restricted as specified in OAC 310:257-3-5(a)(9) if the skin, infected wound, cut, or pustular boil is properly covered with one of the following:

- (A) **Impermeable cover - hand, finger, or wrist.** An impermeable cover such as a finger cot or stall and a single-use glove over the impermeable cover if the infected wound or pustular boil is on the hand, finger, or wrist;
- (B) **Impermeable cover - arm.** An impermeable cover on the arm if the infected wound or pustular boil is on the arm; or
- (C) **Impermeable cover - other parts of body.** A dry, durable, tight-fitting bandage if the infected wound or pustular boil is on another part of the body.

(10) **Exposure to foodborne pathogen and works in food establishment serving highly susceptible population - removing restriction.** Reinstate a food employee who was restricted as specified in OAC 310:257-3-5(a)(10) and was exposed to one of the following pathogens as specified in OAC 310:257-3-4(a)(4) or OAC 310:257-3-4(a)(5):

- (A) **Norovirus.** Norovirus and one of the following conditions is met:
 - (i) More than forty-eight (48) hours have passed since the last day the food employee was potentially exposed; or
 - (ii) More than forty-eight (48) hours have passed since the food employee's household contact became asymptomatic
- (B) **Shigella spp., STEC.** *Shigella* spp. or Shiga toxin-producing *Escherichia coli* (STEC) and one of the following conditions is met:
 - (i) More than three (3) calendar days have passed since the last day the food employee was potentially exposed; or
 - (ii) More than three (3) calendar days have passed since the food employee's household contact became asymptomatic.
- (C) **Typhoid fever.** Typhoid fever (caused by *Salmonella* Typhi) and one (1) of the following conditions is met:
 - (i) More than fourteen (14) calendar days have passed since the last day the food employee was potentially exposed; or
 - (ii) More than fourteen (14) calendar days have passed since the food employee's household contact became asymptomatic.

(D) **Hepatitis A virus.** Hepatitis A virus and one of the following conditions is met:

- (i) The food employee is immune to hepatitis A virus infection because of a prior illness from hepatitis A;
- (ii) The food employee is immune to hepatitis A virus infection because of vaccination against hepatitis A;
- (iii) The food employee is immune to hepatitis A virus infection because of IgG administration;
- (iv) More than thirty (30) calendar days have passed since the last day the food employee was potentially exposed;
- (v) More than thirty (30) calendar days have passed since the food employee's household contact became jaundiced; or
- (vi) The food employee does not use an alternative procedure that allows bare hand contact with ready-to-eat food until at least thirty (30) days after the potential exposure, as specified in (a)(10)(D)(iv) and (a)(10)(D)(v) of this Section, and the food employee receives additional training about:
 - (I) Hepatitis A symptoms and preventing the transmission of infection,
 - (II) Proper handwashing procedures, and
 - (III) Protecting ready-to-eat food from contamination introduced by bare hand contact.

310:257-3-9. Clean condition

Food employees shall keep their hands and exposed portions of their arms clean.

[Source: Added at 23 Ok Reg 2358, eff 6-25-06]

310:257-3-10. Cleaning procedure

(a) Except as specified in paragraph (d) of this Section, food employees shall clean their hands and exposed portions of their arms, including

surrogate prosthetic devices, for hands or arms, for at least twenty (20) seconds, using a cleaning compound in a handwashing sink that is equipped as specified under OAC 310:257-9-14 and OAC 310:257-11-23 through OAC 310:257-11-28.

(b) Food employees shall use the following cleaning procedure in the order stated to clean their hands and exposed portions of their arms, including surrogate prosthetic devices for hand and arms:

- (1) Rinse under clean, running warm water;
- (2) Apply an amount of cleaning compound recommended by the cleaning compound manufacturer;
- (3) Rub together vigorously for at least ten (10) to fifteen (15) seconds while:
 - (A) Paying particular attention to removing soil from underneath the fingernails during the cleaning procedure; and
 - (B) Creating friction on the surfaces of the hands and arms or surrogate prosthetic devices for hands and arms, finger tips, and areas between the fingers;
- (4) Thoroughly rinse under clean, running warm water; and
- (5) Immediately follow the cleaning procedure with thorough drying using a method as specified in OAC 310:257-11-25.

(c) To avoid re-contaminating hands or surrogate prosthetic devices, food employees may use disposable paper towels or similar clean barriers when touching surfaces such as manually operated faucet handles on a handwashing sink or the handle of a restroom door.

(d) If approved and capable of removing the types of soils encountered in the food operations involved, an automatic handwashing facility may be used by food employees to clean their hands or surrogate prosthetic devices.

310:257-3-12. When to wash

Food employees shall clean their hands and exposed portions of their arms immediately before engaging in food preparation including working with exposed food, clean equipment and utensils, and unwrapped single-service and single-use articles and:

- (1) After touching bare human body parts other than clean hands and clean, exposed portions of arms;
- (2) After using the toilet room;
- (3) After caring for or handling service animals or aquatic animals;
- (4) Except as specified in OAC 310:257-3-18(b), after coughing, sneezing, using a handkerchief or disposable tissue, using tobacco, eating, or drinking;
- (5) After handling soiled equipment or utensils;

- (6) During food preparation, as often as necessary to remove soil and contamination and to prevent cross contamination when changing tasks;
- (7) When switching between working with raw food and working with ready-to-eat food;
- (8) Before donning gloves to initiate tasks that involve working with food; and
- (9) After engaging in other activities that contaminate the hands.

[Source: Added at 23 Ok Reg 2358, eff 6-25-06 ; Amended at 33 Ok Reg 1520, eff 9-11-16 ; Amended at 38 Ok Reg 1947, eff 9-11-21]

310:257-3-13. Where to wash

Food employees shall clean their hands in a handwashing sink or approved automatic handwashing facility and may not clean their hands in a sink used for food preparation, warewashing, or in a service sink or a curbed cleaning facility used for the disposal of mop water and similar liquid waste.

[Source: Added at 23 Ok Reg 2358, eff 6-25-06 ; Amended at 38 Ok Reg 1947, eff 9-11-21]

310:257-3-14. Hand antiseptics

(a) A hand antiseptic used as a topical application, a hand antiseptic solution used as a hand dip, or a hand antiseptic soap shall:

(1) Comply with one of the following:

(A) Be an approved drug that is listed in the FDA publication Approved Drug Products with Therapeutic Equivalence Evaluations as an approved drug based on safety and effectiveness; or

(B) Have active antimicrobial ingredients that are listed in the FDA monograph for OTC Health-Care Antiseptic Drug Products as an antiseptic handwash, and

(2) Consist of only components which the intended use of each complies with one of the following:

(A) A threshold of regulation exemption pursuant to 21 CFR Section 170.39 - Threshold of regulation for substances used in food-contact articles; or

(B) 21 CFR, Part 178 - Indirect Food Additives: Adjuvants; Production Aids, and Sanitizers as regulated for use as a food additive with conditions of safe use; or

(C) A determination of generally recognized as safe (GRAS), partial listings of substances with food uses that are GRAS may be found at 21 CFR, Part 182 - Substances Generally Recognized as Safe, 21 CFR, Part 184 - Direct Food Substances Affirmed as Generally Recognized as Safe for use in contact with food, or 21 CFR, Part 186 - Indirect Food Substances Affirmed as Generally Recognized as Safe for use in contact with food, and in FDA's inventory of GRAS notices, or

(D) A prior sanction listed under 21 CFR, Part 181 - Prior Sanctioned Food Ingredients, or

- (E) A food contact notification that is effective, and
- (3) Be applied only to hands that are cleaned as specified in OAC 310:257-3-10.
- (b) If a hand antiseptic or a hand antiseptic solution used as a hand dip does not meet the criteria specified under (a)(2) of this Section, use shall be:
 - (1) Followed by thorough hand rinsing in clean water before hand contact with food or by the use of gloves; or
 - (2) Limited to situations that involve no direct contact with food by the bare hands.
- (c) A hand antiseptic solution used as a hand dip shall be maintained clean and at a strength equivalent to at least 100 mg/L chlorine.

[Source: Added at 23 Ok Reg 2358, eff 6-25-06 ; Amended at 28 Ok Reg 2289, eff 11-1-11 ; Amended at 33 Ok Reg 1520, eff 9-11-16 ; Amended at 38 Ok Reg 1947, eff 9-11-21]

310:257-3-15. Maintenance

- (a) Food employees shall keep their fingernails trimmed, filed, and maintained so the edges and surfaces are cleanable and not rough.
- (b) Unless wearing intact gloves in good repair, a food employee may not wear fingernail polish or artificial fingernails when working with exposed food.

[Source: Added at 23 Ok Reg 2358, eff 6-25-06]

310:257-3-16. Prohibition

Except for a plain ring such as a wedding band, while preparing food, food employees may not wear jewelry including medical information jewelry on their arms and hands.

[Source: Added at 23 Ok Reg 2358, eff 6-25-06 ; Amended at 28 Ok Reg 2289, eff 11-1-11]

310:257-3-17. Clean condition

Food employees shall wear clean outer clothing to prevent contamination of food, equipment, utensils, linens, and single-service and single-use articles.

[Source: Added at 23 Ok Reg 2358, eff 6-25-06]

310:257-3-18. Eating, drinking, or using tobacco

- (a) Except as specified in (b) of this Section, an employee must eat, drink, or use any form of tobacco, medical marijuana, or vape product in designated areas where the following items cannot be contaminated: exposed food; clean equipment, utensils, and linens; unwrapped single-service and single-use articles; and other items needing protection.
- (b) A food employee may drink from a closed beverage container if the container is handled to prevent contamination of:
 - (1) The employees's hands;
 - (2) The container; and

(3) Exposed food; clean equipment, utensils, and linens; and unwrapped single-service and single-use articles.

[Source: Added at 23 Ok Reg 2358, eff 6-25-06 ; Amended at 38 Ok Reg 1947, eff 9-11-21]

310:257-3-19. Discharges from the eyes, nose, and mouth

Food employees experiencing persistent sneezing, coughing, or a runny nose that causes discharges from the eyes, nose, or mouth may not work with exposed food; clean equipment, utensils, and linens; or unwrapped single-service or single-use articles.

[Source: Added at 23 Ok Reg 2358, eff 6-25-06]

310:257-3-19.1. Use of bandages, finger cots, or finger stalls

If used, an impermeable cover such as a bandage, finger cot or finger stall located on the wrist, hand, or finger of a food employee working with exposed food shall be covered with a single-use glove.

[Source: Added at 38 Ok Reg 1947, eff 9-11-21]

310:257-3-20. Effectiveness of hair restraints

(a) Except as provided in (b) of this Section, food employees shall wear hair restraints such as hats, hair coverings or nets, beard restraints, and clothing that covers body hair, that are designed and worn to effectively keep their hair from contacting exposed food; clean equipment, utensils, and linens; and unwrapped single-service and single-use articles.

(b) This Section does not apply to food employees such as counter staff who only serve beverages and wrapped or packaged foods, hostesses, and wait staff if they present a minimal risk of contaminating exposed food; clean equipment, utensils, and linens; and unwrapped single-service and single-use articles.

[Source: Added at 23 Ok Reg 2358, eff 6-25-06 ; Amended at 38 Ok Reg 1947, eff 9-11-21]

310:257-3-21. Handling prohibition

(a) Except as specified in (b) of this Section, food employees may not care for or handle animals that may be present such as patrol dogs, service animals, or pets that are allowed as specified in OAC 310:257-11-54(b)(2-5).

(b) Food employees with service animals may handle or care for their service animals and food employees may handle or care for fish in aquariums or molluscan shellfish or crustacea in display tanks if they wash their hands as specified under OAC 310:257-3-10 and OAC 310:257-3-12(3).

[Source: Added at 23 Ok Reg 2358, eff 6-25-06]

310:257-3-22. Clean-up of vomiting and diarrheal events

A food establishment shall have written procedures for employees to follow when responding to vomiting or diarrheal events that involve

the discharge of vomitus or fecal matter onto surfaces in the food establishment. The procedures shall address the specific actions employees must take to minimize the spread of contamination and the exposure of employees, consumers, food, and surfaces to vomitus or fecal matter.

[Source: Added at 38 Ok Reg 1947, eff 9-11-21]

310:257-3-23. Availability of educational materials

The Department shall make available educational materials to assist license holders, persons in charge, and employees in complying with the requirements of this Chapter.

[Source: Added at 38 Ok Reg 1947, eff 9-11-21]

SUBCHAPTER 5. FOOD

310:257-5-1. Safe, unadulterated, and honestly presented

Food shall be safe, unadulterated, and, as specified under OAC 310:257-5-66, honestly presented.

[Source: Added at 23 Ok Reg 2358, eff 6-25-06]

310:257-5-2. Compliance with food law

- (a) Food shall be obtained from sources that comply with this Chapter.
- (b) Packaged food shall be labeled as specified in 21 CFR, Part 101 Food Labeling, 9 CFR, Part 317 Labeling, Marking Devices, and Containers, and 9 CFR, Part 381 Subpart N Labeling and Containers, and as specified in this chapter.
- (c) Fish, other than those specified under OAC 310:257-5-49(b), that are intended for consumption in their raw or undercooked form and allowed as specified under OAC 310:257-5-46(d)(1), may be offered for sale or service if they are obtained from a supplier that freezes the fish as specified under OAC 310:257-5-49; or frozen on the premises as specified under OAC 310:257-5-49 and records are retained as specified under OAC 310:257-5-50.
- (d) Whole-muscle, intact beef steaks that are intended for consumption in an undercooked form without a consumer advisory as specified under OAC 310:257-5-46(c) shall be:
 - (1) Obtained from a food processing plant that, upon request by the purchaser, packages the steaks and labels them, to indicate that the steaks meet the definition of whole-muscle, intact beef, or
 - (2) Deemed acceptable by the Department based on other evidence, such as written buyer specifications or invoices that indicates that the steaks explicitly meet the definition of whole-muscle, intact beef, and
 - (3) If individually cut in a food establishment:
 - (A) Cut from whole-muscle intact beef that is labeled by a food processing plant as specified in OAC 310:257-5-2 (e)

- (1) and (e)(2),
 - (B) Prepared so they remain intact, and
 - (C) If packaged for undercooking in a food establishment, labeled as specified in (e)(1) of this Section or identified as specified in (e)(2) of this Section.
- (e) Meat and poultry that is not a ready-to-eat food and is in a packaged form when it is offered for sale or otherwise offered for consumption, shall be labeled to include safe handling instructions as specified in law, including 9 CFR, Section 317.2(l) and 9 CFR, Section 381.125(b).
- (f) Eggs that have not been specifically treated to destroy all viable *Salmonellae* shall be labeled to include safe handling instructions as specified in law, including 21 CFR 101.17(h).
- (g) Alcohol sales and service may only be conducted as allowed by law.

310:257-5-3. Food in a hermetically sealed container

Food in a hermetically sealed container shall be obtained from a food processing plant that is regulated by the food regulatory agency that has jurisdiction over the plant.

[Source: Added at 23 Ok Reg 2358, eff 6-25-06]

310:257-5-4. Fluid milk and milk products

Fluid milk and milk products shall be obtained from sources that comply with Grade A Standards as adopted by the Oklahoma Department of Agriculture Food and Forestry.

[Source: Added at 23 Ok Reg 2358, eff 6-25-06 ; Amended at 33 Ok Reg 1520, eff 9-11-16]

310:257-5-5. Fish

- (a) Fish that are received for sale or service shall be:
- (1) Commercially and legally caught or harvested; or
 - (2) Approved for sale or service.
- (b) Molluscan shellfish that are recreationally caught may not be received for sale or service.

[Source: Added at 23 Ok Reg 2358, eff 6-25-06]

310:257-5-6. Molluscan shellfish

- (a) Molluscan shellfish shall be obtained from sources according to law and the requirements specified in the U.S. Department of Health and Human Services, Public Health Service, Food and Drug Administration, National Shellfish Sanitation Program Guide for the Control of Molluscan Shellfish.
- (b) Molluscan shellfish received in interstate commerce shall be from sources that are listed in the Interstate Certified Shellfish Shippers List.

[Source: Added at 23 Ok Reg 2358, eff 6-25-06]

310:257-5-7. Wild mushrooms

(a) Except as specified in (b) of this Section, mushroom species picked in the wild shall not be offered for sale or service by a food establishment.

(b) This Section does not apply to:

- (1) Cultivated wild mushroom species that are grown, harvested, and processed in an operation that is regulated by the food regulatory agency that has jurisdiction over the operation; or
- (2) Wild mushroom species if they are in packaged form and are the product of a food processing plant that is regulated by the food regulatory agency that has jurisdiction over the plant.

[Source: Added at 23 Ok Reg 2358, eff 6-25-06 ; Amended at 33 Ok Reg 1520, eff 9-11-16]

310:257-5-8. Game Animals

(a) Game animals received for sale or service shall be commercially raised livestock for food and:

- (1) Slaughtered and processed under the Exotic Livestock and Exotic Livestock Products Inspection Act (2 O.S. Section 6-290.1 et seq.) or the Oklahoma Rabbit and Rabbit Products Act (2 O.S. Section 6-280.1 et seq.). The rules for rabbit inspection are included in OAC 35:37-9 (relating to Oklahoma Rabbit and Rabbit Products Inspection Regulations). The meat products shall be marked with the appropriate mark of inspection as required in OAC 35:37-9-18 (relating to Form of inspection mark) and OAC 35:37, Appendix D, (relating to Official Marks of Inspection and Other Identification for Rabbits and Rabbit Products); or
- (2) Marked with the appropriate mark of inspection as described in OAC 35:37-11-86 (relating to Official marks and devices to identify inspected and passed carcasses and products of exotic livestock) and OAC 35:37, Appendix E (relating to Official Marks of Inspection and Other Identification for Exotic Livestock and Exotic Livestock Products), for exotic livestock that is commercially raised, including but not limited to animals of the families bovidae, cervidae, and antilocapridae. The rules for exotic livestock inspection are included in OAC 35:37-11 (relating to Exotic Livestock and Exotic Livestock Products); or
- (3) Slaughtered and processed under a voluntary inspection program administered by the USDA for exotic animals, including reindeer, elk, deer, antelope, water buffalo or bison, that are inspected and approved in accordance with 9 CFR Part 352, Exotic Animals and Horses; Voluntary Inspection, or rabbits that are inspected and certified in accordance with 9 CFR Part 354, Voluntary Inspection of Rabbits and Edible Products Thereof; or
- (4) Slaughtered and processed under the U. S. Department of Agriculture Food Safety and Inspection Service Meat Inspection Program or the Oklahoma Department of Agriculture, Food and Forestry - Meat and Poultry Inspection Program if the meat products are from wild hogs that are live caught. All products eligible for consumption shall be legibly marked by the

appropriate regulatory agency with the mark of inspection.

(b) Meat derived from field dressed wild game animals shall not be received for sale or service and can only be donated to individual consumers from approved donation sites provided:

(1) The meat has been processed in an establishment that has been approved by the Oklahoma Department of Wildlife Conservation; and

(2) The meat has been processed in an establishment that has been approved by the Oklahoma Department of Wildlife Conservation and Oklahoma Department of Agriculture, Food and Forestry as a custom processor.

(c) A game animal shall not be received for sale or service if it is a species of wildlife that is listed in 50 CFR 17 - Endangered and Threatened Wildlife and Plants.

[Source: Added at 23 Ok Reg 2358, eff 6-25-06 ; Amended at 28 Ok Reg 2289, eff 11-1-11 ; Amended at 38 Ok Reg 1947, eff 9-11-21]

310:257-5-9. Temperature

(a) Except as specified in (b) of this Section, refrigerated, Time/Temperature Control for Safety Food shall be at a temperature of 5°C (41°F) or below when received.

(b) If a temperature other than 5°C (41°F) for a Time/Temperature Control for Safety Food is specified in law governing its distribution, such as laws governing milk and molluscan shellfish, the food may be received at the specified temperature.

(c) Raw eggs shall be received in refrigerated equipment that maintains an ambient air temperature of 7°C (45°F) or less.

(d) Time/Temperature Control for Safety Food that is cooked to a temperature and for a time specified under OAC 310:257-5-46 through 310:257-5-48 and received hot shall be at a temperature of 57°C (135°F) or above.

(e) A food that is labeled frozen and shipped frozen by a food processing plant shall be received frozen.

(f) Upon receipt, Time/Temperature Control for Safety Food shall be free of evidence of previous temperature abuse.

[Source: Added at 23 Ok Reg 2358, eff 6-25-06 ; Amended at 28 Ok Reg 2289, eff 11-1-11 ; Amended at 33 Ok Reg 1520, eff 9-11-16]

310:257-5-10. Additives

Food may not contain unapproved food additives or additives that exceed amounts specified in 21 CFR 170-180 relating to food additives, generally recognized as safe or prior sanctioned substances that exceed amounts specified in 21 CFR 181-186, substances that exceed amounts specified in 9 CFR Subpart C Section 424.21(b) food ingredients and sources of radiation, or pesticide residues that exceed provisions specified in 40 CFR Part 180 Tolerances and Exemptions for Pesticide Chemical Residues In Food.

310:257-5-11. Eggs

Eggs shall be received clean and sound and may not exceed the restricted egg tolerances for U.S. Consumer Grade B as specified in United States Standards, Grades, and Weight Classes for Shell Eggs, AMS 56.200 et seq., administered by the Agricultural Marketing Service of USDA.

[Source: Added at 23 Ok Reg 2358, eff 6-25-06 ; Amended at 28 Ok Reg 2289, eff 11-1-11 ; Amended at 33 Ok Reg 1520, eff 9-11-16 ; Amended at 38 Ok Reg 1947, eff 9-11-21]

310:257-5-12. Eggs and milk products, pasteurized

- (a) Egg products shall be obtained pasteurized.
- (b) Fluid and dry milk and milk products frozen milk products, such as ice cream, and cheese shall be as specified in 2 O.S. Section 7-401 et seq.

[Source: Added at 23 Ok Reg 2358, eff 6-25-06 ; Amended at 28 Ok Reg 2289, eff 11-1-11 ; Amended at 33 Ok Reg 1520, eff 9-11-16 ; Amended at 38 Ok Reg 1947, eff 9-11-21]

310:257-5-13. Package integrity

Food packages shall be in good condition and protect the integrity of the contents so that the food is not exposed to adulteration or potential contaminants.

[Source: Added at 23 Ok Reg 2358, eff 6-25-06]

310:257-5-14. Ice

Ice for use as a food or a cooling medium shall be made from drinking water.

[Source: Added at 23 Ok Reg 2358, eff 6-25-06]

310:257-5-15. Shucked shellfish, packaging and identification

- (a) Raw shucked shellfish shall be obtained in nonreturnable packages which bear a legible label that identifies the:
 - (1) Name, address, and certification number of the shucker, packer or repacker of the molluscan shellfish; and
 - (2) The "sell by" or "best if used by" date for packages with a capacity of less than 1.89 L (one-half gallon) or the date shucked for packages with a capacity of 1.89 L (one-half gallon) or more.
- (b) A package of raw shucked shellfish that does not bear a label or which bears a label which does not contain all the information as specified under (a) of this Section shall be subject to a hold order, as allowed by law, or seizure and destruction in accordance with 21 CFR Subpart D - Specific Administrative Decisions Regarding Interstate Shipments, Section 1240.60(d) Molluscan shellfish.

[Source: Added at 23 Ok Reg 2358, eff 6-25-06 ; Amended at 28 Ok Reg 2289, eff 11-1-11 ; Amended at 33 Ok Reg 1520, eff 9-11-16]

310:257-5-16. Shellstock identification

(a) Shellstock shall be obtained in containers bearing legible source identification tags or labels that are affixed by the harvester or dealer that depurates, ships, or reships the shellstock, as specified in the National Shellfish Sanitation Program Guide for the Control of Molluscan Shellfish, and that list:

(1) Except as specified under (c) of this Section, on the harvester's tag or label, the following information in the following order:

- (A) The harvester's identification number that is assigned by the shellfish control authority,
- (B) The date of harvesting,
- (C) The most precise identification of the harvest location or aquaculture site that is practicable based on the system of harvest area designations that is in use by the shellfish control authority and including the abbreviation of the name of the state or country in which the shellfish are harvested,
- (D) The type and quantity of shellfish, and
- (E) The following statement in bold, capitalized type: "This tag is required to be attached until container is empty or retagged and thereafter kept on file for 90 days;" and

(2) Except as specified in (d) of this Section, on each dealer's tag or label, the following information in the following order:

- (A) The dealer's name and address, and the certification number assigned by the shellfish control authority,
- (B) The original shipper's certification number including the abbreviation of the name of the state or country in which the shellfish are harvested,
- (C) The same information as specified for a harvester's tag under paragraphs (a)(1)(B)-(D) of this Section, and
- (D) The following statement in bold, capitalized type: "This tag is required to be attached until container is empty and thereafter kept on file for 90 days."

(b) A container of shellstock that does not bear a tag or label or that bears a tag or label that does not contain all the information as specified under (a) of this Section shall be subject to a hold order, as allowed by law, or seizure and destruction in accordance with 21 CFR Subpart D - Specific Administrative Decisions Regarding Interstate Shipments, Section 1240.60(d).

(c) If a place is provided on the harvester's tag or label for a dealer's name, address, and certification number, the dealer's information shall be listed first.

(d) If the harvester's tag or label is designed to accommodate each dealer's identification as specified under (a)(2)(A) and (B) of this Section, individual dealer tags or labels need not be provided.

[Source: Added at 23 Ok Reg 2358, eff 6-25-06 ; Amended at 28 Ok Reg 2289, eff 11-1-11]

310:257-5-17. Shellstock, condition

When received by a food establishment, shellstock shall be reasonably free of mud, dead shellfish, and shellfish with broken shells. Dead shellfish or shellstock with badly broken shells shall be discarded.

[Source: Added at 23 Ok Reg 2358, eff 6-25-06 ; Amended at 33 Ok Reg 1520, eff 9-11-16]

310:257-5-18. Juice treated

(a) Pre-packaged juice shall:

- (1) Be obtained from a processor with a HACCP system as specified in 21 CFR Part 120 Hazard Analysis and Critical Control (HACCP) Systems; and
- (2) Be obtained pasteurized or otherwise treated to attain a five(5)-log reduction of the most resistant microorganism of public health significance as specified in 21 CFR Part 120.24 Process Controls.

(b) Juices that have not been subjected to processing to achieve a five(5)-log destruction of the pathogen of concern shall be restricted to sale at the site of production.

[Source: Added at 23 Ok Reg 2358, eff 6-25-06 ; Amended at 28 Ok Reg 2289, eff 11-1-11 ; Amended at 38 Ok Reg 1947, eff 9-11-21]

310:257-5-19. Molluscan shellfish, original container

(a) Except as specified in (b) through (d) of this Section, molluscan shellfish may not be removed from the container in which they are received other than immediately before sale or preparation for service.

(b) For display purposes, shellstock may be removed from the container in which they are received, displayed on drained ice, or held in a display container, and a quantity specified by a consumer may be removed from the display or display container and provided to the consumer if:

- (1) The source of the shellstock on display is identified as specified under OAC 310:257-5-16 and recorded as specified under OAC 310:257-5-20; and
- (2) The shellstock are protected from contamination.

(c) Shucked shellfish may be removed from the container in which they were received and held in a display container from which individual servings are dispensed upon a consumer's request if:

- (1) The labeling information for the shellfish on display as specified under OAC 310:257-5-15 is retained and correlated to the date when, or dates during which, the shellfish are sold or served; and
- (2) The shellfish are protected from contamination.

(d) Shucked shellfish may be removed from the container in which they were received and repacked in consumer self-service containers where allowed by law if:

- (1) The labeling information for the shellfish is on each consumer self-service container as specified under OAC 310:257-5-15, OAC 310:257-5-67(a) and OAC 310:257-5-67 (b)(1) through (5);
- (2) The labeling information as specified under OAC 310:257-5-15 is retained and correlated with the date when, or dates during which, the shellfish are sold or served;

- (3) The labeling information and dates specified under Subparagraph (d)(2) of this section are maintained for ninety (90) days; and
- (4) The shellfish are protected from contamination.

[Source: Added at 23 Ok Reg 2358, eff 6-25-06 ; Amended at 28 Ok Reg 2289, eff 11-1-11 ; Amended at 33 Ok Reg 1520, eff 9-11-16 ; Amended at 38 Ok Reg 1947, eff 9-11-21]

310:257-5-20. Shellstock, maintaining identification

- (a) Except as specified under (c)(2) of this Section, shellstock tags or labels shall remain attached to the container in which the shellstock are received until the container is empty.
- (b) The date when the last shellstock from the container is sold or served shall be recorded on the tag or label.
- (c) The identity of the source of shellstock that are sold or served shall be maintained by retaining shellstock tags or labels for ninety (90) calendar days from the date that is recorded on the tag or label, as specified under (b) of this Section, by:
 - (1) Using an approved record keeping system that keeps the tags or labels in chronological order correlated to the date that is recorded on the tag or label, as specified under (b) of this Section; and
 - (2) If shellstock are removed from their tagged or labeled container:
 - (A) Preserving source identification by using a record keeping system as specified under (c)(1) of this Section, and
 - (B) Ensuring that shellstock from one tagged or labeled container are not commingled with shellstock from another container with different certification numbers, different harvest dates, or different growing areas as identified on the tag or label before being ordered by the consumer.

[Source: Added at 23 Ok Reg 2358, eff 6-25-06 ; Amended at 28 Ok Reg 2289, eff 11-1-11 ; Amended at 33 Ok Reg 1520, eff 9-11-16]

310:257-5-21. Preventing contamination from hands

- (a) Food employees shall wash their hands as specified under OAC 310:257-3-10.
- (b) Except when washing fruits and vegetables as specified in OAC 310:257-5-27 or (d) of this Section, food employees shall not contact exposed, ready-to-eat food with their bare hands and shall use suitable utensils such as deli-tissue, spatulas, tongs, single-use gloves, or dispensing equipment. This does not apply to a food employee that contacts exposed, ready-to-eat food with bare hands at a time the ready-to-eat food is being added as an ingredient to food that:
 - (1) Contains a raw animal food and is to be cooked in the food establishment to heat all parts of the food to the minimum temperature as specified in OAC 310:257-5-46 or OAC 310:257-5-47; or

(2) Does not contain a raw animal food but is to be cooked in the food establishment to heat all parts of the food to a temperature of at least 63°C (145°F).

(c) Food employees shall minimize bare hand and arm contact with exposed food that is not in a ready-to-eat form.

(d) Food employees not serving a highly susceptible population may contact exposed, ready-to-eat food with their bare hands if the food establishment obtains prior approval from the regulatory authority and maintains:

(1) A written employee health policy that details how the food establishment complies with OAC 310:257-3-4 through 310:257-3-6 including:

(A) Documentation that food employees and conditional employees acknowledge that they are informed to report information about their health and activities as they relate to gastrointestinal symptoms and diseases that are transmittable through food as specified under OAC 310:257-3-4,

(B) Documentation that food employees and conditional employees acknowledge their responsibilities as specified under OAC 310:257-3-4, and

(C) Documentation that the person in charge acknowledges the responsibilities as specified under OAC 310:257-3-4(b) through 310:257-3-4(d), OAC 310:257-3-5 and OAC 310:257-3-6;

(2) Documentation that food employees acknowledge that they have received training in:

(A) The risks of contacting the specific ready-to-eat foods with bare hands,

(B) Proper handwashing as specified under OAC 310:257-3-10;

(C) When to wash their hands as specified under OAC 310:257-3-12;

(D) Where to wash their hands as specified under OAC 310:257-3-13;

(E) Proper fingernail maintenance as specified under OAC 310:257-3-15;

(F) Prohibition of jewelry as specified under OAC 310:257-3-16; and

(G) Good hygienic practices as specified under OAC 310:257-3-18 and 310:257-3-19.

(3) Documentation that food employees contacting ready-to-eat food with bare hands use two (2) or more of the following control measures to provide additional safeguards to hazards associated with bare hand contact:

(A) Double handwashing,

(B) Nail brushes,

(C) A hand antiseptic after handwashing as specified under OAC 310:257-3-14, or

(D) Other control measures approved by the Department, and

(4) Documentation that corrective action is taken when this Sub-paragraph is not followed.

[Source: Added at 23 Ok Reg 2358, eff 6-25-06 ; Amended at 28 Ok Reg 2289, eff 11-1-11 ; Amended at 33 Ok Reg 1520, eff 9-11-16 ; Amended at 38 Ok Reg 1947, eff 9-11-21]

310:257-5-22. Preventing contamination when tasting

A food employee may not use a utensil more than once to taste food that is to be sold or served.

[Source: Added at 23 Ok Reg 2358, eff 6-25-06 ; Amended at 28 Ok Reg 2289, eff 11-1-11 ; Amended at 38 Ok Reg 1947, eff 9-11-21]

310:257-5-23. Packaged and unpackaged food-separation, packaging, and segregation

(a) Food shall be protected from cross contamination by:

(1) Except as specified in (c) of this Section, separating raw animal foods during storage, preparation, holding, and display from:

- (A) Raw ready-to-eat food including other raw animal food such as fish for sushi or molluscan shellfish, or other raw ready-to-eat food such as fruits and vegetables; and
- (B) Cooked ready-to-eat food; and
- (C) Fruits and vegetables before they are washed.

(2) Except when combined as ingredients, separating types of raw animal foods from each other such as beef, fish, lamb, pork, and poultry during storage, preparation, holding, and display by:

- (A) Using separate equipment for each type; or
- (B) Arranging each type of food in equipment so that cross contamination of one type with another is prevented; and
- (C) Preparing each type of food at different times or in separate areas;

(3) Cleaning equipment and utensils as specified under OAC 310:257-7-83(a) and sanitizing as specified under OAC 310:257-7-95;

(4) Except as specified in (b) of this Section, storing the food in packages, covered containers, or wrappings;

(5) Cleaning hermetically sealed containers of food of visible soil before opening;

(6) Protecting food containers that are received packaged together in a case or overwrap from cuts when the case or overwrap is opened;

(7) Storing damaged, spoiled, or recalled food being held in the food establishment as specified under OAC 310:257-11-38; and

(8) Separating fruits and vegetables, before they are washed as specified under OAC 310:257-5-27 from ready-to-eat food.

(b) Paragraph (a)(4) of this Section does not apply to:

(1) Whole, uncut, raw fruits and vegetables and nuts in the shell, that require peeling or hulling before consumption;

(2) Primal cuts, quarters, or sides of raw meat or slab bacon that are hung on clean, sanitized hooks or placed on clean, sanitized

racks;

(3) Whole, uncut, processed meats such as country hams, and smoked or cured sausages that are placed on clean, sanitized racks;

(4) Food being cooled as specified under OAC 310:257-5-58(b)(2); or

(5) Shellstock.

(c) Frozen, commercially processed and packaged raw animal food may be stored or displayed with or above frozen, commercially processed and packaged, ready-to-eat food.

310:257-5-24. Food storage containers, identified with common name of food

Except for containers holding food that can be readily and unmistakably recognized such as dry pasta, working containers holding food or food ingredients that are removed from their original packages for use in the food establishment, such as cooking oils, flour, herbs, potato flakes, salt, spices, and sugar, shall be identified with the common name of the food.

[Source: Added at 23 Ok Reg 2358, eff 6-25-06 ; Amended at 28 Ok Reg 2289, eff 11-1-11 ; Amended at 33 Ok Reg 1520, eff 9-11-16]

310:257-5-25. Pasteurized eggs, substitute for raw eggs for certain recipes

Pasteurized eggs or egg products shall be substituted for raw eggs in the preparation of foods such as Caesar salad, hollandaise or BÉarnaise sauce, mayonnaise, meringue, eggnog, ice cream, and egg-fortified beverages that are not:

(1) Cooked as specified under OAC 310:257-5-46(a)(1) or OAC 310:257-5-46(a)(2); or

(2) Included in OAC 310:257-5-46(d).

[Source: Added at 23 Ok Reg 2358, eff 6-25-06 ; Amended at 28 Ok Reg 2289, eff 11-1-11 ; Amended at 38 Ok Reg 1947, eff 9-11-21]

310:257-5-26. Protection from unapproved additives

(a) Food shall be protected from contamination that may result from the addition of, as specified in OAC 310:257-5-10:

(1) Unsafe or unapproved food or color additives; and

(2) Unsafe or unapproved levels of approved food and color additives.

(b) A food employee may not:

(1) Apply sulfiting agents to fresh fruits and vegetables intended for raw consumption or to a food considered to be a good source of vitamin B1; or

(2) Except for grapes, serve or sell food specified under (b)(1) of this Section that is treated with sulfiting agents before receipt by

the food establishment.

[Source: Added at 23 Ok Reg 2358, eff 6-25-06 ; Amended at 28 Ok Reg 2289, eff 11-1-11 ; Amended at 33 Ok Reg 1520, eff 9-11-16]

310:257-5-27. Washing fruits and vegetables

(a) Except as specified in (b) of this section and except for whole, uncut, raw fruits and vegetables that are intended for washing by the consumer before consumption, raw fruits and vegetables shall be thoroughly washed in water to remove soil and other contaminants before being cut, combined with other ingredients, cooked, served, or offered for human consumption in ready-to-eat form.

(b) Fruits and vegetables may be washed by using chemicals as specified under OAC 310:257-13-8.

(c) Devices used for on-site generation of chemicals meeting the requirements specified in 21 CFR Section 173.315, chemicals used in the washing or to assist in the peeling of fruits and vegetables, for the washing of raw, whole fruits and vegetables shall be used in accordance with the manufacturer's instructions.

[Source: Added at 23 Ok Reg 2358, eff 6-25-06 ; Amended at 28 Ok Reg 2289, eff 11-1-11 ; Amended at 33 Ok Reg 1520, eff 9-11-16 ; Amended at 38 Ok Reg 1947, eff 9-11-21]

310:257-5-28. Ice used as exterior coolant, prohibited as ingredient

After use as a medium for cooling the exterior surfaces of food such as melons or fish, packaged foods such as canned beverages, or cooling coils and tubes of equipment, ice shall not be used as food.

[Source: Added at 23 Ok Reg 2358, eff 6-25-06 ; Amended at 28 Ok Reg 2289, eff 11-1-11]

310:257-5-29. Storage or display of food in contact with water or ice

(a) Packaged food shall not be stored in direct contact with ice or water if the food is subject to the entry of water because of the nature of its packaging, wrapping, or container or its positioning in the ice or water, except that canned and bottled beverages may be stored in self draining ice.

(b) Except as specified in (c) and (d) of this Section, unpackaged food may not be stored in direct contact with undrained ice.

(c) Whole, raw fruits or vegetables; cut, raw vegetables such as celery or carrot sticks or cut potatoes; and tofu may be immersed in ice or water.

(d) Raw poultry and raw fish that are received immersed in ice in shipping containers may remain in that condition while in storage awaiting preparation, display, service, or sale.

[Source: Added at 23 Ok Reg 2358, eff 6-25-06 ; Amended at 28 Ok Reg 2289, eff 11-1-11 ; Amended at 38 Ok Reg 1947, eff 9-11-21]

310:257-5-30. Food contact with equipment and utensils

Food shall only contact surfaces of:

- (1) Equipment and utensils that are cleaned as specified under OAC 310:257-7-82 through OAC 310:257-7-91 of this Chapter and sanitized as specified under OAC 310:257-7-93 through OAC 310:257-7-95 of this Chapter;
- (2) Single service and single-use articles; or
- (3) Linens, such as cloth napkins, as specified under OAC 310:257-5-32 that are laundered as specified under OAC 310:257-7-96 through 100.

[Source: Added at 23 Ok Reg 2358, eff 6-25-06 ; Amended at 28 Ok Reg 2289, eff 11-1-11 ; Amended at 33 Ok Reg 1520, eff 9-11-16 ; Amended at 38 Ok Reg 1947, eff 9-11-21]

310:257-5-31. In-use utensils, between-use storage

During pauses in food preparation or dispensing, food preparation and dispensing utensils shall be stored:

- (1) Except as specified under (2) of this Section, in the food with their handles above the top of the food and the container;
- (2) In food that is not Time/Temperature Control for Safety Food with their handles above the top of the food within containers or equipment that can be closed, such as bins of sugar, flour, or cinnamon;
- (3) On a clean portion of the food preparation table or cooking equipment only if the in-use utensil and the food-contact surface of the food preparation table or cooking equipment are cleaned and sanitized at a frequency specified under OAC 310:257-7-83 and OAC 310-257-7-94;
- (4) In running water of sufficient velocity to flush particulates to the drain, if used with moist food such as ice cream or mashed potatoes;
- (5) In a clean, protected location if the utensils, such as ice scoops, are used only with a food that is not Time/Temperature Control for Safety Food; or
- (6) In a container of water if the water is maintained at a temperature of at least 57°C (135°F) and the container is cleaned at a frequency specified under OAC 310:257-7-83 (d)(7).

[Source: Added at 23 Ok Reg 2358, eff 6-25-06 ; Amended at 28 Ok Reg 2289, eff 11-1-11 ; Amended at 38 Ok Reg 1947, eff 9-11-21]

310:257-5-32. Linens and napkins, use limitation

Linens, such as cloth napkins, may not be used in contact with food unless they are used to line a container for the service of foods and the linens and napkins are replaced each time the container is refilled for a new consumer.

[Source: Added at 23 Ok Reg 2358, eff 6-25-06 ; Amended at 33 Ok Reg 1520, eff 9-11-16]

310:257-5-33. Wiping cloths, use limitation

(a) Cloths in use for wiping food spills from tableware and carry out containers that occur as food is being served shall be:

- (1) Maintained dry; and

- (2) Used for no other purpose.
- (b) Cloths in use for wiping counters and other equipment surfaces shall be:
 - (1) Held between uses in a chemical sanitizer solution at a concentration specified under OAC 310:257-7-75; and
 - (2) Laundered daily as specified under OAC 310:257-7-97(d).
- (c) Cloths in use for wiping surfaces in contact with raw animal foods shall be kept separate from cloths used for other purposes.
- (d) Dry wiping cloths and the chemical sanitizing solution specified in (b)(1) of this Section in which wet wiping cloths are held between uses shall be free of food debris and visible soil.
- (e) Containers of sanitizing solutions specified in (b)(1) of this Section in which wet wiping cloths are held between uses shall be stored off the floor and used in a manner to prevent contamination of food, equipment, utensils, linens, single-service or single-use articles.
- (f) Single use disposable sanitizer wipes shall be used in accordance with EPA approved manufacturer's label use instructions.

[Source: Added at 23 Ok Reg 2358, eff 6-25-06 ; Amended at 28 Ok Reg 2289, eff 11-1-11 ; Amended at 38 Ok Reg 1947, eff 9-11-21]

310:257-5-34. Gloves, use limitation

- (a) If used, single-use gloves shall be used for only one task such as working with ready-to-eat food or with raw animal food, used for no other purpose, and discarded when damaged or soiled, or when interruptions occur in the operation.
- (b) Except as specified in (c) of this Section, slash-resistant gloves that are used to protect the hands during operations requiring cutting shall be used in direct contact only with food that is subsequently cooked as specified under OAC 310:257-5-46 through OAC 310:257-5-48.1 such as frozen food or a primal cut of meat.
- (c) Slash-resistant gloves may be used with ready-to-eat food that will not be subsequently cooked if the slash-resistant gloves have a smooth, durable, and nonabsorbent outer surface; or if the slash-resistant gloves are covered with a smooth, durable, nonabsorbent glove, or a single-use glove.
- (d) Cloth gloves may not be used in direct contact with food unless the food is subsequently cooked as required under OAC 310:257-5-46 through OAC 310:257-5-48.1 such as frozen food or a primal cut of meat.

[Source: Added at 23 Ok Reg 2358, eff 6-25-06 ; Amended at 38 Ok Reg 1947, eff 9-11-21]

310:257-5-35. Using clean tableware for second portions and refills

- (a) Except for refilling a consumer's drinking cup or container without contact between the pouring utensil and the lip-contact area of the drinking cup or container, food employees may not use tableware, including single-service articles, soiled by the consumer, to provide second portions or refills.
- (b) Except as specified in (c) of this Section, self-service consumers may not be allowed to use soiled tableware, including single-service articles,

to obtain additional food from the display and serving equipment. This Section shall be deemed to be met if clean tableware is provided at self-service areas and signage is prominently posted that reads in substance: "Oklahoma State Department of Health Rules require the use of clean tableware to get refills."

(c) Drinking cups and containers may be reused by self-service consumers if refilling is a contamination-free process as specified under OAC 310:257-7-28(1),(2), and (4).

[Source: Added at 23 Ok Reg 2358, eff 6-25-06]

310:257-5-36. Refilling returnables

(a) Except as provided in paragraphs (b) through (e) of this section, empty containers returned to a food establishment for cleaning and refilling with food shall be cleaned and refilled in a regulated food establishment.

(b) Take-home food containers returned to a food establishment may be refilled at a food establishment with food, if the food container is:

- (1) Designed and constructed for reuse and in accordance with the requirements specified under OAC 310:257-7-1 through 310:257-7-15;
- (2) A container that was initially provided by the food establishment to the consumer, either empty or filled with food by the food establishment, for the purpose of being returned for reuse;

(c) A take-home food container returned to a food establishment may be refilled at a food establishment with beverage if:

- (1) The beverage is not Time/Temperature Control for Safety Food;
- (2) The design of the container and the rinsing equipment and nature of the beverage, when considered together, allow effective cleaning at home or in the food establishment;
- (3) Facilities for rinsing before refilling returned containers with fresh, hot water that is under pressure and not recirculated are provided as part of the dispensing system;
- (4) The consumer-owned container returned to the food establishment for refilling is refilled for sale or service only to the same consumer; and
- (5) The container is refilled by:
 - (A) An employee of the food establishment; or
 - (B) The owner of the container if the beverage system includes a contamination-free transfer process as specified under OAC 310:257-7-28 (1), (2) and (4) that cannot be bypassed.

(d) Consumer-owned, personal take-out beverage containers, such as thermally insulated bottles, non-spill coffee cups, and promotional beverage glasses, may be refilled by employees of the food establishment or the consumer if refilling is a contamination-free process as specified under OAC 310:257-7-28 (1), (2) and (4).

(e) Consumer-owned containers that are not food-specific may be filled at a water vending machine or system.

[Source: Added at 23 Ok Reg 2358, eff 6-25-06 ; Amended at 28 Ok Reg 2289, eff 11-1-11 ; Amended at 33 Ok Reg 1520, eff 9-11-16 ; Amended at 38 Ok Reg 1947, eff 9-11-21]

310:257-5-37. Food storage

(a) Except as specified in (b) and (c) of this Section, food shall be protected from contamination by storing the food:

- (1) In a clean, dry location;
- (2) Where it is not exposed to splash, dust, or other contamination; and
- (3) At least 15 cm (6 inches) above the floor.

(b) Food in packages and working containers may be stored less than 15 cm (6 inches) above the floor on case lot handling equipment as specified under OAC 310:257-7-47.

(c) Pressurized beverage containers, cased food in waterproof containers such as bottles or cans, and milk containers in plastic crates may be stored on a floor that is clean and not exposed to floor moisture.

[Source: Added at 23 Ok Reg 2358, eff 6-25-06 ; Amended at 28 Ok Reg 2289, eff 11-1-11 ; Amended at 33 Ok Reg 1520, eff 9-11-16 ; Amended at 38 Ok Reg 1947, eff 9-11-21]

310:257-5-38. Food storage, prohibited areas

Food may not be stored:

- (1) In locker rooms;
- (2) In toilet rooms;
- (3) In dressing rooms;
- (4) In garbage rooms;
- (5) In mechanical rooms;
- (6) Under sewer lines that are not shielded to intercept potential drips;
- (7) Under leaking water lines, including leaking automatic fire sprinkler heads, or under lines on which water has condensed;
- (8) Under open stairwells; or
- (9) Under other sources of contamination.

[Source: Added at 23 Ok Reg 2358, eff 6-25-06]

310:257-5-39. Vended Time/Temperature Control for Safety Food, original container

Time/Temperature Control for Safety Food dispensed through a vending machine shall be in the package in which it was placed at the food establishment or food processing plant at which it was prepared.

[Source: Added at 23 Ok Reg 2358, eff 6-25-06 ; Amended at 28 Ok Reg 2289, eff 11-1-11 ; Amended at 33 Ok Reg 1520, eff 9-11-16]

310:257-5-40. Food preparation

During preparation, unpackaged food shall be protected from environmental sources of contamination.

[Source: Added at 23 Ok Reg 2358, eff 6-25-06 ; Amended at 38 Ok Reg 1947, eff 9-11-21]

310:257-5-41. Food display

Except for nuts in the shell and whole, raw fruits and vegetables that are intended for hulling, peeling, or washing by the consumer before consumption, food on display shall be protected from contamination by the use of packaging; counter, service line, or salad bar food guards; display cases; or other effective means.

[Source: Added at 23 Ok Reg 2358, eff 6-25-06]

310:257-5-42. Condiments, protection

(a) Condiments shall be protected from contamination by being kept in dispensers that are designed to provide protection, protected food displays provided with the proper utensils, original containers designed for dispensing, or individual packages or portions.

(b) Condiments at a vending machine location shall be in individual packages or provided in dispensers that are filled at an approved location, such as the food establishment that provides food to the vending machine location, a food processing plant that is regulated by the agency that has jurisdiction over the operation, or a properly equipped facility that is located on the site of the vending machine location.

[Source: Added at 23 Ok Reg 2358, eff 6-25-06 ; Amended at 33 Ok Reg 1520, eff 9-11-16]

310:257-5-43. Consumer self-service operations

(a) Raw, unpackaged animal food, such as beef, lamb, pork, poultry, and fish may not be offered for consumer self-service. This paragraph does not apply to:

- (1) Consumer self-service of ready-to-eat foods at buffets or salad bars that serve foods such as sushi or raw shellfish;
- (2) Ready-to-cook individual portions for immediate cooking and consumption on the premises such as consumer-cooked meats or consumer-selected ingredients for Mongolian barbecue; or
- (3) Raw, frozen, shell-on shrimp or lobster.

(b) Consumer self-service operations for ready-to-eat-foods shall be provided with suitable utensils or effective dispensing methods that protect the food from contamination.

(c) Consumer self-service operations such as buffets and salad bars shall be monitored by food employees trained in safe operating procedures.

[Source: Added at 23 Ok Reg 2358, eff 6-25-06 ; Amended at 28 Ok Reg 2289, eff 11-1-11]

310:257-5-44. Returned food and re-service of food

(a) Except as specified in (b) of this Section, after being served or sold and in the possession of a consumer, food that is unused or returned by the consumer may not be offered as food for human consumption.

(b) Except as specified under OAC 310:257-5-71(8), a container of food that is not Time/Temperature Control for Safety Food may be re-served from one consumer to another if:

- (1) The food is dispensed so that it is protected from contamination and the container is closed between uses, such as a narrow-neck bottle containing catsup, steak sauce, or wine; or
- (2) The food, such as crackers, salt, or pepper, is in an unopened original package and is maintained in sound condition.

[Source: Added at 23 Ok Reg 2358, eff 6-25-06 ; Amended at 28 Ok Reg 2289, eff 11-1-11 ; Amended at 33 Ok Reg 1520, eff 9-11-16]

310:257-5-45. Miscellaneous sources of contamination

Food shall be protected from contamination that may result from a factor or source not specified under OAC 310:257-5-21 through OAC 310:257-5-44.

[Source: Added at 23 Ok Reg 2358, eff 6-25-06]

310:257-5-46. Raw animal foods

(a) Except as specified under (b), (c), and (d) of this Section, raw animal foods such as eggs, fish, meat, poultry, and foods containing these raw animal foods, shall be cooked to heat all parts of the food to a temperature and for a time that complies with one of the following methods based on the food that is being cooked:

- (1) 63°C (145°F) or above for fifteen (15) seconds for:
 - (A) Raw eggs that are broken and prepared in response to a consumer's order and for immediate service, and
 - (B) Except as specified under (a)(2), (a)(3), (b) and (c) of this Section, fish and intact meat including game animals commercially raised for food as specified under OAC 310:257-5-8 and game animals under a voluntary inspection program as specified under OAC 310:257-5-8;
- (2) 68°C (155°F) for seventeen (17) seconds or 63°C (145°F) for three (3) minutes or 66°C (150°F) for one (1) minute, or 70°C (158°F) for less than one (1) second or instantaneous, see Table 3 of Appendix A of this Chapter and that corresponds to the holding time for ratites, mechanically tenderized, and injected meats; the following if they are comminuted: fish, meat, game animals commercially raised for food as specified under OAC 310:257-5-8, and game animals under a voluntary inspection program as specified under OAC 310:257-5-8; and raw eggs that are not prepared as specified under (a)(1)(A) of this Section; or
- (3) 74°C (165°F) or above for less than one (1) second (instantaneous) for poultry, baluts, wild game animals as specified under OAC 310:257-5-8, stuffed fish, stuffed meat, stuffed pasta, stuffed poultry, stuffed ratites, or stuffing containing fish, meat, poultry, or ratites.

(b) Whole meat roasts including beef, corned beef, lamb, pork and cured pork roasts such as ham, shall be cooked:

(1) As specified in Table 5 of Appendix A of this Chapter, to heat all parts of the food to a temperature and for the holding time that corresponds with the temperature. Holding time may include post-oven heat rise; and

(2) If cooked in an oven, use an oven that is preheated to the temperature specified for the roast's weight and that is held at that temperature in accordance with Table 4 of appendix A of this Chapter.

(c) A raw or undercooked whole-muscle, intact beef steak may be served or offered for sale in a ready-to-eat form if:

(1) The food establishment serves a population that is not a highly susceptible population,

(2) The steak is labeled to indicate that it meets the definition of "whole-muscle, intact beef" as specified under OAC 310:257-5-2(e), and

(3) The steak is cooked on both the top and bottom to a surface temperature of 63°C (145°F) or above and a cooked color change is achieved on all external surfaces.

(d) A raw animal food such as raw egg, raw fish, raw-marinated fish, raw molluscan shellfish, or steak tartare; or a partially cooked food such as lightly cooked fish, soft cooked eggs, or rare meat other than whole-muscle, intact beef steaks as specified in (c) of this Section, may be served or offered for sale upon consumer request or selection in a ready-to-eat form if:

(1) As specified under OAC 310:257-5-71(3)(A) and (B) the food establishment serves a population that is not a highly susceptible population;

(2) The food, if served or offered for service by consumer selection from a children's menu, does not contain comminuted meat; and

(3) The consumer is informed as specified under OAC 310:257-5-69 that to ensure its safety, the food should be cooked as specified under (a) or (b) of this Section; or

(4) The Department grants a variance from (a) or (b) of this Section as specified in OAC 310:257-15-3 based on a HACCP Plan that:

(A) Is submitted by the license holder and approved as specified under OAC 310:257-15-4,

(B) Documents scientific data or other information showing that a lesser time and temperature regimen results in a safe food, and

(C) Verifies that equipment and procedures for food preparation and training of food employees at the food establishment meet the conditions of the variance.

[Source: Added at 23 Ok Reg 2358, eff 6-25-06 ; Amended at 28 Ok Reg 2289, eff 11-1-11 ; Amended at 33 Ok Reg 1520, eff 9-11-16 ; Amended at 38 Ok Reg 1947, eff 9-11-21]

310:257-5-47. Microwave cooking

Raw animal foods cooked in a microwave oven shall be:

- (1) Rotated or stirred throughout or midway during cooking to compensate for uneven distribution of heat;
- (2) Covered to retain surface moisture;
- (3) Heated to a temperature of at least 74°C (165°F) in all parts of the food; and
- (4) Allowed to stand covered for 2 minutes after cooking to obtain temperature equilibrium.

[Source: Added at 23 Ok Reg 2358, eff 6-25-06]

310:257-5-48. Plant food cooking for hot holding

Plant foods that are cooked for hot holding shall be cooked to a temperature of 57°C (135°F).

[Source: Added at 23 Ok Reg 2358, eff 6-25-06 ; Amended at 38 Ok Reg 1947, eff 9-11-21]

310:257-5-48.1. Non-Continuous Cooking of Raw Animal

Raw animal foods that are cooked using a non-continuous cooking process shall be:

- (1) Subject to an initial heating process that is no longer than sixty (60) minutes in duration;
- (2) Immediately after initial heating, cooled according to the time and temperature parameters specified for cooked Time/Temperature Control for Safety Food under OAC 310:257-5-57(a);
- (3) After cooling, held frozen or cold, as specified for Time/Temperature Control for Safety Food under OAC 310:257-5-59(a)(2);
- (4) Prior to sale or service, cooked using a process that heats all parts of the food to a temperature and for a time specified under OAC 310:257-5-46 (a) through (c);
- (5) Cooled according to the time and temperature parameters specified for cooked Time/Temperature Control for Safety Food under OAC 310:257-5-57(a) if not either hot held as specified under OAC 310:257-5-59(a), served immediately, or held using time as a public health control as specified under OAC 310:257-5-62 after complete cooking; and
- (6) Prepared and stored according to written procedures that:
 - (A) Have obtained prior approval from the Department;
 - (B) Are maintained in the food establishment and are available to the Department upon request;
 - (C) Describe how the requirements specified under (a) through (e) of this Section are to be monitored and documented by the license holder and the corrective actions to be taken if the requirements are not met;
 - (D) Describe how the foods, after initial heating, but prior to complete cooking, are to be marked or otherwise identified as foods that must be cooked as specified under (d) of this Section prior to being offered for sale or service;

and

(E) Describe how the foods, after initial heating but prior to cooking as specified in (d) of this Section, are to be separated from ready-to-eat foods as specified under OAC 310:257-5-23.

[Source: Added at 28 Ok Reg 2289, eff 11-1-11 ; Amended at 33 Ok Reg 1520, eff 9-11-16]

310:257-5-49. Parasite destruction

(a) Except as specified in (b) of this Section, before service or sale in ready-to-eat form, raw, raw-marinated, partially cooked, or marinated-partially cooked fish shall be:

- (1) Frozen and stored at a temperature of -20°C (-4°F) or below for a minimum of 168 hours (seven (7) days) in a freezer;
- (2) Frozen at -35°C (-31°F) or below until solid and stored at -35°C (-31°F) or below for a minimum of fifteen (15) hours; or
- (3) Frozen at -35°C (-31°F) or below until solid and stored at -20°C (-4°F) or below for a minimum of twenty-four (24) hours;

(b) Subsection (a) of this Section does not apply to:

- (1) Molluscan shellfish;
- (2) Tuna of the species *Thunnus alalunga*, *Thunnus albacares* (Yellowfin tuna), *Thunnus atlanticus*, *Thunnus maccoyii* (Bluefin tuna, Southern), *Thunnus obesus* (Bigeye tuna), or *Thunnus thynnus* (Bluefin tuna, Northern) ;
- (3) Aquacultured fish, such as salmon, that:
 - (A) If raised in open water, are raised in net pens, or
 - (B) Are raised in land-based operations such as ponds or tanks, and
 - (C) Are fed formulated feed, such as pellets, that contains no live parasites infective to the aquacultured fish;
- (4) Fish eggs that have been removed from the skein and rinsed; or
- (5) A scallop product consisting only of the shucked adductor muscle.

[Source: Added at 23 Ok Reg 2358, eff 6-25-06 ; Amended at 28 Ok Reg 2289, eff 11-1-11 ; Amended at 33 Ok Reg 1520, eff 9-11-16]

310:257-5-50. Records, creation and retention

(a) Except as specified in OAC 310:257-5-49(b) and (b) of this section, if raw, raw-marinated, partially cooked, or marinated-partially cooked fish are served or sold in ready-to-eat form, the person in charge shall record the freezing temperature and time to which the fish are subjected and shall retain the records of the food establishment for ninety (90) calendar days beyond the time of service or sale of the fish.

(b) If the fish are frozen by a supplier, a written agreement or statement from the supplier stipulating that the fish supplied are frozen to a temperature and for a time specified under OAC 310:257-5-49 may substitute for the records specified under (a) of this Section.

(c) If raw, raw marinated, partially cooked, or marinated-partially cooked fish are served or sold in ready-to-eat form, and the fish are raised and

fed as specified in OAC 310:257-5-49(b)(3), a written agreement or statement from the supplier or aquaculturist stipulating that the fish were raised and fed as specified in OAC 310:257-5-49(b)(3) shall be obtained by the person in charge and retained in the records of the food establishment for ninety (90) calendar days beyond the time of service or sale of the fish.

[Source: Added at 23 Ok Reg 2358, eff 6-25-06 ; Amended at 26 Ok Reg 1477, eff 6-11-09 ; Amended at 28 Ok Reg 2289, eff 11-1-11 ; Amended at 33 Ok Reg 1520, eff 9-11-16 ; Amended at 38 Ok Reg 1947, eff 9-11-21]

310:257-5-51. Preparation for immediate service

Cooked and refrigerated food that is prepared for immediate service in response to an individual consumer order, such as a roast beef sandwich au jus, may be served at any temperature.

[Source: Added at 23 Ok Reg 2358, eff 6-25-06]

310:257-5-52. Reheating for hot holding

- (a) Except as specified under (b) and (c) and in (e) of this Section, Time/Temperature Control for Safety Food that is cooked, cooled, and reheated for hot holding shall be reheated so that all parts of the food reach a temperature of at least 74°C (165°F) for fifteen (15) seconds.
- (b) Except as specified under (c) of this Section, Time/Temperature Control for Safety Food reheated in a microwave oven for hot holding shall be reheated so that all parts of the food reach a temperature of at least 74°C (165°F) and the food is rotated or stirred, covered, and allowed to stand covered for two (2) minutes after reheating.
- (c) Ready-to-eat Time/Temperature Control for Safety Food that has been commercially processed and packaged in a food processing plant that is inspected by the Department that has jurisdiction over the plant, shall be heated to a temperature of at least 57°C (135°F) when being reheated for hot holding.
- (d) Reheating for hot holding specified under (a) through (c) of this Section shall be done rapidly and the time the food is between the temperature of 5°C (41°F) and the temperatures specified under (a) through (c) of this Section may not exceed two (2) hours.
- (e) Remaining unsliced portions of meat roasts that are cooked as specified under OAC 310:257-5-46(b) may be reheated for hot holding using the oven parameters and minimum time and temperature conditions specified under OAC 310:257-5-46(b).

[Source: Added at 23 Ok Reg 2358, eff 6-25-06 ; Amended at 28 Ok Reg 2289, eff 11-1-11 ; Amended at 33 Ok Reg 1520, eff 9-11-16 ; Amended at 38 Ok Reg 1947, eff 9-11-21]

310:257-5-53. Treating juice

Juice packaged in a food establishment shall be:

- (1) Treated under a HACCP Plan as specified in OAC 310:257-15-9 to attain a 5-log reduction, which is equal to a 99.999% reduction, of the most resistant microorganism of public health significance; or

- (2) Labeled, if not treated to yield a 5-log reduction of the most resistant microorganism of public health significance:
- (A) As specified under OAC 310:257-5-67, and
 - (B) As specified in 21 CFR, Section 101.17(g) Food labeling, warning, notice, and safe handling statements, juices that have not been specifically processed to prevent, reduce, or eliminate the presence of pathogens with the following: "WARNING: This product has not been pasteurized and, therefore, may contain harmful bacteria that can cause serious illness in children, the elderly, and persons with weakened immune systems."

[Source: Added at 23 Ok Reg 2358, eff 6-25-06 ; Amended at 28 Ok Reg 2289, eff 11-1-11 ; Amended at 33 Ok Reg 1520, eff 9-11-16 ; Amended at 38 Ok Reg 1947, eff 9-11-21]

310:257-5-54. Frozen food

Stored frozen foods shall be maintained frozen.

[Source: Added at 23 Ok Reg 2358, eff 6-25-06]

310:257-5-55. Time/Temperature Control for Safety Food, slacking

Frozen Time/Temperature Control for Safety Food that is slacked to moderate the temperature shall be held:

- (1) Under refrigeration that maintains the food temperature at 5°C (41°F) or less; or
- (2) At any temperature if the food remains frozen.

[Source: Added at 23 Ok Reg 2358, eff 6-25-06 ; Amended at 28 Ok Reg 2289, eff 11-1-11 ; Amended at 33 Ok Reg 1520, eff 9-11-16]

310:257-5-56. Thawing

Except as specified in (4) of this Section, Time/Temperature Control for Safety Food shall be thawed:

- (1) Under refrigeration that maintains the food temperature at 5°C (41°F) or less; or
- (2) Completely submerged under running water:
 - (A) At a water temperature of 21°C (70°F) or below,
 - (B) With sufficient water velocity to agitate and float off loose particles in an overflow, and
 - (C) For a period of time that does not allow thawed portions of ready-to-eat food to rise above 5°C (41°F), or
 - (D) For a period of time that does not allow thawed portions of a raw animal food requiring cooking as specified under OAC 310:257-5-46(a) or (b) to be above 5°C (41°F), for more than four (4) hours including:
 - (i) The time the food is exposed to the running water and the time needed for preparation for cooking, or
 - (ii) The time it takes under refrigeration to lower the food temperature to 5°C (41°F);
- (3) As part of a cooking process if the food that is frozen is:

- (A) Cooked as specified under OAC 310:257-5-46 through OAC 310:257-5-48, or
- (B) Thawed in a microwave oven and immediately transferred to conventional cooking equipment, with no interruption in the process;
- (4) Using any procedure if a portion of frozen ready-to-eat food is thawed and prepared for immediate service in response to an individual consumer's order; or
- (5) Reduced oxygen packaged fish that bears a label indicating that it is to be kept frozen until time of use shall be removed from the reduced oxygen environment:
 - (A) Prior to its thawing under refrigeration as specified in paragraph (1) of this section; or
 - (B) Prior to, or immediately upon completion of its thawing using procedures specified in paragraph (2) of this section.

[Source: Added at 23 Ok Reg 2358, eff 6-25-06 ; Amended at 28 Ok Reg 2289, eff 11-1-11 ; Amended at 33 Ok Reg 1520, eff 9-11-16 ; Amended at 38 Ok Reg 1947, eff 9-11-21]

310:257-5-57. Cooling

- (a) Cooked Time/Temperature Control for Safety Food shall be cooled:
 - (1) Within 2 hours from 57°C (135°F) to 21°C (70°F); and
 - (2) Within a total of 6 hours from 57°C (135°F) to 5°C (41°F) or less.
- (b) Time/Temperature Control for Safety Food shall be cooled within 4 hours to 5°C (41°F) or less, if prepared from ingredients at ambient temperature, such as reconstituted foods and canned tuna.
- (c) Except as specified in (d) of this Section, a Time/Temperature Control for Safety Food received in compliance with laws allowing a temperature above 5°C (41°F) during shipment from the supplier as specified in 310:257-5-9(b), shall be cooled within 4 hours to 5°C (41°F) or less.

[Source: Added at 23 Ok Reg 2358, eff 6-25-06 ; Amended at 28 Ok Reg 2289, eff 11-1-11 ; Amended at 38 Ok Reg 1947, eff 9-11-21]

310:257-5-58. Cooling methods

- (a) Cooling shall be accomplished in accordance with the time and temperature criteria specified under OAC 310:257-5-57 by using one or more of the following methods based on the type of food being cooled:
 - (1) Placing the food in shallow pans;
 - (2) Separating the food into smaller or thinner portions;
 - (3) Using rapid cooling equipment;
 - (4) Stirring the food in a container placed in an ice water bath;
 - (5) Using containers that facilitate heat transfer;
 - (6) Adding ice as an ingredient; or
 - (7) Other effective methods.
- (b) When placed in cooling or cold holding equipment, food containers in which food is being cooled shall be:
 - (1) Arranged in the equipment to provide maximum heat transfer through the container walls; and

(2) Loosely covered, or uncovered if protected from overhead contamination as specified under OAC 310:257-5-37(a)(2), during the cooling period to facilitate heat transfer from the surface of the food.

[Source: Added at 23 Ok Reg 2358, eff 6-25-06]

310:257-5-59. Time/Temperature Control for Safety Food, hot and cold holding

(a) Except during preparation, cooking, or cooling, or when time is used as the public health control as specified under 310:257-5-62 and except as specified in (b) of this Section, Time/Temperature Control for Safety Food shall be maintained:

(1) At 57°C (135°F) or above, except that roasts cooked to a temperature and for a time specified under 310:257-5-46(b) or reheated as specified in 310:257-5-52(e) may be held at a temperature of 54°C (130°F); or

(2) At a temperature of 5°C (41°F) or less .

(b) Eggs that have not been treated to destroy all viable *Salmonellae* shall be stored in refrigerated equipment that maintains an ambient air temperature of 5°C (41° F) or less.

(c) Time/Temperature Control for Safety Food in a homogenous liquid form may be maintained outside of the temperature control requirements, as specified under (a) of this Section, while contained within specially designed equipment that complies with the design and construction requirements as specified in 310:257-7-28(5).

[Source: Added at 23 Ok Reg 2358, eff 6-25-06 ; Amended at 26 Ok Reg 1477, eff 6-11-09 ; Amended at 28 Ok Reg 2289, eff 11-1-11]

310:257-5-60. Ready-to-eat, Time/Temperature Control for Safety Food, date marking

(a) Except when packaging food using a reduced oxygen packaging method as specified in OAC 310:257-5-64, and except as specified in (e) and (g) of this Section, refrigerated, ready-to-eat, Time/Temperature Control for Safety Food prepared and held in a food establishment for more than twenty-four (24) hours shall be clearly marked to indicate the date or day by which the food shall be consumed on the premises, sold, or discarded when held at a temperature of 5°C (41°F) or less for a maximum of seven (7) days. The day of preparation shall be counted as day one (1).

(b) Except as specified in(e) through (g) of this Section, refrigerated, ready-to-eat, Time/Temperature Control for Safety Food prepared and packaged by a food processing plant shall be clearly marked, at the time the original container is opened in a food establishment and if the food is held for more than twenty-four (24) hours, to indicate the date or day by which the food shall be consumed on the premises, sold, or discarded, based on the temperature and time combinations specified in (a) of this Section and:

(1) The day the original container is opened in the food establishment shall be counted as day one (1); and

(2) The day or date marked by the food establishment may not exceed a manufacturer's use-by date if the manufacturer determined the use-by date based on food safety.

(c) A refrigerated, ready-to-eat, Time/Temperature Control for Safety Food ingredient or a portion of a refrigerated, ready to eat, Time/Temperature Control for Safety Food that is subsequently combined with additional ingredients or portions of food shall retain the date marking of the earliest-prepared or first-prepared ingredient.

(d) A date marking system that meets the criteria stated in (a) and (b) of this Section may include:

(1) Using a method approved by the Department for refrigerated, ready-to-eat Time/Temperature Control for Safety Food that is frequently rewrapped, such as lunchmeat or a roast, or for which date marking is impractical, such as soft serve mix or milk in a dispensing machine;

(2) Marking the date or day of preparation, with a procedure to discard the food on or before the last date or day by which the food must be consumed on the premises, sold, or discarded as specified in (a) of this Section;

(3) Marking the date or day the original container is opened in a food establishment, with a procedure to discard the food on or before the last date or day by which the food must be consumed on the premises, sold, or discarded as specified in (b) of this Section; or

(4) Using calendar dates, days of the week, color-coded marks, or other effective marking methods, provided that the marking system is disclosed to the regulatory authority upon request.

(e) Subsections (a) and (b) of this Section do not apply to individual meal portions served or repackaged for sale from a bulk container upon a consumer's request.

(f) Subsection (b) of this Section does not apply to the following foods prepared and packaged by a food processing plant inspected by a state or federal agency having jurisdiction over the facility:

(1) Deli salads, such as ham salad, seafood salad, chicken salad, egg salad, pasta salad, potato salad, and macaroni salad, manufactured in accordance with OAC 310:260, or 21 CFR Part 110;

(2) Hard cheeses containing not more than 39% Moisture as defined in 21 CFR, Part 133 Cheeses and related cheese products, such as cheddar, gruyere, parmesan and reggiano, and romano;

(3) Semi-soft cheeses containing more than 39% moisture, but not more than 50% moisture, as defined in 21 CFR, Part 133 Cheeses and related cheese products, such as blue, edam, gorgonzola, gouda, and Monterey jack;

(4) Cultured dairy products as defined in 21 CFR, Part 131 Milk and cream, such as yogurt, sour cream, and buttermilk;

(5) Preserved fish products, such as pickled herring and dried or salted cod, and other acidified fish products defined in 21 CFR, Part 114 Acidified foods;

(6) Shelf stable, dry, fermented sausages, such as pepperoni and Genoa salami; and

(7) Shelf stable salt-cured products such as prosciutto and Parma (ham).

(g) Paragraph (a) and (b) of this Section shall not apply to Shellstock.

[Source: Added at 23 Ok Reg 2358, eff 6-25-06 ; Amended at 26 Ok Reg 1477, eff 6-11-09 ; Amended at 28 Ok Reg 2289, eff 11-1-11 ; Amended at 33 Ok Reg 1520, eff 9-11-16 ; Amended at 38 Ok Reg 1947, eff 9-11-21]

310:257-5-61. Ready-to-eat, Time/Temperature Control for Safety Food, disposition

(a) A food specified in OAC 310:257-5-60(a) or OAC 310:257-5-60(b) shall be discarded if it:

- (1) Exceeds the temperature and time combinations specified in OAC 310:257-5-60 (a), except time that the product is frozen;
- (2) Is in a container or package that does not bear a date or day;
- or
- (3) Is inappropriately marked with a date or day that exceeds a temperature and time combination as specified in OAC 310:257-5-60 (a).

(b) Refrigerated, ready-to-eat, Time/Temperature Control for Safety Food prepared in a food establishment and dispensed through a vending machine with an automatic shutoff control shall be discarded if it exceeds a temperature and time combination as specified in OAC 310:257-5-60(a).

[Source: Added at 23 Ok Reg 2358, eff 6-25-06 ; Amended at 26 Ok Reg 1477, eff 6-11-09 ; Amended at 28 Ok Reg 2289, eff 11-1-11 ; Amended at 33 Ok Reg 1520, eff 9-11-16 ; Amended at 38 Ok Reg 1947, eff 9-11-21]

310:257-5-62. Time as a public health control

(a) Except as specified under (d) of this Section, if time without temperature control is used as the public health control for a working supply of Time/Temperature Control for Safety Food before cooking, or for ready-to-eat Time/Temperature Control for Safety Food that is displayed or held for sale or service, written procedures shall be prepared in advance, maintained in the food establishment and made available to the Department upon request that specify:

- (1) Methods of compliance with (b)(1) through (4) or (c)(1) through (5) of this Section; and
- (2) Methods of compliance with OAC 310:257-5-57 for food that is prepared, cooked, and refrigerated before time is used as a public health control.

(b) If time without temperature control is used as the public health control up to a maximum of four (4) hours:

- (1) The food shall have an initial temperature of 5°C (41°F) or less when removed from cold holding temperature control, or 57°C (135°F) or greater when removed from hot holding temperature control;
- (2) The food shall be marked or otherwise identified to indicate the time that is four (4) hours past the point in time when the food is removed from temperature control;

- (3) The food shall be cooked and served, served at any temperature if ready-to-eat, or discarded, within four (4) hours from the point in time when the food is removed from temperature control; and
 - (4) The food in unmarked containers or packages, or marked to exceed a 4-hour limit shall be discarded.
- (c) If time without temperature control is used as the public health control up to a maximum of six (6) hours:
- (1) The food shall have an initial temperature of 5°C (41°F) or less when removed from temperature control and the food temperature may not exceed 21°C (70°F) within a maximum time period of six (6) hours;
 - (2) The food shall be monitored to ensure the warmest portion of the food does not exceed 21°C (70°F) during the 6-hour period, unless an ambient air temperature is maintained that ensures the food does not exceed 21°C (70°F) during the 6-hour holding period;
 - (3) The food shall be marked or otherwise identified to indicate:
 - (A) The time when the food is removed from 5°C (41°F) or less cold holding temperature control, and
 - (B) The time that is six (6) hours past the point in time when the food is removed from cold holding temperature control;
 - (4) The food shall be:
 - (A) Discarded if the temperature of the food exceeds 21°C (70°F), or
 - (B) Cooked and served, served at any temperature if ready-to-eat, or discarded within a maximum of six (6) hours from the point in time when the food is removed from 5°C (41°F) or less cold holding temperature control; and
 - (5) The food in unmarked containers or packages, or marked with a time that exceeds the 6-hour limit shall be discarded.
- (d) A food establishment that serves a highly susceptible population shall not use time as specified in (a), (b) or (c) of this Section as the public health control for raw eggs.

[Source: Added at 23 Ok Reg 2358, eff 6-25-06 ; Amended at 28 Ok Reg 2289, eff 11-1-11 ; Amended at 33 Ok Reg 1520, eff 9-11-16]

310:257-5-63. Variance requirement

A food establishment shall obtain a variance from the Department as specified in OAC 310:257-15-3 and under OAC 310:257-15-4 before:

- (1) Smoking food as a method of food preservation rather than as a method of flavor enhancement;
- (2) Curing food;
- (3) Using food additives or adding components such as vinegar:
 - (A) As a method of food preservation rather than as a method of flavor enhancement, or
 - (B) To render a food so that it is not a Time/Temperature Control for Safety Food;

- (4) Packaging Time/Temperature Control for Safety Food using a reduced oxygen packaging method except where the growth of and toxin formation by *Clostridium botulinum* and the growth of *Listeria monocytogenes* are controlled as specified under OAC 310:257-5-64;
- (5) Operating a molluscan shellfish life-support system display tank used to store and display shellfish that are offered for human consumption;
- (6) Custom processing animals that are for personal use as food and not for sale or service in a food establishment;
- (7) Sprouting seeds or beans; or
- (8) Preparing food by another method that is determined by the Department to require a variance.

[Source: Added at 23 Ok Reg 2358, eff 6-25-06 ; Amended at 28 Ok Reg 2289, eff 11-1-11 ; Amended at 33 Ok Reg 1520, eff 9-11-16 ; Amended at 38 Ok Reg 1947, eff 9-11-21]

310:257-5-64. Reduced oxygen packaging without a variance, criteria

- (a) Except for a food establishment that obtains a variance as specified under OAC 310:257-5-63, a food establishment that packages Time/Temperature Control for Safety Food using a reduced oxygen packaging method shall control the growth and toxin formation of *Clostridium botulinum* and the growth of *Listeria monocytogenes*.
- (b) Except as specified under paragraph (f) of this Section, a food establishment that packages Time/Temperature Control for Safety Food using a reduced oxygen packaging method shall implement a HACCP plan that contains the information specified under OAC 310:257- 15-9(2) and OAC 310:257-15-9(4) and that:
 - (1) Identifies the food to be packaged;
 - (2) Except as specified in (c) through (e) of this Section, requires that the packaged food shall be maintained at 5°C (41°F) or less and meet at least one of the following criteria:
 - (A) Has an aw of 0.91 or less,
 - (B) Has a pH of 4.6 or less,
 - (C) Is a meat or poultry product cured at a food processing plant regulated by the USDA using substances specified in 9 CFR, Part 424.21. Use of food ingredients and sources of radiation, and is received in an intact package, or
 - (D) Is a food with a high level of competing organisms such as raw meat or raw poultry or raw vegetables;
 - (3) Describes how the packages shall be prominently and conspicuously labeled on the principal display panel in bold type on a contrasting background, with instructions to:
 - (A) Maintain the food at 5°C (41°F) or below, and
 - (B) Discard the food if within thirty (30) calendar days of its packaging it is not served for on-premises consumption, or consumed if served or sold for off-premises consumption;
 - (4) Limits the refrigerated shelf life to no more than thirty (30) calendar days from packaging to consumption, except the time

the product is maintained frozen, or the original manufacturer's "sell by" or "use by" date, whichever occurs first;

(5) Includes operational procedures that:

(A) Prohibit contacting ready-to-eat food with bare hands as specified under OAC 310:257-5-21(b),

(B) Identify a designated work area and the method by which:

(i) Physical barriers or methods of separation of raw foods and ready-to-eat foods minimize cross contamination, and

(ii) Access to the processing equipment is limited to responsible trained personnel familiar with the potential hazards of the operation, and

(C) Delineate cleaning and sanitization procedures for food-contact surfaces;

(6) Describes the training program that ensures that the individual responsible for the reduced oxygen packaging operation understands the:

(A) Concepts required for a safe operation,

(B) Equipment and facilities, and

(C) Procedures specified under paragraph (b) (5) of this Section, OAC 310:257- 15-9(2) and OAC 310:257-15-9(4); and

(7) Is provided to the Department prior to implementation as specified under OAC 310:257-15-(8)(b).

(c) Except for fish that is frozen before, during, and after packaging and bears a label indicating that it is to be kept frozen until time of use, a food establishment may not package fish using a reduced oxygen packaging method.

(d) Except as specified under paragraphs (c) and (f) of this Section, a food establishment that packages Time/Temperature Control for Safety Food using a cook-chill or sous vide process shall:

(1) Provide to the Department prior to implementation, a HACCP Plan that contains the information as specified under OAC 310:257-15-9;

(2) Ensure the food is:

(A) Prepared and consumed on the premises, or prepared and consumed off the premises but within the same business entity with no distribution or sale of the packaged product to another business entity or the consumer;

(B) Cooked to heat all parts of the food to a temperature and for a time as specified under OAC 310:257-5-46 through 48;

(C) Protected from contamination before and after cooking as specified under OAC 310:257-5-21 through OAC 310:257-5-45;

(D) Placed in a package with an oxygen barrier and sealed before cooking, or placed in a package and sealed immediately after cooking and before reaching a temperature below 57°C (135°F);

(E) Cooled to 5°C (41°F) in the sealed package or bag as specified under 310:257-5-57 and:

- (i) Cooled to 1°C (34°F) within forty-eight (48) hours of reaching 5°C (41°F) and held at that temperature until consumed or discarded within thirty (30) days after the date of packaging;
- (ii) Held at 5°C (41°F) or less for no more than seven (7) days, at which time the food must be consumed or discarded; or
- (iii) Held frozen with no shelf life restriction while frozen until consumed or used;

(F) Held in a refrigeration unit that is equipped with an electronic system that continuously monitors time and temperature and is visually examined for proper operation twice daily;

(G) If transported off-site to a satellite location of the same business entity, equipped with verifiable electronic monitoring devices to ensure that times and temperatures are monitored during transportation; and

(H) Labeled with the product name and the date packaged; and

(3) Maintain the records required to confirm that cooling and cold holding refrigeration time/temperature parameters are required as part of the HACCP Plan and:

(A) Make such records available to the regulatory authority upon request; and

(B) Hold such records for at least six (6) months; and

(4) Implement written operational procedures as specified in (b)

(5) of this Section and a training program as specified in (b)(6) of this Section.

(e) Except as specified in paragraph (f) of this Section, a food establishment that packages cheese using a reduced oxygen packaging method shall:

(1) Limit the cheeses packaged to those that are commercially manufactured in a food processing plant with no ingredients added in the food establishment and that meet the Standards of Identity as specified in 21 CFR 133:150 Hard cheeses, 21 CFR Section 133.169 Pasteurized process cheese or 21 CFR Section 133.187 Semisoft cheeses;

(2) Have a HACCP Plan that contains the information specified in OAC 310:257-15-9(2), OAC 310-15-9(4), and specified in (b)(1), (b)(3)(A), (b)(5) and (b)(6) of this Section;

(3) Labels the package on the principal display panel with the "use by" date that does not exceed thirty (30) days from its packaging or the original manufacturer's "sell by" or "use by" date, whichever occurs first; and

(4) Discards the reduced oxygen packaged cheese if it is not sold for off-premises consumption or consumed within thirty (30) calendar days of its packaging.

(f) A HACCP Plan is not required when a food establishment uses a reduced oxygen packaging method to package Time/Temperature Control

for Safety Food that is always:

- (1) Labeled with the production time and date;
- (2) Held at five 5°C (41°F) or less during refrigerated storage; and
- (3) Removed from its package in the food establishment within forty-eight (48) hours after packaging.

[Source: Added at 23 Ok Reg 2358, eff 6-25-06 ; Amended at 28 Ok Reg 2289, eff 11-1-11 ; Amended at 33 Ok Reg 1520, eff 9-11-16 ; Amended at 38 Ok Reg 1947, eff 9-11-21]

310:257-5-65. Standards of identity

Packaged food shall comply with standard of identity requirements in 21 CFR 131-169 and 9 CFR 319 Definitions and Standards of Identity or Composition.

[Source: Added at 23 Ok Reg 2358, eff 6-25-06 ; Amended at 38 Ok Reg 1947, eff 9-11-21]

310:257-5-66. Honestly presented

- (a) Food shall be offered for human consumption in a way that does not mislead or misinform the consumer.
- (b) Food or color additives, colored overwraps, or lights may not be used to misrepresent the true appearance, color, or quality of a food.

[Source: Added at 23 Ok Reg 2358, eff 6-25-06]

310:257-5-67. Food labels

- (a) Food packaged in a food establishment, shall be labeled as specified in law, including 21 CFR, Part 101 - Food Labeling, and 9 CFR, Part 317 Labeling, Marking Devices, and Containers.
- (b) Label information shall include:
 - (1) The common name of the food, or absent a common name, an adequately descriptive identity statement;
 - (2) If made from two or more ingredients, a list of ingredients and sub-ingredients in descending order of predominance by weight, including a declaration of artificial colors, artificial flavors, and chemical preservatives, if contained in the food;
 - (3) An accurate declaration of the quantity of contents;
 - (4) The name and place of business of the manufacturer, packer, or distributor; and
 - (5) The name of the food source for each major food allergen contained in the food unless the food source is already part of the common or usual name of the respective ingredient.
 - (6) Except as exempted in the Federal Food, Drug, and Cosmetic Act Section 403(q)(3)-(5), nutrition labeling as specified in 21 CFR, Part 101 - Food Labeling and 9 CFR, Part 317 Subpart B Nutrition Labeling.
 - (7) For any salmonid fish containing canthaxanthin or astaxanthin as a color additive, the labeling of the bulk fish container, including a list of ingredients, displayed on the retail container or by other written means, such as a counter card, that discloses the

use of canthaxanthin or astaxanthin.

(c) Bulk food that is available for consumer self-dispensing shall be prominently labeled with the following information in plain view of the consumer:

(1) The manufacturer's or processor's label that was provided with the food; or

(2) A card, sign, or other method of notification that includes the information specified under (b)(1), (2), (5), and (6) of this Section.

(d) Bulk, unpackaged foods such as bakery products and unpackaged foods that are portioned to consumer specification need not be labeled if:

(1) A health, nutrient content, or other claim is not made;

(2) There are no state or local laws requiring labeling; and;

(3) The food is manufactured or prepared on the premises of the food establishment or at another food establishment or a food processing plant that is owned by the same person and is regulated by the food regulatory agency that has jurisdiction.

[Source: Added at 23 Ok Reg 2358, eff 6-25-06 ; Amended at 28 Ok Reg 2289, eff 11-1-11 ; Amended at 33 Ok Reg 1520, eff 9-11-16 ; Amended at 38 Ok Reg 1947, eff 9-11-21]

310:257-5-68. Other forms of information

(a) If required by law, consumer warnings shall be provided.

(b) Food establishment or manufacturers' dating information on foods may not be concealed or altered.

(c) For homemade food products produced under 2 O.S. 5-4.1 et seq. that are to be sold in a food establishment, a disclosure that states: "This product was produced in a private residence that is exempt from government licensing and inspection. This product may contain allergens." shall be:

(1) Posted at the point of sale; or

(2) If used to produce another food product, cited on the menu.

[Source: Added at 23 Ok Reg 2358, eff 6-25-06 ; Amended at 33 Ok Reg 1520, eff 9-11-16 ; Amended at 39 Ok Reg 1247, eff 9-11-22]

310:257-5-69. Consumption of animal foods that are raw, undercooked, or not otherwise processed to eliminate pathogens

(a) Except as specified in OAC 310:257-5-46(c) and OAC 310:257-5-46(d) (4) and under OAC 310:257-5-71 (3), if an animal food such as beef, eggs, fish, lamb, milk, pork, poultry, or shellfish is served or sold raw, undercooked, or without otherwise being processed to eliminate pathogens, either in ready-to-eat form or as an ingredient in another ready-to-eat food, the license holder shall inform consumers of the significantly increased risk of consuming such foods by way of disclosure and reminder, as specified in paragraphs (b) and (c) of this Section, using brochures, deli case or menu advisories, label statements, table tents, placards, or other effective written means.

(b) Disclosure shall include:

(1) A description of the animal-derived foods, such as "oysters on the half shell (raw oysters), raw-egg Caesar salad," and "hamburgers" (can be cooked to order); or;

(2) Identification of the animal-derived foods by asterisking them to a footnote that states that the items are served raw or undercooked, or contain (or may contain) raw or undercooked ingredients.

(c) Reminder shall include asterisking the animal-derived foods requiring disclosure to a footnote that states:

(1) "Regarding the safety of these items, written information is available upon request;"

(2) "Consuming raw or undercooked meats, poultry, seafood, shellfish, or eggs may increase your risk of foodborne illness;" or

(3) "Consuming raw or undercooked meats, poultry, seafood, shellfish, or eggs may increase your risk of foodborne illness, especially if you have certain medical conditions."

[Source: Added at 23 Ok Reg 2358, eff 6-25-06 ; Amended at 26 Ok Reg 1477, eff 6-11-09 ; Amended at 38 Ok Reg 1947, eff 9-11-21]

310:257-5-70. Discarding or reconditioning unsafe, adulterated, or contaminated food

(a) A food that is unsafe, adulterated, or not honestly presented as specified under OAC 310:257-5-1 shall be discarded or reconditioned according to an approved procedure.

(b) Food that is not from a source approved by law shall be discarded.

(c) Ready-to-eat food that may have been contaminated by an employee who has been restricted or excluded as specified under 310:257-3-5 shall be discarded.

(d) Food that is contaminated by food employees, consumers or other persons through contact with their hands, bodily discharges, such as nasal or oral discharges, or other means shall be discarded.

(e) Food may be examined or sampled by the Department as often as necessary for enforcement of these rules and regulations. The Department may place an embargo on food in accordance with the provisions of Title 63 O.S. Section 1-1105.

[Source: Added at 23 Ok Reg 2358, eff 6-25-06 ; Amended at 28 Ok Reg 2289, eff 11-1-11 ; Amended at 33 Ok Reg 1520, eff 9-11-16 ; Amended at 39 Ok Reg 1247, eff 9-11-22]

310:257-5-71. Pasteurized foods, prohibited re-service, and prohibited food

In a food establishment that serves a highly susceptible population:

(1) The following criteria apply to juice:

(A) For the purposes of this paragraph only, children who are age nine (9) or less and receive food in a school, day care setting or similar facility that provides custodial care are included as highly susceptible populations;

(B) Prepackaged juice or a prepackaged beverage containing juice, that bears a warning label as specified in 21 CFR, Section 101.17(g) Food Labeling, (pertaining to warning, notice and safe handling statements for juices that have not been specifically processed to prevent, reduce, or eliminate the presence of pathogens,) or

packaged juice or beverage containing juice, that bears a warning label as specified under OAC 310:257-5-53 (2) may not be served or offered for sale; and
(C) Unpackaged juice that is prepared on the premises for service or sale in a ready-to-eat form shall be processed under a HACCP plan that contains the information specified in OAC 310:257-15-9 and as specified under 21 CFR, Part 120 - Hazard Analysis and Critical Control Point (HACCP) systems, Subpart B Pathogen Reduction, Section 120.24 Process controls.

(2) Pasteurized eggs or egg products shall be substituted for raw eggs in the preparation of:

- (A) Foods such as Caesar salad, hollandaise or BÉarnaise sauce, mayonnaise, meringue, eggnog, ice cream, and egg-fortified beverages, and
- (B) Except as specified in (6) of this Section, recipes in which more than one egg is broken and the eggs are combined;

(3) The following foods may not be served or offered for sale in a ready-to-eat form:

- (A) Raw animal foods such as raw fish, raw-marinated fish, raw molluscan shellfish, and steak tartare,
- (B) A partially cooked animal food such as lightly cooked fish, rare meat, soft-cooked eggs that are made from raw eggs, and meringue, and
- (C) Raw seed sprouts.

(4) Food employees may not contact ready-to-eat foods as specified under OAC 310:257-5-21(b) and OAC 310:257-5-21(d).

(5) Time only, as the public health control as specified in OAC 310:257-5-62(d), shall not be used for raw eggs.

(6) Subparagraph (2)(B) of this Section does not apply if:

- (A) The raw eggs are combined immediately before cooking for one consumer's serving at a single meal, cooked as specified under OAC 310:257-5-46(a)(1), and served immediately, such as an omelet, soufflé, or scrambled eggs;
- (B) The raw eggs are combined as an ingredient immediately before baking and the eggs are thoroughly cooked to a ready-to-eat form, such as a cake, muffin, or bread; or
- (C) The preparation of the food is conducted under a HACCP plan that:
 - (i) Identifies the food to be prepared,
 - (ii) Prohibits contacting ready-to-eat food with bare hands,
 - (iii) Includes specifications and practices that ensure:
 - (I) Salmonella Enteritidis growth is controlled before and after cooking, and
 - (II) Salmonella Enteritidis is destroyed by cooking the eggs according to the

- temperature and time specified in OAC 310:257-5-46(a)(2),
 - (iv) Contains the information specified under OAC 310:257-15-9 including procedures that:
 - (I) Control cross contamination of ready-to-eat food with raw eggs, and
 - (II) Delineate cleaning and sanitization procedures for food-contact surfaces, and
 - (v) Describes the training program that ensures that the food employee responsible for the preparation of the food understands the procedures to be used.
- (7) Except as specified in paragraph (8) of this Section, food may be re-served as specified in OAC 310:257-5-44(b).
- (8) Food shall not be re-served under the following conditions:
- (A) Any food served to patients or clients who are under contact precautions in medical isolation or quarantine, or protective environment isolation shall not be re-served to others outside; and
 - (B) Packages of food from any patients, clients, or other consumers shall not be re-served to persons in protective environment isolation.

[Source: Added at 23 Ok Reg 2358, eff 6-25-06 ; Amended at 26 Ok Reg 1477, eff 6-11-09 ; Amended at 28 Ok Reg 2289, eff 11-1-11 ; Amended at 33 Ok Reg 1520, eff 9-11-16 ; Amended at 38 Ok Reg 1947, eff 9-11-21]

SUBCHAPTER 7. EQUIPMENT, UTENSILS AND LINENS

310:257-7-1. Characteristics

Materials that are used in the construction of utensils and food-contact surfaces of equipment may not allow the migration of deleterious substances or impart colors, odors, or tastes to food and under normal use conditions shall be:

- (1) Safe;
- (2) Durable, corrosion-resistant, and nonabsorbent;
- (3) Sufficient in weight and thickness to withstand repeated warewashing;
- (4) Finished to have a smooth, easily cleanable surface; and;
- (5) Resistant to pitting, chipping, crazing, scratching, scoring, distortion, and decomposition.

[Source: Added at 23 Ok Reg 2358, eff 6-25-06 ; Amended at 38 Ok Reg 1947, eff 9-11-21]

310:257-7-2. Cast iron, use limitation

- (a) Except as specified in (b) and (c) of this Section, cast iron may not be used for utensils or food-contact surfaces of equipment.
- (b) Cast iron may be used as a surface for cooking.

(c) Cast iron may be used in utensils for serving food if the utensils are used only as part of an uninterrupted process from cooking through service.

[Source: Added at 23 Ok Reg 2358, eff 6-25-06]

310:257-7-3. Lead in ceramic, china, and crystal utensils, use limitation

Ceramic, china, crystal utensils, and decorative utensils such as hand painted ceramic or china that are used in contact with food shall be lead-free or contain levels of lead not exceeding the limits of the utensil categories as contained in Table 6 of Appendix A of this Chapter.

[Source: Added at 23 Ok Reg 2358, eff 6-25-06 ; Amended at 26 Ok Reg 1477, eff 6-11-09 ; Amended at 33 Ok Reg 1520, eff 9-11-16]

310:257-7-4. Copper, use limitation

(a) Except as specified in (b) of this Section, copper and copper alloys such as brass may not be used in contact with a food that has a pH below 6 such as vinegar, fruit juice, or wine or for a fitting or tubing installed between a backflow prevention device and a carbonator.

(b) Copper and copper alloys may be used in contact with beer brewing ingredients that have a pH below 6 in the prefermentation and fermentation steps of a beer brewing operation such as a brewpub or microbrewery.

[Source: Added at 23 Ok Reg 2358, eff 6-25-06]

310:257-7-5. Galvanized metal, use limitation

Galvanized metal may not be used for utensils or food-contact surfaces of equipment that are used in contact with acidic food.

[Source: Added at 23 Ok Reg 2358, eff 6-25-06]

310:257-7-6. Sponges, use limitation

Sponges may not be used in contact with cleaned and sanitized or in-use food-contact surfaces.

[Source: Added at 23 Ok Reg 2358, eff 6-25-06]

310:257-7-7. Lead in pewter alloys, use limitation

Pewter alloys containing lead in excess of 0.05% may not be used as a food-contact surface.

[Source: Added at 23 Ok Reg 2358, eff 6-25-06]

310:257-7-8. Lead in solder and flux, use limitation

Solder and flux containing lead in excess of 0.2% may not be used as a food-contact surface.

[Source: Added at 23 Ok Reg 2358, eff 6-25-06]

310:257-7-9. Wood, use limitation

(a) Except as specified in (b), (c), and (d) of this Section, wood and wood wicker may not be used as a food-contact surface.

(b) Hard maple or an equivalently hard, close-grained wood may be used for:

(1) Cutting boards; cutting blocks; bakers' tables; and utensils such as rolling pins, doughnut dowels, salad bowls, and chopsticks; and

(2) Wooden paddles used in confectionery operations for pressure scraping kettles when manually preparing confections at a temperature of 110°C (230°F) or above.

(c) Whole, uncut, raw fruits and vegetables, and nuts in the shell may be kept in the wood shipping containers in which they were received, until the fruits, vegetables, or nuts are used.

(d) If the nature of the food requires removal of rinds, peels, husks, or shells before consumption, the whole, uncut, raw food may be kept in:

(1) Untreated wood containers; or

(2) Treated wood containers if the containers are treated with a preservative that meets the requirements specified in 21 CFR 178.3800 Preservatives for wood.

[Source: Added at 23 Ok Reg 2358, eff 6-25-06]

310:257-7-10. Nonstick coatings, use limitation

Multiuse kitchenware such as frying pans, griddles, sauce pans, cookie sheets, and waffle bakers that have a perfluorocarbon resin coating shall be used with nonscoring or nonscratching utensils and cleaning aids.

[Source: Added at 23 Ok Reg 2358, eff 6-25-06]

310:257-7-11. Nonfood-contact surfaces

Nonfood-contact surfaces of equipment that are exposed to splash, spillage, or other food soiling or that require frequent cleaning shall be constructed of a corrosion-resistant, nonabsorbent, and smooth material.

[Source: Added at 23 Ok Reg 2358, eff 6-25-06]

310:257-7-12. Characteristics

Materials that are used to make single-service and single-use articles:

- (1) May not:
 - (A) Allow the migration of deleterious substances, or
 - (B) Impart colors, odors, or tastes to food; and
- (2) Shall be:
 - (A) Safe, and
 - (B) Clean.

[Source: Added at 23 Ok Reg 2358, eff 6-25-06]

310:257-7-13. Equipment and utensils

Equipment used in a food establishment shall be designated as "commercial" or "commercial grade" by the manufacturer if the equipment is used to meet or maintain temperature for time/temperature control for safety food. Equipment and utensils shall be designed and constructed to be durable and to retain their characteristic qualities under normal use conditions. This section does not apply to the following equipment if cleanability and maintenance requirements are met:

- (1) Microwave ovens that meet the safety standards specified in 21 CFR 1030.10 Microwave ovens, used to heat food for immediate service or as part of a continuous cooking process.
- (2) Residential freezers used for long term storage, or
- (3) Custom built large equipment such as a smoker.

[Source: Added at 23 Ok Reg 2358, eff 6-25-06 ; Amended at 33 Ok Reg 1520, eff 9-11-16 ; Amended at 38 Ok Reg 1947, eff 9-11-21]

310:257-7-14. Food temperature measuring devices

Food temperature measuring device may not have sensors or stems constructed of glass, except that thermometers with glass sensors or stems that are encased in a shatterproof coating such as candy thermometers may be used.

[Source: Added at 23 Ok Reg 2358, eff 6-25-06]

310:257-7-15. Food-contact surfaces

(a) Multiuse food-contact surfaces shall be:

- (1) Smooth;
- (2) Free of breaks, open seams, cracks, chips, inclusions, pits, and similar imperfections;
- (3) Free of sharp internal angles, corners, and crevices;
- (4) Finished to have smooth welds and joints; and
- (5) Except as specified in (b) of this Section, be accessible for cleaning and inspection by one of the following methods:
 - (A) Without being disassembled,
 - (B) By disassembling without the use of tools, or
 - (C) By easy disassembling with the use of handheld tools commonly available to maintenance and cleaning

personnel such as screwdrivers, pliers, open-end wrenches, and Allen wrenches.

(b) OAC 310:257-7-15 (a) (5) of this Section does not apply to cooking oil storage tanks, distribution lines for cooking oils, or beverage syrup lines or tubes.

[Source: Added at 23 Ok Reg 2358, eff 6-25-06 ; Amended at 38 Ok Reg 1947, eff 9-11-21]

310:257-7-16. CIP equipment

(a) CIP equipment shall meet the characteristics specified under OAC 310:257-7-15 and shall be designed and constructed so that:

- (1) Cleaning and sanitizing solutions circulate throughout a fixed system and contact all interior food-contact surfaces, and;
- (2) The system is self-draining or capable of being completely drained of cleaning and sanitizing solutions; and;

(b) CIP equipment that is not designed to be disassembled for cleaning shall be designed with inspection access points to ensure that all interior food-contact surfaces throughout the fixed system are being effectively cleaned.

[Source: Added at 23 Ok Reg 2358, eff 6-25-06]

310:257-7-17. "V" threads, use limitation

Except for hot oil cooking or filtering equipment, "V" type threads may not be used on food-contact surfaces.

[Source: Added at 23 Ok Reg 2358, eff 6-25-06]

310:257-7-18. Hot oil filtering equipment

Hot oil filtering equipment shall meet the characteristics specified under OAC 310:257-7-15 or OAC 310:257-7-16 and shall be readily accessible for filter replacement and cleaning of the filter.

[Source: Added at 23 Ok Reg 2358, eff 6-25-06]

310:257-7-19. Can openers

Cutting or piercing parts of can openers shall be readily removable for cleaning and for replacement.

[Source: Added at 23 Ok Reg 2358, eff 6-25-06]

310:257-7-20. Nonfood-contact surfaces

Nonfood-contact surfaces shall be free of unnecessary ledges, projections, and crevices, and designed and constructed to allow easy cleaning and to facilitate maintenance.

[Source: Added at 23 Ok Reg 2358, eff 6-25-06]

310:257-7-21. Kick plates, removable

Kick plates shall be designed so that the areas behind them are accessible for inspection and cleaning by being:

- (1) Removable by one of the methods specified under Subparagraph OAC 310:257-7-15(a)(5) or capable of being rotated open; and
- (2) Removable or capable of being rotated open without unlocking equipment doors.

[Source: Added at 23 Ok Reg 2358, eff 6-25-06]

310:257-7-22. Ventilation hood systems, filters

Filters or other grease extracting equipment shall be designed to be readily removable for cleaning and replacement if not designed to be cleaned in place.

[Source: Added at 23 Ok Reg 2358, eff 6-25-06]

310:257-7-23. Temperature measuring devices, food

- (a) Food temperature measuring device devices that are scaled only in Celsius or dually scaled in Celsius and Fahrenheit shall be accurate to within 1°C in the intended range of use.
- (b) Food temperature measuring devices that are scaled only in Fahrenheit shall be accurate to within 2°F in the intended range of use.

[Source: Added at 23 Ok Reg 2358, eff 6-25-06 ; Amended at 28 Ok Reg 2289, eff 11-1-11 ; Amended at 38 Ok Reg 1947, eff 9-11-21]

310:257-7-24. Temperature measuring devices, ambient air and water

- (a) Ambient air and water temperature measuring devices that are scaled in Celsius or dually scaled in Celsius and Fahrenheit shall be designed to be easily readable and accurate to within 1.5°C in the intended range of use.
- (b) Ambient air and water temperature measuring devices that are scaled only in Fahrenheit shall be accurate to within 3°F in the intended range of use.

[Source: Added at 23 Ok Reg 2358, eff 6-25-06 ; Amended at 28 Ok Reg 2289, eff 11-1-11 ; Amended at 38 Ok Reg 1947, eff 9-11-21]

310:257-7-25. Pressure measuring devices, mechanical warewashing equipment

Pressure measuring devices that display the pressures in the water supply line for the fresh hot water sanitizing rinse shall have increments of seven (7) kilopascals (one (1) pound per square inch) or smaller and shall be accurate to within fourteen (14) kilopascals (two (2) pounds per square inch) in the range indicated on the manufacturer's data plate.

[Source: Added at 23 Ok Reg 2358, eff 6-25-06 ; Amended at 28 Ok Reg 2289, eff 11-1-11 ; Amended at 33 Ok Reg 1520, eff 9-11-16 ; Amended at 38 Ok Reg 1947, eff 9-11-21]

310:257-7-26. Ventilation hood systems, drip prevention

Exhaust ventilation hood systems in food preparation and warewashing areas including components such as hoods, fans, guards, and ducting shall be designed to prevent grease or condensation from draining or dripping onto food, equipment, utensils, linens, and single-service and single-use articles.

[Source: Added at 23 Ok Reg 2358, eff 6-25-06]

310:257-7-27. Equipment openings, closures and deflectors

(a) A cover or lid for equipment shall overlap the opening and be sloped to drain.

(b) An opening located within the top of a unit of equipment that is designed for use with a cover or lid shall be flanged upward at least 5 millimeters (two-tenths of an inch).

(c) Except as specified under (d) of this Section, fixed piping, temperature measuring devices, rotary shafts, and other parts extending into equipment shall be provided with a watertight joint at the point where the item enters the equipment.

(d) If a watertight joint is not provided:

(1) The piping, temperature measuring devices, rotary shafts, and other parts extending through the openings shall be equipped with an apron designed to deflect condensation, drips, and dust from openings into the food; and

(2) The opening shall be flanged as specified under (b) of this Section.

[Source: Added at 23 Ok Reg 2358, eff 6-25-06 ; Amended at 28 Ok Reg 2289, eff 11-1-11]

310:257-7-28. Dispensing equipment, protection of equipment and food

In equipment that dispenses or vends liquid food or ice in unpackaged form:

(1) The delivery tube, chute, orifice, and splash surfaces directly above the container receiving the food shall be designed in a manner, such as with barriers, baffles, or drip aprons, so that drips from condensation and splash are diverted from the opening of the container receiving the food;

(2) The delivery tube, chute, and orifice shall be protected from manual contact such as by being recessed;

(3) The delivery tube or chute and orifice of equipment used to vend liquid food or ice in unpackaged form to self-service consumers shall be designed so that the delivery tube or chute and orifice are protected from dust, insects, rodents, and other contamination by a self-closing door if the equipment is:

(A) Located in an outside area that does not otherwise afford the protection of an enclosure against the rain, windblown debris, insects, rodents, and other contaminants that are present in the environment, or

- (B) Available for self-service during hours when it is not under the full-time supervision of a food employee; and
- (4) The dispensing equipment actuating lever or mechanism and filling device of consumer self-service beverage dispensing equipment shall be designed to prevent contact with the lip-contact surface of glasses or cups that are refilled.
- (5) Dispensing equipment in which Time/Temperature Control for Safety Food in a homogenous liquid form is maintained outside of the temperature control requirements as specified under OAC 310:257-5-59(a) shall:
 - (A) Be specifically designed and equipped to maintain the commercial sterility of aseptically packaged food in a homogenous liquid form for a specified duration from the time of opening the packaging within the equipment; and
 - (B) Conform to the requirements for this equipment as specified in American National Standards Institute (ANSI) 18-2006 Manual Food and Beverage Dispensing Equipment.

[Source: Added at 23 Ok Reg 2358, eff 6-25-06 ; Amended at 28 Ok Reg 2289, eff 11-1-11 ; Amended at 33 Ok Reg 1520, eff 9-11-16 ; Amended at 38 Ok Reg 1947, eff 9-11-21]

310:257-7-29. Vending machine, vending stage closure.

The dispensing compartment of a vending machine including a machine that is designed to vend prepackaged snack food that is not Time/Temperature Control for Safety Food such as chips, party mixes, and pretzels shall be equipped with a self-closing door or cover if the machine is:

- (1) Located in an outside area that does not otherwise afford the protection of an enclosure against the rain, windblown debris, insects, rodents, and other contaminants that are present in the environment; or
- (2) Available for self-service during hours when it is not under the full-time supervision of a food employee.

310:257-7-30. Bearings and gear boxes, leakproof

Equipment containing bearings and gears that require lubricants shall be designed and constructed so that the lubricant can not leak, drip, or be forced into food or onto food-contact surfaces.

[Source: Added at 23 Ok Reg 2358, eff 6-25-06]

310:257-7-31. Beverage tubing, separation

Except for cold plates that are constructed integrally with an ice storage bin, beverage tubing and cold-plate beverage cooling devices may not be installed in contact with stored ice.

[Source: Added at 23 Ok Reg 2358, eff 6-25-06 ; Amended at 33 Ok Reg 1520, eff 9-11-16]

310:257-7-32. Ice units, separation of drains

Liquid waste drain lines may not pass through an ice machine or ice storage bin.

[Source: Added at 23 Ok Reg 2358, eff 6-25-06]

310:257-7-33. Condenser unit, separation

If a condenser unit is an integral component of equipment, the condenser unit shall be separated from the food and food storage space by a dustproof barrier.

[Source: Added at 23 Ok Reg 2358, eff 6-25-06]

310:257-7-34. Can openers on vending machines

Cutting or piercing parts of can openers on vending machines shall be protected from manual contact, dust, insects, rodents, and other contamination.

[Source: Added at 23 Ok Reg 2358, eff 6-25-06]

310:257-7-35. Molluscan shellfish tanks

(a) Except as specified under (b) of this Section, molluscan shellfish life support system display tanks may not be used to store or display shellfish that are offered for human consumption and shall be conspicuously marked so that it is obvious to the consumer that the shellfish are for display only.

(b) Molluscan shellfish life-support system display tanks that are used to store or display shellfish that are offered for human consumption shall be operated and maintained in accordance with a variance granted by the Department as specified in OAC 310:257-15-3 and a HACCP plan that:

(1) Is submitted by the license holder and approved as specified under OAC 310:257-15-4; and

(2) Ensures that:

(A) Water used with fish other than molluscan shellfish does not flow into the molluscan tank,

(B) The safety and quality of the shellfish as they were received are not compromised by the use of the tank, and;

(C) The identity of the source of the shellstock is retained as specified under OAC 310:257-5-20.

[Source: Added at 23 Ok Reg 2358, eff 6-25-06 ; Amended at 28 Ok Reg 2289, eff 11-1-11 ; Amended at 33 Ok Reg 1520, eff 9-11-16 ; Amended at 38 Ok Reg 1947, eff 9-11-21]

310:257-7-36. Vending machines, automatic shutoff

(a) A machine vending Time/Temperature Control for Safety Food shall have an automatic control that prevents the machine from vending food:

(1) If there is a power failure, mechanical failure, or other condition that results in an internal machine temperature that cannot maintain food temperatures as specified under Subchapter 5; and

- (2) If a condition specified under (a) (1) of this Section occurs, until the machine is serviced and restocked with food that has been maintained at temperatures specified under Subchapter 5.
- (b) When the automatic shutoff within a vending machine that contains Time/Temperature Control for Safety Food is activated:
- (1) In a refrigerated vending machine, the ambient air temperature may not exceed 5°C (41°F) for more than thirty (30) minutes immediately after the machine is filled, serviced, or restocked; or
- (2) In a hot holding vending machine, the ambient air temperature may not be less than 57°C (135°F) for more than 120 minutes immediately after the machine is filled, serviced, or restocked.

[Source: Added at 23 Ok Reg 2358, eff 6-25-06 ; Amended at 33 Ok Reg 1520, eff 9-11-16 ; Amended at 38 Ok Reg 1947, eff 9-11-21]

310:257-7-37. Temperature measuring devices

- (a) In a mechanically refrigerated or hot food storage unit, the sensor of a temperature measuring device shall be located to measure the air temperature or a simulated product temperature in the warmest part of a mechanically refrigerated unit and in the coolest part of a hot food storage unit.
- (b) Except as specified in (c) of this Section, cold or hot holding equipment used for Time/Temperature Control for Safety food shall be designed to include and shall be equipped with at least one integral or permanently affixed temperature measuring device that is located to allow easy viewing of the device's temperature display.
- (c) Paragraph (b) of this Section does not apply to equipment for which the placement of a temperature measuring device is not a practical means for measuring the ambient air surrounding the food because of the design, type, and use of the equipment, such as calrod units, heat lamps, cold plates, bainmaries, steam tables, insulated food transport containers, and salad bars.
- (d) Temperature measuring devices shall be designed to be easily readable.
- (e) Food temperature measuring devices and water temperature measuring devices on warewashing machines shall have a numerical scale, printed record, or digital readout in increments no greater than 1°C or 2°F in the intended range of use.

[Source: Added at 23 Ok Reg 2358, eff 6-25-06 ; Amended at 26 Ok Reg 1477, eff 6-11-09 ; Amended at 38 Ok Reg 1947, eff 9-11-21]

310:257-7-38. Warewashing machine, data plate operating specifications

A warewashing machine shall be provided with an easily accessible and readable data plate affixed to the machine by the manufacturer that indicates the machine's design and operating specifications including the:

- (1) Temperatures required for washing, rinsing, and sanitizing;

- (2) Pressure required for the fresh water sanitizing rinse unless the machine is designed to use only a pumped sanitizing rinse; and
- (3) Conveyor speed for conveyor machines or cycle time for stationary rack machines.

[Source: Added at 23 Ok Reg 2358, eff 6-25-06]

310:257-7-39. Warewashing machines, internal baffles

Warewashing machine wash and rinse tanks shall be equipped with baffles, curtains, or other means to minimize internal cross contamination of the solutions in wash and rinse tanks.

[Source: Added at 23 Ok Reg 2358, eff 6-25-06]

310:257-7-40. Warewashing machines, temperature measuring devices

A warewashing machine shall be equipped with a temperature measuring device that indicates the temperature of the water:

- (1) In each wash and rinse tank; and
- (2) As the water enters the hot water sanitizing final rinse manifold or in the chemical sanitizing solution tank.

[Source: Added at 23 Ok Reg 2358, eff 6-25-06]

310:257-7-41. Manual warewashing equipment, heaters and baskets

If hot water is used for sanitization in manual warewashing operations, the sanitizing compartment of the sink shall be:

- (1) Designed with an integral heating device that is capable of maintaining water at a temperature not less than 77°C (171°F); and
- (2) Provided with a rack or basket to allow complete immersion of equipment and utensils into the hot water.

[Source: Added at 23 Ok Reg 2358, eff 6-25-06]

310:257-7-42. Warewashing machines, automatic dispensing of detergents and sanitizers

A warewashing machine shall be equipped to:

- (1) Automatically dispense detergents and sanitizers; and
- (2) Incorporate a visual means to verify that detergents and sanitizers are delivered or a visual or audible alarm to signal if the detergents and sanitizers are not delivered to the respective washing and sanitizing cycles.

[Source: Added at 23 Ok Reg 2358, eff 6-25-06 ; Amended at 28 Ok Reg 2289, eff 11-1-11 ; Amended at 33 Ok Reg 1520, eff 9-11-16]

310:257-7-43. Warewashing machines, flow pressure device

- (a) Warewashing machines that provide a fresh hot water sanitizing rinse shall be equipped with a pressure gauge or similar device such as a transducer that measures and displays the water pressure in the supply line immediately before entering the warewashing machine; and
- (b) If the flow pressure measuring device is upstream of the fresh hot water sanitizing rinse control valve, the device shall be mounted in a 6.4 millimeter or one-fourth inch Iron Pipe Size (IPS) valve.
- (c) Paragraphs(a) and (b) of this Section do not apply to a machine that uses only a pumped or recirculated sanitizing rinse.

[Source: Added at 23 Ok Reg 2358, eff 6-25-06 ; Amended at 26 Ok Reg 1477, eff 6-11-09]

310:257-7-44. Warewashing sinks and drainboards, self-draining

Sinks and drainboards of warewashing sinks and machines shall be self-draining.

[Source: Added at 23 Ok Reg 2358, eff 6-25-06]

310:257-7-45. Equipment compartments, drainage

Equipment compartments that are subject to accumulation of moisture due to conditions such as condensation, food or beverage drip, or water from melting ice shall be sloped to an outlet that allows complete draining.

[Source: Added at 23 Ok Reg 2358, eff 6-25-06]

310:257-7-46. Vending machines, liquid waste products

- (a) Vending machines designed to store beverages that are packaged in containers made from paper products shall be equipped with diversion devices and retention pans or drains for container leakage.
- (b) Vending machines that dispense liquid food in bulk shall be:
 - (1) Provided with an internally mounted waste receptacle for the collection of drip, spillage, overflow, or other internal wastes; and
 - (2) Equipped with an automatic shutoff device that will place the machine out of operation before the waste receptacle overflows.
- (c) Shutoff devices specified under (b)(2) of this Section shall prevent water or liquid food from continuously running if there is a failure of a flow control device in the water or liquid food system or waste accumulation that could lead to overflow of the waste receptacle.

[Source: Added at 23 Ok Reg 2358, eff 6-25-06]

310:257-7-47. Case lot handling equipment, moveability

Equipment, such as dollies, pallets, racks, and skids used to store and transport large quantities of packaged foods received from a supplier in a cased or overwrapped lot, shall be designed to be moved by hand or by conveniently available equipment such as hand trucks and forklifts.

[Source: Added at 23 Ok Reg 2358, eff 6-25-06]

310:257-7-48. Vending machine doors and openings

(a) Vending machine doors and access opening covers to food and container storage spaces shall be tight-fitting so that the space along the entire interface between the doors or covers and the cabinet of the machine, if the doors or covers are in a closed position, is no greater than 1.5 millimeters or one-sixteenth inch by:

- (1) Being covered with louvers, screens, or materials that provide an equivalent opening of not greater than 1.5 millimeters or one-sixteenth inch. Screening of 12 or more mesh to 2.5 centimeters (12 mesh to 1 inch) meets this requirement;
- (2) Being effectively gasketed;
- (3) Having interface surfaces that are at least 13 millimeters or one-half inch wide; or
- (4) Jambs or surfaces used to form an L-shaped entry path to the interface.

(b) Vending machine service connection openings through an exterior wall of a machine shall be closed by sealants, clamps, or grommets so that the openings are no larger than 1.5 millimeters or one-sixteenth inch.

[Source: Added at 23 Ok Reg 2358, eff 6-25-06]

310:257-7-49. Food equipment, certification and classification

Food equipment that is certified or classified for sanitation by an American National Standards Institute (ANSI) - accredited certification program such as NSF and for commercial use will be deemed to comply with Sections OAC 310:257-7-1 through OAC 310:257-7-49 of this Subchapter or be approved by the Department.

[Source: Added at 23 Ok Reg 2358, eff 6-25-06]

310:257-7-50. Cooling, heating, and holding capacities

Equipment for cooling and heating food, and holding cold and hot food, shall be sufficient in number and capacity to provide food temperatures as specified under Subchapter 5.

[Source: Added at 23 Ok Reg 2358, eff 6-25-06]

310:257-7-51. Manual warewashing, sink compartment requirements

(a) Except as specified in (c) or (f) of this Section, a mechanical warewashing machine or a sink with at least three (3) compartments shall be provided for manually washing, rinsing, and sanitizing equipment and utensils.

(b) Sink compartments shall be large enough to accommodate immersion of the largest equipment and utensils. If equipment or utensils are too large for the warewashing sink, a warewashing machine or alternative equipment as specified in (c) of this Section shall be used. The sink system shall be made of equipment and materials intended for the use of

warewashing.

(c) Alternative manual warewashing equipment may be used when there are special cleaning needs or constraints and its use is approved.

Alternative manual warewashing equipment may include:

- (1) High-pressure detergent sprayers;
- (2) Low- or line-pressure spray detergent foamers;
- (3) Other task-specific cleaning equipment;
- (4) Brushes or other implements;
- (5) 2-compartment sinks as specified under (d) and (e) of this Section; or
- (6) Receptacles that substitute for the compartments of a multicompartment sink in the case of temporary food establishments.

(d) Before a 2-compartment sink is used:

- (1) The food establishment shall be a retail establishment that does not serve or prepare unpackaged Time/Temperature Control for Safety Foods;
- (2) The license holder shall have its use approved; and
- (3) The license holder shall limit the number of kitchenware items cleaned and sanitized in the 2-compartment sink, and shall limit warewashing to batch operations for cleaning kitchenware at the end of a shift, and shall:
 - (A) Make up the cleaning and sanitizing solutions immediately before use and drain them immediately after use, and
 - (B) Use a detergent-sanitizer to sanitize and apply the detergent-sanitizer in accordance with the manufacturer's label instructions and as specified under OAC 310:257-7-76, or
 - (C) Use a hot water sanitization immersion step as specified under OAC 310:257-7-91(3).

(e) A 2-compartment sink may not be used for warewashing operations where cleaning and sanitizing solutions are used for a continuous or intermittent flow of kitchenware or tableware in an ongoing warewashing process.

(f) Food establishments that sell only prepackaged foods have no food preparation, and have no equipment or utensils that require cleaning are exempt from the requirements of a warewashing sink.

[Source: Added at 23 Ok Reg 2358, eff 6-25-06 ; Amended at 28 Ok Reg 2289, eff 11-1-11 ; Amended at 33 Ok Reg 1520, eff 9-11-16 ; Amended at 38 Ok Reg 1947, eff 9-11-21]

310:257-7-52. Drainboards

Drainboards, utensil racks, or tables large enough to accommodate all soiled and cleaned items that may accumulate during hours of operation shall be provided for necessary utensil holding before cleaning and after sanitizing.

[Source: Added at 23 Ok Reg 2358, eff 6-25-06]

310:257-7-53. Ventilation hood systems, adequacy

Ventilation hood systems and devices shall be sufficient in number and capacity to prevent grease or condensation from collecting on walls and ceilings and to prevent the collection of smoke and noxious odors in the food service establishment. Ventilation hoods meeting the requirements listed in OAC 158:50, Mechanical Industry Regulations, shall be installed above commercial heat-processing equipment that causes grease vapors and smoke. This equipment includes but is not limited to deep fat fryers, broilers, griddles, and fry grills.

[Source: Added at 23 Ok Reg 2358, eff 6-25-06 ; Amended at 26 Ok Reg 1477, eff 6-11-09 ; Amended at 28 Ok Reg 2289, eff 11-1-11]

310:257-7-54. Clothes washers and dryers

(a) Except as specified in (b) of this Section, if work clothes or linens are laundered on the premises, a mechanical clothes washer and dryer shall be provided and used.

(b) If on-premises laundering is limited to wiping cloths intended to be used moist, or wiping cloths are air-dried as specified under OAC 310:257-7-102, a mechanical clothes washer and dryer need not be provided.

[Source: Added at 23 Ok Reg 2358, eff 6-25-06]

310:257-7-55. Utensils, consumer self-service

A food dispensing utensil shall be available for each container displayed at a consumer self-service unit such as a buffet or salad bar.

[Source: Added at 23 Ok Reg 2358, eff 6-25-06]

310:257-7-56. Food temperature measuring devices

(a) Food temperature measuring devices shall be provided and readily accessible for use in ensuring attainment and maintenance of food temperatures as specified under Subchapter 5.

(b) A temperature measuring device with a suitable small-diameter probe that is designed to measure the temperature of thin masses shall be provided and readily accessible to accurately measure the temperature in thin foods such as meat patties and fish filets.

[Source: Added at 23 Ok Reg 2358, eff 6-25-06 ; Amended at 28 Ok Reg 2289, eff 11-1-11]

310:257-7-57. Temperature measuring devices, manual and mechanical warewashing

(a) In manual warewashing operations, a temperature measuring device shall be provided and readily accessible for frequently measuring the washing and sanitizing temperatures.

(b) In hot water mechanical warewashing operations, an irreversible registering temperature indicator shall be provided and readily accessible for measuring the utensil surface temperature.

[Source: Added at 23 Ok Reg 2358, eff 6-25-06 ; Amended at 33 Ok Reg 1520, eff 9-11-16]

310:257-7-58. Sanitizing solutions, testing devices

A test kit or other device that accurately measures the concentration in mg/L of sanitizing solutions shall be provided.

[Source: Added at 23 Ok Reg 2358, eff 6-25-06]

310:257-7-58.1. Cleaning agents and sanitizers, availability

(a) Cleaning agents that are used to clean equipment and utensils as specified under OAC 310:257-7-82 through OAC 310:257-7-91 shall be provided and available for use during all hours of operation.

(b) Except for those that are generated on-site at the time of use, chemical sanitizers that are used to sanitize equipment and utensils as specified under OAC 310:257-7-93 through OAC 310:257-7-95 shall be provided and available for use during all hours of operation.

[Source: Added at 38 Ok Reg 1947, eff 9-11-21]

310:257-7-59. Equipment, clothes washers and dryers, and storage cabinets, contamination prevention

(a) Except as specified in (b) of this Section, equipment, a cabinet used for the storage of food, or a cabinet that is used to store cleaned and sanitized equipment, utensils, laundered linens, and single-service and single-use articles may not be located:

- (1) In locker rooms;
- (2) In toilet rooms;
- (3) In garbage rooms;
- (4) In mechanical rooms;
- (5) Under sewer lines that are not shielded to intercept potential drips;
- (6) Under leaking water lines including leaking automatic fire sprinkler heads or under lines on which water has condensed;
- (7) Under open stairwells; or
- (8) Under other sources of contamination.

(b) A storage cabinet used for linens or single-service or single-use articles may be stored in a locker room.

(c) If a mechanical clothes washer or dryer is provided, it shall be located so that the washer or dryer is protected from contamination and only where there is no exposed food; clean equipment, utensils, and linens; and unwrapped single-service and single-use articles.

[Source: Added at 23 Ok Reg 2358, eff 6-25-06]

310:257-7-60. Fixed equipment, spacing or sealing

(a) Equipment that is fixed because it is not easily movable shall be installed so that it is:

- (1) Spaced to allow access for cleaning along the sides, behind, and above the equipment;
- (2) Spaced from adjoining equipment, walls, and ceilings a distance of not more than 1 millimeter or one thirty-second inch;

or

(3) Sealed to adjoining equipment or walls, if the equipment is exposed to spillage or seepage.

(b) Counter-mounted equipment that is not easily movable shall be installed to allow cleaning of the equipment and areas underneath and around the equipment by being:

(1) Sealed to the counter; or

(2) Elevated on legs as specified under OAC 310:257-7-61(d).

[Source: Added at 23 Ok Reg 2358, eff 6-25-06 ; Amended at 28 Ok Reg 2289, eff 11-1-11 ; Amended at 38 Ok Reg 1947, eff 9-11-21]

310:257-7-61. Fixed equipment, elevation or sealing

(a) Except as specified in (b) and (c) of this Section, floor-mounted equipment that is not easily movable shall be sealed to the floor or elevated on legs that provide at least a 15 centimeter (6 inch) clearance between the floor and the equipment.

(b) If no part of the floor under the floor-mounted equipment is more than 15 centimeters (6 inches) from the point of cleaning access, the clearance space may be only 10 centimeters (4 inches).

(c) This Section does not apply to display shelving units, display refrigeration units, and display freezer units located in the consumer shopping areas of a retail food store, if the floor under the units is maintained clean.

(d) Except as specified in (e) of this Section, counter-mounted equipment that is not easily movable shall be elevated on legs that provide at least a 10 centimeter (4 inch) clearance between the table and the equipment.

(e) The clearance space between the counter and counter-mounted equipment may be:

(1) 7.5 centimeters (3 inches) if the horizontal distance of the counter top under the equipment is no more than 50 centimeters (20 inches) from the point of access for cleaning; or

(2) 5 centimeters (2 inches) if the horizontal distance of the counter top under the equipment is no more than 7.5 centimeters (3 inches) from the point of access for cleaning.

[Source: Added at 23 Ok Reg 2358, eff 6-25-06 ; Amended at 28 Ok Reg 2289, eff 11-1-11]

310:257-7-62. Good repair and proper adjustment

(a) Equipment shall be maintained in a state of repair and condition that meets the requirements specified under Sections OAC 310:257-7-1 through OAC 310:257-7-49.

(b) Equipment components such as doors, seals, hinges, fasteners, and kick plates shall be kept intact, tight, and adjusted in accordance with manufacturer's specifications.

(c) Cutting or piercing parts of can openers shall be kept sharp to minimize the creation of metal fragments that can contaminate food when the container is opened.

[Source: Added at 23 Ok Reg 2358, eff 6-25-06]

310:257-7-63. Cutting surfaces

Surfaces such as cutting blocks and boards that are subject to scratching and scoring shall be resurfaced if they can no longer be effectively cleaned and sanitized, or discarded if they are not capable of being resurfaced.

[Source: Added at 23 Ok Reg 2358, eff 6-25-06]

310:257-7-64. Microwave ovens [REVOKED]

[Source: Added at 23 Ok Reg 2358, eff 6-25-06 ; Revoked at 38 Ok Reg 1947, eff 9-11-21]

310:257-7-65. Warewashing equipment, cleaning frequency

A warewashing machine; the compartments of sinks, basins, or other receptacles used for washing and rinsing equipment, utensils, or raw foods, or laundering wiping cloths; and drainboards or other equipment used to substitute for drainboards as specified under OAC 310:257-7-52 shall be cleaned:

- (1) Before use;
- (2) Throughout the day at a frequency necessary to prevent recontamination of equipment and utensils and to ensure that the equipment performs its intended function; and
- (3) If used, at least every twenty-four (24) hours.

[Source: Added at 23 Ok Reg 2358, eff 6-25-06 ; Amended at 38 Ok Reg 1947, eff 9-11-21]

310:257-7-66. Warewashing machines, manufacturers' operating instructions

- (a) A warewashing machine and its auxiliary components shall be operated in accordance with the machine's data plate and other manufacturer's instructions.
- (b) A warewashing machine's conveyor speed or automatic cycle times shall be maintained accurately timed in accordance with manufacturer's specifications.

[Source: Added at 23 Ok Reg 2358, eff 6-25-06]

310:257-7-67. Warewashing sinks, use limitation

- (a) A warewashing sink may not be used for handwashing as specified under OAC 310:257-3-13.
- (b) If a warewashing sink is used to wash wiping cloths, wash produce, or thaw food, the sink shall be cleaned as specified under OAC 310:257-7-65 before and after each time it is used to wash wiping cloths or wash produce or thaw food. Sinks used to wash or thaw food shall be sanitized as specified under OAC 310:257-7-93, OAC 310:257-7-94, and OAC 310:257-7-95 before and after using the sink to wash produce or thaw food.

[Source: Added at 23 Ok Reg 2358, eff 6-25-06]

310:257-7-68. Warewashing equipment, cleaning agents

When used for warewashing, the wash compartment of a sink, mechanical warewasher, or wash receptacle of alternative manual warewashing equipment as specified in OAC 310:257-7-51(c), shall contain a wash solution of soap, detergent, acid cleaner, alkaline cleaner, degreaser, abrasive cleaner, or other cleaning agent according to the cleaning agent manufacturer's label instructions.

[Source: Added at 23 Ok Reg 2358, eff 6-25-06]

310:257-7-69. Warewashing equipment, clean solutions

The wash, rinse, and sanitize solutions shall be maintained clean.

[Source: Added at 23 Ok Reg 2358, eff 6-25-06]

310:257-7-70. Manual warewashing equipment, wash solution temperature

The temperature of the wash solution in manual warewashing equipment shall be maintained at not less than 43°C (110°F) or the temperature specified on the cleaning agent manufacturer's label instructions.

[Source: Added at 23 Ok Reg 2358, eff 6-25-06]

310:257-7-71. Mechanical warewashing equipment, wash solution temperature

(a) The temperature of the wash solution in spray type warewashers that use hot water to sanitize may not be less than:

- (1) For a stationary rack, single temperature machine, 74°C (165°F);
- (2) For a stationary rack, dual temperature machine, 66°C (150°F);
- (3) For a single tank, conveyor, dual temperature machine, 71°C (160°F); or
- (4) For a multitank, conveyor, multitemperature machine, 66°C (150°F).

(b) The temperature of the wash solution in spray-type warewashers that use chemicals to sanitize may not be less than 49°C (120°F).

[Source: Added at 23 Ok Reg 2358, eff 6-25-06]

310:257-7-72. Manual warewashing equipment, hot water sanitization temperatures

If immersion in hot water is used for sanitizing in a manual operation, the temperature of the water shall be maintained at 77°C (171°F) or above.

[Source: Added at 23 Ok Reg 2358, eff 6-25-06]

310:257-7-73. Mechanical warewashing equipment, hot water sanitization temperatures

(a) Except as specified in (b) of this Section, in a mechanical operation, the temperature of the fresh hot water sanitizing rinse as it enters the manifold may not be more than 90°C (194°F), or less than:

(1) For a stationary rack, single temperature machine, 74°C (165°F); or

(2) For all other machines, 82°C (180°F).

(b) The maximum temperature specified under (a) of this Section, does not apply to the high pressure and temperature systems with wand-type, hand-held, spraying devices used for the in-place cleaning and sanitizing of equipment such as meat saws.

[Source: Added at 23 Ok Reg 2358, eff 6-25-06]

310:257-7-74. Mechanical warewashing equipment, sanitization pressure

The flow pressure of the fresh hot water sanitizing rinse in a warewashing machine, as measured in the water line immediately downstream or upstream from the fresh hot water sanitizing rinse control valve, shall be within the range specified on the machine manufacturer's data plate and may not be less than 35 kilopascals (5 pounds per square inch) or more than 200 kilopascals (30 pounds per square inch).

[Source: Amended at 28 Ok Reg 2289, eff 11-1-11]

310:257-7-75. Manual and mechanical warewashing equipment, chemical sanitization - temperature, pH, concentration, and hardness

A chemical sanitizer used in a sanitizing solution for a manual or mechanical operation at exposure times specified under OAC 310:257-7-95(3) shall meet the criteria specified under OAC 310:257-13-7, shall be used in accordance with the EPA registered label use instructions, and shall be used as follows:

(1) A chlorine solution shall have a minimum temperature based on the concentration and pH of the solution as contained in Table 7 of Appendix A of this Chapter

(2) An iodine solution shall have a:

(A) Minimum temperature of 20°C (68°F),

(B) pH of 5.0 or less or a pH no higher than the level for which the manufacturer specifies the solution is effective, and

(C) Concentration between 12.5 mg/L and 25 mg/L;

(3) A quaternary ammonium compound solution shall:

(A) Have a minimum temperature of 24°C (75°F),

(B) Have a concentration as specified under OAC 310-257-13-7 and as indicated by the manufacturer's use directions included in the labeling, and

- (C) Be used only in water with 500 mg/L hardness or less or in water having a hardness no greater than specified by the EPA-registered label use instructions;
- (4) If another solution of a chemical specified under (1) through (3) of this Section is used, the license holder shall demonstrate to the regulatory authority that the solution achieves sanitization and the use of the solution shall be approved; or
- (5) If a chemical sanitizer other than chlorine, iodine, or a quaternary ammonium compound is used, it shall be applied in accordance with the EPA-registered label use instructions, and
- (6) If a chemical sanitizer is generated by a device located on-site at the food establishment, the chemical sanitizer shall be used as specified in paragraphs (1) through (4) of this Section and shall be produced by a device that:
 - (A) Complies with the regulation as specified in Sections 2(q)(1) and 12 of the Federal Insecticide, Fungicide and Rodenticide Act (FIFRA);
 - (B) Complies with 40 CFR Part 152.500 Requirements for Devices and 40 CFR, Section 156.10 Labeling Requirements;
 - (C) Displays the EPA device manufacturing facility registration number on the device; and
 - (D) Is operated and maintained in accordance with manufacturer's instructions.

[Source: Added at 23 Ok Reg 2358, eff 6-25-06 ; Amended at 26 Ok Reg 1477, eff 6-11-09 ; Amended at 28 Ok Reg 2289, eff 11-1-11 ; Amended at 33 Ok Reg 1520, eff 9-11-16 ; Amended at 38 Ok Reg 1947, eff 9-11-21]

310:257-7-76. Manual warewashing equipment, chemical sanitization using detergent-sanitizers

If a detergent-sanitizer is used to sanitize in a cleaning and sanitizing procedure where there is no distinct water rinse between the washing and sanitizing steps, the agent applied in the sanitizing step shall be the same detergent-sanitizer that is used in the washing step.

[Source: Added at 23 Ok Reg 2358, eff 6-25-06]

310:257-7-77. Warewashing equipment, determining chemical sanitizer concentration

Concentration of the sanitizing solution shall be accurately determined by using a test kit or other device.

[Source: Added at 23 Ok Reg 2358, eff 6-25-06]

310:257-7-78. Good repair and calibration

(a) Utensils shall be maintained in a state of repair or condition that complies with the requirements specified under Sections OAC 310:257-7-1 through OAC 310:257-7-49 or shall be discarded.

(b) Food temperature measuring device shall be calibrated in accordance with manufacturer's specifications as necessary to ensure their accuracy.

(c) Ambient air temperature, water pressure, and water temperature measuring devices shall be maintained in good repair and be accurate within the intended range of use.

[Source: Added at 23 Ok Reg 2358, eff 6-25-06]

310:257-7-79. Single-service and single-use articles, required use

A food establishment, without facilities specified under OAC 310:257-7-82 through 310:257-7-95 for cleaning and sanitizing kitchenware and tableware shall provide only single-use kitchenware, single-service articles, and single-use articles for use by food employees and single-service articles for use by consumers.

[Source: Added at 23 Ok Reg 2358, eff 6-25-06 ; Amended at 28 Ok Reg 2289, eff 11-1-11 ; Amended at 33 Ok Reg 1520, eff 9-11-16]

310:257-7-80. Single-service and single-use articles, use limitation

- (a) Single-service and single-use articles may not be reused.
- (b) The bulk milk container dispensing tube shall be cut on the diagonal leaving no more than one inch protruding from the chilled dispensing head.

[Source: Added at 23 Ok Reg 2358, eff 6-25-06]

310:257-7-81. Shells, use limitation

Mollusk and crustacea shells may not be used more than once as serving containers.

[Source: Added at 23 Ok Reg 2358, eff 6-25-06]

310:257-7-82. Equipment, food-contact surfaces, nonfood-contact surfaces, and utensils

- (a) Equipment food-contact surfaces and utensils shall be clean to sight and touch.
- (b) The food-contact surfaces of cooking equipment and pans shall be kept free of encrusted grease deposits and other soil accumulations.
- (c) Nonfood-contact surfaces of equipment shall be kept free of an accumulation of dust, dirt, food residue, and other debris.

[Source: Added at 23 Ok Reg 2358, eff 6-25-06]

310:257-7-83. Equipment food-contact surfaces and utensils

- (a) Equipment food-contact surfaces and utensils shall be cleaned and sanitized:
 - (1) Except as specified in (b) of this Section, before each use with a different type of raw animal food such as beef, fish, lamb, pork, or poultry;
 - (2) Each time there is a change from working with raw foods to working with ready-to-eat foods;

- (3) Between uses with raw fruits and vegetables and with Time/Temperature Control for Safety Food;
- (4) Before using or storing a food temperature measuring device; and
- (5) At any time during the operation when contamination may have occurred.

(b) Paragraph (a)(1) of this Section does not apply if the food-contact surface or utensil is in contact with a succession of different types of raw meat and poultry each requiring a higher cooking temperature as specified under OAC 310:257-5-46 than the previous type.

(c) Except as specified in (d) of this Section, if used with Time/Temperature Control for Safety Food, equipment food-contact surfaces and utensils shall be cleaned throughout the day at least every four (4) hours.

(d) Surfaces of utensils and equipment contacting Time/Temperature Control for Safety Food may be cleaned less frequently than every four (4) hours if:

- (1) In storage, containers of Time/Temperature Control for Safety Food and their contents are maintained at temperatures specified under Subchapter 5 and the containers are cleaned when they are empty;
- (2) Utensils and equipment used to prepare food in a refrigerated room or area that is maintained at one of the temperatures as specified in Table 8 of Appendix A of this Chapter, shall be cleaned at the frequency that corresponds to the temperature established in Table 8 of Appendix A of this Chapter. The cleaning frequency and the ambient temperature of the refrigerated room or area, as established in Table 8 of Appendix A of this Chapter, shall be documented by the food establishment.
- (3) Containers in serving situations such as salad bars, delis, and cafeteria lines hold ready-to-eat Time/Temperature Control for Safety Food that is maintained at the temperatures specified under Subchapter 5, are intermittently combined with additional supplies of the same food that is at the required temperature, and the containers are cleaned at least every twenty-four (24) hours;
- (4) Temperature measuring devices are maintained in contact with food, such as when left in a container of deli food or in a roast, held at temperatures specified under Subchapter 5;
- (5) Equipment is used for storage of packaged or unpackaged food such as a reach-in refrigerator and the equipment is cleaned at a frequency necessary to preclude accumulation of soil residues;
- (6) The cleaning schedule is approved based on consideration of:
 - (A) Characteristics of the equipment and its use,
 - (B) The type of food involved,
 - (C) The amount of food residue accumulation, and
 - (D) The temperature at which the food is maintained during the operation and the potential for the rapid and progressive multiplication of pathogenic or toxigenic microorganisms that are capable of causing foodborne disease; or

(7) In-use utensils are intermittently stored in a container of water in which the water is maintained at 57°C (135°F) or more and the utensils and container are cleaned at least every twenty-four (24) hours or at a frequency necessary to preclude accumulation of soil residues.

(e) Except when dry cleaning methods are used as specified under OAC 310:257-7-86, surfaces of utensils and equipment contacting food that is not Time/Temperature Control for Safety Food shall be cleaned:

- (1) At any time when contamination may have occurred;
- (2) At least every twenty-four (24) hours for iced tea dispensers and consumer self-service utensils such as tongs, scoops, or ladles;
- (3) Before restocking consumer self-service equipment and utensils such as condiment dispensers and display containers; and
- (4) In equipment such as ice bins and beverage dispensing nozzles and enclosed components of equipment such as ice makers, cooking oil storage tanks and distribution lines, beverage and syrup dispensing lines or tubes, coffee bean grinders, and water vending equipment:
 - (A) At a frequency specified by the manufacturer, or
 - (B) Absent manufacturer specifications, at a frequency necessary to preclude accumulation of soil or mold.

[Source: Added at 23 Ok Reg 2358, eff 6-25-06 ; Amended at 26 Ok Reg 1477, eff 6-11-09 ; Amended at 28 Ok Reg 2289, eff 11-1-11 ; Amended at 33 Ok Reg 1520, eff 9-11-16 ; Amended at 38 Ok Reg 1947, eff 9-11-21]

310:257-7-84. Cooking and baking equipment

(a) The food-contact surfaces of cooking and baking equipment shall be cleaned at least every twenty-four (24) hours. This Section does not apply to hot oil cooking and filtering equipment if it is cleaned as specified in OAC 310:257-7-83(d)(6).

(b) The cavities and door seals of microwave ovens shall be cleaned at least every twenty-four (24) hours by using the manufacturer's recommended cleaning procedure.

[Source: Added at 23 Ok Reg 2358, eff 6-25-06 ; Amended at 38 Ok Reg 1947, eff 9-11-21]

310:257-7-85. Nonfood-contact surfaces

Nonfood-contact surfaces of equipment shall be cleaned at a frequency necessary to preclude accumulation of soil residues.

[Source: Added at 23 Ok Reg 2358, eff 6-25-06]

310:257-7-86. Dry cleaning

- (a) If used, dry cleaning methods such as brushing, scraping, and vacuuming shall contact only surfaces that are soiled with dry food residues that are not Time/Temperature Control for Safety Food.
- (b) Cleaning equipment used in dry cleaning food-contact surfaces may not be used for any other purpose.

[Source: Added at 23 Ok Reg 2358, eff 6-25-06 ; Amended at 38 Ok Reg 1947, eff 9-11-21]

310:257-7-87. Precleaning

- (a) Food debris on equipment and utensils shall be scraped over a waste disposal unit or garbage receptacle or shall be removed in a warewashing machine with a prewash cycle.
- (b) If necessary for effective cleaning, utensils and equipment shall be preflushed, presoaked, or scrubbed with abrasives.

[Source: Added at 23 Ok Reg 2358, eff 6-25-06 ; Amended at 38 Ok Reg 1947, eff 9-11-21]

310:257-7-88. Loading of soiled items, warewashing machines

Soiled items to be cleaned in a warewashing machine shall be loaded into racks, trays, or baskets or onto conveyors in a position that:

- (1) Exposes the items to the unobstructed spray from all cycles;
- and
- (2) Allows the items to drain.

[Source: Added at 23 Ok Reg 2358, eff 6-25-06]

310:257-7-89. Wet cleaning

- (a) Equipment food-contact surfaces and utensils shall be effectively washed to remove or completely loosen soils by using the manual or mechanical means necessary such as the application of detergents containing wetting agents and emulsifiers; acid, alkaline, or abrasive cleaners; hot water; brushes; scouring pads; high-pressure sprays; or ultrasonic devices.
- (b) The washing procedures selected shall be based on the type and purpose of the equipment or utensil, and on the type of soil to be removed.

[Source: Added at 23 Ok Reg 2358, eff 6-25-06]

310:257-7-90. Washing, procedures for alternative manual warewashing equipment

If washing in sink compartments or a warewashing machine is impractical such as when the equipment is fixed or the utensils are too large, washing shall be done by using alternative manual warewashing equipment as specified in OAC 310:257-7-51(c) in accordance with the following procedures:

- (1) Equipment shall be disassembled as necessary to allow access of the detergent solution to all parts;

- (2) Equipment components and utensils shall be scraped or rough cleaned to remove food particle accumulation; and
- (3) Equipment and utensils shall be washed as specified under OAC 310:257-7-89(a).

[Source: Added at 23 Ok Reg 2358, eff 6-25-06 ; Amended at 28 Ok Reg 2289, eff 11-1-11 ; Amended at 38 Ok Reg 1947, eff 9-11-21]

310:257-7-91. Rinsing procedures

Washed utensils and equipment shall be rinsed so that abrasives are removed and cleaning chemicals are removed or diluted through the use of water or a detergent-sanitizer solution by using one of the following procedures:

- (1) Use of a distinct, separate water rinse after washing and before sanitizing if using:
 - (A) A 3-compartment sink as specified in OAC 310:257-7-51,
 - (B) Alternative manual warewashing equipment equivalent to a 3-compartment sink as specified in OAC 310:257-7-51(c), or
 - (C) A 3-step washing, rinsing, and sanitizing procedure in a warewashing system for CIP equipment;
- (2) Use of a detergent-sanitizer as specified under OAC 310:257-7-76 if using:
 - (A) Alternative warewashing equipment as specified in OAC 310:257-7-51(c) that is approved for use with a detergent-sanitizer, or
 - (B) A warewashing system for CIP equipment;
- (3) Use of a nondistinct water rinse that is integrated in the hot water sanitization immersion step of a 2-compartment sink operation;
- (4) If using a warewashing machine that does not recycle the sanitizing solution as specified under (5) of this Section, or alternative manual warewashing equipment such as sprayers, use of a nondistinct water rinse that is:
 - (A) Integrated in the application of the sanitizing solution, and
 - (B) Wasted immediately after each application; or
- (5) If using a warewashing machine that recycles the sanitizing solution for use in the next wash cycle, use of a nondistinct water rinse that is integrated in the application of the sanitizing solution.

310:257-7-92. Returnables, cleaning for refilling [REVOKED]

[Source: Added at 23 Ok Reg 2358, eff 6-25-06 ; Amended at 26 Ok Reg 1477, eff 6-11-09 ; Revoked at 33 Ok Reg 1520, eff 9-11-16]

310:257-7-93. Food-contact surfaces and utensils

Equipment food-contact surfaces and utensils shall be sanitized.

[Source: Added at 23 Ok Reg 2358, eff 6-25-06]

310:257-7-94. Before use after cleaning

Utensils and food-contact surfaces of equipment shall be sanitized before use after cleaning.

[Source: Added at 23 Ok Reg 2358, eff 6-25-06]

310:257-7-95. Hot water and chemical

After being cleaned, equipment food-contact surfaces and utensils shall be sanitized in:

- (1) Hot water manual operations by immersion for at least thirty (30) seconds and as specified under OAC 310:257-7-72;
- (2) Hot water mechanical operations by being cycled through equipment that is set up as specified under OAC 310:257-7-66, OAC 310:257-7-73, and OAC 310:257-7-74 and achieving a utensil surface temperature of 71°C (160°F) as measured by an irreversible registering temperature indicator; or
- (3) Chemical manual or mechanical operations, including the application of sanitizing chemicals by immersion, manual swabbing, brushing, or pressure spraying methods, using a solution as specified under OAC 310:257-7-75. Contact times shall be consistent with those on the EPA-registered label use instructions by providing:
 - (A) Except as specified under paragraph (3)(B) of this Section, a contact time of at least ten (10) seconds for a chlorine solution specified under OAC 310:257-7-75(1),
 - (B) A contact time of at least seven (7) seconds for a chlorine solution of 50 mg/L that has a pH of ten (10) or less and a temperature of at least 38°C (100°F) or a pH of eight (8) or less and a temperature of at least 24°C (75°F),
 - (C) A contact time of at least thirty (30) seconds for other chemical sanitizing solutions, or
 - (D) A contact time used in relationship with a combination of temperature, concentration, and pH that, when evaluated for efficacy, yields sanitization as defined in OAC 310:257-1-2.

310:257-7-96. Clean linens

Clean linens shall be free from food residues and other soiling matter.

[Source: Added at 23 Ok Reg 2358, eff 6-25-06]

310:257-7-97. Specifications

- (a) Linens that do not come in direct contact with food shall be laundered between operations if they become wet, sticky, or visibly soiled.
- (b) Cloth gloves used as specified under OAC 310:257-5-34(d) shall be laundered before being used with a different type of raw animal food such as beef, lamb, pork, poultry and fish.
- (c) Linens that are used as specified under OAC 310:257-5-32 and cloth napkins shall be laundered between each use.
- (d) Wet wiping cloths shall be laundered daily.
- (e) Dry wiping cloths shall be laundered as necessary to prevent contamination of food and clean serving utensils.

[Source: Added at 23 Ok Reg 2358, eff 6-25-06 ; Amended at 28 Ok Reg 2289, eff 11-1-11 ; Amended at 33 Ok Reg 1520, eff 9-11-16]

310:257-7-98. Storage of soiled linens

Soiled linens shall be kept in clean, nonabsorbent receptacles or clean, washable laundry bags and stored and transported to prevent contamination of food, clean equipment, clean utensils, and single-service and single-use articles.

[Source: Added at 23 Ok Reg 2358, eff 6-25-06]

310:257-7-99. Mechanical washing

- (a) Except as specified in (b) of this Section, linens shall be mechanically washed.
- (b) In food establishments in which only wiping cloths are laundered as specified under OAC 310:257-7-54(b), the wiping cloths may be laundered in a mechanical washer, sink designated only for laundering wiping cloths, or a warewashing or food preparation sink that is cleaned as specified under OAC 310:257-7-65.

[Source: Added at 23 Ok Reg 2358, eff 6-25-06 ; Amended at 33 Ok Reg 1520, eff 9-11-16]

310:257-7-100. Use of laundry facilities

- (a) Except as specified in (b) of this Section, laundry facilities on the premises of a food establishment shall be used only for the washing and drying of items used in the operation of the establishment.
- (b) Separate laundry facilities located on the premises for the purpose of general laundering such as for institutions providing boarding and lodging may also be used for laundering food establishment items.

[Source: Added at 23 Ok Reg 2358, eff 6-25-06 ; Amended at 33 Ok Reg 1520, eff 9-11-16]

310:257-7-101. Equipment and utensils, Air-drying required

After cleaning and sanitizing, equipment and utensils:

- (1) Shall be air-dried or used after adequate draining as specified in 40 CFR 180.940(a), before contact with food. Stacking of wet items shall be prohibited; and
- (2) Shall not be cloth dried except that utensils that have been air-dried may be polished with cloths that are maintained clean

and dry.

[Source: Added at 23 Ok Reg 2358, eff 6-25-06 ; Amended at 28 Ok Reg 2289, eff 11-1-11 ; Amended at 38 Ok Reg 1947, eff 9-11-21]

310:257-7-102. Wiping cloths, air-drying locations

Wiping cloths laundered in a food establishment that does not have a mechanical clothes dryer as specified under OAC 310:257-7-54(b) shall be air-dried in a location and in a manner that prevents contamination of food, equipment, utensils, linens, and single-service and single-use articles and the wiping cloths. This Section does not apply if wiping cloths are stored after laundering in a sanitizing solution as specified under OAC 310:257-7-75.

[Source: Added at 23 Ok Reg 2358, eff 6-25-06 ; Amended at 33 Ok Reg 1520, eff 9-11-16]

310:257-7-103. Food-contact surfaces

Lubricants, as specified under OAC 310:257-13-11 shall be applied to food-contact surfaces that require lubrication in a manner that does not contaminate food-contact surfaces.

[Source: Added at 23 Ok Reg 2358, eff 6-25-06 ; Amended at 33 Ok Reg 1520, eff 9-11-16]

310:257-7-104. Equipment

Equipment shall be reassembled so that food-contact surfaces are not contaminated.

[Source: Added at 23 Ok Reg 2358, eff 6-25-06]

310:257-7-105. Equipment, utensils, linens, and single-service and single-use articles

(a) Except as specified in (d) of this Section, cleaned equipment and utensils, laundered linens, and single-service and single-use articles shall be stored:

- (1) In a clean, dry location;
- (2) Where they are not exposed to splash, dust, or other contamination; and
- (3) At least 15 cm (6 inches) above the floor.

(b) Clean equipment and utensils shall be stored as specified under (a) of this Section and shall be stored:

- (1) In a self-draining position that allows air drying; and
- (2) Covered or inverted.

(c) Single-service and single-use articles shall be stored as specified under (a) of this Section and shall be kept in the original protective package or stored by using other means that afford protection from contamination until used.

(d) Items that are kept in closed packages may be stored less than 15 cm (6 inches) above the floor on dollies, pallets, racks, and skids that are designed as specified under OAC 310:257-7-47.

[Source: Added at 23 Ok Reg 2358, eff 6-25-06]

310:257-7-106. Prohibitions

(a) Except as specified in (b) of this Section, cleaned and sanitized equipment, utensils, laundered linens, and single-service and single-use articles may not be stored:

- (1) In locker rooms;
- (2) In toilet rooms;
- (3) In garbage rooms;
- (4) In mechanical rooms;
- (5) Under sewer lines that are not shielded to intercept potential drips;
- (6) Under leaking water lines including leaking automatic fire sprinkler heads or under lines on which water has condensed;
- (7) Under open stairwells; or
- (8) Under other sources of contamination.

(b) Laundered linens and single-service and single-use articles that are packaged or in a facility such as a cabinet may be stored in a locker room.

[Source: Added at 23 Ok Reg 2358, eff 6-25-06]

310:257-7-107. Kitchenware and tableware

(a) Single-service and single-use articles and cleaned and sanitized utensils shall be handled, displayed, and dispensed so that contamination of food- and lip-contact surfaces is prevented.

(b) Knives, forks, and spoons that are not prewrapped shall be presented so that only the handles are touched by employees and by consumers if consumer self-service is provided.

(c) Except as specified under (b) of this Section, single-service articles that are intended for food-or lip-contact shall be furnished for consumer self-service with the original individual wrapper intact or from an approved dispenser.

[Source: Added at 23 Ok Reg 2358, eff 6-25-06]

310:257-7-108. Soiled and clean tableware

Soiled tableware shall be removed from consumer eating and drinking areas and handled so that clean tableware is not contaminated.

[Source: Added at 23 Ok Reg 2358, eff 6-25-06]

310:257-7-109. Preset tableware

If tableware is preset:

- (1) Except as specified in paragraph two (2) of this Section, tableware that is preset shall be protected from contamination by being wrapped, covered, or inverted;
- (2) Preset tableware may be exposed if:

- (A) Unused settings are removed when the consumer is seated; or
 - (B) Settings not removed when a consumer is seated are cleaned and sanitized before any further use
- () .

310:257-7-110. Rinsing equipment and utensils after cleaning and sanitizing

After being cleaned and sanitized, equipment and utensils shall not be rinsed before air drying or use unless:

- (1) The rinse is applied directly from a potable water supply by a warewashing machine that is maintained and operated as specified under OAC 310:257-7-26 through 310:257-7-48 and as specified under OAC 310:257-7-62 through 310:257-7-77; and
- (2) The rinse is applied only after the equipment and utensils have been sanitized by the applications of hot water or by the applications of a chemical sanitizer solution whose EPA - Registered label use instructions call for rinsing off the sanitizer after it is applied in a commercial warewashing machine.

SUBCHAPTER 9. WATER, PLUMBING AND WASTE

310:257-9-1. Approved System

A license holder shall obtain potable water from:

- (1) A public water system; or
- (2) A nonpublic water system that is constructed, maintained, and operated according to law.

[Source: Added at 23 Ok Reg 2358, eff 6-25-06 ; Amended at 28 Ok Reg 2289, eff 11-1-11 ; Amended at 38 Ok Reg 1947, eff 9-11-21]

310:257-9-2. System flushing and disinfection

A drinking water system shall be flushed and disinfected before being placed in service after construction, repair, or modification and after an emergency situation, such as a flood, that may introduce contaminants to the system.

[Source: Added at 23 Ok Reg 2358, eff 6-25-06]

310:257-9-3. Bottled drinking water [REVOKED]

[Source: Added at 23 Ok Reg 2358, eff 6-25-06 ; Amended at 33 Ok Reg 1520, eff 9-11-16 ; Revoked at 38 Ok Reg 1947, eff 9-11-21]

310:257-9-4. Quality, standards [REVOKED]

[Source: Added at 23 Ok Reg 2358, eff 6-25-06 ; Amended at 28 Ok Reg 2289, eff 11-1-11 ; Revoked at 38 Ok Reg 1947, eff 9-11-21]

310:257-9-5. Nondrinking water

- (a) A nondrinking water supply shall be used only if its use is approved.
- (b) Nondrinking water shall be used only for nonculinary purposes such as air conditioning, nonfood equipment cooling, and fire protection.

[Source: Added at 23 Ok Reg 2358, eff 6-25-06 ; Amended at 38 Ok Reg 1947, eff 9-11-21]

310:257-9-6. Sampling

Except when used as specified under OAC 310:257-9-5, water from a non-public water system shall be sampled and tested at least annually and as required by OAC 252:624 Minor Public Water Supply Systems.

[Source: Added at 23 Ok Reg 2358, eff 6-25-06 ; Amended at 28 Ok Reg 2289, eff 11-1-11 ; Amended at 38 Ok Reg 1947, eff 9-11-21]

310:257-9-7. Sample report

The most recent sample report for the non-public water system shall be retained on file in the food establishment.

[Source: Added at 23 Ok Reg 2358, eff 6-25-06 ; Amended at 28 Ok Reg 2289, eff 11-1-11 ; Amended at 33 Ok Reg 1520, eff 9-11-16 ; Amended at 38 Ok Reg 1947, eff 9-11-21]

310:257-9-8. Quantity and availability, capacity

- (a) The water source and system shall be of sufficient capacity to meet the peak water demands of the food establishment. Mobile and seasonal food establishments shall have a minimum water capacity of at least ten (10) gallons. Pushcarts shall have a minimum water capacity of at least five (5) gallons.
- (b) Hot water generation and distribution systems shall be sufficient to meet the peak hot water demands throughout the food establishment.

[Source: Added at 23 Ok Reg 2358, eff 6-25-06 ; Amended at 33 Ok Reg 1520, eff 9-11-16]

310:257-9-9. Pressure

- (a) Water under pressure shall be provided to all fixtures, equipment, and nonfood equipment that are required to use water except that water supplied as specified under OAC 310:257-9-11(1) and (2) to a temporary food establishment or in response to a temporary interruption of a water supply need not be under pressure.
- (b) Mobile and seasonal food establishments shall have a water system under pressure that produces a flow of at least two (2) gallons per minute.

[Source: Added at 23 Ok Reg 2358, eff 6-25-06 ; Amended at 33 Ok Reg 1520, eff 9-11-16 ; Amended at 38 Ok Reg 1947, eff 9-11-21]

310:257-9-10. Distribution, delivery, and retention, system

Water shall be received from the source through the use of:

- (1) An approved public water main; or
- (2) One or more of the following that shall be constructed, maintained, and operated according to law:
 - (A) Non-public water main, water pumps, pipes, hoses, connections, and other appurtenances,
 - (B) Water transport vehicles, and
 - (C) Water containers.

[Source: Added at 23 Ok Reg 2358, eff 6-25-06 ; Amended at 28 Ok Reg 2289, eff 11-1-11 ; Amended at 38 Ok Reg 1947, eff 9-11-21]

310:257-9-11. Alternative water supply

Water meeting the requirements specified under OAC 310:257-9-1 through OAC 310:257-9-9 shall be made available for a temporary food establishment without a permanent water supply, and for a food establishment or mobile food establishment with a temporary interruption of its water supply through:

- (1) A supply of containers of commercially bottled drinking water;
- (2) One or more closed portable water containers;
- (3) An enclosed vehicular water tank;
- (4) An on-premises water storage tank; or
- (5) Piping, tubing, or hoses connected to an adjacent approved source.

[Source: Added at 23 Ok Reg 2358, eff 6-25-06 ; Amended at 33 Ok Reg 1520, eff 9-11-16]

310:257-9-12. Materials, approved

- (a) A plumbing system and hoses conveying water shall be constructed and repaired with approved materials according to law.
- (b) A water filter shall be made of safe materials.

[Source: Added at 23 Ok Reg 2358, eff 6-25-06]

310:257-9-13. Approved system and cleanable fixtures

- (a) A plumbing system shall be designed, constructed, and installed according to law.
- (b) A plumbing fixture such as a handwashing facility, toilet, or urinal shall be easily cleanable.

[Source: Added at 23 Ok Reg 2358, eff 6-25-06]

310:257-9-14. Handwashing facility, installation

- (a) A handwashing lavatory shall be equipped to provide water at a temperature of at least 38°C (100°F) through a mixing valve or combination faucet.
- (b) A steam mixing valve shall not be used at a handwashing lavatory.
- (c) A self-closing, slow-closing, or metering faucet shall provide a flow of water for at least fifteen (15) seconds without the need to reactivate the

faucet.

(d) An automatic handwashing facility shall be installed in accordance with manufacturer's instructions.

(e) Where faucets are supplied with tempered water, the maximum water temperature shall be no greater than 120°F.

[Source: Added at 23 Ok Reg 2358, eff 6-25-06 ; Amended at 38 Ok Reg 1947, eff 9-11-21]

310:257-9-15. Backflow prevention, air gap

An air gap between the water supply inlet and the flood level rim of the plumbing fixture, equipment, or nonfood equipment shall be at least twice the diameter of the water supply inlet and shall not be less than 25 mm (1 inch).

[Source: Added at 23 Ok Reg 2358, eff 6-25-06 ; Amended at 38 Ok Reg 1947, eff 9-11-21]

310:257-9-16. Backflow prevention device, design standard

A backflow or backsiphonage prevention device installed on a water supply system shall meet American Society of Sanitary Engineering (A.S.S.E.) standards for construction, installation, maintenance, inspection, and testing for that specific application and type of device.

[Source: Added at 23 Ok Reg 2358, eff 6-25-06]

310:257-9-17. Conditioning device, design

A water filter, screen, and other water conditioning device installed on water lines shall be designed to facilitate disassembly for periodic servicing and cleaning. A water filter element shall be of the replaceable type.

[Source: Added at 23 Ok Reg 2358, eff 6-25-06]

310:257-9-18. Numbers and capacities, handwashing facilities

(a) Except as specified in paragraphs (b) and (c) of this Section, at least one (1) handwashing lavatory, a number of handwashing lavatories necessary for their convenient use by employees in areas specified under OAC 310:257-9-23, and not fewer than the number of handwashing lavatories required by law shall be provided. A sink system shall be made of equipment and materials intended for the use of hand washing. The sink system shall be installed so that hand washing cannot contaminate clean utensils.

(b) If approved and capable of removing the types of soils encountered in the food operations involved, automatic handwashing facilities may be substituted for handwashing lavatories in a food establishment that has at least one (1) handwashing lavatory.

[Source: Added at 23 Ok Reg 2358, eff 6-25-06 ; Amended at 26 Ok Reg 1477, eff 6-11-09 ; Amended at 28 Ok Reg 2289, eff 11-1-11 ; Amended at 33 Ok Reg 1520, eff 9-11-16 ; Amended at 38 Ok Reg 1947, eff 9-11-21]

310:257-9-19. Toilets and urinals

At least one (1) toilet and not fewer than the toilets required by law shall be provided. If authorized by law and urinals are substituted for toilets, the substitution shall be done as specified in law. Chemical portable toilets, if approved, may be substituted for this requirement for temporary, seasonal, and mobile food establishments.

[Source: Added at 23 Ok Reg 2358, eff 6-25-06 ; Amended at 38 Ok Reg 1947, eff 9-11-21]

310:257-9-20. Service sink

(a) At least one(1) service sink or one(1) curbed cleaning facility equipped with a floor drain shall be provided and conveniently located for the cleaning of mops or similar wet floor cleaning tools and for the disposal of mop water and similar liquid waste.

(b) If alternate floor cleaning methods are approved, and waste mop water is not generated, the service sink specified under (a) of this Section is not required.

[Source: Added at 23 Ok Reg 2358, eff 6-25-06 ; Amended at 28 Ok Reg 2289, eff 11-1-11 ; Amended at 38 Ok Reg 1947, eff 9-11-21]

310:257-9-21. Backflow prevention device, when required

A plumbing system shall be installed to preclude backflow of a solid, liquid, or gas contaminant into the water supply system at each point of use at the food establishment, including on a hose bibb if a hose is attached or on a hose bibb if a hose is not attached and backflow prevention is required by law, by:

- (1) Providing an air gap as specified under OAC 310:257-9-15; or
- (2) Installing an approved backflow prevention device as specified under OAC 310:257-9-16.

[Source: Added at 23 Ok Reg 2358, eff 6-25-06 ; Amended at 33 Ok Reg 1520, eff 9-11-16]

310:257-9-22. Backflow prevention device, carbonator

(a) If not provided with an air gap as specified under OAC 310:257-9-15, a dual check valve with an intermediate vent preceded by a screen of not less than 100 mesh to 25.4mm (100 mesh to 1 inch) shall be installed upstream from a carbonating device and downstream from any copper in the water supply line.

(b) A dual check valve attached to the carbonator need not be of the vented type if an air gap or vented backflow prevention device has been otherwise provided as specified under (a) of this Section.

[Source: Added at 23 Ok Reg 2358, eff 6-25-06 ; Amended at 28 Ok Reg 2289, eff 11-1-11 ; Amended at 38 Ok Reg 1947, eff 9-11-21]

310:257-9-23. Location and placement, handwashing facilities

A handwashing facility shall be located:

- (1) To allow convenient use by employees in food preparation, food dispensing, and warewashing areas; and;

(2) In, or immediately adjacent to, toilet rooms.

[Source: Added at 23 Ok Reg 2358, eff 6-25-06]

310:257-9-24. Backflow prevention device, location

A backflow prevention device shall be located so that it may be serviced and maintained.

[Source: Added at 23 Ok Reg 2358, eff 6-25-06]

310:257-9-25. Conditioning device, location

A water filter, screen, and other water conditioning device installed on water lines shall be located to facilitate disassembly for periodic servicing and cleaning.

[Source: Added at 23 Ok Reg 2358, eff 6-25-06]

310:257-9-26. Using a handwashing facility.

- (a) A handwashing facility shall be maintained so that it is accessible at all times for employee use.
- (b) A handwashing facility shall not be used for purposes other than handwashing.
- (c) An automatic handwashing facility shall be used in accordance with manufacturer's instructions.

[Source: Added at 23 Ok Reg 2358, eff 6-25-06 ; Amended at 38 Ok Reg 1947, eff 9-11-21]

310:257-9-27. Prohibiting a cross connection

- (a) A person shall not create a cross connection by connecting a pipe or conduit between the drinking water system and a nondrinking water system or a water system of unknown quality.
- (b) The piping of a nondrinking water system shall be durably identified so that it is readily distinguishable from piping that carries drinking water.

[Source: Added at 23 Ok Reg 2358, eff 6-25-06 ; Amended at 38 Ok Reg 1947, eff 9-11-21]

310:257-9-28. Scheduling inspection and service for a water system device

A device such as a water treatment device or backflow preventer shall be scheduled for inspection and service, in accordance with manufacturer's instructions and as necessary to prevent device failure based on local water conditions, and records demonstrating inspection and service shall be maintained by the person in charge.

[Source: Added at 23 Ok Reg 2358, eff 6-25-06]

310:257-9-29. Water reservoir of fogging devices, cleaning

(a) A reservoir that is used to supply water to a device such as a produce fogger shall be:

- (1) Maintained in accordance with manufacturer's specifications; and
- (2) Cleaned in accordance with manufacturer's specifications or according to the procedures specified under (b) of this Section, whichever is more stringent.

(b) Cleaning procedures shall include at least the following steps and shall be conducted at least once a week:

- (1) Draining and complete disassembly of the water and aerosol contact parts;
- (2) Brush-cleaning the reservoir, aerosol tubing, and discharge nozzles with a suitable detergent solution;
- (3) Flushing the complete system with water to remove the detergent solution and particulate accumulation; and;
- (4) Rinsing by immersing, spraying, or swabbing the reservoir, aerosol tubing, and discharge nozzles with at least 50 mg/L hypochlorite solution.

[Source: Added at 23 Ok Reg 2358, eff 6-25-06]

310:257-9-30. System maintained in good repair

A plumbing system shall be:

- (1) Repaired according to law; and
- (2) Maintained in good repair.

[Source: Added at 23 Ok Reg 2358, eff 6-25-06]

310:257-9-31. Materials, approved

Materials that are used in the construction of a water tank and appurtenances shall be:

- (1) Safe;
- (2) Durable, corrosion-resistant, and nonabsorbent; and
- (3) Finished to have a smooth, easily cleanable surface.

[Source: Added at 23 Ok Reg 2358, eff 6-25-06 ; Amended at 33 Ok Reg 1520, eff 9-11-16 ; Amended at 38 Ok Reg 1947, eff 9-11-21]

310:257-9-32. Enclosed system, sloped to drain

A potable water tank shall be:

- (1) Enclosed from the filling inlet to the discharge outlet; and
- (2) Sloped to an outlet that allows complete drainage of the tank; and
- (3) At least the capacity as specified in OAC 310:257-9-8.

[Source: Added at 23 Ok Reg 2358, eff 6-25-06 ; Amended at 26 Ok Reg 1477, eff 6-11-09 ; Amended at 38 Ok Reg 1947, eff 9-11-21]

310:257-9-33. Inspection and cleaning port, protected and secured

If a water tank is designed with an access port for inspection and cleaning, the opening shall be in the top of the tank and:

- (1) Flanged upward at least 13 mm (one-half inch); and
- (2) Equipped with a port cover assembly that is:
 - (A) Provided with a gasket and a device for securing the cover in place, and;
 - (B) Flanged to overlap the opening and sloped to drain.

[Source: Added at 23 Ok Reg 2358, eff 6-25-06]

310:257-9-34. "V" type threads, use limitation

A fitting with "V" type threads on a water tank inlet or outlet shall be allowed only when a hose is permanently attached.

[Source: Added at 23 Ok Reg 2358, eff 6-25-06]

310:257-9-35. Tank vent, protected

If provided, a water tank vent shall terminate in a downward direction and shall be covered with:

- (1) 16 mesh to 25.4 mm (16 mesh to 1 inch) screen or equivalent when the vent is in a protected area; or
- (2) A protective filter when the vent is in an area that is not protected from windblown dirt and debris.

[Source: Added at 23 Ok Reg 2358, eff 6-25-06]

310:257-9-36. Inlet and outlet, sloped to drain

- (a) A water tank and its inlet and outlet shall be sloped to drain.
- (b) A water tank inlet shall be positioned so that it is protected from contaminants such as waste discharge, road dust, oil or grease.

[Source: Added at 23 Ok Reg 2358, eff 6-25-06]

310:257-9-37. Hose, construction and identification

A hose used for conveying potable water that is to be used for culinary purposes shall be:

- (1) Safe;
- (2) Durable, corrosion-resistant, nonabsorbent and made of food grade materials;
- (3) Resistant to pitting, chipping, crazing, scratching, scoring, distortion, and decomposition;
- (4) Finished with a smooth interior surface; and
- (5) Clearly and durably identified as to its use if not permanently attached.

[Source: Added at 23 Ok Reg 2358, eff 6-25-06 ; Amended at 28 Ok Reg 2289, eff 11-1-11 ; Amended at 33 Ok Reg 1520, eff 9-11-16 ; Amended at 38 Ok Reg 1947, eff 9-11-21]

310:257-9-38. Filter, compressed air

A filter that does not pass oil or oil vapors shall be installed in the air supply line between the compressor and drinking water system when compressed air is used to pressurize the water tank system.

[Source: Added at 23 Ok Reg 2358, eff 6-25-06]

310:257-9-39. Protective cover or device

A cap and keeper chain, closed cabinet, closed storage tube, or other approved protective cover or device shall be provided for a water inlet, outlet, and hose.

[Source: Added at 23 Ok Reg 2358, eff 6-25-06]

310:257-9-40. Mobile food establishment tank inlet

A mobile food establishment's water tank inlet shall be:

- (1) 19.1 mm (three-fourths (3/4) inch) in inner diameter or less; and
- (2) Provided with a hose connection of a size or type that will prevent its use for any other service.

[Source: Added at 23 Ok Reg 2358, eff 6-25-06 ; Amended at 33 Ok Reg 1520, eff 9-11-16]

310:257-9-41. System flushing and sanitization

A water tank, pump, and hoses shall be flushed and sanitized before being placed in service after construction, repair, modification, and periods of nonuse.

[Source: Added at 23 Ok Reg 2358, eff 6-25-06 ; Amended at 38 Ok Reg 1947, eff 9-11-21]

310:257-9-42. Using a pump and hoses, backflow prevention

A person shall operate a water tank, pump, and hoses so that backflow and other contamination of the water supply are prevented.

[Source: Added at 23 Ok Reg 2358, eff 6-25-06]

310:257-9-43. Protecting inlet, outlet, and hose fitting

If not in use, a water tank and hose inlet and outlet fitting shall be protected using a cover or device as specified under OAC 310:257-9-39.

[Source: Added at 23 Ok Reg 2358, eff 6-25-06]

310:257-9-44. Tank, pump, and hoses, dedication

(a) Except as specified in (b) of this Section, a water tank, pump, and hoses used for conveying drinking water shall be used for no other purpose.

(b) Water tanks, pumps, and hoses approved for liquid foods may be used for conveying drinking water if they are cleaned and sanitized before they are used to convey water.

[Source: Added at 23 Ok Reg 2358, eff 6-25-06]

310:257-9-45. Capacity and drainage

A sewage holding tank in a mobile or seasonal food establishment shall be:

- (1) Sized fifteen percent (15%) larger in capacity than the water supply tank;
- (2) Sloped to a drain that is twenty-five (25) mm (one (1) inch) in inner diameter or greater, equipped with a shut-off valve; and
- (3) If connected to a permanent water supply, the establishment shall be connected to a permanent sewage system.

[Source: Added at 23 Ok Reg 2358, eff 6-25-06 ; Amended at 33 Ok Reg 1520, eff 9-11-16 ; Amended at 38 Ok Reg 1947, eff 9-11-21]

310:257-9-46. Establishment drainage system

Food establishment drainage systems, including grease traps, that convey sewage shall be designed and installed as specified under OAC 310:257-9-13(a).

[Source: Added at 23 Ok Reg 2358, eff 6-25-06 ; Amended at 33 Ok Reg 1520, eff 9-11-16]

310:257-9-47. Backflow prevention

- (a) Except as specified in (b) through (d) of this Section, a direct connection shall not exist between the sewage system and a drain originating from equipment in which food, portable equipment, or utensils are placed.
- (b) Subsection (a) of this Section does not apply to floor drains that originate in refrigerated spaces that are constructed as an integral part of the building.
- (c) If allowed by law, a warewashing machine may have a direct connection between its waste outlet and a floor drain when the machine is located within 1.5 m (5 feet) of a trapped floor drain and the machine outlet is connected to the inlet side of a properly vented floor drain trap.
- (d) If allowed by law, a warewashing sink may have a direct connection.

[Source: Added at 23 Ok Reg 2358, eff 6-25-06 ; Amended at 28 Ok Reg 2289, eff 11-1-11 ; Amended at 38 Ok Reg 1947, eff 9-11-21]

310:257-9-48. Grease trap

If used, a grease trap or interceptor shall be located to be easily accessible for cleaning.

[Source: Added at 23 Ok Reg 2358, eff 6-25-06 ; Amended at 38 Ok Reg 1947, eff 9-11-21]

310:257-9-49. Conveying sewage

Sewage shall be conveyed to the point of disposal through an approved sanitary sewage system or other system, including use of sewage transport vehicles, waste retention tanks, pumps, pipes, hoses,

and connections that are constructed, maintained, and operated according to law.

[Source: Added at 23 Ok Reg 2358, eff 6-25-06 ; Amended at 28 Ok Reg 2289, eff 11-1-11]

310:257-9-50. Removing mobile food establishment wastes

Sewage and other liquid wastes shall be removed from a mobile food establishment at an approved waste servicing area or by a sewage transport vehicle in such a way that a public health hazard or nuisance is not created.

[Source: Added at 23 Ok Reg 2358, eff 6-25-06 ; Amended at 33 Ok Reg 1520, eff 9-11-16]

310:257-9-51. Flushing a waste retention tank

A tank for liquid waste retention shall be thoroughly flushed and drained in a sanitary manner during the servicing operation.

[Source: Added at 23 Ok Reg 2358, eff 6-25-06]

310:257-9-52. Approved sewage disposal system

Sewage shall be disposed through an approved facility that is:

- (1) A public sewage treatment plant; or
- (2) An individual sewage disposal system that is sized, constructed, maintained, and operated according to law.

[Source: Added at 23 Ok Reg 2358, eff 6-25-06 ; Amended at 28 Ok Reg 2289, eff 11-1-11]

310:257-9-53. Other liquid wastes and rainwater

Condensate drainage and other non-sewage liquids and rainwater shall be drained from point of discharge to disposal according to law.

[Source: Added at 23 Ok Reg 2358, eff 6-25-06 ; Amended at 38 Ok Reg 1947, eff 9-11-21]

310:257-9-54. Indoor storage area

If located within the food establishment, a storage area for refuse, recyclables, and returnables shall meet the requirements specified under OAC 310:257-11-1, OAC 310:257-11-3 through OAC 310:257-11-10, OAC 310:257-11-15, and OAC 310:257-11-16.

[Source: Added at 23 Ok Reg 2358, eff 6-25-06 ; Amended at 33 Ok Reg 1520, eff 9-11-16]

310:257-9-55. Outdoor storage surface

An outdoor storage surface for refuse, recyclables, and returnables shall be constructed of nonabsorbent material such as concrete or asphalt and shall be smooth, durable, and sloped to drain.

[Source: Added at 23 Ok Reg 2358, eff 6-25-06]

310:257-9-56. Outdoor enclosure

If used, an outdoor enclosure for refuse, recyclables, and returnables shall be constructed of durable and cleanable materials.

[Source: Added at 23 Ok Reg 2358, eff 6-25-06]

310:257-9-57. Receptacles

(a) Except as specified in (b) of this Section, receptacles and waste handling units for refuse, recyclables, and returnables and for use with materials containing food residue shall be durable, cleanable, insect- and rodent-resistant, leakproof, and nonabsorbent.

(b) Plastic bags and wet strength paper bags may be used to line receptacles for storage inside the food establishment, or within closed outside receptacles.

[Source: Added at 23 Ok Reg 2358, eff 6-25-06 ; Amended at 33 Ok Reg 1520, eff 9-11-16]

310:257-9-58. Receptacles in vending machines

A refuse receptacle shall not be located within a vending machine, except that a receptacle for beverage bottle crown closures may be located within a vending machine.

[Source: Added at 23 Ok Reg 2358, eff 6-25-06 ; Amended at 38 Ok Reg 1947, eff 9-11-21]

310:257-9-59. Outside receptacles

(a) Receptacles and waste handling units for refuse, recyclables, and returnables used with materials containing food residue and used outside the food establishment shall be designed and constructed to have tight-fitting lids, doors, or covers.

(b) Receptacles and waste handling units for refuse and recyclables such as an on-site compactor shall be installed so that accumulation of debris and insect and rodent attraction and harborage are minimized and effective cleaning is facilitated around and, if the unit is not installed flush with the base pad, under the unit.

(c) Equipment and receptacles for refuse, recyclables, and returnables used with materials containing food residue and designed to be used by establishment patrons shall be used as originally designed and maintained so that accumulation of debris and insect and rodent attraction are minimized.

[Source: Added at 23 Ok Reg 2358, eff 6-25-06 ; Amended at 33 Ok Reg 1520, eff 9-11-16]

310:257-9-60. Storage areas, rooms, and receptacles, capacity and availability

(a) An inside storage room and area and outside storage area and enclosure, and receptacles shall be of sufficient capacity to hold refuse, recyclables, and returnables that accumulate.

(b) A receptacle shall be provided in each area of the food establishment or premises where refuse is generated or commonly discarded, or where recyclables or returnables are placed.

(c) If disposable towels are used at handwashing lavatories, a waste receptacle shall be located at each lavatory or group of adjacent lavatories.

[Source: Added at 23 Ok Reg 2358, eff 6-25-06 ; Amended at 33 Ok Reg 1520, eff 9-11-16]

310:257-9-61. Toilet room receptacle, covered

A toilet room used by females shall be provided with a covered receptacle for sanitary napkins.

[Source: Added at 23 Ok Reg 2358, eff 6-25-06]

310:257-9-62. Cleaning implements and supplies

(a) Except as specified in (b) of this Section, suitable cleaning implements and supplies such as high pressure pumps, hot water, steam, and detergent shall be provided as necessary for effective cleaning of receptacles and waste handling units for refuse, recyclables, and returnables.

(b) If approved, off-premises-based cleaning services may be used if on-premises cleaning implements and supplies are not provided.

[Source: Added at 23 Ok Reg 2358, eff 6-25-06]

310:257-9-63. Storage areas, redeeming machines, receptacles and waste handling units, location

(a) An area designated for refuse, recyclables, returnables, and, except as specified in (b) of this Section, a redeeming machine for recyclables or returnables shall be located so that it is separate from food, equipment, utensils, linens, and single-service and single-use articles so a public health hazard or nuisance is not created.

(b) A redeeming machine may be located in the packaged food storage area or consumer area of a food establishment if food, equipment, utensils, linens, and single-service and single-use articles are not subject to contamination from the machines and a public health hazard or nuisance is not created.

(c) The location of receptacles and waste handling units for refuse, recyclables, and returnables shall not create a public health hazard or nuisance or interfere with the cleaning of adjacent space.

[Source: Added at 23 Ok Reg 2358, eff 6-25-06 ; Amended at 33 Ok Reg 1520, eff 9-11-16 ; Amended at 38 Ok Reg 1947, eff 9-11-21]

310:257-9-64. Storing refuse, recyclables, and returnables

Refuse, recyclables, and returnables shall be stored in receptacles or waste handling units so that they are inaccessible to insects and rodents.

[Source: Added at 23 Ok Reg 2358, eff 6-25-06]

310:257-9-65. Areas, enclosures, and receptacles, good repair

Storage areas, enclosures, and receptacles for refuse, recyclables, and returnables shall be maintained in good repair.

[Source: Added at 23 Ok Reg 2358, eff 6-25-06]

310:257-9-66. Outside storage prohibitions

(a) Except as specified in (b) of this Section, refuse receptacles not meeting the requirements specified under OAC 310:257-9-57(a) such as receptacles that are not rodent-resistant, unprotected plastic bags and paper bags, or baled units that contain materials with food residue shall not be stored outside.

(b) Cardboard or other packaging material that does not contain food residues and that is awaiting regularly scheduled delivery to a recycling or disposal site may be stored outside without being in a covered receptacle if it is stored so that it does not create a rodent harborage problem.

[Source: Added at 23 Ok Reg 2358, eff 6-25-06 ; Amended at 38 Ok Reg 1947, eff 9-11-21]

310:257-9-67. Covering receptacles

Receptacles and waste handling units for refuse, recyclables, and returnables shall be kept covered:

- (1) Inside the food establishment if the receptacles and units:
 - (A) Contain food residue and are not in continuous use; or
 - (B) After they are filled; and
- (2) With tight-fitting lids or doors if kept outside the food establishment.

[Source: Added at 23 Ok Reg 2358, eff 6-25-06 ; Amended at 33 Ok Reg 1520, eff 9-11-16]

310:257-9-68. Using drain plugs

Drains in receptacles and waste handling units for refuse, recyclables, and returnables shall have drain plugs in place.

[Source: Added at 23 Ok Reg 2358, eff 6-25-06]

310:257-9-69. Maintaining refuse areas and enclosures

A storage area and enclosure for refuse, recyclables, or returnables shall be maintained free of unnecessary items, as specified under OAC 310:257-11-53, and clean.

[Source: Added at 23 Ok Reg 2358, eff 6-25-06 ; Amended at 26 Ok Reg 1477, eff 6-11-09]

310:257-9-70. Cleaning receptacles

(a) Receptacles and waste handling units for refuse, recyclables, and returnables shall be thoroughly cleaned in a way that does not contaminate food, equipment, utensils, linens, or single-service and single-use articles, and waste water shall be disposed of as specified under OAC 310:257-9-49.

(b) Soiled receptacles and waste handling units for refuse, recyclables, and returnables shall be cleaned at a frequency necessary to prevent them from developing a buildup of soil or becoming attractants for insects and rodents.

[Source: Added at 23 Ok Reg 2358, eff 6-25-06 ; Amended at 38 Ok Reg 1947, eff 9-11-21]

310:257-9-71. Frequency

Refuse, recyclables, and returnables shall be removed from the premises at a frequency that will minimize the development of objectionable odors and other conditions that attract or harbor insects and rodents.

[Source: Added at 23 Ok Reg 2358, eff 6-25-06]

310:257-9-72. Receptacles or vehicles

Refuse, recyclables, and returnables shall be removed from the premises by way of:

- (1) Portable receptacles that are constructed and maintained according to law; or
- (2) A transport vehicle that is constructed, maintained, and operated according to law.

[Source: Added at 23 Ok Reg 2358, eff 6-25-06]

310:257-9-73. Community or individual facility

Solid waste not disposed of through the sewage system such as through grinders and pulpers shall be recycled or disposed of in an approved public or private community recycling or refuse facility; or solid waste shall be disposed of in an individual refuse facility such as a landfill or incinerator which is sized, constructed, maintained, and operated according to law.

[Source: Added at 23 Ok Reg 2358, eff 6-25-06]

SUBCHAPTER 11. PHYSICAL FACILITIES

310:257-11-1. Indoor areas, surface characteristics

(a) Except as specified in (b) of this Section, materials for indoor floor, wall, and ceiling surfaces under conditions of normal use shall be:

- (1) Smooth, durable, and easily cleanable for areas where food establishment operations are conducted. In food preparation and warewashing areas, the Light Reflectivity Value (LRV) of walls and ceiling surfaces shall be fifty percent (50%) or greater to aid in thorough cleaning of these areas.
- (2) Closely woven and easily cleanable carpet for carpeted areas; and

(3) Nonabsorbent for areas subject to moisture such as food preparation areas, walk-in refrigerators, warewashing areas, toilet rooms, mobile food establishment servicing areas, and areas subject to flushing or spray cleaning methods.

(b) In a temporary food establishment:

(1) If graded to drain, a floor may be concrete, machine-laid asphalt, or dirt or gravel if it is covered with mats, removable platforms, duckboards, or other suitable approved materials that are effectively treated to control dust and mud; and

(2) Walls and ceilings shall be constructed of a material that protects the interior from the weather and windblown dust and debris.

[Source: Added at 23 Ok Reg 2358, eff 6-25-06 ; Amended at 28 Ok Reg 2289, eff 11-1-11 ; Amended at 33 Ok Reg 1520, eff 9-11-16 ; Amended at 38 Ok Reg 1947, eff 9-11-21]

310:257-11-2. Outdoor areas, surface characteristics

(a) The outdoor walking and driving areas shall be surfaced with concrete, asphalt, or gravel or other materials that have been effectively treated to minimize dust, facilitate maintenance, and prevent muddy conditions.

(b) Exterior surfaces of buildings and mobile food establishments shall be of weather-resistant materials and shall comply with law.

[Source: Added at 23 Ok Reg 2358, eff 6-25-06 ; Amended at 26 Ok Reg 1477, eff 6-11-09 ; Amended at 38 Ok Reg 1947, eff 9-11-21]

310:257-11-3. Floors, walls, and ceilings

Except as allowed in OAC 310:257-11-6, and except for antislip floor coverings or applications that may be used for safety reasons, floors, floor coverings, walls, wall coverings, and ceilings shall be designed, constructed, and installed so they are smooth and easily cleanable.

[Source: Added at 23 Ok Reg 2358, eff 6-25-06 ; Amended at 28 Ok Reg 2289, eff 11-1-11 ; Amended at 38 Ok Reg 1947, eff 9-11-21]

310:257-11-4. Floors, walls, and ceilings, utility lines

(a) Utility service lines and pipes shall not be unnecessarily exposed.

(b) Exposed utility service lines and pipes shall be installed so they do not obstruct or prevent cleaning of the floors, walls, or ceilings.

(c) Exposed horizontal utility service lines and pipes shall not be installed on the floor.

[Source: Added at 23 Ok Reg 2358, eff 6-25-06 ; Amended at 38 Ok Reg 1947, eff 9-11-21]

310:257-11-5. Floor and wall junctures, coved, and enclosed or sealed

(a) In food establishments in which cleaning methods other than water flushing are used for cleaning floors, the floor and wall junctures shall be coved and closed to no larger than one (1) mm (one thirty-second 1/32

inch).

(b) The floors in food establishments in which water flush cleaning methods are used shall be provided with drains, be graded to drain, and the floor and wall junctures shall be coved and sealed.

[Source: Added at 23 Ok Reg 2358, eff 6-25-06 ; Amended at 26 Ok Reg 1477, eff 6-11-09 ; Amended at 33 Ok Reg 1520, eff 9-11-16 ; Amended at 38 Ok Reg 1947, eff 9-11-21]

310:257-11-6. Floor carpeting, restrictions and installation

(a) A floor covering such as carpeting or similar material shall not be installed as a floor covering in food preparation areas, walk-in refrigerators, warewashing areas, toilet room areas where handwashing lavatories, toilets, and urinals are located, refuse storage rooms, or other areas where the floor is subject to moisture, flushing, or spray cleaning methods.

(b) If carpeting is installed as a floor covering in areas other than those specified under (a) of this Section, it shall be:

- (1) Securely attached to the floor with a durable mastic, by using a stretch and tack method, or by another method; and
- (2) Installed tightly against the wall under the coving or installed away from the wall with a space between the carpet and the wall and with the edges of the carpet secured by metal stripping or some other means.

[Source: Added at 23 Ok Reg 2358, eff 6-25-06 ; Amended at 38 Ok Reg 1947, eff 9-11-21]

310:257-11-7. Floor covering, mats and duckboards

Mats and duckboards shall be designed to be removable and easily cleanable.

[Source: Added at 23 Ok Reg 2358, eff 6-25-06]

310:257-11-8. Wall and ceiling coverings and coatings

(a) Wall and ceiling covering materials shall be attached so that they are easily cleanable.

(b) Except in areas used only for dry storage, concrete, porous blocks, or bricks used for indoor wall construction shall be finished and sealed to provide a smooth, nonabsorbent, easily cleanable surface.

[Source: Added at 23 Ok Reg 2358, eff 6-25-06]

310:257-11-9. Walls and ceilings, attachments

(a) Except as specified in (b) of this Section, attachments to walls and ceilings such as light fixtures, mechanical room ventilation system components, vent covers, wall mounted fans, decorative items, and other attachments shall be easily cleanable.

(b) In a consumer area, wall and ceiling surfaces and decorative items and attachments that are provided for ambiance need not meet this requirement if they are kept clean.

[Source: Added at 23 Ok Reg 2358, eff 6-25-06]

310:257-11-10. Walls and ceilings, studs, joists, and rafters

Studs, joists, and rafters shall not be exposed in areas subject to moisture. This requirement does not apply to temporary food establishments.

[Source: Added at 23 Ok Reg 2358, eff 6-25-06 ; Amended at 33 Ok Reg 1520, eff 9-11-16 ; Amended at 38 Ok Reg 1947, eff 9-11-21]

310:257-11-11. Light bulbs, protective shielding

(a) Except as specified in (b) of this Section, light bulbs shall be shielded, coated, or otherwise shatter-resistant in areas where there is exposed food; clean equipment, utensils, and linens; or unwrapped single-service and single-use articles.

(b) Shielded, coated, or otherwise shatter-resistant bulbs need not be used in areas used only for storing food in unopened packages, if:

- (1) The integrity of the packages can not be affected by broken glass falling onto them; and
- (2) The packages are capable of being cleaned of debris from broken bulbs before the packages are opened.

(c) An infrared or other heat lamp shall be protected against breakage by a shield surrounding and extending beyond the bulb so that only the face of the bulb is exposed.

[Source: Added at 23 Ok Reg 2358, eff 6-25-06]

310:257-11-12. Heating, ventilating, air conditioning system Vents

Heating, ventilating, and air conditioning systems shall be designed and installed so that make-up air intake and exhaust vents do not cause contamination of food, food-contact surfaces, equipment, or utensils.

[Source: Added at 23 Ok Reg 2358, eff 6-25-06]

310:257-11-13. Insect control devices, design and installation

(a) Insect control devices that are used to electrocute or stun flying insects shall be designed to retain the insect within the device.

(b) Insect control devices shall be installed so that:

- (1) The devices are not located over a food preparation area; and
- (2) Dead insects and insect fragments are prevented from being impelled onto or falling on exposed food; clean equipment, utensils, linens; and unwrapped single-service and single-use articles.

[Source: Added at 23 Ok Reg 2358, eff 6-25-06 ; Amended at 38 Ok Reg 1947, eff 9-11-21]

310:257-11-14. Toilet rooms, enclosed

A toilet room shall be completely enclosed and provided with a tight-fitting and self-closing door, except for the following situations:

- (1) when a toilet room is located outside of the food establishment and does not open directly into the food establishment, such as a toilet room provided by the management of a shopping mall; or
- (2) when a toilet room that utilizes an offset entrance maze:
 - (A) protects exposed food, clean equipment, utensils, linens; and unwrapped single-service and single-use articles to contamination, and
 - (B) offensive odors are controlled.

[Source: Added at 23 Ok Reg 2358, eff 6-25-06 ; Amended at 28 Ok Reg 2289, eff 11-1-11 ; Amended at 33 Ok Reg 1520, eff 9-11-16 ; Amended at 38 Ok Reg 1947, eff 9-11-21]

310:257-11-15. Outer openings, protected

(a) Except as specified in (b), (c), (d) and (e) of this Section, outer openings of a food establishment shall be protected against the entry of insects and rodents by:

- (1) Filling or closing holes and other gaps along floors, walls, and ceilings;
- (2) Closed, tight-fitting windows; and
- (3) Solid, self-closing, tight-fitting doors.

(b) Paragraph (a) of this Section does not apply if a food establishment opens into a larger structure, such as a mall, airport, or office building, or into an attached structure, such as a porch, and the outer openings from the larger or attached structure are protected against the entry of insects and rodents.

(c) Exterior doors used as exits need not be self-closing if they are:

- (1) Solid and tight-fitting;
- (2) Designated for use only when an emergency exists, by the fire protection authority that has jurisdiction over the food establishment; and
- (3) Limited-use so they are not used for entrance or exit from the building for purposes other than the designated emergency exit use.

(d) Except as specified in (b) and (e) of this Section, if the windows or doors of a food establishment, or of a larger structure within which a food establishment is located, are kept open for ventilation or other purposes or a temporary food establishment is not provided with windows and doors as specified under (a) of this Section, the openings shall be protected against the entry of insects and rodents by:

- (1) 16 mesh to 25.4mm (16 mesh to 1 inch) screens; or
- (2) Properly installed air curtains which adequately exclude flying insects; or
- (3) Other effective means.

(e) Paragraph (d) of this Section does not apply if flying insects and other pests are absent due to the location of the establishment, the weather, or other limiting conditions.

[Source: Added at 23 Ok Reg 2358, eff 6-25-06 ; Amended at 33 Ok Reg 1520, eff 9-11-16 ; Amended at 38 Ok Reg 1947, eff 9-11-21]

310:257-11-16. Exterior walls and roofs, protective barrier

Perimeter walls and roofs of a food establishment shall effectively protect the establishment from the weather and the entry of insects, rodents, and other animals.

[Source: Added at 23 Ok Reg 2358, eff 6-25-06 ; Amended at 33 Ok Reg 1520, eff 9-11-16]

310:257-11-17. Outdoor food vending areas, overhead protection

Except for machines that vend canned beverages, if located outside, a machine used to vend food shall be provided with overhead protection.

[Source: Added at 23 Ok Reg 2358, eff 6-25-06 ; Amended at 28 Ok Reg 2289, eff 11-1-11]

310:257-11-18. Outdoor servicing areas, overhead protection

Servicing areas shall be provided with overhead protection except that areas used only for the loading of water or the discharge of sewage and other liquid waste, through the use of a closed system of hoses, need not be provided with overhead protection.

[Source: Added at 23 Ok Reg 2358, eff 6-25-06]

310:257-11-19. Outdoor walking and driving surfaces, graded to drain

Exterior walking and driving surfaces shall be graded to drain.

[Source: Added at 23 Ok Reg 2358, eff 6-25-06]

310:257-11-20. Outdoor refuse areas graded to drain

Outdoor refuse areas shall be constructed in accordance with law and shall be graded to drain to collect and dispose of liquid waste that result from the refuse and from cleaning the area and waste receptacles.

[Source: Added at 23 Ok Reg 2358, eff 6-25-06 ; Amended at 38 Ok Reg 1947, eff 9-11-21]

310:257-11-21. Private homes and living or sleeping quarters, use prohibition

A private home, a room used as living or sleeping quarters, or an area directly opening into a room used as living or sleeping quarters shall not be used for conducting food establishment operations.

[Source: Added at 23 Ok Reg 2358, eff 6-25-06 ; Amended at 33 Ok Reg 1520, eff 9-11-16 ; Amended at 38 Ok Reg 1947, eff 9-11-21]

310:257-11-22. Living or sleeping quarters, separation

Living or sleeping quarters located on the premises of a food establishment such as those provided for lodging registration clerks or resident managers shall be separated from rooms and areas used for food establishment operations by complete partitioning and solid self-closing doors.

310:257-11-25. Hand drying provision

Each handwashing sink or group of adjacent sinks shall be provided with at least one of the following:

- (1) Individual, disposable towels;
- (2) A continuous towel system that supplies the user with a clean towel;
- (3) A heated-air hand drying device; or
- (4) A hand drying device that employs an air-knife system that delivers high velocity, pressurized air at ambient temperatures.

[Source: Added at 23 Ok Reg 2358, eff 6-25-06 ; Amended at 28 Ok Reg 2289, eff 11-1-11 ; Amended at 38 Ok Reg 1947, eff 9-11-21]

310:257-11-26. Handwashing aids and devices, use restrictions

A sink used for food preparation or utensil washing, or a service sink or curbed cleaning facility used for the disposal of mop water or similar wastes, shall not be provided with the handwashing aids and devices required for a handwashing sink as specified under OAC 310:257-11-24 and OAC 310:257-11-25 and OAC 310:257-9-60(c).

310:257-11-30. Toilet tissue, availability

A supply of toilet tissue shall be available at each toilet.

[Source: Added at 23 Ok Reg 2358, eff 6-25-06]

310:257-11-31. Lighting, intensity

The light intensity shall be:

- (1) At least 108 lux (10 foot candles) at a distance of 75 cm (30 inches) above the floor, in walk-in refrigeration units and dry food storage areas and in other areas and rooms during periods of cleaning;
- (2) At least 215 lux (20 foot candles):
 - (A) At a surface where food is provided for consumer self-service such as buffets and salad bars or where fresh produce or packaged foods are sold or offered for consumption;
 - (B) Inside equipment such as reach-in and under-counter refrigerators;
 - (C) At a distance of 75 cm (30 inches) above the floor in areas used for handwashing, warewashing, and equipment and utensil storage, and in toilet rooms; and
- (3) At least 540 lux (50 foot candles) at a surface where a food employee is working with food or working with utensils or equipment such as knives, slicers, grinders, or saws where employee safety is a factor.

310:257-11-38. Distressed merchandise, segregation and location

Products that are held by the license holder for credit, redemption, or return to the distributor, such as damaged, spoiled, or recalled products, shall be segregated and held in designated areas that are separated from food, equipment, utensils, linens, and single-service and single-use articles.

[Source: Added at 23 Ok Reg 2358, eff 6-25-06]

310:257-11-39. Receptacles, waste handling units, and designated storage areas [REVOKED]

[Source: Added at 23 Ok Reg 2358, eff 6-25-06 ; Revoked at 38 Ok Reg 1947, eff 9-11-21]

310:257-11-40. Premises, structures, attachments, and fixtures, repairing

The physical facilities shall be maintained in good repair.

[Source: Added at 23 Ok Reg 2358, eff 6-25-06]

310:257-11-41. Cleaning, frequency and restrictions

(a) The physical facilities shall be cleaned as often as necessary to keep them clean.

(b) Cleaning shall be done during periods when the least amount of food is exposed such as after closing. This requirement does not apply to cleaning that is necessary due to a spill or other accident.

(c) Mobile pushcarts and mobile food establishments shall return daily to the commissary for servicing and cleaning, if not associated with an event or celebration.

[Source: Added at 23 Ok Reg 2358, eff 6-25-06 ; Amended at 28 Ok Reg 2289, eff 11-1-11]

310:257-11-42. Cleaning floors, dustless methods

(a) Except as specified in (b) of this Section, only dustless methods of cleaning shall be used, such as wet cleaning, vacuum cleaning, mopping with treated dust mops, or sweeping using a broom and dust-arresting compounds.

(b) Spills, drippage, or vomit and diarrheal events on floors that occur between normal floor cleaning times may be cleaned:

(1) Without the use of dust-arresting compounds; and

(2) In the case of liquid spills or drippage, with the use of a small amount of absorbent compound such as sawdust or diatomaceous earth applied immediately before spot cleaning.

[Source: Added at 23 Ok Reg 2358, eff 6-25-06 ; Amended at 38 Ok Reg 1947, eff 9-11-21]

310:257-11-43. Cleaning ventilation systems, nuisance and discharge prohibition

(a) Intake and exhaust air ducts shall be cleaned and filters changed so they are not a source of contamination by dust, dirt, and other materials.

(b) If vented to the outside, ventilation systems may not create a public health hazard or nuisance or unlawful discharge.

[Source: Added at 23 Ok Reg 2358, eff 6-25-06]

310:257-11-44. Cleaning maintenance tools, preventing contamination

Food preparation sinks, handwashing lavatories, and warewashing equipment shall not be used for the cleaning of maintenance tools, the preparation or holding of maintenance materials, or the disposal of mop water and similar liquid wastes.

[Source: Added at 23 Ok Reg 2358, eff 6-25-06 ; Amended at 38 Ok Reg 1947, eff 9-11-21]

310:257-11-45. Drying mops

After use, mops shall be placed in a position that allows them to air-dry without soiling walls, equipment, or supplies.

[Source: Added at 23 Ok Reg 2358, eff 6-25-06]

310:257-11-46. Absorbent materials on floors, use limitation

Except as specified in OAC 310:257-11-42(b), sawdust, wood shavings, granular salt, baked clay, diatomaceous earth, or similar materials may not be used on floors.

[Source: Added at 23 Ok Reg 2358, eff 6-25-06]

310:257-11-47. Cleaning of plumbing fixtures

Plumbing fixtures such as handwashing sinks, toilets, and urinals shall be cleaned as often as necessary to keep them clean.

[Source: Added at 23 Ok Reg 2358, eff 6-25-06 ; Amended at 28 Ok Reg 2289, eff 11-1-11]

310:257-11-48. Closing toilet room doors

Toilet room doors as specified under OAC 310:257-11-14 shall be kept closed except during cleaning and maintenance operations.

[Source: Added at 23 Ok Reg 2358, eff 6-25-06]

310:257-11-49. Using dressing rooms and lockers

(a) Dressing rooms shall be used by employees if the employees regularly change their clothes in the establishment.

(b) Lockers or other suitable facilities shall be used for the orderly storage of employee clothing and other possessions.

[Source: Added at 23 Ok Reg 2358, eff 6-25-06]

310:257-11-50. Controlling pests

The premises shall be maintained free of insects, rodents, and other pests. Insects, rodents, and other pests shall be controlled to eliminate their presence on the premises by:

- (1) Routinely inspecting incoming shipments of food and supplies;
- (2) Routinely inspecting the premises for evidence of pests;
- (3) Using methods, if pests are found, such as trapping devices or other means of pest control as specified under OAC 310:257-13-5, OAC 310:257-13-13, and OAC 310:257-13-14 and
- (4) Eliminating harborage conditions.

[Source: Added at 23 Ok Reg 2358, eff 6-25-06 ; Amended at 38 Ok Reg 1947, eff 9-11-21]

310:257-11-51. Removing dead or trapped birds, insects, rodents, and other pests

Dead or trapped birds, insects, rodents, and other pests shall be removed from control devices and the premises at a frequency that prevents their accumulation, decomposition, or the attraction of pests.

[Source: Added at 23 Ok Reg 2358, eff 6-25-06]

310:257-11-52. Storing maintenance tools

Maintenance tools such as brooms, mops, vacuum cleaners, and similar items shall be:

- (1) Stored so they do not contaminate food, equipment, utensils, linens, and single-service and single-use articles; and
- (2) Stored in an orderly manner that facilitates cleaning the area used for storing the maintenance tools.

[Source: Added at 23 Ok Reg 2358, eff 6-25-06]

310:257-11-53. Maintaining premises, unnecessary items and litter

The premises shall be free of:

- (1) Items that are unnecessary to the operation or maintenance of the establishment such as equipment that is nonfunctional or no longer used; and
- (2) Litter.

[Source: Added at 23 Ok Reg 2358, eff 6-25-06]

310:257-11-54. Prohibiting animals

(a) Except as specified in (b), (c) and (d) of this Section, live animals shall not be allowed on the premises of a food establishment.

(b) Live animals may be allowed in the following situations if the contamination of food; clean equipment, utensils, and linens; and unwrapped single-service and single-use articles cannot result:

- (1) Edible fish or decorative fish in aquariums, shellfish or crustacea on ice or under refrigeration, and shellfish and crustacea in display tank systems;
- (2) Patrol dogs accompanying police or security officers in offices and dining, sales, and storage areas, and sentry dogs running loose in outside fenced areas;
- (3) In areas that are not used for food preparation and that are usually open for customers, such as dining and sales areas, service animals that are controlled by the disabled employee or person, if a health or safety hazard will not result from the presence or activities of the service animal;
- (4) Pets in the common dining areas of institutional care facilities such as nursing homes, assisted living facilities, group homes, or residential care facilities at times other than during meals if:
 - (A) Effective partitioning and self-closing doors separate the common dining areas from food storage or food preparation areas,
 - (B) Condiments, equipment, and utensils are stored in enclosed cabinets or removed from the common dining areas when pets are present, and
 - (C) Dining areas including tables, countertops, and similar surfaces are effectively cleaned before the next meal service; and
- (5) In areas that are not used for food preparation, storage, sales, display, or dining, in which there are caged animals or animals that are similarly confined, such as in a variety store that sells pets or a tourist park that displays animals;

(c) Live or dead fish bait may be stored if contamination of food; clean equipment, utensils, and linens; and unwrapped single-service and single-use articles cannot result;

(d) Dogs and cats may be allowed in outdoor dining areas, provided the dog or cat is controlled by the owner or handler of the animal and the following conditions are met:

- (1) A separate entrance/exit is present where pets do not enter through the food establishment to reach the outdoor dining area;
- (2) No food preparation shall be allowed in the outdoor dining area, including the mixing of drinks and ice;
- (3) Customer multi-use or reusable utensils such as plates, silverware, glasses, and bowls shall not be stored, displayed, or pre-set at the outdoor dining area;
- (4) Containers used to provide food and water to the animal by the food establishment shall only be distributed in single-use, disposable containers;
- (5) Employees shall be prohibited from having direct contact with the animals;
- (6) The outdoor dining area shall be cleanable, durable and constructed of impervious materials;
- (7) The outdoor dining areas shall be maintained to remove and eliminate any animal excrement;
- (8) In cases where animal excrement or other animal fluids (urine, saliva, vomit) are deposited, an employee shall immediately clean and sanitize the affected areas; and
- (9) The outdoor dining area shall not be fully enclosed. Any fully enclosed dining area shall be considered a part of the interior of the facility.

[Source: Added at 23 Ok Reg 2358, eff 6-25-06 ; Amended at 33 Ok Reg 1520, eff 9-11-16 ; Amended at 38 Ok Reg 1947, eff 9-11-21]

SUBCHAPTER 13. POISONOUS OR TOXIC MATERIALS

310:257-13-1. Identifying information, prominence

Containers of poisonous or toxic materials, first aid supplies, medicine, and personal care items shall bear a legible manufacturer's label.

[Source: Added at 23 Ok Reg 2358, eff 6-25-06 ; Amended at 38 Ok Reg 1947, eff 9-11-21]

310:257-13-2. Common name

Working containers used for storing poisonous or toxic materials such as cleaners and sanitizers taken from bulk supplies shall be clearly and individually identified with the common name of the material.

[Source: Added at 23 Ok Reg 2358, eff 6-25-06]

310:257-13-3. Storage separation

Poisonous or toxic materials shall be stored so they cannot contaminate food, equipment, utensils, linens, and single-service and single-use articles by:

- (1) Separating the poisonous or toxic materials by spacing or partitioning; and

(2) Locating the poisonous or toxic materials in an area that is not above food, equipment, utensils, linens, and single-service or single-use articles. This paragraph does not apply to equipment and utensil cleaners and sanitizers that are stored in warewashing areas for availability and convenience if the materials are stored to prevent contamination of food, equipment, utensils, linens, and single-service and single-use articles.

[Source: Added at 23 Ok Reg 2358, eff 6-25-06]

310:257-13-4. Presence and use, restriction

(a) Only those poisonous or toxic materials that are required for the operation and maintenance of a food establishment and the immediate premise, such as for the cleaning and sanitizing of equipment and utensils and the control of insects and rodents, shall be allowed in a food establishment.

(b) Paragraph (a) of this Section does not apply to packaged poisonous or toxic materials that are for retail sale.

[Source: Added at 23 Ok Reg 2358, eff 6-25-06 ; Amended at 33 Ok Reg 1520, eff 9-11-16 ; Amended at 38 Ok Reg 1947, eff 9-11-21]

310:257-13-5. Conditions of use

Poisonous or toxic materials shall be:

(1) Used according to:

- (A) Law and this Chapter,
- (B) Manufacturer's use directions included in labeling, and, for a pesticide, manufacturer's label instructions that state that use is allowed in a food establishment,
- (C) The conditions of certification, if certification is required, for use of the pest control materials, and
- (D) Additional conditions that may be established by the Department; and

(2) Applied so that:

- (A) A hazard to employees or other persons is not constituted, and
- (B) Contamination including toxic residues due to drip, drain, fog, splash or spray on food, equipment, utensils, linens, and single-service and single-use articles is prevented, and for a restricted use pesticide, this is achieved by:
 - (i) Removing the items,
 - (ii) Covering the items with impermeable covers, or
 - (iii) Taking other appropriate preventive actions, and
 - (iv) Cleaning and sanitizing equipment and utensils after the application.

(3) A restricted use pesticide shall be applied only by an applicator certified as defined in 7 USC Section 136(e) Certified Applicator, of the Federal Insecticide, Fungicide and Rodenticide Act, or a person under the direct supervision of a certified

applicator.

310:257-13-6. Poisonous or toxic material containers

A container previously used to store poisonous or toxic materials shall not be used to store, transport, or dispense food.

[Source: Added at 23 Ok Reg 2358, eff 6-25-06 ; Amended at 38 Ok Reg 1947, eff 9-11-21]

310:257-13-7. Sanitizers, criteria

Chemical sanitizers, including chemical sanitizing solutions generated on-site, and other chemical antimicrobials applied to food-contact surfaces shall:

- (1) Meet the requirements specified in 40 CFR Section 180.940 Tolerance exemptions for active and inert ingredients for use in antimicrobial formulations (Food-contact surface sanitizing solutions), or
- (2) Meet the requirements as specified in 40 CFR Section 180.2020 Pesticide Chemicals Not Requiring a Tolerance or Exemption from Tolerance-Non-food determinations.

[Source: Added at 23 Ok Reg 2358, eff 6-25-06 ; Amended at 33 Ok Reg 1520, eff 9-11-16]

310:257-13-8. Chemicals for washing, treatment, storage, and processing of fruits and vegetables, criteria

Chemicals, including those generated on-site, used to wash or peel raw, whole, uncut fruits and vegetables or used in the treatment, storage, and processing of fruits and vegetables shall:

- (1) Be an approved food additive listed for this intended use in 21 CFR, Part 173, or
- (2) Be generally recognized as safe (GRAS) for this intended use, or
- (3) Be the subject of an effective food contact notification for this intended use (only effective for the manufacturer or supplier identified in the notification), and
- (4) Meet the requirements in 40 CFR, Part 156 Labeling Requirements for Pesticide and Devices.

[Source: Added at 23 Ok Reg 2358, eff 6-25-06 ; Amended at 28 Ok Reg 2289, eff 11-1-11 ; Amended at 33 Ok Reg 1520, eff 9-11-16 ; Amended at 38 Ok Reg 1947, eff 9-11-21]

310:257-13-9. Boiler water additives, criteria

Chemicals used as boiler water additives shall meet the requirements specified in 21 CFR 173.310 Boiler Water Additives.

[Source: Added at 23 Ok Reg 2358, eff 6-25-06]

310:257-13-10. Drying agents, criteria

Drying agents used in conjunction with sanitization shall:

(1) Contain only components that are listed as one of the following:

- (A) Generally recognized as safe for use in food as specified in 21 CFR, Part 182 - Substances Generally Recognized as Safe, or 21 CFR, Part 184 - Direct Food Substances Affirmed as Generally Recognized as Safe,
- (B) Generally recognized as safe for the intended use as specified in 21 CFR, Part 186 - Indirect Food Substances Affirmed as Generally Recognized as Safe,
- (C) Generally recognized as safe for the intended use as determined by experts qualified in scientific training and experience to evaluate the safety of substances added, directly or indirectly, to food as described in 21 CFR Section 170.30 Eligibility for classification as generally recognized as safe (GRAS),
- (D) Specifically regulated as an indirect food additive for use as a drying agent as specified in 21 CFR Parts 174-178,
- (E) Approved for use as a drying agent under the threshold of regulation process established by 21 CFR Section 170.39 Threshold of regulation for substances used in food-contact articles,
- (F) Subject of an effective Food Contact Notification as described in the 21 USC Section 348, or
- (G) Approved for use as a drying agent under a prior sanction as described in 21 USC §301; and

(2) When sanitization is with chemicals, the approval required as specified under (1)(E) or (1)(G) of this Section or the regulation as an indirect food additive required as specified under (1)(D) of this Section, shall be specifically for use with chemical sanitizing solutions.

[Source: Added at 23 Ok Reg 2358, eff 6-25-06 ; Amended at 33 Ok Reg 1520, eff 9-11-16 ; Amended at 38 Ok Reg 1947, eff 9-11-21]

310:257-13-11. Incidental food contact, criteria

Lubricants shall meet the requirements specified in 21 CFR 178.3570 Lubricants with incidental food contact, if they are used on food-contact surfaces, on bearings and gears located on or within food-contact surfaces, or on bearings and gears that are located so that lubricants may leak, drip, or be forced into food or onto food-contact surfaces.

[Source: Added at 23 Ok Reg 2358, eff 6-25-06]

310:257-13-12. Restricted use pesticides, criteria

Restricted use pesticides specified under OAC 310:257-13-5 (3) shall meet the requirements specified in 40 CFR 152 Subpart I - Classification of Pesticides.

[Source: Added at 23 Ok Reg 2358, eff 6-25-06]

310:257-13-13. Rodent bait stations

Rodent bait shall be contained in a covered, tamper-resistant bait station.

[Source: Added at 23 Ok Reg 2358, eff 6-25-06]

310:257-13-14. Tracking powders, pest control and monitoring

(a) Except as specified in (b) of this Section, a tracking powder pesticide shall not be used in a food establishment.

(b) If used, a nontoxic tracking powder such as talcum or flour shall not contaminate food, equipment, utensils, linens, and single-service and single-use articles.

[Source: Added at 23 Ok Reg 2358, eff 6-25-06 ; Amended at 28 Ok Reg 2289, eff 11-1-11 ; Amended at 33 Ok Reg 1520, eff 9-11-16 ; Amended at 38 Ok Reg 1947, eff 9-11-21]

310:257-13-15. Restriction and storage

(a) Except for medicines that are stored or displayed for retail sale, only those medicines that are necessary for the health of employees shall be allowed in a food establishment.

(b) Medicines that are in a food establishment for the employees' use shall be labeled as specified under OAC 310:257-13-1 and located to prevent the contamination of food, equipment, utensils, linens, and single-service and single-use articles.

[Source: Added at 23 Ok Reg 2358, eff 6-25-06 ; Amended at 28 Ok Reg 2289, eff 11-1-11 ; Amended at 33 Ok Reg 1520, eff 9-11-16]

310:257-13-16. Refrigerated medicines, storage

Medicines belonging to employees or to children in a school setting that require refrigeration and are stored in a food refrigerator shall be:

- (1) Stored in a package or container and kept inside a covered, leak-proof container that is identified as a container for the storage of medicines; and
- (2) Located so they are inaccessible to children.

[Source: Added at 23 Ok Reg 2358, eff 6-25-06 ; Amended at 38 Ok Reg 1947, eff 9-11-21]

310:257-13-17. Storage

First aid supplies that are in a food establishment for the employees' use shall be:

- (1) Labeled as specified under OAC 310:257-13-1; and
- (2) Stored in a kit or a container that is located to prevent the contamination of food, equipment, utensils, and linens, and single-service and single-use articles.

[Source: Added at 23 Ok Reg 2358, eff 6-25-06 ; Amended at 33 Ok Reg 1520, eff 9-11-16]

310:257-13-18. Storage

Except as specified under OAC 310:257-13-16 and OAC 310:257-13-17, employees shall store their personal care items in facilities as specified under OAC 310:257-11-33(b).

[Source: Added at 23 Ok Reg 2358, eff 6-25-06]

310:257-13-19. Separation

Poisonous or toxic materials shall be stored and displayed for retail sale so they can not contaminate food, equipment, utensils, linens, and single-service and single-use articles by:

- (1) Separating the poisonous or toxic materials by spacing or partitioning; and
- (2) Locating the poisonous or toxic materials in an area that is not above food, equipment, utensils, linens, and single-service or single-use articles.

[Source: Added at 23 Ok Reg 2358, eff 6-25-06]

SUBCHAPTER 15. COMPLIANCE AND ENFORCEMENT

310:257-15-1. Public health protection [REVOKED]

[Source: Added at 23 Ok Reg 2358, eff 6-25-06 ; Revoked at 38 Ok Reg 1947, eff 9-11-21]

310:257-15-2. Preventing health hazards, provision for conditions not addressed [REVOKED]

[Source: Added at 23 Ok Reg 2358, eff 6-25-06 ; Amended at 33 Ok Reg 1520, eff 9-11-16 ; Revoked at 38 Ok Reg 1947, eff 9-11-21]

310:257-15-2.1. Public health protection

- (a) The regulatory authority shall apply this Chapter to promote its underlying purpose of safeguarding public health and ensuring that food is safe, unadulterated, and honestly presented when offered to the consumer.
- (b) If necessary to protect against public health hazards or nuisances, the Department may impose specific requirements in addition to the requirements contained in this Chapter that are authorized by law.
- (c) The regulatory authority shall document the conditions that necessitate the imposition of additional requirements and the underlying public health rationale. The documentation shall be provided to the license applicant or license holder and a copy shall be maintained in the Department file for the food establishment.

[Source: Added at 38 Ok Reg 1947, eff 9-11-21]

310:257-15-3. Modifications and waivers [REVOKED]

[Source: Added at 23 Ok Reg 2358, eff 6-25-06 ; Amended at 33 Ok Reg 1520, eff 9-11-16 ; Revoked at 38 Ok Reg 1947, eff 9-11-21]

310:257-15-3.1. Variances and waivers

(a) Whenever the Department adopts new rules or amends existing language in this Chapter, the owner of a food establishment may request that a waiver be granted on any nonconforming use that may then exist, on or before the effective date of the rule change, at the license holder's place of operation, based on the following considerations:

- (1) Whether the facilities or equipment are in good repair and capable of being maintained in a sanitary condition;
- (2) Whether food-contact surfaces comply with OAC 310:257-7-1 through OAC 310:257-7-13;
- (3) Whether the capacities of cooling, heating, and holding equipment are sufficient to comply with OAC 310:257-7-50; and
- (4) The existence of a documented agreement with the license holder that the facilities or equipment will be replaced as specified under OAC 310:257-15-20(6).

(b) Waivers or variances requested pursuant to this Subchapter are subject to approval by the Department. A license holder must submit a written application on a form provided by the Department. Any request shall be deemed denied unless the license holder subsequently receives notice of approval from the Department.

(c) If the license holder replaces the equipment or reconstructs the portion of the facility that is the subject of the waiver, the new equipment or construction must conform to the rules of this Chapter.

(d) Waivers or variances may be reviewed and reconsidered for each successive licensing period.

(e) Waivers or variances are not considered to be part of the license and may be revoked at any time, for any reason, by the Department. The licensee is not entitled to a hearing prior to revocation, but will be provided written notice of any revocation along with instructions that the licensee must come into compliance by a certain date.

[Source: Added at 38 Ok Reg 1947, eff 9-11-21]

310:257-15-4. Documentation of proposed waiver or variance and justification

(a) Waiver or variance requests are subject to review by the Department. During this process, the regulatory authority may confirm the following in writing:

- (1) The nature and extent of any nonconforming use;
 - (2) That the equipment or portion of the facility in question is in an operable and sanitary condition, and can be maintained in satisfactory condition; and
 - (3) That no public health threats or food-related illness will result if the waiver or variance is granted.
- (b) If a HACCP plan is required, as specified in OAC 257-15-8, the license holder must supply the regulatory authority with the information specified in OAC 310:257-15-9 as it is relevant to the variance requested.

[Source: Added at 23 Ok Reg 2358, eff 6-25-06 ; Amended at 26 Ok Reg 1477, eff 6-11-09 ; Amended at 38 Ok Reg 1947, eff 9-11-21]

310:257-15-5. Conformance with approved procedures

If the Department grants a variance as specified in OAC 310:257-15-3.1, or a HACCP plan is otherwise required as specified under OAC 310:257-15-8, the license holder shall:

- (1) Comply with the HACCP plans and procedures that are submitted as specified under OAC 310:257-15-9 and approved as a basis for the variance, and
- (2) Maintain and provide to the regulatory authority, upon request, records specified under OAC 310:257-15-9(5) and 6(B) that demonstrate that the following are routinely employed:
 - (A) Procedures for monitoring critical control points,
 - (B) Monitoring of the critical control points,
 - (C) Verification of the effectiveness of an operation or process, and
 - (D) Necessary corrective actions if there is failure at a critical control point.

[Source: Added at 23 Ok Reg 2358, eff 6-25-06 ; Amended at 38 Ok Reg 1947, eff 9-11-21]

310:257-15-6. When Plans are required

A license applicant or license holder shall submit to the Department, payment of plan review fees and properly prepared plans and specifications for review and approval before:

- (1) The construction of a food establishment;
- (2) The conversion of an existing structure for use as a food establishment;
- (3) The remodeling of a food establishment or a change of type of food establishment or food operation ; or
- (4) If the regulatory authority determines that plans and specifications are necessary to ensure compliance with this Chapter.

[Source: Added at 23 Ok Reg 2358, eff 6-25-06 ; Amended at 33 Ok Reg 1520, eff 9-11-16 ; Amended at 38 Ok Reg 1947, eff 9-11-21]

310:257-15-7. Contents of the Plans and Specifications

The plans and specifications for a food establishment shall include:

- (1) Intended menu;
- (2) Anticipated volume of food to be stored, prepared, and sold or served;
- (3) Proposed equipment types, manufacturer and model numbers (if available);
- (4) Proposed floor plan;
- (5) Evidence that standard operating procedures that ensure compliance with the requirements of this Chapter are developed or are being developed; and
- (6) Other information that may be required by the regulatory authority for the proper review of the proposed construction, conversion or modification, and procedures for operating a food establishment.

[Source: Added at 23 Ok Reg 2358, eff 6-25-06 ; Amended at 28 Ok Reg 2289, eff 11-1-11 ; Amended at 33 Ok Reg 1520, eff 9-11-16 ; Amended at 38 Ok Reg 1947, eff 9-11-21]

310:257-15-8. When a HACCP plan is required

(a) Before engaging in an activity that requires a HACCP plan, a license applicant or holder shall submit to the Department for approval a properly prepared HACCP plan as specified under OAC 310:257-15-9 and the relevant provisions of this Chapter if:

- (1) Submission of a HACCP plan is required;
- (2) A variance is required as specified under OAC 310:257-5-63, OAC 310:257-7-35(b), or OAC 310:257-5-46 (d)(4); or
- (3) The Department determines that a food preparation or processing method requires a variance based on a plan submittal specified under OAC 310:257-15-7, an inspectional finding, or a variance request.

(b) Before engaging in reduced oxygen packaging without a variance as specified under OAC 310:257-5-64, a license applicant or license holder shall submit a properly prepared HACCP plan to the Department.

[Source: Added at 23 Ok Reg 2358, eff 6-25-06 ; Amended at 26 Ok Reg 1477, eff 6-11-09 ; Amended at 38 Ok Reg 1947, eff 9-11-21]

310:257-15-9. Contents of a HACCP plan

For a food establishment that is required under OAC 310:257-15-8 to have a HACCP plan, the plan and specifications shall indicate:

- (1) The name of the license applicant or holder, the food establishment address, and contact information.
- (2) A categorization of the types of Time/Temperature Control for Safety foods that are to be controlled under the HACCP plan;
- (3) A flow diagram or chart for each specific food or category type that identifies:

- (A) Each step in the process
 - (B) The hazards and controls for each step in the flow diagram or chart;
 - (C) The steps that are CCPs;
 - (D) The ingredients, materials, and equipment used in the preparation of that food; and
 - (E) Formulations or recipes that delineate methods and procedural control measures that address the food safety concerns involved.
- (4) Food employee and supervisory training plan that addresses the food safety issues of concern;
- (5) A CCP summary for each specific food or category type that clearly identifies:
- (A) Each CCP,
 - (B) The critical limits for each CCP,
 - (C) The method and frequency for monitoring and controlling each CCP by the food employee designated by the person in charge,
 - (D) The method and frequency for the person in charge to routinely verify that the food employee is following standard operating procedures and monitoring CCPs,
 - (E) Action to be taken by the person in charge if the critical limits for each CCP are not met, and
 - (F) Records to be maintained by the person in charge to demonstrate that the HACCP plan is properly operated and managed; and
- (6) Supporting documents such as:
- (A) Copies of blank records forms that are necessary to implement the HACCP plan;
 - (B) Additional scientific data or other information, as required by the Department, supporting the determination that food safety is not compromised by the proposal.
- (7) Any other information required by the Department.

[Source: Added at 23 Ok Reg 2358, eff 6-25-06 ; Amended at 33 Ok Reg 1520, eff 9-11-16 ; Amended at 38 Ok Reg 1947, eff 9-11-21]

310:257-15-10. Trade secrets

The regulatory authority shall treat as confidential information that meets the criteria specified in law for a trade secret and is contained on inspection reports and any plans and specifications submitted.

[Source: Added at 23 Ok Reg 2358, eff 6-25-06 ; Amended at 38 Ok Reg 1947, eff 9-11-21]

310:257-15-11. Preoperational inspections

The regulatory authority may conduct one or more preoperational inspections to verify that the food establishment is constructed and equipped in accordance with the approved plans and approved modifications of those plans, has established standard operating procedures as specified under OAC 310:257-15-7(5), and is in compliance with law and this Chapter.

[Source: Added at 23 Ok Reg 2358, eff 6-25-06 ; Amended at 33 Ok Reg 1520, eff 9-11-16 ; Amended at 38 Ok Reg 1947, eff 9-11-21]

310:257-15-12. Prerequisite for operation

A person may not operate a food establishment without a valid license to operate issued by the Commissioner of Health.

[Source: Added at 23 Ok Reg 2358, eff 6-25-06 ; Amended at 33 Ok Reg 1520, eff 9-11-16]

310:257-15-13. Form of submission and contents of application

A person desiring to operate a food establishment shall submit to the regulatory authority a written application for a license on a form provided by the Department. The application will include at a minimum:

- (1) The name, mailing address, telephone number, e-mail address, and signature of the person applying for the license and the name, mailing address, and physical location of the food establishment;
- (2) Information specifying whether the food establishment is owned by an association, corporation, individual, partnership, or other legal entity.

[Source: Added at 23 Ok Reg 2358, eff 6-25-06 ; Amended at 38 Ok Reg 1947, eff 9-11-21]

310:257-15-14. Qualifications and responsibilities of applicants

To qualify for a license, an applicant shall:

- (1) Be an owner of the food establishment or an officer of the legal ownership;
- (2) Comply with the requirements of this Chapter;
- (3) Allow access to the food establishment and provide required information; and
- (4) Pay the applicable license fees at the time the application is submitted.

[Source: Added at 23 Ok Reg 2358, eff 6-25-06 ; Amended at 33 Ok Reg 1520, eff 9-11-16 ; Amended at 38 Ok Reg 1947, eff 9-11-21]

310:257-15-15. Contents of the application [REVOKED]

[Source: Added at 23 Ok Reg 2358, eff 6-25-06 ; Amended at 33 Ok Reg 1520, eff 9-11-16 ; Revoked at 38 Ok Reg 1947, eff 9-11-21]

310:257-15-16. New establishments

For food establishments that are required to submit plans as specified under OAC 310:257-15-6 the Commissioner of Health shall issue a license to the applicant after:

- (1) A properly completed application is submitted;
- (2) All required fees are received;
- (3) The required plans, specifications, and information are reviewed and approved; and
- (4) A preoperational inspection if required shows that the establishment is built or remodeled in accordance with the approved plans and specifications and that the establishment is in compliance with this Chapter.

[Source: Added at 23 Ok Reg 2358, eff 6-25-06 ; Amended at 33 Ok Reg 1520, eff 9-11-16 ; Amended at 38 Ok Reg 1947, eff 9-11-21]

310:257-15-17. Existing establishments, license renewal, and change of ownership

The Commissioner of Health may renew a license for an existing food establishment or may issue a license to a new owner of an existing food establishment after a properly completed application is submitted, reviewed, and approved, the fees are received, and an inspection shows that the establishment is in compliance with this Chapter.

[Source: Added at 23 Ok Reg 2358, eff 6-25-06 ; Amended at 33 Ok Reg 1520, eff 9-11-16 ; Amended at 38 Ok Reg 1947, eff 9-11-21]

310:257-15-18. Denial of application for license, notice

If an application for a license to operate is denied, the regulatory authority shall provide the applicant with a notice that includes:

- (1) The specific reasons and Chapter citations for the license denial; and
- (2) The actions, if any, that the applicant must take to qualify for a license.

[Source: Added at 23 Ok Reg 2358, eff 6-25-06 ; Amended at 38 Ok Reg 1947, eff 9-11-21]

310:257-15-19. Responsibilities of the Department

(a) The Department shall make available to the license holder a copy of this Chapter via the Oklahoma State Department of Health website so that the license holder is notified of the compliance requirements and the conditions of retention that are applicable to the license.

(b) Failure to provide the information specified in (a) of this Section does not prevent the regulatory authority from taking authorized action or seeking remedies if the license holder fails to comply with this Chapter or an order, warning, or directive of the Department.

[Source: Added at 23 Ok Reg 2358, eff 6-25-06 ; Amended at 38 Ok Reg 1947, eff 9-11-21]

310:257-15-20. Responsibilities of the license holder

Upon acceptance of the license issued by the Commissioner of Health, the license holder in order to retain the license shall:

- (1) Post the license in a conspicuous location in the food establishment;
- (2) Comply with the provisions of this Chapter;
- (3) Comply with directives of the Department including time frames for corrective actions specified in inspection reports, notices, orders, warnings, and other directives issued by the Department;
- (4) Accept notices issued and served by the Department;
- (5) Be subject to the administrative, civil, injunctive, and criminal remedies as authorized by law for failure to comply with this Chapter or a directive of the Department, including time frames for corrective actions specified in inspection reports, notices, orders, warnings, and other directives; and
- (6) If applicable, submit the annual renewal application and pay all renewal license and late fees.

[Source: Added at 23 Ok Reg 2358, eff 6-25-06 ; Amended at 33 Ok Reg 1520, eff 9-11-16 ; Amended at 38 Ok Reg 1947, eff 9-11-21]

310:257-15-21. Licenses not transferable

A license cannot be transferred from one license holder to another, from one physical address to another or from one type of operation to another if the food operation changes from the type of operation specified in the application and the change in operation is not approved.

[Source: Added at 23 Ok Reg 2358, eff 6-25-06 ; Amended at 33 Ok Reg 1520, eff 9-11-16 ; Amended at 38 Ok Reg 1947, eff 9-11-21]

310:257-15-22. Competency of inspectors

An authorized representative of the Department who inspects a food establishment or conducts plan review for compliance with this Chapter shall have the knowledge, skills, and ability to adequately perform the required duties and be licensed pursuant to 59 O.S. Sections 1150.1 et seq. (Oklahoma Sanitarian and Environmental Specialist Registration Act).

[Source: Added at 23 Ok Reg 2358, eff 6-25-06 ; Amended at 33 Ok Reg 1520, eff 9-11-16 ; Amended at 38 Ok Reg 1947, eff 9-11-21]

310:257-15-23. Allowed at reasonable times after due notice

After the regulatory authority presents official credentials and provides notice of the purpose of, and an intent to conduct, an inspection, the person in charge shall allow the regulatory authority to determine if the food establishment is in compliance with this Chapter by allowing access to the establishment, allowing inspection, and providing information and records specified in this Chapter and to which the regulatory authority is entitled according to law, during the food establishment's hours of operation and other reasonable times.

[Source: Added at 23 Ok Reg 2358, eff 6-25-06 ; Amended at 33 Ok Reg 1520, eff 9-11-16 ; Amended at 38 Ok Reg 1947, eff 9-11-21]

310:257-15-24. Refusal, notification of right to access, and final request for access

If a person denies access to the the regulatory authority then the regulatory authority shall:

- (1) Inform the person that:
 - (A) The license holder is required to allow access to the regulatory authority as specified under OAC 310:257-15-23 of this Chapter,
 - (B) Access is a condition of the acceptance and retention of a food establishment license to operate, and
 - (C) If access is denied, an order issued by the appropriate authority allowing access may be obtained; and
- (2) Make a final request for access.

[Source: Added at 23 Ok Reg 2358, eff 6-25-06 ; Amended at 33 Ok Reg 1520, eff 9-11-16 ; Amended at 38 Ok Reg 1947, eff 9-11-21]

310:257-15-25. Refusal, reporting

If after the regulatory authority presents credentials and provides notice, explains the authority upon which access is requested, and makes a final request for access, the person in charge continues to refuse access, the regulatory authority shall record details of the denial of access on an inspection report form.

[Source: Added at 23 Ok Reg 2358, eff 6-25-06 ; Amended at 38 Ok Reg 1947, eff 9-11-21]

310:257-15-26. Order to gain access

If denied access to a food establishment for an authorized purpose and after complying with OAC 310:257-15-24, the Department may issue, or apply for the issuance of, an order to gain access as provided in law.

[Source: Added at 23 Ok Reg 2358, eff 6-25-06 ; Amended at 33 Ok Reg 1520, eff 9-11-16 ; Amended at 38 Ok Reg 1947, eff 9-11-21]

310:257-15-27. Documenting information and observations

The regulatory authority shall document on an inspection report form:

- (1) Administrative information about the food establishment's legal identity, physical location, type of establishment, inspection date, and other information such as type of water supply and sewage disposal, status of the license, and personnel certificates that may be required; and
- (2) Specific observations of violative conditions or other deviations from this Chapter that require correction by the license holder including:
 - (A) Failure of the person in charge to demonstrate the knowledge of foodborne illness prevention, application of

HACCP principles, and the requirements of this Chapter,
(B) Failure of food employees to demonstrate their knowledge of their responsibility to report a disease or medical condition,
(C) Nonconformance with priority or priority foundation items of this Chapter,
(D) Failure of the appropriate food employees to demonstrate their knowledge of, and ability to perform in accordance with, the procedural, monitoring, verification, and corrective action practices required by the Department,
(E) Failure of the person in charge to provide records required by the regulatory authority for determining conformance with a HACCP plan, and
(F) Nonconformance with critical limits of a HACCP plan.

310:257-15-28. Specifying time frame for corrections [REVOKED]

[Source: Added at 23 Ok Reg 2358, eff 6-25-06 ; Revoked at 38 Ok Reg 1947, eff 9-11-21]

310:257-15-29. Issuing report and obtaining acknowledgment of receipt

At the conclusion of the inspection, the regulatory authority shall provide a copy of the completed inspection report to the license holder or to the person in charge, and request a signed acknowledgment of receipt.

[Source: Added at 23 Ok Reg 2358, eff 6-25-06 ; Amended at 38 Ok Reg 1947, eff 9-11-21]

310:257-15-30. Refusal to sign acknowledgment

The regulatory authority shall:

- (1) Inform a person who declines to sign an acknowledgment of receipt of inspectional findings as specified under OAC 310:257-15-29:
 - (A) An acknowledgment of receipt is not an agreement with findings,
 - (B) Refusal to sign an acknowledgment of receipt does not affect the license holder's obligation to correct the violations noted in the inspection report within the required timeframes, and
 - (C) A refusal to sign an acknowledgment of receipt is noted in the inspection report and conveyed to the Department's historical record for the food establishment; and
- (2) Make a final request that the person in charge sign an acknowledgment receipt of inspectional findings.

[Source: Added at 23 Ok Reg 2358, eff 6-25-06 ; Amended at 33 Ok Reg 1520, eff 9-11-16 ; Amended at 38 Ok Reg 1947, eff 9-11-21]

310:257-15-31. Public information

Except as specified in OAC 310:257-15-10, the Department shall treat the inspection report as a public document and shall make it available for disclosure to a person who requests it as provided in law.

[Source: Added at 23 Ok Reg 2358, eff 6-25-06 ; Amended at 38 Ok Reg 1947, eff 9-11-21]

310:257-15-32. Ceasing operations and reporting

(a) Except as specified in (b) of this Section, a license holder shall immediately discontinue operations and notify the regulatory authority if an imminent health hazard may exist because of an emergency such as a fire, flood, sewage backup, insufficient refrigeration and/or hot food storage facilities available, substantial evidence or presence of a large number of insects, or evidence of rodents in food or on food preparation surfaces, interruption of safe potable water supply to the facility, misuse of poisonous or toxic materials, onset of an apparent foodborne illness outbreak, interruption of electrical service for more than four (4) hours, severe structural damage in the facility, an employee working with a Salmonella, Shigella, Shiga toxin-producing *Escherichia coli* or Hepatitis A infection, gross unsanitary occurrence or condition, or other circumstance as determined by the Commissioner of Health, or his designee, that may endanger public health.

(b) A license holder need not discontinue operations in an area of an establishment that is unaffected by the imminent health hazard.

(c) Considering the nature of the potential hazard involved and the complexity of the corrective action needed, the regulatory authority may agree to continuing operations in the event of an extended interruption of electrical or water service if:

- (1) A written emergency operation plan has been approved;
- (2) Immediate corrective action is taken to eliminate, prevent, or control any food safety risk and imminent health hazard associated with the electrical or water service interruption; and
- (3) The Regulatory Authority Department is informed upon implementation of the written emergency operating plan.

[Source: Added at 23 Ok Reg 2358, eff 6-25-06 ; Amended at 26 Ok Reg 1477, eff 6-11-09 ; Amended at 38 Ok Reg 1947, eff 9-11-21]

310:257-15-33. Resumption of operations

If operations are discontinued as specified under OAC 310:257-15-32 or otherwise according to law, the license holder shall obtain approval from the regulatory authority before resuming operations.

[Source: Added at 23 Ok Reg 2358, eff 6-25-06]

310:257-15-34. Timely correction

(a) Except as specified in (b) of this Section, a license holder shall at the time of inspection correct a priority or priority foundation violation of this Chapter and implement corrective actions for a HACCP plan provision that is not in compliance with its critical limit.

(b) Considering the nature of the potential hazard involved and the complexity of the corrective action needed, the regulatory authority may agree to or specify a longer time frame, not to exceed:

(1) Seventy two (72) hours after the inspection, for the license holder to correct violations of a priority item; or

(2) Ten (10) calendar days after the inspection, for the license holder to correct violations of a priority foundation item or HACCP Plan deviations.

(c) If corrections are not made according to (a) and (b) of this section, then the facility is subject to enforcement action.

[Source: Added at 23 Ok Reg 2358, eff 6-25-06 ; Amended at 28 Ok Reg 2289, eff 11-1-11 ; Amended at 38 Ok Reg 1947, eff 9-11-21]

310:257-15-35. Verification and documentation of correction

(a) After observing at the time of inspection a correction of a priority or priority foundation violation or HACCP deviation, the regulatory authority shall enter the violation and information about the corrective action on the inspection report.

(b) After receiving notification that the license holder has corrected a priority or priority foundation violation or HACCP plan deviation, or at the end of the specified period of time, the regulatory authority shall verify correction of the violation, document the information on an inspection report, and enter the report in the Department's records.

[Source: Added at 23 Ok Reg 2358, eff 6-25-06 ; Amended at 28 Ok Reg 2289, eff 11-1-11 ; Amended at 38 Ok Reg 1947, eff 9-11-21]

310:257-15-36. Time frame for correction

(a) Except as specified in (b) of this Section, the license holder shall correct violations that are Core items by a date and time agreed to or specified by the regulatory authority but no later than ninety (90) calendar days after the inspection.

(b) The Department may approve a compliance schedule that extends beyond the time limits specified under (a) of this Section if a written schedule of compliance is submitted by the license holder and no health hazard exists or will result from allowing an extended schedule for compliance.

(c) If corrections are not made according to (a) and (b) of this section, then the facility is subject to enforcement action.

[Source: Added at 23 Ok Reg 2358, eff 6-25-06 ; Amended at 28 Ok Reg 2289, eff 11-1-11 ; Amended at 38 Ok Reg 1947, eff 9-11-21]

310:257-15-37. Obtaining information: personal history of illness, medical examination, and specimen analysis

The Department shall act when it has reasonable cause to believe that a food employee or conditional employee has possibly transmitted disease; may be infected with a disease in a communicable form that is transmissible through food; may be a carrier of infectious agents that cause a disease that is transmissible through food; or is affected with a boil, an infected wound, or acute respiratory infection, by:

- (1) Securing a confidential medical history of the food employee or conditional employee suspected of transmitting disease or making other investigations as deemed appropriate; and
- (2) Requiring appropriate medical examinations, including collection of specimens for laboratory analysis, of a suspected food employee or conditional employee and other employees.

[Source: Added at 23 Ok Reg 2358, eff 6-25-06 ; Amended at 38 Ok Reg 1947, eff 9-11-21]

310:257-15-38. Restriction or exclusion of food employee or conditional employee, or summary suspension of license

Based on the findings of an investigation related to a food employee or conditional employee who is suspected of being infected or diseased, the Department may issue an order to the suspected food employee or license holder instituting one or more of the following control measures:

- (1) Restricting the food employee or conditional employee;
- (2) Excluding the food employee or conditional employee; or
- (3) Closing the food establishment by summarily suspending a license to operate.

[Source: Added at 23 Ok Reg 2358, eff 6-25-06 ; Amended at 33 Ok Reg 1520, eff 9-11-16 ; Amended at 38 Ok Reg 1947, eff 9-11-21]

310:257-15-39. Restriction or exclusion order: warning or hearing not required, information required in order

Based on the findings of the investigation and to control disease transmission, the Department may issue an order of restriction or exclusion to a suspected food employee or the license holder without prior warning, notice of a hearing, or a hearing if the order:

- (1) States the reasons for the restriction or exclusion that is ordered;
- (2) States the evidence that the food employee or license holder shall provide in order to demonstrate that the reasons for the restriction or exclusion are eliminated;
- (3) States that the suspected food employee or the license holder may request an appeal hearing by submitting a timely request as provided in law; and
- (4) Provides the name and address of the Department representative to whom a request for an appeal hearing may be made.

[Source: Added at 23 Ok Reg 2358, eff 6-25-06 ; Amended at 38 Ok Reg 1947, eff 9-11-21]

310:257-15-40. Release of food employee from restriction or exclusion

The Department shall release a food employee from restriction or exclusion consistent with the provisions of 310:257-3-6.

[Source: Added at 23 Ok Reg 2358, eff 6-25-06 ; Amended at 28 Ok Reg 2289, eff 11-1-11]

310:257-15-41. Priority items and priority foundation items

(a) **Priority items.** The Department shall treat as a priority item any requirement in the following sections of OAC 310-257: 3-4(a, c, d, f); 3-5; 3-6; 3-9; 3-10(a, b); 3-12; 5-1; 5-2(a, b), (e)(3)(A); 5-3; 5-4; 5-5; 5-6; 5-7(a); 5-8; 5-9(a, c, d); 5-10; 5-11; 5-12; 5-14; 5-18(a)(2); 5-21(b); 5-22; 5-23(a)(1, 2); 5-25; 5-26; 5-28; 5-30; 5-34(a); 5-36(a), (b)(1); 5-41; 5-43(a); 5-44(a); 5-46(a),(b)(1); 5-47(3); 5-48.1(1, 2, 3, 4, 5); 5-49(a); 5-52 (a, b, c, d); 5-53(1); 5-57; 5-59(a, b); 5-61; 5-62(b)(1, 3, 4), (c)(1, 4, 5); 5-64(a), (b)(4), (c), (d)(2)(B, C, D, E), (e)(1); 5-70(a, b, c, d); 5-71(1, 2, 3, 4, 5); 7-1(1); 7-3; 7-4(a); 7-5; 7-7; 7-12(1)(A), (2)(A); 7-14; 7-28(5); 7-35(a); 7-36; 7-72; 7-75(1, 2, 3, 4, 5), (6)(A, B); 7-79; 7-83(a, c); 7-94; 7-95; 9-1; 9-2; 9-5; 9-12; 9-13(a); 9-15; 9-16; 9-21; 9-22(a); 9-27(a); 9-29, 9-30(1); 9-31(1); 9-37(1); 9-38; 9-41; 9-44(a); 9-47(a); 9-49; 9-52; 11-21; 13-3; 13-5(1, 2); 13-6; 13-7; 13-8; 13-9; 13-10; 13-11; 13-12; 13-13; 13-14(a); 13-15(b); 13-16; 13-17(2); 13-19; 15-5(1); 15-12; 15-32(a); 17-1(d); 17-2(c)(3), (d)(1, 3); 17-3.1(c); 17-5(b, d).

(b) **Priority foundation items.** The Department shall treat as a priority foundation item any requirement in the following sections of OAC 310-257: 3-1(a, b); 3-2; 3-3; 3-4(b, e); 3-13; 3-14(a)(1), (2)(A, B, C, D, E), (b, c); 3-15; 3-21(a); 3-22; 5-2(c), (e)(1, 2), (e)(3)(B, C); 5-9(e, f); 5-13; 5-15(a); 5-16(a); 5-18(a)(1); 5-20; 5-21(c); 5-27(c); 5-43(b, c); 5-46(b)(2), (d)(2); 5-48; 5-48.1(6); 5-50(a, c); 5-53(2); 5-58; 5-60(a, b, c); 5-62(a), (b)(2), (c)(2, 3); 5-63; 5-64(b)(1, 2, 3, 5, 6), (d)(1), (2)(A, F, G, H), (d)(3,4), (e)(2, 3, 4); 5-67(b)(5); 5-69; 7-15(a); 7-16(a)(1); 7-23; 7-24; 7-35(b); 7-37(e); 7-40; 7-41; 7-42; 7-50; 7-51(a, b); 7-55; 7-56; 7-57; 7-58; 7-68; 7-70; 7-71; 7-73(a); 7-75(6)(C, D); 7-77; 7-78(b); 7-82(a); 9-6; 9-8; 9-9; 9-10; 9-11; 9-14(a, e); 9-18(a); 9-23; 9-26; 9-27(b); 9-28; 9-50; 11-24; 11-25; 11-30; 11-38; 11-44; 11-50(3); 11-54(a); 13-1; 13-2; 13-4(a); 13-5(3); 13-15(a); 13-17(1); 15-4; 15-5(2); 15-6; 15-9; 15-34(a); 17-1(g, h); 17-2(b), (c)(4), (d)(4); 17-4(b)

[Source: Added at 23 Ok Reg 2358, eff 6-25-06 ; Amended at 28 Ok Reg 2289, eff 11-1-11 ; Amended at 38 Ok Reg 1947, eff 9-11-21]

SUBCHAPTER 17. MOBILE UNITS

310:257-17-1. General requirements

(a) The provisions of this Subchapter are specific to mobile units, which includes mobile pushcarts, mobile food establishments, and mobile retail food establishments, and are in addition to any requirements contained in this Chapter.

(b) Any mobile unit that sells only prepackaged food is not subject to a plan review fee.

(c) A mobile unit is exempt from mechanical refrigeration requirements if it is able to maintain food products at temperatures of 41°F or less and serves only prepackaged food.

(d) Mobile retail units may sell packaged foods prepared by a facility that is in compliance with any or all of (1) through (4):

- (1) OAC 310:260 (relating to good manufacturing practices),
- (2) United States Department of Agriculture,
- (3) Oklahoma Department of Agriculture Food and Forestry requirements, or
- (4) Food that is prepared in a facility which is licensed as a food establishment under this Chapter to the same owner as the mobile retail unit, provided it is not a mobile pushcart or mobile food establishment.

(e) The name of the business and the Oklahoma State Department of Health license number shall be clearly visible on the outside of the unit, in print of no less than three inches (3") in size during hours of operation.

(f) All mobile units shall be operated within 500 feet of a toilet facility available to employees during all hours of operation.

(g) Mobile units shall not have an active food cooling process within the unit. All cooling processes must take place in the licensed commissary.

(h) Electrical network and components must be sufficient to power all required equipment at all times during operation.

(i) An indoor or outdoor mobile pushcart shall not be required to have a three (3) compartment sink, provided that:

- (1) Only pre-packaged food is sold from the mobile pushcart; or
- (2) If serving unpackaged food, then an adequate supply of clean utensils is available on the cart, and the utensils are washed in the licensed commissary.

[Source: Added at 28 Ok Reg 2289, eff 11-1-11 ; Amended at 33 Ok Reg 1520, eff 9-11-16 ; Amended at 38 Ok Reg 1947, eff 9-11-21]

310:257-17-2. Mobile pushcarts

(a) Pushcarts preparing unpackaged food shall be shielded on three sides.

(b) Foods sold from a pushcart are limited to :

- (1) Non-Time/Temperature Control for Safety Foods and condiments (i.e. processed cheese products, cheese, uncooked onions, and sauerkraut),
- (2) Pre-packaged food, and
- (3) The preparation and serving of precooked frankfurters, sausages, or other precooked, commercially processed Time/Temperature Control for Safety Foods.

(c) Each indoor mobile pushcart shall:

- (1) Be limited to operating within the confines of an enclosed or protected environment such as an indoor mall, sports arena, convention center, etc.
- (2) Have a commissary, licensed to the same owner as the pushcart, within the confines of the enclosed or protected

environment except as specified in (c)(1) of this section.

(3) Have hand washing facilities on the pushcart or immediately adjacent to the pushcart if open food is sold.

(4) Except as specified in OAC 310:257-17-1(i), have a 3-compartment sink on the pushcart;

(d) Each outdoor mobile pushcart shall:

(1) Have hand washing facilities on the pushcart if open food is sold;

(2) Have over-head protection above food and food preparation areas;

(3) Except as specified in OAC 310:257-17-5(c), have a commissary, licensed to the same owner as the pushcart; and

(4) Except as specified in OAC 310:257-17-1(i), have a 3-compartment sink on the pushcart

[Source: Added at 28 Ok Reg 2289, eff 11-1-11 ; Amended at 33 Ok Reg 1520, eff 9-11-16 ; Amended at 38 Ok Reg 1947, eff 9-11-21]

310:257-17-3. Mobile food establishments [REVOKED]

[Source: Added at 28 Ok Reg 2289, eff 11-1-11 ; Amended at 33 Ok Reg 1520, eff 9-11-16 ; Revoked at 38 Ok Reg 1947, eff 9-11-21]

310:257-17-3.1. Operations of mobile units

(a) A mobile unit shall not remain at one physical address for longer than twelve (12) hours, unless:

(1) It is parked and is not operating for multiple days.

(2) It is operated in conjunction with a single event or celebration.

(3) It is parked or operated at the site of its licensed commissary.

(b) A mobile unit shall return to its commissary daily, except as established in (a) of this Section, to dispose of waste water, refill with potable water, and service the unit.

(c) Commissaries used for food production and/or utensil washing shall be licensed as a food establishment.

[Source: Added at 38 Ok Reg 1947, eff 9-11-21]

310:257-17-4. Mobile retail food establishments

(a) A mobile retail food establishment may sell from a stationary table, such as at an event or farmers market.

(b) The mobile retail food establishment shall have no personal property or hazardous items in the same compartment in which the food is transported or stored.

[Source: Added at 28 Ok Reg 2289, eff 11-1-11 ; Amended at 33 Ok Reg 1520, eff 9-11-16 ; Amended at 38 Ok Reg 1947, eff 9-11-21]

310:257-17-5. Commissary and servicing area requirements

(a) The commissary shall have:

(1) A location available for flushing and draining liquid waste to an approved disposal system.

- (2) A location to refill potable water.
- (3) The ability to properly store back stock of food and single service articles separate from personal items.
- (b) Commissaries used for food production and/or utensil washing shall be licensed as a food establishment to the operator of the mobile unit.
- (c) Commissaries used only to store unopened, prepackaged, frozen or shelf stable foods and single service items and/or the cleaning and servicing of the units shall be exempt from licensure if only one (1) unit is serviced from the commissary and it is located at a residence.
- (d) Commissaries used for food preparation and utensil washing outside the state of Oklahoma shall provide proof of licensure and inspection from the jurisdiction in which they are located.

310:257-17-6. Storage [REVOKED]

[Source: Added at 28 Ok Reg 2289, eff 11-1-11 ; Amended at 33 Ok Reg 1520, eff 9-11-16 ; Revoked at 38 Ok Reg 1947, eff 9-11-21]

APPENDIX A. TABLES

Figure 1

The following tables are used in OAC 310:257:

Table 1.
(OAC 310:257-1-2. Definitions)

Interaction of pH and a_w for control of spores in FOOD heat-treated to destroy vegetative cells and subsequently PACKAGED

a_w values	pH values		
	4.6 or less	> 4.6 - 5.6	> 5.6
≤ 0.92	non-TCS FOOD**	non-TCS	non-TCS
>0.92 - .95	non-TCS	non-TCS	PA***
>0.95	non-TCS	PA***	PA***
** TCS FOOD means TIME/TEMPERATURE CONTROL FOR SAFETY FOOD			
*** PA means Product Assessment required			

Table 2.
(OAC 310:257-1-2. Definitions)

Interaction of pH and a_w for control of vegetative cells and spores in FOOD not heat-treated or heat-treated but not PACKAGED

a_w values	pH values			
	<4.2	4.2 - 4.6	>4.6 - 5.0	>5.0
<0.88	non-TCS**	non-TCS	non-TCS	non-TCS
0.88 - 0.90	non-TCS	non-TCS	non-TCS	PA***
>0.90 - 0.92	non-TCS	non-TCS	PA	PA
>0.92	non-TCS	PA	PA	PA
** TCS FOOD means TIME/TEMPERATURE CONTROL FOR SAFETY FOOD				
*** PA means Product Assessment required				

Figure 2

Table 3.
(OAC 310:257-5-46. Raw animal foods)

Minimum Temperature °C (°F)	Minimum Time
63 (145)	3 minutes
66 (150)	1 minute
70 (158)	< 1 second (instantaneous)

Table 4.
(OAC 310:257-5-46. Raw animal foods)

<i>Oven Type</i>	<u>Oven Temperature Based on Roast Weight</u>	
	Less than 4.5 kg (10 lbs)	4.5 kg (10 lbs) or More
Still Dry	177°C (350°F) or more	121°C (250°F) or more
Convection	163°C (325°F) or more	121°C (250°F) or more
High Humidity¹	121°C (250°F) or less	121°C (250°F) or less
¹ Relative humidity greater than 90% for at least 1 hour as measured in the cooking chamber or exit of the oven; or in a moisture-impermeable bag that provides 100% humidity.		

Table 5.
(OAC 310:257-5-46. Raw animal foods)

Temperature °C (°F)	Time¹ in Minutes	Temperature °C (°F)	Time¹ in Seconds
54.4 (130)	112	63.9 (147)	134
55.0 (131)	89	65.0 (149)	85
56.1 (133)	56	66.1 (151)	54
57.2 (135)	36	67.2 (153)	34
57.8 (136)	28	68.3 (155)	22
58.9 (138)	18	69.4 (157)	14
60.0 (140)	12	70.0 (158)	0
61.1 (142)	8		
62.2 (144)	5		
62.8 (145)	4		
¹ Holding time may include post oven heat rise.

CHAPTER 258. UNATTENDED FOOD ESTABLISHMENTS

[Authority: 63 O.S., § 1-104]
[Source: Codified 9-11-20]

SUBCHAPTER 1. PURPOSE AND DEFINITIONS

310:258-1-1. Purpose

The rules in this Chapter implement 63 O.S. Section 1-1118.1. The purpose is to safeguard public health and provide to consumers food that is safe, unadulterated, and honestly presented. This Chapter establishes definitions; sets standards for food, operations, equipment, and facilities; and provides for unattended food establishment plan review, license issuance, inspection, and license suspension.

[Source: Added at 37 Ok Reg 1373, eff 9-11-20]

310:258-1-2. Definitions

The following words and terms, when used in this Chapter, shall have the following meaning unless the context clearly indicates otherwise.

"Additive" means as used in this Chapter for the following terms:

(A) **"Color additive"** means as stated in the Federal Food, Drug, and Cosmetic Act, 21 U.S.C. Section 321(t) and 21 CFR, Part 70.

(B) **"Food additive"** means as stated in the Federal Food, Drug, and Cosmetic Act, 21 U.S.C. Section 321(s) and 21 CFR, Part 170.

"Adulterated" means the definition in 63 O.S. Section 1-1109.

"Approved" means acceptable to the Department based on a determination of conformity with principles, practices, and generally recognized standards that protect public health.

"Beverage" means a liquid for drinking, including water.

"Bottled drinking water" means water that is sealed in bottles, packages, or other containers and offered for sale for human consumption, including bottled mineral water.

"Certified applicator" means any individual who is certified under the Federal Herbicide, Fungicide, and Rodenticide Act, U.S.C., Section 136(e)(1) and/or by the Oklahoma State Department of Agriculture Food and Forestry as authorized to use or supervise the use of any pesticide that is classified for restricted use. Any applicator who holds or applies registered pesticides or uses dilutions of registered pesticides consistent with the product labeling only to provide a service of controlling pests without delivering any unapplied pesticide to any person so served is not deemed to be a seller or distributor of pesticides.

"CFR" means Code of Federal Regulations. Citations in this Chapter to the CFR refer sequentially to the Title, Part, and Section numbers, such as 21 CFR, 178.1010 refers to Title 21, Part 178, Section 1010.

"Code of Federal Regulations" means the compilation of the general and permanent rules published in the Federal Register by the executive departments and agencies of the federal government which is published annually by the U.S. Government Printing Office; and contains FDA rules in 21 CFR, USDA rules in 7 CFR and 9 CFR, EPA rules in 40 CFR, and Wildlife and Fisheries rules in 50 CFR.

"Community water system" means any public water supply system, which serves at least 15 service connections, used year round or regularly serves 25 customers per day.

"Consumer" means a person who is a member of the public, takes possession of food, is not functioning in the capacity of an operator of an unattended food establishment or food processing plant, and does not offer the food for resale.

"Controlled entry" means selective restriction or limitation of access to a place or location.

"Customer self-service" means customer selection of a prepackaged food product from a product module.

"Cut leafy greens" means fresh leafy greens whose leaves have been cut, shredded, sliced, chopped, or torn. The term "leafy greens" includes iceberg lettuce, romaine lettuce, leaf lettuce, butter lettuce, baby leafy lettuce (i.e., immature lettuce or leafy greens), escarole, endive, spring mix, spinach, cabbage, kale, arugula, and chard. The term "leafy greens" does not include herbs such as cilantro or parsley.

"Department" means the Oklahoma State Department of Health and a health department designated in writing by the State Commissioner of Health to perform official duties or other acts authorized under 63 O.S. § 101 et seq. and this Chapter, or an authorized agent thereof.

"Dispensed beverage" means a beverage or ice that is dispensed in its unpackaged form from a machine.

"Easily movable" means portable; mounted on casters, gliders, or rollers; or provided with a mechanical means to safely tilt a unit of equipment for cleaning; and has no utility connection, a utility connection that disconnects quickly, or a flexible utility connection line of sufficient length to allow the equipment to be moved for cleaning of the equipment and adjacent area.

"EPA" means the U.S. Environmental Protection Agency.

"Equipment" means an article that is used in the operation of an unattended food establishment such as a freezer, reach-in refrigerator, or temperature measuring device for ambient air. It does not include items used for handling or storing large quantities of packaged foods that are received from a supplier in a cased or overwrapped lot, such as hand trucks, forklifts, dollies, pallets, racks, and skids.

"FDA" means the U.S. Food and Drug Administration.

"Fish" means fresh or saltwater finfish, crustaceans, and other forms of aquatic life (including alligator, frog, aquatic turtle, jellyfish, sea cucumber, and sea urchin and the roe of such animals) other than birds or mammals, and all mollusks, if such animal life is intended for human consumption. Fish includes an edible human food product derived in whole or in part from fish, including fish that have been processed in any manner.

"Food" means a raw, cooked, or processed edible substance, ice, beverage, or ingredient used or intended for use or for sale in whole or in part for human consumption, or chewing gum.

"Food processing plant" means a commercial operation that manufactures, packages, labels, or stores food for human consumption and provides food for sale or distribution to other business entities such as food processing plants, food establishment, or unattended food establishments.

"Grade A standards" means the requirements of the United States Public Health Service/FDA "Grade A Pasteurized Milk Ordinance" with which certain fluid and dry milk and milk products comply.

"Hazard" means a biological, chemical, or physical property that may cause an unacceptable consumer health risk.

"Hermetically sealed container" means a container that is designed and intended to be secure against the entry of microorganisms and, in the case of low acid canned foods, to maintain the commercial sterility of its contents after processing.

"Imminent health hazard" means a significant threat or danger to health that is considered to exist when there is evidence sufficient to show that a product, practice, circumstance, or event creates a situation that requires immediate correction or cessation of operation to prevent injury based on the number of potential injuries, and the nature, severity, and duration of the anticipated injury.

"Impermeable" means incapable of allowing liquids to pass through the covering.

"Juice" means, when used in the context of food safety, the aqueous liquid expressed or extracted from one or more fruits or vegetables, purées of the edible portions of one or more fruits or vegetables, or any concentrates of such liquid or purée. Juice does not include, for purposes of HACCP, liquids, purees, or concentrates that are not used as beverages or ingredients of beverages.

"License" means the document issued by the Department that authorizes a person to operate an unattended food establishment.

"License holder" means the entity that is legally responsible for the operation of the unattended food establishment such as the owner, the owner's agent, or other person; and possesses a valid license to operate an unattended food establishment.

"Major food allergen" means milk, egg, fish (such as bass, flounder, cod, and including crustacean such as crab, lobster, or shrimp), tree nuts (such as almonds, pecans, or walnuts), wheat, peanuts, and soybeans; or a food ingredient that contains protein derived from a food specified above.

(A) Major food allergen does not include: Any highly refined oil derived from a food specified in Major Food Allergen definition and any ingredient derived from such highly refined oil; or

(B) Any ingredient that is exempt under the petition or notification process specified in the Federal Food, Drugs, and Cosmetics Act, 21 U.S.C. Section 343.

"Non-community water system" means any public water supply system, which serves an average of at least 25 individuals at least 60

days per year and is not a community water system.

"OAC" means Oklahoma Administrative Code.

"O.S." means Oklahoma Statute.

"Packaged" means bottled, canned, cartoned, bagged, or wrapped, whether packaged in a food processing plant.

"Person" means an association, a corporation, individual, partnership, other legal entity, government, or governmental subdivision or agency.

"Physical facilities" means the structure and interior surfaces of an unattended food establishment including accessories such as light fixtures and heating or air conditioning system vents.

"Plumbing fixture" means a receptacle or device that is permanently or temporarily connected to the water distribution system of the premises and demands a supply of water from the system; or discharges used water, waste materials, or sewage directly or indirectly to the drainage system of the premises.

"Plumbing system" means the water supply and distribution pipes; plumbing fixtures and traps; soil, waste, and vent pipes; sanitary and storm sewers and building drains, including their respective connections, devices, and appurtenances within the premises; and water-treating equipment.

"Poisonous or toxic materials" means substances that are not intended for ingestion and are included in 4 categories:

- (A) Cleaners and sanitizers, which include cleaning and sanitizing agents and agents such as caustics, acids, drying agents, polishes, and other chemicals;
- (B) Pesticides, except sanitizers, which include substances such as insecticides and rodenticides;
- (C) Substances necessary for the operation and maintenance of the establishment such as nonfood grade lubricants and personal care items that may be deleterious to health; and
- (D) Substances that are not necessary for the operation and maintenance of the establishment and are on the premises for retail sale, such as petroleum products and paints.

"Premises" means the physical facility, its contents, and the contiguous land or property under the control of the license holder or the contracted establishment.

"Refuse" means solid waste not carried by water through the sewage system.

"Regulatory authority" means a representative, such as an onsite inspector, of the Department.

"Restricted use pesticide" means a pesticide product that contains the active ingredients specified in 40 CFR, Section 152.175. Pesticides classified for restricted use, and that is limited to use by or under the direct supervision of a certified applicator.

"Sealed" means free of cracks or other openings that allow the entry or passage of moisture.

"Service animal" means an animal such as a guide dog, signal dog, or other animal individually trained to provide assistance to an

individual with a disability.

"Sewage" means liquid waste containing animal or vegetable matter in suspension or solution and may include liquids containing chemicals in solution.

"Single-use articles" means utensils and food containers designed and constructed to be used once and discarded.

"Temperature measuring device" means a thermometer, thermocouple, thermistor, or other device that indicates the ambient air temperature within a cold holding unit.

"Time/Temperature Control for Safety Food" means a food that requires time/temperature control for safety (TCS) to limit pathogenic microorganism growth or toxin formation. Time/Temperature Control for Safety Food includes: An animal food that is raw or heat-treated; a plant food that is heat-treated or consists of raw seed sprouts, cut melons, cut leafy greens, cut tomatoes or mixtures of cut tomatoes that are not modified in a way so that they are unable to support pathogenic microorganism growth or toxin formation, or garlic-in-oil mixtures that are not modified in a way that results in mixtures that do not support growth or toxin formation.

"Unattended food establishment" means an operation that provides packaged foods or whole fruit using an automated payment system and has controlled entry not accessible by the general public.

"USDA" means the U.S. Department of Agriculture.

"Vending machine" means a self-service device that, upon insertion of a coin, paper currency, token, card, or key, or by optional manual operation, dispenses unit servings of food in bulk or in packages without the necessity of replenishing the device between each vending operation.

"Vending machine location" means the room, enclosure, space, or area where one or more vending machines are installed and operated and includes the storage areas and areas on the premises that are used to service and maintain the vending machines.

310:258-1-3. Incorporated by reference

The following Code of Federal Regulation (CFR) provisions are incorporated by reference as published on July 1, 2019:

- (1) Title 9 CFR, Part 424, Subpart (C) PREPARATION AND PROCESSING OPERATIONS;
- (2) Title 21 CFR, Part 129 PROCESSING AND BOTTLING OF BOTTLED DRINKING WATER;
- (3) Title 21 CFR, Part 170 FOOD ADDITIVES;
- (4) Title 21 CFR, Part 172 FOOD ADDITIVES PERMITTED FOR DIRECT ADDITION TO FOOD FOR HUMAN CONSUMPTION;
- (5) Title 21 CFR, Part 173 SECONDARY DIRECT FOOD ADDITIVES PERMITTED IN FOOD FOR HUMAN CONSUMPTION;
- (6) Title 21 CFR, Part 174 INDIRECT FOOD ADDITIVES: GENERAL;

- (7) Title 21 CFR, Part 175 INDIRECT FOOD ADDITIVES: ADHESIVES AND COMPONENTS OF COATINGS;
- (8) Title 21 CFR, Part 176 INDIRECT FOOD ADDITIVES: PAPER AND PAPERBOARD COMPONENTS;
- (9) Title 21 CFR, Part 177 INDIRECT FOOD ADDITIVES: POLYMERS;
- (10) Title 21 CFR, Part 178 INDIRECT FOOD ADDITIVES: ADJUVANTS, PRODUCTION AIDS, AND SANITIZERS;
- (11) Title 21 CFR, Part 179 IRRADIATION IN THE PRODUCTION, PROCESSING AND HANDLING OF FOOD;
- (12) Title 21 CFR, Part 180 FOOD ADDITIVES PERMITTED IN FOOD OR IN CONTACT WITH FOOD ON AN INTERIM BASIS PENDING ADDITIONAL STUDY;
- (13) Title 21 CFR, Part 181 PRIOR-SANCTIONED FOOD INGREDIENTS;
- (14) Title 21 CFR, Part 182 SUBSTANCES GENERALLY RECOGNIZED AS SAFE;
- (15) Title 21 CFR, Part 184 DIRECT FOOD SUBSTANCES AFFIRMED AS GENERALLY RECOGNIZED AS SAFE;
- (16) Title 21 CFR, Part 186 INDIRECT FOOD SUBSTANCES AFFIRMED AS GENERALLY RECOGNIZED AS SAFE;
- (17) Title 21 CFR, Section 1240.60 Subpart (d) SPECIFIC ADMINISTRATIVE DECISIONS REGARDING INTERSTATE SHIPMENTS.

[Source: Added at 37 Ok Reg 1373, eff 9-11-20]

SUBCHAPTER 3. OPERATIONS

310:258-3-1. Living quarters, separation

Living or sleeping quarters located on the premises of an establishment shall be separated from rooms and areas used for establishment operations by complete partitioning and solid self-closing doors.

[Source: Added at 37 Ok Reg 1373, eff 9-11-20]

310:258-3-2. Cleaning frequency

The physical facilities shall be cleaned as often as necessary to keep them clean.

[Source: Added at 37 Ok Reg 1373, eff 9-11-20]

310:258-3-3. Premises, repairing

The physical facilities shall be maintained in good repair.

[Source: Added at 37 Ok Reg 1373, eff 9-11-20]

310:258-3-4. Storing maintenance tools

Maintenance tools such as brooms, mops, vacuum cleaners, and similar items shall be stored so they do not contaminate food, equipment, utensils, and single-service articles.

[Source: Added at 37 Ok Reg 1373, eff 9-11-20 ; Amended at 39 Ok Reg 1257, eff 9-11-22]

310:258-3-5. Maintaining premises, unnecessary items and litter

The premises shall be free of:

- (1) Items that are unnecessary to the operation or maintenance of the establishment such as equipment that is nonfunctional or no longer used; and
- (2) Litter.

[Source: Added at 37 Ok Reg 1373, eff 9-11-20]

310:258-3-6. Controlling pests

The presence of insects, rodents, and other pests shall be controlled to minimize their presence within the facility by:

- (1) Routinely inspecting incoming shipments of food and supplies;
- (2) Routinely inspecting the premises for evidence of pests;
- (3) Using methods, if pests are found, such as trapping devices or other means of pest control/elimination; and
- (4) Eliminating harborage conditions.

[Source: Added at 37 Ok Reg 1373, eff 9-11-20]

310:258-3-7. Removing dead or trapped pests

Dead or trapped birds, insects, rodents, and other pests shall be removed from control devices and the premises at a frequency that prevents their accumulation, decomposition, or the attraction of pests.

[Source: Added at 37 Ok Reg 1373, eff 9-11-20]

310:258-3-8. Prohibiting animals

(a) Except as specified in (b) of this Section, live animals may not be allowed on the premises of an establishment.

(b) Live animals may be allowed in the following situations unless the contamination of food, clean equipment, and unwrapped single-service and single-use articles may result:

- (1) Patrol dogs accompanying police or security officers in offices and dining, sales, and storage areas, and sentry dogs running loose in outside fenced areas;
- (2) Service animals that are controlled by the disabled employee or person, as long as a health or safety hazard will not result from the presence or activities of the service animal.

[Source: Added at 37 Ok Reg 1373, eff 9-11-20]

310:258-3-9. Distressed merchandise, segregation and location

Products that are held by the license holder for credit, redemption, or return to the distributor, such as damaged, spoiled, or recalled products, shall be segregated and held in designated areas that are separated from food, equipment, and single-service and single-use articles.

[Source: Added at 37 Ok Reg 1373, eff 9-11-20]

SUBCHAPTER 5. POISONOUS OR TOXIC MATERIALS**310:258-5-1. Identifying information**

- (a) Containers of poisonous or toxic materials and personal care items shall bear a legible manufacturer's label.
- (b) Working containers used for storing poisonous or toxic materials such as cleaners and sanitizers taken from bulk supplies shall be clearly and individually identified with the common name of the material.

[Source: Added at 37 Ok Reg 1373, eff 9-11-20]

310:258-5-2. Storage and separation

Poisonous or toxic materials shall be stored so they cannot contaminate food, equipment, utensils, and single-service and single-use articles by:

- (1) Separating the poisonous or toxic materials by spacing or partitioning; and
- (2) Locating the poisonous or toxic materials in an area that is not above food, equipment, utensils, and single-service articles.

[Source: Added at 37 Ok Reg 1373, eff 9-11-20]

310:258-5-3. Presence and use, restriction

Only those poisonous or toxic materials that are required for the operation and maintenance of an unattended food establishment, such as for the cleaning and sanitizing of equipment and utensils and the control of insects and rodents, shall be allowed in an unattended food establishment.

[Source: Added at 37 Ok Reg 1373, eff 9-11-20]

310:258-5-4. Conditions of use

Poisonous or toxic materials shall be:

- (1) Used according to:
 - (A) Law and this Chapter,
 - (B) Manufacturer's use directions included in labeling, and, for a pesticide, manufacturer's label instructions that state that use is allowed in an unattended food establishment,

- (C) The conditions of certification, if certification is required, for use of the pest control materials, and
 - (D) Additional conditions that may be established by the Department; and
- (2) Applied so that:
- (A) A hazard to employees or other persons is not constituted, and
 - (B) Contamination including toxic residues due to drip, drain, fog, splash or spray on food, equipment, utensils, linens, and single-service and single-use articles is prevented, and for a restricted use pesticide, this is achieved by:
 - (i) Removing the items,
 - (ii) Covering the items with impermeable covers, or
 - (iii) Taking other appropriate preventive actions, and
 - (iv) Cleaning and sanitizing equipment and utensils after the application.
- (3) A restricted use pesticide shall be applied only by an applicator certified as defined in 7 USC Section 136(e) Certified Applicator, of the Federal Insecticide, Fungicide and Rodenticide Act, or a person under the direct supervision of a certified applicator. Restricted use pesticides specified under OAC 310:285-13-5 (3) shall meet the requirements specified in 40 CFR, Part 152 Subpart I - Classification of Pesticides.

[Source: Added at 37 Ok Reg 1373, eff 9-11-20]

310:258-5-5. Sanitizers, criteria

Chemical sanitizers, including chemical sanitizing solutions generated on-site, and other chemical antimicrobials applied to surfaces shall:

- (1) Meet the requirements specified in 40 CFR, Section 180.940 Tolerance exemptions for active and inert ingredients for use in antimicrobial formulations (Food-contact surface sanitizing solutions), or
- (2) Meet the requirements as specified in 40 CFR, Section 180.2020 Pesticide Chemicals Not Requiring a Tolerance or Exemption from Tolerance-Non-food determinations.

[Source: Added at 37 Ok Reg 1373, eff 9-11-20]

310:258-5-6. Rodent bait stations

Rodent bait shall be contained in a covered, tamper-resistant bait station.

[Source: Added at 37 Ok Reg 1373, eff 9-11-20]

310:258-5-7. Tracking powders, pest control and monitoring

- (a) Except as specified in (b) of this Section, a tracking powder pesticide may not be used in an unattended establishment.
- (b) If used, a nontoxic tracking powder such as talcum or flour may not contaminate food, equipment, utensils, and single-service articles.

[Source: Added at 37 Ok Reg 1373, eff 9-11-20]

310:258-5-8. Medication, restriction

Only medicines that are stored or displayed for retail sale shall be allowed in an unattended food service establishment.

[Source: Added at 37 Ok Reg 1373, eff 9-11-20]

SUBCHAPTER 7. FOOD

310:258-7-1. Prohibited food sales

The following foods shall not be offered for sale in an unattended food establishment:

- (1) Unpackaged foods with the exception of whole uncut fruits or vegetables,
- (2) Dispensed beverage,
- (3) Salvaged food as regulated under OAC 310:260 Subchapter seven (7),
- (4) Raw molluscan shellfish,
- (5) Mushrooms harvested in the wild.

[Source: Added at 37 Ok Reg 1373, eff 9-11-20]

310:258-7-2. Safe, unadulterated, and honestly presented

Food shall be safe, unadulterated, and honestly presented.

- (1) Food shall be offered for human consumption in a way that does not mislead or misinform the consumer.
- (2) Food color additives, colored overwraps, or lights may not be used to misrepresent the true appearance, color, or quality of a food.
- (3) Manufacturers' dating information on foods may not be concealed or altered.

[Source: Added at 37 Ok Reg 1373, eff 9-11-20]

310:258-7-3. Additives

Food may not contain unapproved food additives or additives that exceed amounts specified in 21 CFR Sections 170-180 relating to food additives, generally recognized as safe or prior sanctioned substances that exceed amounts specified in 21 CFR, Sections 181-186, substances that exceed amounts specified in 9 CFR, Subpart C Section 424.21(b), food ingredients and sources of radiation, or pesticide residues that exceed provisions specified in 40 CFR, Part 180 Tolerances and

Exemptions for Pesticides Chemicals Residues in Food.

[Source: Added at 37 Ok Reg 1373, eff 9-11-20]

310:258-7-4. Standards of identity

Packaged food shall comply with standard of identity requirements in 21 CFR, Sections 131-169 and 9 CFR, Section 319, Definitions and Standards of Identity or Composition, and the General requirements in 21 CFR, Part 130 - Food Standards: General, and 9 CFR, Section 319 Subpart A - General.

[Source: Added at 37 Ok Reg 1373, eff 9-11-20]

310:258-7-5. Food labels

(a) Packaged food shall be labeled as specified in law, including 21 CFR, Part 101 - Food Labeling, and 9 CFR, Part 317 Labeling, Marking Devices, and Containers.

(b) Label information shall include:

- (1) The common name of the food, or absent a common name, an adequately descriptive identity statement;
- (2) If made from two or more ingredients, a list of ingredients and sub-ingredients in descending order of predominance by weight, including a declaration of artificial colors, artificial flavors, and chemical preservatives, if contained in the food;
- (3) An accurate declaration of the quantity of contents;
- (4) The name and place of business of the manufacturer, packer, or distributor; and
- (5) The name of the food source for each major food allergen contained in the food unless the food source is already part of the common or usual name of the respective ingredient.
- (6) Except as exempted in the Federal Food, Drug, and Cosmetic Act, 21 U.S.C., Section 343, nutrition labeling as specified in 21 CFR, Part 101 - Food Labeling and 9 CFR, Part 317 Subpart B, Nutrition Labeling.
- (7) For any salmonid fish containing canthaxanthin or astaxanthin as a color additive, the labeling of the bulk fish container, including a list of ingredients, displayed on the retail container or by other written means, such as a counter card, that discloses the use of canthaxanthin or astaxanthin.

[Source: Added at 37 Ok Reg 1373, eff 9-11-20]

310:258-7-6. Compliance with food law

(a) Food shall be obtained from sources that comply with this Chapter and applicable laws.

(b) An establishment may sell packaged foods prepared by a facility that is in compliance with OAC 310:260 (relating to good manufacturing practices), United States Department of Agriculture, or the Oklahoma Department of Agriculture Food and Forestry.

[Source: Added at 37 Ok Reg 1373, eff 9-11-20 ; Amended at 39 Ok Reg 1257, eff 9-11-22]

310:258-7-7. Approved water system

A license holder shall obtain potable water from:

- (1) A community water system; or
- (2) A non-community water system; or
- (3) A non-transient, non-community water system that is constructed, maintained and operated in accordance with the Oklahoma Water Supply Systems Act, codified at 27A O.S. Section 2-6-301 et seq., and the rules promulgated thereunder.

[Source: Added at 37 Ok Reg 1373, eff 9-11-20]

310:258-7-8. Bottled drinking water

Bottled drinking water used or sold in an unattended food establishment shall be obtained from approved sources in accordance with 21 CFR, Part 129 - Processing and Bottling of Bottled Drinking Water and OAC 310:225.

[Source: Added at 37 Ok Reg 1373, eff 9-11-20]

310:258-7-9. Milk products

(a) Food products listed below shall meet standards as specified in 2 O.S. Section 7-401 et seq.

- (1) Frozen milk products, such as ice cream; and
- (2) Cheese.

(b) Milk products shall be obtained pasteurized and in compliance with Grade A Standards.

[Source: Added at 37 Ok Reg 1373, eff 9-11-20 ; Amended at 39 Ok Reg 1257, eff 9-11-22]

310:258-7-10. Fish

(a) Fish that are received for sale or service shall be:

- (1) Commercially and legally caught or harvested; or
- (2) Approved for sale or service.

(b) Raw molluscan shellfish may not be received for sale.

[Source: Added at 37 Ok Reg 1373, eff 9-11-20]

310:258-7-11. Juice

Pre-packaged juice shall:

- (1) Be obtained from a processor with a HACCP system as specified in 21 CFR, Part 120 Hazard Analysis and Critical Control (HACCP) Systems; and
- (2) Be obtained pasteurized or otherwise treated to attain a 5-log reduction of the most resistant microorganism of public health significance as specified in 21 CFR, Part 120.24 Process Controls.

[Source: Added at 37 Ok Reg 1373, eff 9-11-20]

310:258-7-12. Food in a hermetically sealed container

Food in a hermetically sealed container shall be obtained from a food processing plant that is regulated by the food regulatory agency that has jurisdiction over the plant.

[Source: Added at 37 Ok Reg 1373, eff 9-11-20]

310:258-7-13. Package integrity

Food packages shall be in good condition and protect the integrity of the contents so that the food is not exposed to adulteration or potential contaminants.

[Source: Added at 37 Ok Reg 1373, eff 9-11-20]

310:258-7-14. Vended time/temperature control for safety food, original container

Time/Temperature Control for Safety Food dispensed through a vending machine, vending unit, or customer self-service unit shall be in the package in which it was placed at the unattended food establishment or food processing plant at which it was prepared.

[Source: Added at 37 Ok Reg 1373, eff 9-11-20]

310:258-7-15. Temperature

- (a) Except as specified in (b) of this Section, refrigerated, Time/Temperature Control for Safety Food shall be at a temperature of 5°C (41°F) or below when received.
- (b) If a temperature other than 5°C (41°F) for a Time/Temperature Control for Safety Food is specified in law governing its distribution, the food may be received at the specified temperature.
- (c) A food that is labeled frozen and shipped frozen by a food processing plant shall be received frozen.
- (d) Upon receipt, Time/Temperature Control for Safety Food shall be free of evidence of previous temperature abuse.

[Source: Added at 37 Ok Reg 1373, eff 9-11-20]

310:258-7-16. Frozen food

Stored frozen foods shall be maintained frozen.

[Source: Added at 37 Ok Reg 1373, eff 9-11-20]

310:258-7-17. Thawing

Time/Temperature Control for Safety Food shall be thawed under refrigeration that maintains the food temperature at 5°C (41°F) or less.

[Source: Added at 37 Ok Reg 1373, eff 9-11-20]

310:258-7-18. Time/temperature control for safety food cold holding

Time/Temperature Control for Safety Food for cold holding shall be maintained at a temperature of 5°C (41°F) or less.

[Source: Added at 37 Ok Reg 1373, eff 9-11-20]

310:258-7-19. Discarding unsafe, adulterated, or contaminated food

- (a) A food that is unsafe, adulterated, or not honestly presented shall be discarded.
- (b) Food that is not from an approved source shall be discarded.
- (c) Time/Temperature Control for Safety Food shall be discarded if it:
 - (1) Exceeds the use by date on the package,
 - (2) Exceeds 41°F for 4 hours.
- (d) Food may be examined or sampled by the Department as often as necessary for enforcement of these rules and regulations. The Department may place an embargo on food in accordance with the provisions of Title 63 O.S. Section 1-1105.

[Source: Added at 37 Ok Reg 1373, eff 9-11-20]

310:258-7-20. Storage or display of food in contact with water or ice

Packaged food shall not be stored in direct contact with ice or water.

[Source: Added at 37 Ok Reg 1373, eff 9-11-20]

310:258-7-21. Food and single service article storage

- (a) Except as specified in (b) and (c) of this Section, food and single service articles shall be protected from contamination by storing the food:
 - (1) In a clean, dry location;
 - (2) Where it is not exposed to splash, dust, or other contamination; and
 - (3) At least 15 cm (6 inches) above the floor.
- (b) Food in packages and working containers may be stored less than 15 cm (6 inches) above the floor on case lot handling equipment.
- (c) Pressurized beverage containers, cased food in waterproof containers such as bottles or cans, and milk containers in plastic crates may be stored on a floor that is clean and not exposed to floor moisture.

[Source: Added at 37 Ok Reg 1373, eff 9-11-20]

310:258-7-22. Food and single service article storage, prohibited areas

- Food and single-service articles may not be stored:
- (1) In locker rooms;

- (2) In toilet rooms;
- (3) In dressing rooms;
- (4) In garbage rooms;
- (5) In mechanical rooms;
- (6) Under sewer lines that are not shielded to intercept potential drips;
- (7) Under leaking water lines, including leaking automatic fire sprinkler heads, or under lines on which water has condensed;
- (8) Under open stairwells; or
- (9) Under other sources of contamination.

[Source: Added at 37 Ok Reg 1373, eff 9-11-20]

310:258-7-23. Food display

Except for nuts in the shell and whole, raw fruits and vegetables that are intended for hulling, peeling, or washing by the consumer before consumption, food on display shall be protected from contamination by the use of packaging.

[Source: Added at 37 Ok Reg 1373, eff 9-11-20]

310:258-7-24. Condiments, protection

Condiments at a vending machine location shall be in individual packages.

[Source: Added at 37 Ok Reg 1373, eff 9-11-20]

310:258-7-25. Returned food and re-use of single service article

- (a) After being sold and in the possession of a consumer, food that is unused or returned by the consumer may not be offered as food for human consumption.
- (b) The permit holder shall take reasonable steps necessary to discourage individuals from returning food or beverages that have not been selected for purchase.
- (c) Single-service articles may not be reused.

[Source: Added at 37 Ok Reg 1373, eff 9-11-20]

310:258-7-26. Miscellaneous sources of contamination

Food shall be protected from contamination not otherwise specified.

[Source: Added at 37 Ok Reg 1373, eff 9-11-20]

SUBCHAPTER 9. EQUIPMENT CONSTRUCTION

310:258-9-1. Single-service article characteristics

Materials that are used to make single-service articles:

- (1) May not:
 - (A) Allow the migration of deleterious substances, or
 - (B) Impart colors, odors, or tastes to food; and
- (2) Shall be:
 - (A) Safe, and
 - (B) Clean.

[Source: Added at 37 Ok Reg 1373, eff 9-11-20]

310:258-9-2. Nonfood-contact surfaces

- (a) Nonfood-contact surfaces of equipment that are exposed to splash, spillage, or other food soiling or that require frequent cleaning shall be constructed of a corrosion-resistant, nonabsorbent, and smooth material.
- (b) Nonfood-contact surfaces shall be free of unnecessary ledges, projections, and crevices, and designed and constructed to allow easy cleaning and to facilitate maintenance.
- (c) Nonfood-contact surfaces of equipment shall be kept free of an accumulation of dust, dirt, food residue, and other debris.
- (d) Nonfood-contact surfaces of equipment shall be cleaned at a frequency necessary to preclude accumulation of soil residues.

[Source: Added at 37 Ok Reg 1373, eff 9-11-20]

310:258-9-3. Equipment

Equipment used in an unattended food establishment shall be designated as "commercial" or "commercial grade" by the manufacturer if the equipment is used to meet or maintain temperature for time/temperature control for safety food. Equipment shall be designed and constructed to be durable and to retain their characteristic qualities under normal use conditions.

[Source: Added at 37 Ok Reg 1373, eff 9-11-20]

310:258-9-4. Cold holding capacities

Equipment for holding cold food shall be sufficient in number and capacity to maintain food temperatures at 41°F or below.

[Source: Added at 37 Ok Reg 1373, eff 9-11-20]

310:258-9-5. Cold holding equipment, design

Each cold holding unit shall be equipped with:

- (1) Self-closing doors that allow food to be viewed without opening the door of the unit,
- (2) An automatic self-locking mechanism that prevents the consumer from accessing the food items inside the unit if the ambient temperature rises above 41°F. The locking mechanism shall not prevent the unit from being closed if it has been activated.

[Source: Added at 37 Ok Reg 1373, eff 9-11-20]

310:258-9-6. Frozen holding equipment, design

Each frozen holding unit shall be equipped with:

- (1) Self-closing doors that allow food to be viewed without opening the door of the unit,
- (2) An automatic self-locking mechanism that prevents the consumer from accessing the food items inside the unit if the ambient temperature rises above 32°F. The locking mechanism shall not prevent the unit from being closed if it has been activated.

[Source: Added at 37 Ok Reg 1373, eff 9-11-20]

310:258-9-7. Temperature measuring devices for ambient air

- (a) Ambient air temperature measuring devices that are scaled in Celsius or dually scaled in Celsius and Fahrenheit shall be designed to be easily readable and accurate to 1.5°C in the intended range of use.
- (b) Ambient air temperature measuring devices that are scaled only in Fahrenheit shall be accurate to 3°F in the intended range of use.

[Source: Added at 37 Ok Reg 1373, eff 9-11-20]

310:258-9-8. Temperature measuring devices

- (a) In a mechanically refrigerated storage unit, the sensor of a temperature measuring device shall be located to measure the air temperature in the warmest part of a mechanically refrigerated unit.
- (b) Cold holding equipment used for potentially hazardous food shall be designed to include and shall be equipped with at least one integral or permanently affixed temperature measuring device that is located to allow easy viewing of the device's temperature display.
- (c) Temperature measuring devices shall be designed to be easily readable.

[Source: Added at 37 Ok Reg 1373, eff 9-11-20]

310:258-9-9. Condenser unit, separation

If a condenser unit is an integral component of equipment, the condenser unit shall be separated from the food and food storage space by a dustproof barrier.

[Source: Added at 37 Ok Reg 1373, eff 9-11-20]

310:258-9-10. Case lot handling equipment

Equipment, such as dollies, pallets, racks, and skids used to store and transport large quantities of packaged foods received from a supplier in a cased or overwrapped lot, shall be designed to be moved by hand or by conveniently available equipment such as hand trucks and forklifts.

[Source: Added at 37 Ok Reg 1373, eff 9-11-20]

310:258-9-11. Fixed equipment, spacing or sealing

(a) Equipment that is fixed because it is not easily movable shall be installed so that it is:

- (1) Spaced to allow access for cleaning along the sides, behind, and above the equipment;
- (2) Spaced from adjoining equipment, walls, and ceilings a distance of not more than 1 millimeter or one thirty-second inch; or
- (3) Sealed to adjoining equipment or walls, if the equipment is exposed to spillage or seepage.

(b) Counter-mounted equipment that is not easily movable shall be installed to allow cleaning of the equipment and areas underneath and around the equipment by being:

- (1) Sealed to the counter; or
- (2) Elevated on legs.

[Source: Added at 37 Ok Reg 1373, eff 9-11-20]

310:258-9-12. Fixed equipment, elevation or sealing

(a) Floor-mounted equipment that is not easily movable shall be sealed to the floor or elevated on legs that provide at least a 15 centimeter (6 inch) clearance between the floor and the equipment.

(b) This Section does not apply to display shelving units, display refrigeration units, and display freezer units located in the consumer shopping areas of a retail food store, if the floor under the units is maintained clean.

(c) Counter-mounted equipment that is not easily movable shall be elevated on legs that provide at least a 10 centimeter (4 inch) clearance between the table and the equipment.

(d) The clearance space between the counter and counter-mounted equipment may be:

- (1) 7.5 centimeters (3 inches) if the horizontal distance of the counter top under the equipment is no more than 50 centimeters (20 inches) from the point of access for cleaning; or
- (2) 5 centimeters (2 inches) if the horizontal distance of the counter top under the equipment is no more than 7.5 centimeters (3 inches) from the point of access for cleaning.

[Source: Added at 37 Ok Reg 1373, eff 9-11-20]

310:258-9-13. Good repair and proper adjustment

(a) Equipment shall be maintained in a state of good repair.

(b) Equipment components such as doors, seals, hinges, fasteners, and kick plates shall be kept intact, tight, and adjusted in accordance with manufacturer's specifications.

[Source: Added at 37 Ok Reg 1373, eff 9-11-20]

310:258-9-14. Microwave ovens [REVOKED]

[Source: Added at 37 Ok Reg 1373, eff 9-11-20 ; Revoked at 39 Ok Reg 1257, eff 9-11-22]

SUBCHAPTER 11. FACILITY CONSTRUCTION

310:258-11-1. Location limitation

An unattended food establishment shall be located in the interior of a building that is not accessible by the general public. Access to the establishment shall be limited to a defined population, including but not limited to employees or occupants of the building where the establishment is located.

[Source: Added at 37 Ok Reg 1373, eff 9-11-20]

310:258-11-2. Video surveillance

An unattended food establishment shall provide continuous video surveillance of areas where consumers view, select, handle and purchase products that provides sufficient resolution to identify situations that may compromise food safety or food defense.

(1) Video surveillance recordings shall be maintained and made available for inspection upon request by a representative of the State Department of Health or another applicable regulatory agency within twenty-four (24) hours of such request.

(2) Video surveillance recordings shall be held by the establishment for a minimum of fourteen (14) calendar days after the date of the surveillance.

[Source: Added at 37 Ok Reg 1373, eff 9-11-20]

310:258-11-3. Floors, walls, and ceiling, characteristics

(a) Materials for floor, wall, and ceiling surfaces under conditions of normal use shall be:

(1) Smooth, durable, and easily cleanable for areas where unattended food establishment operations are conducted.

(2) Light Reflectivity Value (LRV) of walls and ceiling surfaces shall be fifty percent (50%) or greater to aid in thorough cleaning of these areas.

(b) Except for antislip floor coverings or applications that may be used for safety reasons, floors, floor coverings, walls, wall coverings, and ceilings shall be designed, constructed, and installed so they are smooth and easily cleanable.

(c) Mats and duckboards used on the floor shall be designed to be removable and easily cleanable.

(d) Floor and wall junctures shall be coved and closed to no larger than one (1) mm (one thirty-second 1/32 inch).

(e) Studs, joists, and rafters may not be exposed.

(f) Wall and ceiling covering materials shall be attached so that they are easily cleanable.

(g) Concrete, porous blocks, or bricks used for indoor wall construction shall be finished and sealed to provide a smooth, nonabsorbent, easily cleanable surface.

(h) Utility service lines and pipes may not be unnecessarily exposed.

(1) Exposed utility service lines and pipes shall be installed so they do not obstruct or prevent cleaning of the floors, walls, or ceilings.

(2) Exposed horizontal utility service lines and pipes may not be installed on the floor.

(i) Attachments to walls and ceilings such as light fixtures, mechanical room ventilation system components, vent covers, wall mounted fans, decorative items, and other attachments shall be easily cleanable.

[Source: Added at 37 Ok Reg 1373, eff 9-11-20]

310:258-11-4. Exterior walls and roofs

Perimeter walls and roofs of an establishment shall effectively protect the establishment from the weather and the entry of insects, rodents, and other animals.

[Source: Added at 37 Ok Reg 1373, eff 9-11-20]

310:258-11-5. Lighting, intensity

The light intensity shall be at least 108 lux (10 foot candles) at a distance of 75 cm (30 inches) above the floor, in walk-in refrigeration units and dry food storage areas and in other areas and rooms during periods of cleaning.

[Source: Added at 37 Ok Reg 1373, eff 9-11-20]

310:258-11-6. Approved plumbing system

A plumbing system shall be designed, constructed, installed and maintained according to law.

[Source: Added at 37 Ok Reg 1373, eff 9-11-20]

310:258-11-7. Receptacles

(a) Receptacles and waste handling units for refuse, recyclables, and returnables and for use with materials containing food residue shall be durable, cleanable, insect- and rodent-resistant, leak-proof, and nonabsorbent.

(b) Receptacles and waste handling units for refuse, recyclables, and returnables shall be thoroughly cleaned in a way that does not contaminate food, equipment, or single-service articles, and waste water shall be disposed of as specified by law.

(c) Soiled receptacles and waste handling units for refuse, recyclables, and returnables shall be cleaned at a frequency necessary to prevent them from developing a buildup of soil or becoming attractants for

insects and rodents.

(e) Refuse, recyclables, and returnables shall be removed from the premises at a frequency that will minimize the development of objectionable odors and other conditions that attract or harbor insects and rodents.

[Source: Added at 37 Ok Reg 1373, eff 9-11-20]

310:258-11-8. Storage areas, redeeming machines, receptacles, and waste handling units, location

(a) An area designated for refuse, recyclables, returnables, and, except as specified in (b) of this Section, a redeeming machine for recyclables or returnables shall be located so that it is separate from food, equipment, and single-service articles to prevent the creation of a public health hazard or nuisance.

(b) A redeeming machine may be located in the packaged food storage area or consumer area of an establishment, if food, equipment, and single-service and single-use articles are not subject to contamination from the machines and a public health hazard or nuisance is not created.

(d) Refuse, recyclables, and returnables shall be stored in receptacles or waste handling units so that they are inaccessible to insects and rodents.

(e) Storage areas, enclosures, and receptacles for refuse, recyclables, and returnables shall be maintained in good repair.

(f) A storage area and enclosure for refuse, recyclables, or returnables shall be maintained free of unnecessary items and clean.

[Source: Added at 37 Ok Reg 1373, eff 9-11-20]

SUBCHAPTER 13. ADMINISTRATION

310:258-13-1. Preventing health hazards, provision for conditions not addressed

(a) If necessary to protect against public health hazards or nuisances, the Department may impose specific requirements in addition to the requirements contained in this Chapter that are authorized by law.

(b) The regulatory authority shall document the conditions that necessitate the imposition of additional requirements and the underlying public health rationale. The documentation shall be provided to the license applicant or license holder and a copy shall be maintained in the Department file for the unattended food establishment.

[Source: Added at 37 Ok Reg 1373, eff 9-11-20 ; Amended at 39 Ok Reg 1257, eff 9-11-22]

310:258-13-2. When plans are required

A license applicant or license holder shall submit to the Department properly prepared plans and specifications for review and approval before:

- (1) The construction of an unattended food establishment;

- (2) The conversion of an existing structure for use as an unattended food establishment.

[Source: Added at 37 Ok Reg 1373, eff 9-11-20]

310:258-13-3. Contents of the plans and specifications

The plans and specifications for an unattended food establishment shall include the following information to demonstrate conformance with Code provisions:

- (1) Intended menu;
- (2) Anticipated volume of food to be stored and sold;
- (3) Proposed equipment types, manufacturer, and model numbers (if available);
- (4) Proposed floor plan; and
- (5) Other information that may be required by the Department for the proper review of the proposed construction, conversion or modification, and procedures for operating an unattended food establishment.

[Source: Added at 37 Ok Reg 1373, eff 9-11-20]

310:258-13-4. Trade secrets

The Department shall treat as confidential in accordance with law, information that meets the criteria specified in law for a trade secret and is contained on inspection report forms and in the plans and specifications submitted.

[Source: Added at 37 Ok Reg 1373, eff 9-11-20]

310:258-13-5. Preoperational inspections

The regulatory authority shall conduct one or more preoperational inspections to verify that the unattended food establishment is constructed and equipped in accordance with the approved plans and is in compliance with law and this Chapter.

[Source: Added at 37 Ok Reg 1373, eff 9-11-20 ; Amended at 39 Ok Reg 1257, eff 9-11-22]

310:258-13-6. Prerequisite for operation

A person may not operate an unattended food establishment without a valid license to operate issued by the Commissioner of Health.

[Source: Added at 37 Ok Reg 1373, eff 9-11-20]

310:258-13-7. Unattended food establishment license fee

- (a) The following are associated fees for unattended food establishments.
 - (1) Initial - \$150.00
 - (2) Renewal - \$100.00
 - (3) Late Renewal - \$125.00
- (b) Late renewal fees apply to any renewal application postmarked and received thirty (30) days after the expiration date of the license.

(c) A license not renewed within ninety (90) days of the date shall be ineligible for the renewal fee. Thereafter, the establishment shall be required to pay the initial fee. The establishment that has not had a valid license for one (1) year is considered a new establishment and a new Plan Review and the initial license fee shall be required.

[Source: Added at 37 Ok Reg 1373, eff 9-11-20 ; Amended at 39 Ok Reg 1257, eff 9-11-22]

310:258-13-8. Form of submission

A person desiring to operate an unattended food establishment shall submit to the regulatory authority a written application for a license on a form provided by the Department.

[Source: Added at 37 Ok Reg 1373, eff 9-11-20 ; Amended at 39 Ok Reg 1257, eff 9-11-22]

310:258-13-9. Qualifications and responsibilities of applicants

To qualify for a license, an applicant shall:

- (1) Be an owner, or officer of the unattended food establishment;
- (2) Comply with the requirements of this Chapter;
- (3) Allow access to the unattended food establishment;
- (5) Provide any required information;
- (6) Pay the applicable license fees at the time the application is submitted;
- (7) Pay the applicable license renewal fees.

[Source: Added at 37 Ok Reg 1373, eff 9-11-20]

310:258-13-10. Contents of the application

The application shall include:

- (1) The name, mailing address, telephone number, signature of the person applying for the license, and the name, mailing address, and location of the unattended food establishment;
- (2) Information specifying whether the unattended food establishment is owned by an association, corporation, individual, partnership, or other legal entity;
- (3) The Department shall issue a license to the applicant after:
 - (A) A properly completed application is received;
 - (B) The required fees are received;
 - (C) The plans, specifications, and information, if applicable, are reviewed; and
 - (D) A pre-licensing inspection shows that the establishment is built or remodeled in accordance with the approved plans and specifications and that the establishment is in compliance with this Chapter and meets the Department's criteria for a license; or any
 - (E) Other information required by the regulatory authority.

[Source: Added at 37 Ok Reg 1373, eff 9-11-20 ; Amended at 39 Ok Reg 1257, eff 9-11-22]

310:258-13-11. New, converted, or remodeled establishments

For unattended food establishments that are required to submit plans, the Commissioner of Health shall issue a license to the applicant after:

- (1) A properly completed application is submitted;
- (2) The required fee is submitted;
- (3) The required plans, specifications, and information are reviewed and approved; and
- (4) A preoperational inspection shows that the establishment is built or remodeled in accordance with the approved plans; and
- (5) Specifications that the establishment is in compliance with this Chapter.

[Source: Added at 37 Ok Reg 1373, eff 9-11-20]

310:258-13-12. Existing establishments, license renewal, and change of ownership

The Commissioner of Health may renew a license for an existing unattended food establishment or may issue a license to a new owner of an existing unattended food establishment after a properly completed application is submitted, reviewed, and approved, the fees are paid, and an inspection shows that the establishment is in compliance with this Chapter.

[Source: Added at 37 Ok Reg 1373, eff 9-11-20]

310:258-13-13. Denial of application for license, notice

If an application for a license to operate is denied, the regulatory authority shall provide the applicant with a notice that includes:

- (1) The specific reasons and Chapter citations for the license denial;
- (2) The actions, if any, that the applicant must take to qualify for a license; and
- (3) Advisement of the applicant's right of appeal.

[Source: Added at 37 Ok Reg 1373, eff 9-11-20 ; Amended at 39 Ok Reg 1257, eff 9-11-22]

310:258-13-14. Responsibilities of the license holder

Upon acceptance of the license issued by the Commissioner of Health, the license holder in order to retain the license shall:

- (1) Post the license in a prominent public location inside the unattended food establishment;
- (2) Comply with the provisions of this Chapter;
- (3) Immediately discontinue operations and notify the regulatory authority if an imminent health hazard may exist as specified under OAC 310:285-13-26;
- (4) Allow representatives of the Department access to the unattended food establishment;
- (5) Comply with directives of the regulatory authority including time frames for corrective actions specified in inspection reports, notices, orders, warnings, and other directives issued by the

Department in regard to the license holder's unattended food establishment or in response to community emergencies;

- (6) Accept notices issued and served by the Department according to law;
- (7) Be subject to the administrative, civil, injunctive, and criminal remedies authorized in law for failure to comply with this Chapter or a directive of the Department, including time frames for corrective actions specified in inspection reports, notices, orders, warnings, and other directives; and
- (8) If applicable, submit the annual renewal application and pay all renewal license and late fees.

[Source: Added at 37 Ok Reg 1373, eff 9-11-20 ; Amended at 39 Ok Reg 1257, eff 9-11-22]

310:258-13-15. Public notification

The unattended food establishment shall have a sign readily visible at the automated payment station stating:

- (1) The name and mailing address of the business entity responsible for the establishment and to whom complaints and comments should be addressed; and
- (2) The telephone, email or web information for the responsible business entity, when applicable.

[Source: Added at 37 Ok Reg 1373, eff 9-11-20]

310:258-13-16. Licenses not transferable

A license may not be transferred from one person to another person, from one unattended food establishment to another, from one physical address to another, from one corporation to another, from one limited liability company or corporation to another, from one partnership to another, or from one type of operation to another.

[Source: Added at 37 Ok Reg 1373, eff 9-11-20]

310:258-13-17. Competency of inspectors

An authorized representative of the Department who inspects an establishment or conducts plan review for compliance with this Chapter shall have the knowledge, skills, and ability to adequately perform the required duties, and be licensed pursuant to 59 O.S., Section 1150.1 et seq.

[Source: Added at 37 Ok Reg 1373, eff 9-11-20]

310:258-13-18. Allowed at reasonable times after due notice

After the regulatory authority presents official credentials and provides notice of the purpose of, and an intent to conduct, an inspection, the person in charge shall allow the regulatory authority to determine if the unattended food establishment is in compliance with this Chapter by allowing access to the establishment, allowing inspection, and providing information and records specified in this Chapter and to which the

regulatory authority is entitled according to law.

[Source: Added at 37 Ok Reg 1373, eff 9-11-20 ; Amended at 39 Ok Reg 1257, eff 9-11-22]

310:258-13-19. Refusal, notification of right to access, and final request for access

If a person denies access to the regulatory authority, the regulatory authority shall:

- (1) Inform the person that:
 - (A) The license holder is required to allow access to the regulatory authority as specified under OAC 310:285-13-18 of this Chapter,
 - (B) The regulatory authority's access is a condition of the acceptance and retention of an unattended food establishment license to operate as specified under OAC 310:285-11-14(4), and
 - (C) If access is denied, an order issued allowing access, hereinafter referred to as an inspection order, may be obtained according to law; and
- (2) Make a final request for access.

[Source: Added at 37 Ok Reg 1373, eff 9-11-20 ; Amended at 39 Ok Reg 1257, eff 9-11-22]

310:258-13-20. Refusal, reporting

If after the regulatory authority presents credentials and provides notice as specified under OAC 310:285-13-18, explains the authority upon which access is requested, and makes a final request for access as specified in OAC 310:285-13-19, the person in charge continues to refuse access, the regulatory authority shall provide details of the denial of access on an inspection report form.

[Source: Added at 37 Ok Reg 1373, eff 9-11-20 ; Amended at 39 Ok Reg 1257, eff 9-11-22]

310:258-13-21. Inspection order to gain access

If denied access to an unattended food establishment for an authorized purpose and after complying with OAC 310:285-13-19, the Department may issue, or apply for the issuance of, an inspection order to gain access as provided in law.

[Source: Added at 37 Ok Reg 1373, eff 9-11-20]

310:258-13-22. Documenting information and observations

The regulatory authority shall document on an inspection report form:

- (1) Administrative information about the unattended food establishment's legal identity, street and mailing addresses, type of establishment and operation as specified, inspection date, and other information that may be required; and
- (2) Specific factual observations of violative conditions or other deviations from this Chapter that require correction by the

license holder.

[Source: Added at 37 Ok Reg 1373, eff 9-11-20 ; Amended at 39 Ok Reg 1257, eff 9-11-22]

310:258-13-23. Issuing report and obtaining acknowledgment of receipt

At the conclusion of the inspection, the regulatory authority shall provide a copy of the completed inspection report and the notice to correct violations to the license holder or to the person in charge, and request a signed acknowledgment of receipt.

[Source: Added at 37 Ok Reg 1373, eff 9-11-20 ; Amended at 39 Ok Reg 1257, eff 9-11-22]

310:258-13-24. Refusal to sign acknowledgment

The regulatory authority shall:

- (1) Inform a person who declines to sign an acknowledgment of receipt of inspectional findings as specified under OAC 310:285-13-23:
 - (A) An acknowledgment of receipt is not an agreement with findings,
 - (B) Refusal to sign an acknowledgment of receipt will not affect the license holder's obligation to correct the violations noted in the inspection report within the timeframes specified, and
 - (C) A refusal to sign an acknowledgment of receipt is noted in the inspection report and conveyed to the Department's historical record for the unattended food establishment; and
- (2) Make a final request that the person in charge sign an acknowledgment receipt of inspectional findings.

[Source: Added at 37 Ok Reg 1373, eff 9-11-20 ; Amended at 39 Ok Reg 1257, eff 9-11-22]

310:258-13-25. Public information

Except as specified in OAC 310:285-13-4, the Department shall treat the inspection report as a public document and shall make it available for disclosure to a person who requests it as provided in law.

[Source: Added at 37 Ok Reg 1373, eff 9-11-20]

310:258-13-26. Ceasing operations and reporting

A license holder shall immediately discontinue operations and notify the regulatory authority if an imminent health hazard exists because of an emergency such as a fire, flood, sewage backup, insufficient refrigerated food storage facilities available, substantial evidence or presence of a large number of insects or evidence of rodents contaminating food, misuse of poisonous or toxic materials, onset of an apparent foodborne illness outbreak, interruption of electrical service for more than 4 hours, severe structural damage in the facility, gross unsanitary occurrence or condition, or other circumstance as determined

by the Commissioner of Health, or his designee, that shall endanger public health.

[Source: Added at 37 Ok Reg 1373, eff 9-11-20 ; Amended at 39 Ok Reg 1257, eff 9-11-22]

310:258-13-27. Resumption of operations

If operations are discontinued as specified under OAC 310:285-13-26 or otherwise according to law, the license holder shall notify the regulatory authority before resuming operations.

[Source: Added at 37 Ok Reg 1373, eff 9-11-20 ; Amended at 39 Ok Reg 1257, eff 9-11-22]

310:258-13-28. Timely correction

- (a) The license holder shall at the time of inspection correct any violation of this Chapter.
- (b) Considering the nature of the potential hazard involved and the complexity of the corrective action needed, the Department may agree to or specify a longer time frame, not to exceed 10 calendar days after the inspection, for the license holder to correct a violation.
- (c) If corrections are not made according to (a) or (b) of this section, then the facility is subject to enforcement action.

[Source: Added at 39 Ok Reg 1257, eff 9-11-22]

310:258-13-29. Documentation of correction

- (a) After observing at the time of inspection a correction of a violation, the regulatory authority shall enter the violation and information about the corrective action on the inspection report.
- (b) After receiving notification that the license holder has corrected a violation, or at the end of the specified period of time, the Department shall document the information and enter the report in the Department's records.
- (c) In determining if a re-inspection is required, the Department shall count a violation number only once regardless of how many separate violations under the violation number are listed on the inspection sheet.

[Source: Added at 37 Ok Reg 1373, eff 9-11-20 ; Amended at 39 Ok Reg 1257, eff 9-11-22]

CHAPTER 260. GOOD MANUFACTURING PRACTICE REGULATIONS

[**Authority:** 63 O.S.1981, §§ 1-1101 et seq.]

[**Source:** Codified 12-31-91]

SUBCHAPTER 1. GENERAL PROVISIONS

310:260-1-1. Purpose; citation

(a) The rules in this Chapter implement 63 O.S. Section 1-1101 et seq. The purpose of this Chapter is to safeguard public health and provide to consumers food that is safe, unadulterated, and honestly presented. This Chapter establishes definitions; sets standards for management and personnel, food operations, and equipment and facilities; and provides for food establishment plan review, license issuance, inspection, employee restriction, and license suspension.

(b) These rules and regulations may be cited as the Human Foods Good Manufacturing Practice Regulations.

[**Source:** Amended at 37 Ok Reg 1385, eff 9-11-20]

310:260-1-2. Scope

The criteria in this chapter shall apply to all food manufacturing, processing, packing, holding, transporting, or salvage operations conducted within the State of Oklahoma.

[**Source:** Amended at 37 Ok Reg 1385, eff 9-11-20]

310:260-1-3. Incorporation by reference

(a) The following Code of Federal Regulation (CFR) provisions are incorporated by reference as published on July 1, 2019;

- (1) Title 21 CFR, Part 70 COLOR ADDITIVES;
- (2) Title 21 CFR, Part 73 LISTING OF COLOR ADDITIVES EXEMPT FROM CERTIFICATION, Subpart A-Foods;
- (3) Title 21 CFR, Part 82 LISTING OF CERTIFIED PROVISIONALLY LISTED COLORS AND SPECIFICATIONS, Subpart A-General Provisions and Subpart B-Foods, Drugs, and Cosmetics;
- (4) Title 21 CFR, Part 100 GENERAL;
- (5) Title 21 CFR, Part 101 FOOD LABELING;
- (6) Title 21 CFR, Part 102 COMMON OR USUAL NAME FOR NONSTANDARDIZED FOODS;
- (7) Title 21 CFR, Part 104 NUTRITIONAL QUALITY GUIDELINES FOR FOODS;
- (8) Title 21 CFR, Part 105 FOODS FOR SPECIAL DIETARY USE;
- (9) Title 21 CFR, Part 106 INFANT FORMULA REQUIREMENTS PERTAINING TO CURRENT GOOD MANUFACTURING PRACTICE, QUALITY CONTROL PROCEDURES, QUALITY FACTORS, RECORDS AND REPORTS, AND NOTIFICATIONS;

- (10) Title 21 CFR, Part 107 INFANT FORMULA;
- (11) Title 21 CFR, Part 109 UNAVOIDABLE CONTAMINANTS IN FOOD FOR HUMAN CONSUMPTION AND FOOD-PACKAGING MATERIAL, Subpart A-General Provisions and Subpart B-Tolerances for Unavoidable Poisonous or Deleterious Substances;
- (12) Title 21 CFR, Part 110 CURRENT GOOD MANUFACTURING PRACTICE IN MANUFACTURING, PACKING, OR HOLDING HUMAN FOOD;
- (13) Title 21 CFR, Part 111 CURRENT GOOD MANUFACTURING PRACTICE IN MANUFACTURING, PACKAGING, LABELING, OR HOLDING OPERATIONS FOR DIETARY SUPPLEMENTS;
- (14) Title 21 CFR, Part 113 THERMALLY PROCESSED LOW-ACID FOODS PACKAGED IN HERMETICALLY SEALED CONTAINERS;
- (15) Title 21 CFR, Part 114 ACIDIFIED FOODS;
- (16) Title 21 CFR, Part 120 HAZARD ANALYSIS AND CRITICAL CONTROL POINT (HACCP) SYSTEMS;
- (17) Title 21 CFR, Part 123 FISH AND FISHERY PRODUCTS;
- (18) Title 21 CFR, Part 129 PROCESSING AND BOTTLING OF BOTTLED DRINKING WATER;
- (19) Title 21 CFR, Part 136 BAKERY PRODUCTS;
- (20) Title 21 CFR, Part 137 CEREAL FLOURS AND RELATED PRODUCTS;
- (21) Title 21 CFR, Part 139 MACARONI AND NOODLE PRODUCTS;
- (22) Title 21 CFR, Part 145 CANNED FRUITS;
- (23) Title 21 CFR, Part 146 CANNED FRUIT JUICES;
- (24) Title 21 CFR, Part 150 FRUIT BUTTERS, JELLIES, PRESERVES, AND RELATED PRODUCTS;
- (25) Title 21 CFR, Part 152 FRUIT PIES;
- (26) Title 21 CFR, Part 155 CANNED VEGETABLES;
- (27) Title 21 CFR, Part 156 VEGETABLE JUICES;
- (28) Title 21 CFR, Part 158 FROZEN VEGETABLES;
- (29) Title 21 CFR, Part 160 EGGS AND EGG PRODUCTS;
- (30) Title 21 CFR, Part 161 FISH AND SHELLFISH;
- (31) Title 21 CFR, Part 163 CACAO PRODUCTS;
- (32) Title 21 CFR, Part 164 TREE NUT AND PEANUT PRODUCTS;
- (33) Title 21 CFR, Part 166 MARGARINE;
- (34) Title 21 CFR, Part 168 SWEETENERS AND TABLE SIRUPS;
- (35) Title 21 CFR, Part 169 FOOD DRESSINGS AND FLAVORINGS;
- (36) Title 21 CFR, Part 170 FOOD ADDITIVES;
- (37) Title 21 CFR, Part 172 FOOD ADDITIVES PERMITTED FOR DIRECT ADDITION TO FOOD FOR HUMAN CONSUMPTION;
- (38) Title 21 CFR, Part 173 SECONDARY DIRECT FOOD ADDITIVES PERMITTED IN FOOD FOR HUMAN CONSUMPTION;
- (39) Title 21 CFR, Part 174 INDIRECT FOOD ADDITIVES: GENERAL;
- (40) Title 21 CFR, Part 175 INDIRECT FOOD ADDITIVES: ADHESIVES AND COMPONENTS OF COATINGS;

(41) Title 21 CFR, Part 176 INDIRECT FOOD ADDITIVES: PAPER AND PAPERBOARD COMPONENTS;
(42) Title 21 CFR, Part 177 INDIRECT FOOD ADDITIVES: POLYMERS;
(43) Title 21 CFR, Part 178 INDIRECT FOOD ADDITIVES: ADJUVANTS, PRODUCTION AIDS, AND SANITIZERS;
(44) Title 21 CFR, Part 179 IRRADIATION IN THE PRODUCTION, PROCESSING AND HANDLING OF FOOD;
(45) Title 21 CFR, Part 180 FOOD ADDITIVES PERMITTED IN FOOD OR IN CONTACT WITH FOOD ON AN INTERIM BASIS PENDING ADDITIONAL STUDY;
(46) Title 21 CFR, Part 181 PRIOR-SANCTIONED FOOD INGREDIENTS;
(47) Title 21 CFR, Part 182 SUBSTANCES GENERALLY RECOGNIZED AS SAFE;
(48) Title 21 CFR, Part 184 DIRECT FOOD SUBSTANCES AFFIRMED AS GENERALLY RECOGNIZED AS SAFE;
(49) Title 21 CFR, Part 186 INDIRECT FOOD SUBSTANCES AFFIRMED AS GENERALLY RECOGNIZED AS SAFE;
(50) Title 21 CFR, Part 189 SUBSTANCES PROHIBITED FROM USE IN HUMAN FOOD.

(b) For purposes of the provisions adopted by reference, references to the "Secretary" or "Commissioner" shall be deemed to mean the Commissioner of Health for the State of Oklahoma, and "Department" shall be deemed to mean the Oklahoma State Department of Health.

(c) When a provision of the Code of Federal Regulations is incorporated by reference, all citations contained therein are also incorporated by reference, and the definitions contained therein shall apply.

(d) In the event that there are inconsistencies or duplications in the requirements of those provisions incorporated by reference from the CFR, and the requirements otherwise set forth herein, the provisions incorporated from the CFR shall prevail except where the regulations set forth herein are more stringent.

[Source: Amended at 9 Ok Reg 3145, eff 7-1-92 (emergency); Amended at 10 Ok Reg 1615, eff 6-1-93 ; Amended at 10 Ok Reg 3455, eff 7-1-93 (emergency); Amended at 11 Ok Reg 2627, eff 6-25-94 ; Amended at 37 Ok Reg 1385, eff 9-11-20]

310:260-1-4. Memorandums of agreement

Memorandums of agreement may be negotiated where possible with the federal agency to avoid duplication of inspection, when such agreements will satisfactorily fulfill the responsibility of the Commissioner of Health and the federal agency.

310:260-1-5. Exclusion

(a) Persons engaged solely in the harvesting, storage, and distribution of raw, unprocessed agricultural commodities are not subject to the provisions of this Chapter.

(b) Persons engaged solely in the sale of honey products produced under the Oklahoma Honey Sales Act pursuant to Title 63 O.S. 1-1330 et seq. are not subject to the provisions of this Chapter.

(c) Persons engaged solely in the sale of food products produced under the Home Bakery Act of 2013 pursuant to Title 2 O.S. 5-4.1 et seq. are not subject to the provisions of this Chapter.

(d) Persons engaged solely in the sale of food products at a Registered Farmers Market as defined by Title 2 O.S. 5-19 are not subject to the provisions of this Chapter.

(1) These persons are not exempted from Title 63 O.S. 1-1118(B)

(3) in regards to licensure.

(2) Food products shall be labeled with the common food product name, net weight, current ten (10) digit phone number, an address where the product was produced, and shall include the statement, "Packaged in a facility not inspected by the Oklahoma Department of Health." The statement shall be in 10-point type or greater, in a color that provides clear contrast to the background label.

(e) Persons engaged solely in the sale of food products at a County Free fair as defined by Title 2 O.S. 15-67 et seq. are not subject to the provisions of this Chapter.

(1) These persons are not exempted from Title 63 O.S. 1-1118(B)

(3) in regards to licensure.

(2) Food products shall be labeled with the common food product name, net weight, current ten (10) digit phone number, an address where the product was produced, and shall include the statement, "Packaged in a facility not inspected by the Oklahoma Department of Health." The statement shall be in 10-point type or greater, in a color that provides clear contrast to the background label.

[Source: Amended at 9 Ok Reg 3455, eff 7-1-93 (emergency); Amended at 11 Ok Reg 2627, eff 6-25-94 ; Amended at 37 Ok Reg 1407, eff 9-11-20]

310:260-1-6. Definitions

The following words or terms, when used in this chapter, shall have the following meaning, unless the context clearly indicates otherwise:

"Acid food or acidified food" means foods that have an equilibrium pH of 4.6 or below.

"Additive" means as used in this Chapter the following terms:

(A) **"Color additive"** means as stated in the Federal Food, Drug, and Cosmetic Act, 21 U.S.C. Section 321(t) and 21 CFR, Part 70.

(B) **"Food additive"** means as stated in the Federal Food, Drug, and Cosmetic Act, 21 U.S.C. Section 321(s) and 21 CFR, Part 170.

"Adequate" means that which is needed to accomplish the intended purpose in keeping with good public health practice.

"Adulterated" means the definition in 63 O.S. Section 1-1109.

"Approved" means acceptable to the Department based on a determination of conformity with principles, practices, and generally recognized standards that protect public health.

"Batter" means a semi-fluid substance, usually composed of flour and other ingredients, into which principal components of food are

dipped or with which they are coated, or which may be used directly to form bakery foods.

"Beverage" means a liquid for drinking, including water.

"Bin warehouse" means any building where pre-packaged food is stored, the operator or his employee is present no more than two hours daily, and no other operations are conducted.

"Blanching", except for tree nuts and peanuts, means a prepackaging heat treatment of food stuffs for a sufficient time and at a sufficient temperature to partially or completely inactivate the naturally occurring enzymes and to effect other physical or bio-chemical changes in food.

"CFR" means Code of Federal Regulations. Citations in this Chapter to the CFR refer sequentially to the Title, Part, and Section numbers, such as 21 CFR, 178.1010 refers to Title 21, Part 178, Section 1010.

"Code of Federal Regulations" means the compilation of the general and permanent rules published in the Federal Register by the executive departments and agencies of the federal government which is published annually by the U.S. Government Printing Office; and contains FDA rules in 21 CFR, USDA rules in 7 CFR and 9 CFR, EPA rules in 40 CFR, and Wildlife and Fisheries rules in 50 CFR.

"Control measure" means any action or activity to prevent, reduce to acceptable levels, or eliminate a hazard.

"Corrosion-resistant" means capable of maintaining original surface characteristics under prolonged influence of the food to be contacted, the normal use of cleaning compounds and bactericidal solutions, and other conditions-of-use.

"Critical control point" means a point or procedure in a specific food process at which a control measure can be applied and at which control is essential to reduce an identified food hazard to an acceptable level.

"Custom tree nutcracking" means the cracking of whole tree nuts for individual customers. The tree nuts may be brought by the customer from off the premises or may be purchased from the cracker. Tree nuts may not be cracked for resale.

"Department" means the Oklahoma State Department of Health, its duly designated representatives, and a health department designated in writing by the State Commissioner of Health to perform official duties or other acts authorized under the Oklahoma Public Health Code and this Chapter.

"Distressed merchandise" means any food which has been subjected to improper storage; loss of label or identity; smoke, water, fumes, extreme temperatures, pressure or radiation which are due to natural disasters or otherwise; or which may have been rendered unsafe or unsuitable for human or animal consumption or use for any other reason.

"Easily cleanable" means that surfaces are readily accessible and made of such materials and finish and so fabricated that residue may be effectively removed by normal cleaning methods.

"Employee" means the license holder, person in charge, person having supervisory or management duties, person on the payroll, family

member, volunteer, person performing work under contractual agreement, or other person working in an establishment.

"Equipment" means an article that is used in the operation of an establishment such as a freezer, grinder, hood, ice maker, meat block, mixer, oven, reach-in refrigerator, scale, sink, slicer, stove, table, temperature measuring device for ambient air, vending machine, or warewashing machine. It does not include items used for handling or storing large quantities of packaged foods that are received from a supplier in a cased or overwrapped lot, such as hand trucks, forklifts, dollies, pallets, racks, and skids.

"Food" means any raw, cooked, or processed edible substance, ice, beverage or ingredient used or intended for use or for sale in whole or in part for human consumption.

"Food contact surfaces" means those surfaces of equipment and utensils with which food normally comes in contact, and those surfaces from which food may contact drain, drip, or splash back onto surfaces normally in contact with food.

"Food hazard" means any biological, chemical, or physical agent that is reasonably likely to cause illness or injury in the absence of its control.

"Food processing plant" means a commercial operation that manufactures, packages, labels, or stores food for human consumption and provides food for sale or distribution to other business entities such as food processing plants or food establishments.

"Food storage warehouse" means any building, establishment or place where food is stored as a commercial venture or business, or is stored in connection with or as a part of a business.

"HACCP" means Hazard Analysis Critical Control Point.

"HACCP plan" means a written document that delineates the formal procedures for following the Hazard Analysis Critical Control Point principles developed by The National Advisory Committee on Microbiological Criteria for Foods.

"Handwashing sink" means a lavatory, a basin or vessel for washing, a wash basin, or a plumbing fixture especially placed for use in personal hygiene and designed for washing of the hands.

"Hazardous substance" means any substance or mixture of substances which is toxic, corrosive, an irritant, strong sanitizer, flammable or which generates pressure through decomposition.

"Hermetically sealed container" means a container that is designed and intended to be secure against the entry of microorganisms and, in the case of low acid canned foods, to maintain the commercial sterility of its contents after processing.

"Imminent public health hazard" means a significant threat or danger to health that is considered to exist when there is evidence sufficient to show that a product, practice, circumstance, or event creates a situation that requires immediate correction or cessation of operation to prevent injury based on the number of potential injuries, and the nature, severity, and duration of the anticipated injury.

"Impermeable" means incapable of allowing liquids to pass through the covering.

"License" means the document issued by the Department that authorizes a person to operate an establishment.

"License holder" means the entity that is legally responsible for the operation of the establishment such as the owner, the owner's agent, or other person; and possesses a valid license to operate an establishment.

"Lot" means the food produced during a period of time indicated by a specific code.

"Major food allergen" means milk, egg, fish (such as bass, flounder, cod, and including crustacean such as crab, lobster, or shrimp), tree nuts (such as almonds, pecans, or walnuts), wheat, peanuts, and soybeans; or a food ingredient that contains protein derived from a food specified above.

(A) Major food allergen does not include: Any highly refined oil derived from a food specified in Major Food Allergen definition and any ingredient derived from such highly refined oil; or

(B) Any ingredient that is exempt under the petition or notification process specified in the Federal Food, Drugs, and Cosmetics Act, 21 U.S.C. Section 343.

"Manufacture" means the process of combining or purifying articles of food and packing same for sale to the consumer, either by wholesale or retail. Any firm, person, or corporation who represents itself as responsible for the purity and the proper labeling of any article of food by placing or having placed its name and address on the label of any food shall be deemed a manufacturer and shall be included within the meaning of these rules.

"Microorganism" means yeasts, molds, bacteria and viruses and includes, but is not limited to, species having public health significance. The term "undesirable microorganisms" includes those microorganisms that are of public health significance, that subject food to decomposition, that indicate that food is contaminated with filth, or that otherwise may cause food to be adulterated.

"Misbranding" means the definition contained in 63 O.S. Section 1-1110.

"Monitor" means to conduct a planned sequence of observations or measurements to assess whether a process, point, or procedure is under control and to produce an accurate record for use in verification.

"Non-food contact surfaces" means surfaces of equipment not intended for contact with food, but which are being exposed to splash or food debris or which otherwise require frequent cleaning. These surfaces shall be designed and fabricated to be smooth, washable, free of unnecessary ledges, projections, or crevices, readily accessible for cleaning, and shall be of such material and in such repair as to be easily maintained in a clean and sanitary condition.

Non-salvageable merchandise means distressed merchandise which cannot be safely or practically reconditioned.

"Packaging" means any covering, wrapper, or container in which a product is placed for retail or wholesale distribution, either before or after sale, to a consumer. Packaging shall not be construed to include the inner wrapper.

"Perishable foods" means any food of such type or in such condition or physical state that it may spoil or otherwise become unfit for human consumption.

"Person" means an individual, corporation, business trust, estate, trust, partnership, association, or any other public or private legal entity.

"Personnel" means all persons employed by a food manufacturer, salvage establishment or salvage broker who do or may in any manner handle or come in contact with the handling, storage, transporting, selling or distributing of food, salvageable or salvaged merchandise.

"Pest" means any objectionable animal or insect including, but not limited to, birds, rodents, flies and larvae.

"pH" means the symbol for the negative logarithm of the hydrogen ion concentration, which is a measure of the degree of acidity or alkalinity of a solution. Values between 0 and 7 indicate acidity and values between 7 and 14 indicate alkalinity. The value for pure distilled water is 7, which is considered neutral.

"Plant" means the building or facility or parts thereof, used for or in connection with the manufacturing, packaging, labeling or holding of human food.

"Plumbing fixture" means a receptacle or device that is permanently or temporarily connected to the water distribution system of the premises and demands a supply of water from the system; or discharges used water, waste materials, or sewage directly or indirectly to the drainage system of the premises.

"Plumbing system" means the water supply and distribution pipes; plumbing fixtures and traps; soil, waste, and vent pipes; sanitary and storm sewers and building drains, including their respective connections, devices, and appurtenances within the premises; and water-treating equipment.

"Poisonous or toxic materials" means substances that are not intended for ingestion and are included in 4 categories:

- (A) Cleaners and sanitizers, which include cleaning and sanitizing agents and agents such as caustics, acids, drying agents, polishes, and other chemicals;
- (B) Pesticides, except sanitizers, which include substances such as insecticides and rodenticides;
- (C) Substances necessary for the operation and maintenance of the establishment such as nonfood grade lubricants and personal care items that may be deleterious to health; and
- (D) Substances that are not necessary for the operation and maintenance of the establishment and are on the premises for retail sale, such as petroleum products and paints.

"Potable water" means water obtained from an approved source that is:

- (A) A public water system, or
- (B) A nonpublic water system that is constructed, maintained, and operated according to law.

"Processing" means the preparing of a food in a manner which changes the food from its original state.

"Processor" means anyone processing food under the authority of this chapter.

"Quality control operation" means a planned and systematic procedure for taking all actions necessary to prevent food from being adulterated.

"Reconditioning" means any appropriate process or procedure by which distressed merchandise can be brought into compliance with the standards of the Department for consumption or use by the public.

"Refuse" means all garbage, trash, and rubbish not intended for reuse as salvaged merchandise.

"Regulatory authority" means the Oklahoma State Department of Health, a health department designated in writing by the State Commissioner of Health to perform official duties or other acts authorized under the Oklahoma Public Health Code and this Chapter, or a representative thereof.

"Rework" means clean, unadulterated food that has been removed from processing for reasons other than unsanitary conditions or that has been successfully reconditioned by reprocessing and that is suitable for use as food.

"Safe moisture level" is a level of moisture low enough to prevent the growth of undesirable microorganisms in the finished product under the intended conditions of manufacturing, storage and distribution. The maximum safe moisture level for a food is based on its water activity (a_w). An a_w will be considered safe for a food if adequate data are available that demonstrate that the food at or below the given a_w will not support the growth of undesirable microorganisms.

"Safe temperatures" as applied to Time/Temperature Control for Safety Food means food temperature of 45°F or below 140°F or above.

"Sale or distribution" means the act of selling or distributing, whether for compensation or not, and includes delivery, holding or offering for sale, transfer, or other means of handling or trafficking.

"Salvage distributor or broker" means a person who engages in the business of selling, distributing, or otherwise trafficking in any distressed or salvaged merchandise who does not operate a salvage establishment.

"Salvage establishment" means any place of business engaged in reconditioning or by other means the salvaging of distressed merchandise or that sells, buys or distributes for human use any salvaged merchandise.

"Salvage operator" means a person who is engaged in the business of operating a salvage establishment.

"Salvage processing plant" means any establishment primarily engaged in the business of reconditioning or by other means the salvaging of distressed merchandise and which sells or distributes such merchandise for human use.

"Salvage warehouse" means a separate storage facility used by a salvage broker or salvage establishment for the purpose of holding distressed or salvaged merchandise. A salvage warehouse may not be used for the purpose of reconditioning or selling to consumers.

"Salvageable merchandise" means any distressed merchandise, as defined in this section, which can be reconditioned to the satisfaction of the Department.

"Salvaged merchandise" means any distressed merchandise that has been reconditioned to the satisfaction of the Department.

"Sanitize" means to adequately treat food-contact by a process that is effective in destroying vegetative cells of microorganisms of public health significance and in substantially reducing the number of other microorganisms but without adversely affecting the product or its safety to the consumer.

"Shall" is used to state mandatory requirements.

"Shelf-stable product" means a product that is hermetically sealed and, when stored at room temperature, should not demonstrate any microbial growth.

"Should" is used to state recommended or advisory procedures or to identify recommended equipment.

"Single-service articles" means cups, containers, lids, closures, plates, knives, forks, spoons, stirrers, paddles, straws, placemats, napkins, doilies, wrapping materials, toothpicks and similar articles, intended to be discarded after one use.

"Standard operating procedure (SOP)" means a set of step-by-step instructions compiled by the establishment to instruct employees in the proper method to perform complex routine operations. SOPs aim to achieve efficiency and quality control, while reducing miscommunication, and documenting failure to enable better process to be developed.

"Time/temperature control for safety food" means a food that requires time/temperature control for safety (TCS) to limit pathogenic microorganism growth or toxin formation.

"Tree nut cracker/sheller" means a commercial establishment in which tree nuts are processed and/or packaged for human consumption, other than custom tree nut cracking.

"Tree nut grower" means a person who sells only whole tree nuts grown on his property.

"Utensil" means any implement used in the storage, preparation, transportation, or service of food.

"Variance" means a written document issued by the Department that authorizes a modification or waiver of one or more requirements of this Chapter, if, in the opinion of the Department, a health hazard or nuisance will not result from the modification or waiver.

"Vehicle" means any car, truck, bus or other means by which food or distressed, salvageable or salvaged merchandise is transported from one location to another.

"Water activity" (a_w) is a measure of the free moisture in a food and is the quotient of the water vapor pressure of the substance divided by the vapor pressure of pure water at the same temperature.

"Wholesome" means in sound condition, clean, free from adulteration and otherwise suitable for human consumption.

SUBCHAPTER 3. MANUFACTURING, PROCESSING, PACKING OR HOLDING HUMAN FOOD

310:260-3-1. Personnel

(a) **Disease control.** Any person who, by medical examination or supervisory observation, is shown to have, or appears to have, an illness, open lesion, including boils, sores, or infected wounds, or any other abnormal source of microbial contamination by which there is a reasonable possibility of food, food-contact surfaces, or food-packing materials becoming contaminated, shall be excluded from any operations which may be expected to result in such contamination until the condition is corrected, unless conditions such as open lesions, boils, and infected wounds are adequately covered (e.g., by an impermeable cover). Personnel shall be instructed to report such health conditions to their supervisors.

(b) **Cleanliness.** All persons working in direct contact with food, food-contact surfaces, and food-packaging materials shall conform to hygienic practices while on duty to the extent necessary to protect against allergen cross-contact and against contamination of food. The methods for maintaining cleanliness include, but are not limited to:

(1) Wearing outer garments suitable to the operation in a manner that protects against allergen cross-contact and against the contamination of food, food-contact surfaces, or food-packaging materials.

(2) Maintaining adequate personal cleanliness.

(3) Washing hands thoroughly (and sanitizing if necessary to protect against contamination with undesirable microorganisms) in an adequate handwashing facility before starting work, after each absence from the work station, and at any other time when hands may have become soiled or contaminated.

(4) Removing all unsecured jewelry and other objects that might fall into food, equipment, or containers, and removing hand jewelry that cannot be adequately sanitized during periods in which food is manipulated by hand. If such hand jewelry cannot be removed, it may be covered by material which can be maintained in an intact, clean and sanitary condition and which effectively protects against the contamination by these objects of the food, food-contact surfaces, or food-packaging materials.

(5) Maintaining gloves, if they are used in food handling, in an intact, clean, and sanitary condition.

(6) Wearing, where appropriate, in an effective manner, hair nets, headbands, caps, beard covers, or other effective hair restraints.

(7) Storing clothing or other personal belongings in areas other than where food is exposed or where equipment or utensils are washed.

(8) Confining the following to areas other than where food may be exposed or where equipment or utensils are washed: eating food, chewing gum, drinking beverages, or using tobacco.

(9) Taking any other necessary precautions to protect against allergen cross-contact and against contamination of food, food-contact surfaces, or food-packing materials with microorganisms or foreign substances including, but not limited to, perspiration, hair, cosmetics, tobacco, chemicals, and medicines applied to the skin.

- (c) **Education and training.** Personnel responsible for identifying sanitation failures or food contamination should have a background of education or experience, or a combination thereof, to provide a level of competency necessary for production of clean and safe food. Food handlers and supervisors should receive appropriate training in proper food handling techniques and food protection principles and should be informed of the danger of poor personal hygiene and unsanitary practices.
- (d) **Supervision.** Responsibility for assuring compliance by all personnel with all requirements of this Chapter shall be clearly assigned to competent supervisory personnel.
- (e) **Implementation.** The plant management shall take all reasonable measures and precautions to ensure that the provisions of the above subsections are achieved.

[Source: Amended at 37 Ok Reg 1407, eff 9-11-20]

310:260-3-2. Grounds and plants

(a) **Grounds.** The grounds about a food plant under the control of the operator shall be kept in a condition that will protect against the contamination of food. The methods for adequate maintenance of grounds include, but are not limited to:

- (1) Properly storing equipment, removing litter and waste, and cutting weeds or grass within the immediate vicinity of the plant buildings or structures that may constitute an attractant, breeding place, or harborage for pests.
- (2) Maintaining roads, yards, and parking lots, including dust and flying debris, so that they do not constitute a source of contamination in areas where food is exposed.
- (3) Adequately draining areas that may contribute contamination to food by seepage, food-borne filth, or providing a breeding place for pests.
- (4) Operating systems for waste treatment and disposal in an adequate manner so that they do not constitute a source of contamination in areas where food is exposed.
- (5) If the plant grounds are bordered by grounds not under the operator's control and not maintained in the manner described in paragraph (a) (1) through (3) of this section, care shall be exercised in the plant by inspection, extermination, or other means to exclude pests, dirt, and filth that may be a source of food contamination.

(b) **Plant construction and design.** Plant buildings and structures shall be suitable in size, construction, and design to facilitate maintenance and sanitary operations for food-manufacturing purposes (i.e., manufacturing, processing, packing, and holding). The plant and facilities shall:

- (1) Provide sufficient space for such placement of equipment and storage of materials as is necessary for the maintenance of sanitary operations and the production of safe food.
- (2) Permit the taking of adequate precautions to reduce the potential for allergen cross-contact and for contamination of food, food-contact surfaces, or food-packing materials with microorganisms, chemicals, filth, or other extraneous material. The potential for allergen cross-contact and for contamination may be reduced by adequate food safety controls and operating practices or effective design, including the separation of operations in which for allergen cross-contact and contamination are likely to occur, by one or more of the following means: location, time, partition, air flow systems, dust control systems, enclosed systems, or other effective means.
- (3) Permit the taking of proper precautions to protect food in installed outdoor bulk vessels by any effective means, including:
 - (A) Using protective coverings.
 - (B) Controlling areas over and around the vessels to eliminate harborage for pests.
 - (C) Checking on a regular basis for pests and pest infestation.
 - (D) Skimming the fermentation vessels, as necessary.
- (4) Be constructed in such a manner that floors, walls, and ceilings may be adequately cleaned and kept in good repair; that drip or condensate from fixtures, ducts and pipes does not contaminate food, food-contact surfaces, or food packing materials; and that aisles or working spaces are provided between equipment and walls and are adequately unobstructed and of adequate width to permit employees to perform their duties and to protect against contaminating food or food-contact surfaces with clothing or personal contact.
- (5) Provide adequate lighting in hand washing areas, dressing and locker rooms, and toilet rooms and in all areas where food is examined, processed, packed or held and where equipment or utensils are cleaned.
- (6) Provide shatter-resistant light bulbs, fixtures, skylights, or other glass suspended over exposed food in any step of preparation or otherwise protect against food contamination in case of glass breakage.
- (7) Provide adequate ventilation or control equipment to minimize odors and vapors (including steam and noxious fumes) in areas where they may cause allergen cross-contact or contaminate food; and locate and operate fans and other air-blowing equipment in a manner that minimizes the potential for allergen cross-contact and for contaminating food, food-packaging materials, and food-contact surfaces.
- (8) Provide, where necessary, adequate screening or other protection against pests.
- (9) Provide adequate protection, from contamination, of food products, while being transported by vehicles.

310:260-3-3. Sanitary operations

(a) **General maintenance.** Buildings, fixtures, and other physical facilities of the plant shall be maintained in a sanitary condition and shall be kept in repair sufficient to prevent food from becoming adulterated. Cleaning and sanitizing of utensils and equipment shall be conducted in a manner that protects against allergen cross-contact and against contamination of food, food-contact surfaces, or food-packaging materials.

(b) **Cleaning and sanitizing substances.** Cleaning compounds and sanitizing agents used in cleaning and sanitizing procedures shall be free from undesirable microorganisms and shall be safe and adequate under the conditions of use. Compliance with this requirement may be verified by any effective means including purchase of these substances under a letter of guarantee or certification, or examination of these substances for contamination. Only the following toxic materials may be used or stored in a plant where food is processed or exposed:

- (1) Those required to maintain clean and sanitary conditions;
- (2) Those necessary for use in laboratory testing procedures;
- (3) Those necessary for plant and equipment maintenance and operation; and
- (4) Those necessary for use in the plant's operations.

(c) **Storage of toxic materials.** Toxic cleaning compounds, sanitizing agents, and pesticide chemicals shall be identified, held, and stored in a manner that protects against contamination of food, food-contact surfaces, or food-packing materials.

(d) **Pest control.** No pests or animals shall be allowed in any area of a food plant. Guard or guide dogs may be allowed in some areas of a plant if the presence of the dogs is unlikely to result in contamination of food, food-contact surfaces, or food-packing materials. Effective measures shall be taken to exclude pests from the manufacturing, processing, packing, and holding areas and to protect against the contamination of food on the premises by pests. The use of pesticides to control pests in the plant is permitted only under precautions and restrictions that will protect against the contamination of food, food-contact surfaces, and food-packaging materials.

(e) **Sanitation of food-contact surfaces.** All food-contact surfaces, including utensils and food-contact surfaces of equipment, shall be cleaned as frequently as necessary to protect against contamination of food.

- (1) Food-contact surfaces used for manufacturing/processing, packing, or holding low-moisture food shall be in a dry, sanitary condition before use. When the surfaces are wet-cleaned, they shall, when necessary, be sanitized and thoroughly dried before subsequent use.
- (2) In wet processing, when cleaning is necessary to protect against allergen cross-contact or the introduction of microorganisms into food, all food-contact surfaces shall be

cleaned and sanitized before use and after any interruption during which the food-contact surfaces may have become contaminated. Where equipment and utensils are used in a continuous production operation, the utensils and food-contact surfaces of the equipment shall be cleaned and sanitized as necessary.

(3) Single-service articles (such as utensils for one-time use, paper cups, and paper towels) should be stored in appropriate containers and shall be handled, dispensed, used, and disposed of in a manner that protects against allergen cross-contact and against contamination of food or food-contact surfaces, or food-packing materials.

(4) Where necessary to prevent the introduction of undesirable microbiological organisms into food products, all utensils and product-contact surfaces of equipment used in the plant shall be cleaned and sanitized prior to such use and following any interruption during which such utensils and contact surfaces may have become contaminated. Where such equipment and utensils are used in a continuous production operation, the contact surfaces of such equipment and utensils shall be cleaned and sanitized on a predetermined schedule using adequate methods for cleaning and sanitizing. Sanitizing agents shall be approved, effective and safe under conditions of use. The wash solution for multi-use beverage containers must contain at least 3% caustic and must be maintained to at least 140 °F temperature. Any facility, procedure, machine, or device may be acceptable for cleaning and sanitizing equipment and utensils if it is established that such facility, procedure, machine, or device will routinely render equipment and utensils clean and provide adequate sanitizing treatment.

(f) **Sanitation of non-food-contact surfaces.** Non-food-contact surfaces of equipment used in the operation of a food plant must be cleaned in a manner and as frequently as necessary to protect against allergen cross-contact and against contamination of food, food-contact surfaces, and food-packaging materials.

(g) **Storage and handling of cleaned portable equipment and utensils.** Cleaned and sanitized portable equipment with food-contact surfaces and utensils should be stored in a location and manner that protects food-contact surfaces from contamination.

[Source: Amended at 37 Ok Reg 1385, eff 9-11-20]

310:260-3-4. Sanitary facilities and controls

Each plant must be equipped with adequate sanitary facilities and accommodations including:

(1) **Water supply.** The water supply shall be sufficient for the operations intended and shall be derived from an adequate, approved source. Any water that contacts food, food-contact surfaces, or food-packaging materials shall be safe and of adequate sanitary quality. Running water at a suitable

temperature, and under pressure as needed shall be provided in all areas where required for the processing of food, for the cleaning of equipment, utensils, and food-packaging materials, or for employee sanitary facilities.

(2) **Plumbing.** Plumbing shall be permanently attached, of adequate size and design and adequately installed and maintained to:

- (A) Carry adequate quantities of water to required locations throughout the plant.
- (B) Properly convey sewage and liquid disposable waste from the plant.
- (C) Avoid constituting a source of contamination to food, water supplies, equipment, or utensils or creating an unsanitary condition.
- (D) Provide adequate floor drainage in all areas where floors are subject to flooding-type cleaning or where normal operations release or discharge water or other liquid waste on the floor.
- (E) Provide that there is no backflow from, or cross-connection between, piping systems that discharge-waste water or sewage and piping systems that carry water for food.

(3) **Sewage disposal.** Sewage shall be disposed of into an adequate and approved sewerage system or disposed of through other adequate means through permanently attached plumbing.

(4) **Toilet facilities.** Each plant must provide employees with adequate, readily accessible toilet facilities. Toilet facilities must be kept clean and must not be a potential source of contamination of food, food-contact surfaces, or food-packaging materials.

(5) **Hand-washing facilities.** Each plant must provide hand-washing facilities designed to ensure that an employee's hands are not a source of contamination of food, food-contact surfaces, or food-packaging materials, by providing facilities that are adequate, convenient, and furnish running water at a suitable temperature. Compliance with this requirement includes:

- (A) Hand-washing and, where appropriate, hand-sanitizing facilities at each location in the plant where good sanitary practices require employees to wash and/or sanitize their hands.
- (B) Sanitary towel service or suitable drying devices.
- (C) Devices or fixtures, such as water control valves, so designed and constructed to protect against recontamination of clean, sanitized hands.
- (D) Readily understandable signs directing employees handling unprotected food, unprotected food-packaging materials, or food-contact surfaces to wash and, where appropriate, sanitize their hands before they start work, after each absence from post of duty, and when their hands may have become soiled or contaminated. These signs should be posted in the processing room(s) and in all other areas where employees may handle such food,

materials, or surfaces and toilet facilities.

(E) Refuse receptacles that are constructed and maintained in a manner that protects against contamination of food, equipment or hands.

(6) **Rubbish and offal disposal.** Rubbish and any offal shall be so conveyed, stored, and disposed of as to minimize the development of odor, minimize the potential for the waste becoming an attractant and harborage or breeding place for pests, and protect against contamination of food, food-contact surfaces, water supplies, and ground surfaces.

[Source: Amended at 37 Ok Reg 1385, eff 9-11-20]

310:260-3-5. Equipment and utensils

(a) Design, fabrication, installation and maintenance.

(1) All plant equipment and utensils used in manufacturing, processing, packing, or holding food must be so designed and of such material and workmanship as to be adequately cleanable, and must be adequately maintained to protect against allergen cross-contact and contamination.

(2) Equipment and utensils must be designed, constructed, and used appropriately to avoid the adulteration of food with lubricants, fuel, metal fragments, contaminated water, or any other contaminants.

(3) Equipment must be installed so as to facilitate the cleaning and maintenance of the equipment and of adjacent spaces.

(4) Food-contact surfaces must be corrosion-resistant when in contact with food.

(5) Food-contact surfaces must be made of nontoxic materials and designed to withstand the environment of their intended use and the action of food, and, if applicable, cleaning compounds, sanitizing agents, and cleaning procedures.

(6) Food-contact surfaces must be maintained to protect food from allergen cross-contact and from being contaminated by any source, including unlawful indirect food additives.

(b) **Seams.** Seams on food-contact surfaces shall be smoothly bonded or maintained so as to minimize accumulation of food particles, dirt, and organic matter and thus minimize the opportunity for growth of microorganisms and allergen cross-contact.

(c) **Non-food contact equipment.** Equipment that is in the areas where food is manufactured, processed, packed, or held and that does not come into contact with food shall be so constructed that it can be kept in a clean condition.

(d) **Holding, conveying and manufacturing systems.** Holding, conveying, and manufacturing systems, including gravimetric, pneumatic, closed, and automated systems, shall be of a design and construction that enables them to be maintained in an appropriate sanitary condition.

(e) **Thermometers.** Each freezer and cold storage compartment used to store and hold food capable of supporting growth of microorganisms

shall be fitted with an indicating thermometer, temperature measuring device, or temperature recording device so installed as to show the temperature accurately to within $\pm 3^{\circ}\text{F}$ inside the compartment, and should be fitted with an automatic control for regulating temperature or with an automatic alarm system to indicate a significant temperature change during manual operation.

(f) **Instruments and controls.** Instruments and controls used for measuring, regulating, or recording temperatures, pH, acidity, water activity, or other conditions that control or prevent the growth of undesirable microorganisms in food shall be accurate, precise, and adequately maintained, and adequate in number for their designated uses.

(g) **Compressed air.** Compressed air or other gases mechanically introduced into food or used to clean food-contact surfaces or equipment shall be treated in such a way that food is not contaminated with unlawful indirect food additives.

[Source: Amended at 37 Ok Reg 1385, eff 9-11-20]

310:260-3-6. Processes and controls

(a) General.

(1) All operations in the manufacturing, processing, packing, and holding of food (including operations directed to receiving, inspecting, transporting, and segregating) must be conducted in accordance with adequate sanitation principles.

(2) Appropriate quality control operations must be employed to ensure that food is suitable for human consumption and that food-packaging materials are safe and suitable.

(3) Overall sanitation of the plant must be under the supervision of one or more competent individuals assigned responsibility for this function.

(4) Adequate precautions must be taken to ensure that production procedures do not contribute to allergen cross-contact and to contamination from any source.

(5) Chemical, microbial, or extraneous-material testing procedures must be used where necessary to identify sanitation failures or possible allergen cross-contact and food contamination.

(6) All food that has become contaminated to the extent that it is adulterated must be rejected, or if appropriate, treated or processed to eliminate the contamination.

(b) Raw materials and other ingredients.

(1) Raw materials and other ingredients shall be inspected and segregated or otherwise handled as necessary to ascertain that they are clean and suitable for processing into food and shall be stored under conditions that will protect against allergen cross-contact and against contamination and minimize deterioration. Raw materials shall be washed or cleaned as necessary to remove soil or other contamination. Water used for washing, rinsing, or conveying food shall be safe and of adequate sanitary quality.

Water may be reused for washing, rinsing, or conveying food if it does not cause allergen cross-contact or increases the level of contamination of the food. Containers and carriers of raw materials should be inspected on receipt to ensure that their condition has not contributed to the contamination or deterioration of food.

(2) Raw materials and other ingredients shall either not contain levels of microorganisms that may render the food injurious to the health of humans, or they shall be pasteurized or otherwise be treated during manufacturing operations so that they no longer contain levels that would cause the product to be adulterated.

(3) Raw materials and other ingredients susceptible to contamination with aflatoxin or other natural toxins shall comply with current FDA regulations for poisonous or deleterious substances before these materials or ingredients are incorporated into finished food.

(4) Raw materials, other ingredients, and rework susceptible to contamination with pests, undesirable microorganisms, or extraneous material shall comply with applicable FDA regulations for natural or unavoidable defects if a manufacturer wishes to use the materials in manufacturing food.

(5) Raw materials, other ingredients, and rework shall be held in bulk, or in containers designed and constructed so as to protect against allergen cross-contact and against contamination and shall be held at such temperature and relative humidity and in such a manner as to prevent the food from becoming adulterated. Material scheduled for rework shall be identified as such and separated from other foods.

(6) Frozen raw materials and other ingredients shall be kept frozen. If thawing is required prior to use, it shall be done in a manner that prevents the raw materials and other ingredients from becoming adulterated.

(7) Liquid or dry raw materials and other ingredients received and stored in bulk form shall be held in a manner that protects against allergen cross-contact and against contamination.

(8) Raw materials and other ingredients that are food allergens, and rework that contains food allergens, must be identified and held in a manner that prevents allergen cross-contact.

(c) Manufacturing operations.

(1) Equipment and utensils and finished food containers shall be maintained in an adequate condition through appropriate cleaning and sanitizing, as necessary. Insofar as necessary, equipment shall be taken apart for thorough cleaning.

(2) All food manufacturing, including packaging and storage, shall be conducted under such conditions and controls as are necessary to minimize the potential for the growth of microorganisms and allergen cross-contact.

(3) Food that can support the rapid growth of undesirable microorganisms shall be held at temperatures that will prevent the food from becoming adulterated during manufacturing, processing, packing, and holding.

(4) Measures such as sterilizing, irradiating, pasteurizing, freezing, refrigerating, controlling pH or controlling aw that are taken to destroy or prevent the growth of undesirable microorganisms shall be adequate under the conditions of manufacture, handling, and distribution to prevent food from being adulterated.

(5) Work-in-process and rework shall be handled in a manner that protects against allergen cross-contact, contamination, and growth of undesirable microorganisms.

(6) Effective measures shall be taken to protect finished food from allergen cross-contact and from contamination by raw materials, other ingredients, or refuse. When raw materials, other ingredients, or refuse are unprotected, they shall not be handled simultaneously in a receiving, loading, or shipping area if that handling could result in allergen cross-contact or contaminated food. Food transported by conveyor shall be protected against allergen cross-contact and against contamination as necessary.

(7) Equipment, containers, and utensils used to convey, hold, or store raw materials and other ingredients, work-in-process, rework or other food shall be constructed, handled, and maintained during manufacturing processing, packing, and holding in a manner that protects against allergen cross-contact and against contamination.

(8) Adequate measures shall be taken to protect against the inclusion of metal or other extraneous material in food.

(9) Food, raw materials, and other ingredients that are adulterated:

(A) Shall be disposed in a manner that protects against the contamination of other food; or

(B) If the adulterated food is capable of being reconditioned, it shall be:

(i) Reconditioned (if appropriate) using a method that has been proven to be effective; or

(ii) Reconditioned (if appropriate) and reexamined and subsequently found not to be adulterated before being incorporated into other food.

(10) Steps such as washing, peeling, trimming, cutting, sorting and inspecting, mashing, dewatering, cooling, shredding, extruding, drying, whipping, defatting, and forming shall be performed so as to protect food against allergen cross-contact and against contamination.

(11) Heat blanching, when required in the preparation of food capable of supporting microbial growth, should be effected by heating the food to the required temperature, holding it at this temperature for the required time, and then either rapidly cooling the food or passing it to subsequent manufacturing without delay. Growth and contamination by thermophilic microorganisms in blanchers should be minimized by the use of adequate operating temperatures and by periodic cleaning and sanitizing as necessary.

(12) Batters, breadings, sauces, gravies, dressings, dipping solutions, and other similar preparations that are held and used repeatedly over time shall be treated or maintained in such a manner that they are protected against allergen cross-contact and against contamination, and minimizing the potential for the growth of undesirable microorganisms.

(13) Filling, assembling, packaging, and other operations shall be performed in such a way that the food is protected against allergen cross-contact, contamination, and growth of undesirable microorganisms.

(14) Food such as, but not limited to, dry mixes, nuts, immediate moisture food, and dehydrated food, that relies on the control of a_w for preventing the growth of undesirable microorganisms shall be processed to and maintained at a safe moisture level.

(15) Food such as, but not limited to, acid and acidified food, that relies principally on the control of pH for preventing the growth of undesirable microorganisms shall be monitored and maintained at a pH of 4.6 or below.

(16) When ice is used in contact with food, it shall be made from water that is safe and of adequate sanitary quality in accordance with 310:260-3-4(a), and shall be used only if it has been manufactured in accordance with current good manufacturing practice as outlined in these regulations.

(17) Food-manufacturing areas and equipment used for manufacturing human food shall not be used to manufacture nonhuman food grade animal feed or inedible products, unless there is no reasonable possibility for the contamination of the human food.

(18) Food manufacturing shall not be performed in places of human residence nor shall manufacturing areas open directly into rooms occupied as residence or sleeping quarters.

(19) Meaningful coding of products sold or otherwise distributed from a manufacturing, processing, packing, or repacking activity should be utilized to enable positive lot identification to facilitate, where necessary, the segregation of specific food lots that may have become contaminated or otherwise unfit for their intended use. Records should be retained for a period of time that exceeds the shelf life of the product, except that they need not be retained more than two (2) years.

[Source: Amended at 37 Ok Reg 1385, eff 9-11-20]

SUBCHAPTER 5. TREE NUTPROCESSING

310:260-5-1. Tree Nut crackers/shellers

(a) **Cleaning and sanitizing.** All tree nuts shall be thoroughly cleaned to remove all foreign matter before sanitizing. After cleaning, tree nutsshall be subjected to a bactericidal process with:

- (1) Immersion in hot water at 170° F or more for at least two (2) minutes or exposed to a flow of hot water at 170° degrees F or more for at least five (5) minutes, or exposed to hot air at a temperature of 180° F for at least twenty (20) minutes in a properly constructed oven or hot air cabinet equipped with an indicating thermometer located in the coldest zone, or
- (2) A 1000 PPM chlorine equivalent and a flotation process solution of 200 PPM chlorine equivalent, or
- (3) Exposure to steam in a properly designed cabinet for at least fifteen (15) minutes at 170° F, or for at least five (5) minutes at 200° degrees F, or
- (4) Exposure of a jet of live steam for at least One (1) minute, or
- (5) Any other bactericidal treatment which has been proven by laboratory tests to effectively sanitize tree nuts and which has been approved by the Department.

(b) **Holding and drying.** Folding, soaking, or tempering, tree nuts must not be subjected to contamination. Drying of tree nuts must be done in such a manner as to prevent recontamination of moist tree nuts.

(c) **Sanitizing of equipment.** All equipment used for handling, storing, and transporting sanitized tree nuts and/or tree nuts meats shall be subjected to a bactericidal process approved by the Department.

Approved processes shall include:

- (1) Exposure to steam in a properly constructed cabinet for at least fifteen (15) minutes at 170° F, or for at least five (5) minutes at at least 200° F, or
- (2) Exposure to a jet of live steam for at least one (1) minute, or
- (3) Immersion in or exposure to a flow of chlorine solution of not less than 200 PPM strength for at least two (2) minutes, or
- (4) Immersion in hot water at 170° F or more for at least two (2) minutes or exposure to a flow of hot water at 170° F or more (at the outlet) for at least five (5) minutes, or
- (5) Exposure to hot air at a temperature of 180° F, for at least twenty (20) minutes in a properly constructed oven or hot air cabinet equipped with an indicating thermometer located in the coldest zone, or
- (6) Any other bactericidal treatment which has been proven by laboratory tests to effectively sanitize equipment and which has been approved by the Department.

(d) **Other requirements.** All commercial tree nut crackers/shellers shall be subject to all applicable portions of this code.

[Source: Amended at 37 Ok Reg 1385, eff 9-11-20]

310:260-5-2. Custom Tree Nut crackers

(a) Signage.

- (1) The custom tree nut cracking facility must publicly display an easily readable sign which states: "Custom Tree Nut Operations are Exempt from Health Department Regulations Pertaining to Cleaning and Sanitizing of tree nuts /Processing Equipment. Tree nuts Cannot be Cracked for Resale" or words to that effect.

(2) A customer's own Tree Nuts left on the premises for custom Tree Nut cracking must be separately labeled before and after custom cracking with the customer's name and contact information.

(3) Custom Tree Nut crackers shall affix the statement "Custom Tree Nut Operations are Exempt from Health Department Regulations Pertaining to Cleaning and Sanitizing of Tree Nuts /Processing Equipment. Tree Nuts Cannot be Cracked for Resale" or words to that effect on the label, bill of sale, receipt, etc., presented to the customer upon payment.

(b) **Other requirements.** Custom tree nut crackers shall not be subject to licensure.

[Source: Amended at 37 Ok Reg 1385, eff 9-11-20]

SUBCHAPTER 7. SALVAGEABLE AND SALVAGED MERCHANDISE

310:260-7-1. Merchandise protection

(a) Protection from contamination.

(1) All salvageable and salvaged merchandise, while being stored or processed at a salvage processing plant, or during transportation, shall be protected from contamination.

(2) All perishable foods shall be kept at such temperature as will protect against spoilage.

(3) Time/Temperature Control for Safety food shall be maintained at safe temperature (45 °F or below; 140 °F or above).

(4) Poisonous and toxic materials shall be identified, and handled under such conditions as will not contaminate other salvageable or salvaged merchandise or constitute a hazard to personnel.

(b) **Segregation of non-salvageable materials.** All salvageable articles shall be promptly sorted and segregated from non-salvageable materials to prevent further contamination of goods to be salvaged or offered for sale or distribution.

[Source: Amended at 37 Ok Reg 1385, eff 9-11-20]

310:260-7-2. Movement of distressed merchandise

(a) Notice to department.

(1) When merchandise becomes distressed as the result of a conveyance accident; flood, wind, fire, sewer backup, or such other unforeseen catastrophe, the owner or claimant of such distressed merchandise shall contact the Department within twenty-four (24) hours after the merchandise becomes distressed and prior to removal from the place at which it was located when it became distressed merchandise.

(2) If emergency removal of such distressed merchandise is required, such notice to the Department shall be made as soon thereafter as possible.

(3) It shall be the duty of the owner or manager of the salvage processing plant to make contact with the Department within forty-eight (48) hours whenever distressed merchandise subject to the provisions of this regulation is obtained.

(b) **Movement of distressed merchandise.**

(1) Distressed merchandise shall be moved from the site where it became distressed as expeditiously as possible after compliance with (a) of this section so as to protect against spoilage, prevent rodent or insect harborage, or otherwise a menace to the public health.

(2) All distressed and salvageable merchandise of a perishable nature shall, prior to reconditioning, be transported only in vehicles provided with adequate refrigeration for product maintenance.

(3) No interstate movement of distressed or salvageable merchandise from or into Oklahoma shall be made without prior approval of the Department. Concurrence shall also be obtained from the U.S. Food and Drug Administration or U.S. Department of Agriculture, Animal and Plant Health Inspection Service (meat and poultry products), and as required by State law of the State to or from which such merchandise is being shipped, prior to such anticipated interstate movement.

[Source: Amended at 37 Ok Reg 1385, eff 9-11-20]

310:260-7-3. Reconditioning

(a) **Salvageable merchandise.** All salvageable merchandise shall be reconditioned prior to sale or distribution.

(b) **Distressed or nonsalvageable merchandise.** The following items shall be deemed unfit for sale or distribution:

(1) Metalcans of food which are essentially free from rust (pitting) and dents (especially at rim, end double seams and/or side seams).

(2) Leakers, springers, flippers, and swellers.

(3) Containers, including metal and glass containers with press caps, screw caps, pull rings or other types of openings which have been in contact with non-potable water, liquid foam, or other deleterious substances, as a result of fire fighting efforts, flood, sewer backups or similar mishaps shall be deemed unfit for sale or distribution, i.e., nonsalvageable merchandise.

(c) **Metal containers of food.** All metal containers of food, other than those mentioned in (b) of this section whose integrity has not been compromised and whose integrity would not be compromised by the reconditioning, and which have been partially or totally submerged in water, liquid foam, or other deleterious substance as the result of flood, sewer backup or other reasons shall, after thorough cleaning, be subjected to sanitizing rinse of a concentration of 200 ppm available chlorine for a minimum period of one minute, or shall be sanitized by another method approved by the Department. They shall subsequently be treated to inhibit rust formation. All other types of containers so

damaged shall be deemed unfit for use or sale.

[Source: Amended at 37 Ok Reg 1385, eff 9-11-20]

310:260-7-4. Labeling

- (a) Relabeling of other salvageable nonmetal (glass, plastic, etc.) containers shall be required when original labels are missing or illegible.
- (b) All salvaged merchandise shall be labeled to indicate that the merchandise has been salvaged.
- (c) Where original labels are removed from containers which are to be resold or redistributed, the replacement labels must show the name and address of the salvage establishment.

[Source: Amended at 37 Ok Reg 1385, eff 9-11-20]

310:260-7-5. Handling of nonsalvageable merchandise

- (a) **Nonsalvageable merchandise.** Food deemed to be nonsalvageable merchandise are:
 - (1) Foods contaminated and/or adulterated by pesticides or other chemicals;
 - (2) Potentially hazardous foods (frozen or those requiring refrigeration) which have been exposed to a temperature above 45° F (7.2° C) for a period exceeding 4 hours;
 - (3) Foods packaged in paper or other porous materials which have been subjected to contamination.
 - (4) Those described in Section 310:260-7-3 as nonsalvageable.
- (b) **Distribution of nonsalvageable merchandise.** Nonsalvageable merchandise shall not be sold or distributed as food, but shall be disposed of in a manner approved by the Department.

[Source: Amended at 37 Ok Reg 1385, eff 9-11-20]

310:260-7-6. Record keeping

- (a) **Inspection by the Department.** A written record of receipt of distressed, salvageable and salvaged merchandise shall be kept by the salvage establishment or salvage broker for inspection by the Department during business hours.
- (b) **Content of records.** The records shall include a general description of distressed merchandise received, source of the distressed merchandise, the date received and the type of damage (fire, flood, etc.)
- (c) **Retention of records.** These records shall be kept on the premises of the salvage establishment or salvage broker for a period of two (2) years following the receipt of a lot of merchandise.

[Source: Amended at 37 Ok Reg 1385, eff 9-11-20]

310:260-7-7. Salvage processors and distributors out-of-state

Salvaged merchandise from salvage processing plants and distributors located outside the jurisdiction of the State of Oklahoma may be sold or distributed within the State, if such plants and distributors

conform to the provisions of this regulation or to substantially equivalent provisions. To determine the extent of compliance with such provisions, the Department may accept reports from responsible authorities in other jurisdictions where such plants and distributors are located.

[Source: Amended at 37 Ok Reg 1385, eff 9-11-20]

SUBCHAPTER 9. FOOD STORAGE WAREHOUSES

310:260-9-1. Lighting and ventilation

(a) Lighting.

(1) All parts of the food storage warehouse shall be lighted so as to permit the activity for which the premises are used to be carried on safely and to permit effective cleaning and inspection of the premises.

(2) Safety shields on lights or safety type lights shall be used where needed for the protection of food storage.

(b) Ventilation. Where needed, rooms shall have sufficient ventilation to prevent any undue condensation or water vapor or objectionable odors, or temperature extremes.

[Source: Amended at 37 Ok Reg 1385, eff 9-11-20]

310:260-9-1.1. Warehousing and distribution

Storage and transportation of food shall be under conditions that will protect against allergen cross-contact and against biological, chemical (including radiological), and physical contamination of food, as well as against deterioration of the food and the container.

[Source: Added at 37 Ok Reg 1385, eff 9-11-20]

310:260-9-2. Dry storage

(a) Floors.

(1) Floors shall be constructed of easily cleanable and reasonably smooth material.

(2) Floors shall be kept clean and in good repair.

(b) Walls and ceiling. Walls and ceiling shall be of sound construction, easily cleanable and kept reasonably free of dirt, dust and cobwebs and in good repair.

[Source: Amended at 37 Ok Reg 1385, eff 9-11-20]

310:260-9-3. Cold and frozen storage

(a) Thermometers. Each cold storage unit shall be equipped with an accurate and easily visible thermometer with the sensing element at least five feet above the floor.

(b) Storage temperatures. Perishable and Time/Temperature Control for Safety foods shall be stored at 45° F or below.

(c) **Frozen foods.** All frozen food shall be stored at a temperature of 0° F or below except for defrost cycles, loading or unloading, or for other temporary conditions beyond the immediate control of the person or company under whose care or supervision the frozen food is stored. However, the internal temperature of all frozen food shall be maintained at 0° F or below except when the product is subjected to the above-mentioned conditions; at such times the internal product temperature shall not exceed 10° F and such product shall be returned to 0° F as quickly as possible.

(d) **Floors, walls, and ceilings.**

(1) Floors shall be constructed of material that can be easily kept clean, sanitary and in good repair.

(2) Walls and ceiling shall be reasonably smooth, and kept clean and in good repair.

(e) **Defrosting.** During defrosting of overhead coils in cold storage rooms, stored food shall be effectively protected from contamination by condensation, drip or leakage.

[Source: Amended at 37 Ok Reg 1385, eff 9-11-20]

310:260-9-4. Protection of stored food

(a) **Pests.** The operator shall take all reasonable measures to protect the area where food is kept or stored in a food storage warehouse against the entrance into the establishment, and the breeding or presence on the premises of rodents, birds, flies, roaches, weevils and other vermin.

(b) **Animals.** No dogs, cats, fowl, birds or any other type animal shall be permitted in a food storage warehouse, except that patrol dogs accompanying blind or deaf persons shall not be excluded.

(c) **Use of rodenticides.** When in use, rodenticides shall be placed in covered bait boxes where necessary to prevent spillage or possible contamination of stored food and danger to employees. All rodenticide baits shall be applied in such a manner as to prevent contamination of stored food products.

(d) **Storage and labeling of toxics.**

(1) Cleaning materials, pesticides, rodenticides, and any other such hazardous substances used in the operation of the warehouse shall be stored:

(A) In properly labeled containers in a closed closet or cabinet in a separate area from food products.

(B) An adequate distance from stored food and single service articles to prevent contamination caused by leakage or spillage.

(2) Where multiple level storage methods are used, all such substances shall be stored below food or single service articles.

(e) **Pest control services.**

(1) When a licensed pest control service is employed, it shall file at the warehouse a diagram of the bait station locations and the rodenticide in use.

(2) The operator should designate an employee to be responsible for the pest control program being used.

(f) Product storage.

(1) Skids or pallets shall provide a minimum of 6" clearance above the floor to facilitate cleaning, protection of the product, and for movement of air in refrigerated storage areas.

(2) Merchandise stored on skids or pallets shall be at least 18" away from any wall.

(3) Construction of shelving, cabinets, and storage methods used shall be such as to permit ready access for cleaning and sanitary inspection.

(4) No overhead waste drain pipes or other overhead piping shall be used which presents a risk of contamination to foods stored below due to excess condensation or leakage. Protective shields may be used to eliminate this risk.

(5) Bagged animal feeds shall be stored so as not to be intermingled with the storage of human food products. Storage on separate pallets is acceptable.

[Source: Amended at 37 Ok Reg 1385, eff 9-11-20]

310:260-9-5. Morgue

(a) The operator of a food storage warehouse shall provide an area for the accumulation and holding of all damaged foods or foods which may be unwholesome.

(b) The operator shall maintain a program of timely and proper disposal of unwholesome food to prevent development of unsanitary conditions or vermin breeding places and rodent harborage.

[Source: Amended at 37 Ok Reg 1385, eff 9-11-20]

310:260-9-6. Restroom facilities

(a) Toilets.

(1) The warehouse shall be provided with conveniently located toilets and shall be kept clean and in good repair.

(2) The toilet room shall be completely enclosed, well lighted, vented, and equipped with a tight, self-closing door.

(3) Any window opening shall be screened to prevent entrance of insects.

(b) Handwashing facilities.

(1) Handwashing facilities shall be adequate and conveniently located in relation to toilet areas.

(2) Handwashing facilities shall be equipped with hot and cold water, under pressure.

(3) Soap or detergent and paper towels or other single use drying devices shall be provided at all times.

(4) Handwashing facilities shall be kept clean and in good repair.

(5) Signage directing employees to wash their hands before returning to work shall be posted in all toilet rooms.

[Source: Amended at 37 Ok Reg 1385, eff 9-11-20]

310:260-9-7. Waste storage and disposal

- (a) All liquid waste resulting from cleaning floors, equipment, flushing toilets, handwashing facilities, refrigeration equipment and air conditioners shall be disposed of in a sanitary manner per standards established and regulated by the Oklahoma Department of Environmental Quality (ODEQ).
- (b) Waste containers shall be provided for trash or rubbish.
- (c) The warehouse shall be free of unnecessary litter and rubbish, such as paper, empty containers, or other material that might serve as a place for harborage of rodents or other vermin.
- (d) All garbage and waste shall be stored in covered containers.
 - (1) Reusable containers shall be non-absorbent, easily washable receptacles which are covered with close-fitting lids, pending removal.
 - (2) Disposable containers or liners may be used.
 - (3) Removal of garbage and waste shall be frequent and the holding area shall be kept clean.
- (e) All garbage and rubbish shall be disposed of at regular intervals of sufficient frequency and in such manner as to prevent the creation of unsanitary conditions.

[Source: Amended at 37 Ok Reg 1385, eff 9-11-20]

310:260-9-8. Exterior construction

- (a) The exterior of a food storage warehouse shall be so designed, fabricated and finished to minimize the entrance of insects, birds and rodents.
- (b) All necessary ventilation louvers or openings into food storage warehouses shall be effectively screened against insects, birds and rodents.
- (c) All service connections through the exterior wall of the establishment, including water, gas, electrical and refrigeration connections shall be sealed to prevent the entrance of insects, birds and rodents.

[Source: Amended at 37 Ok Reg 1385, eff 9-11-20]

310:260-9-9. Surroundings

The outer premises of the food storage warehouse shall be reasonably clean, and well drained, free from any material or condition that creates rodent, bird and/or insect harborage and free from other nuisances and sources of contamination.

310:260-9-10. Transportation and storage

- (a) All vehicles used in the transportation of processed food products shall be kept in a clean condition at all times. Refuse, dirt and waste products subject to decomposition shall be removed daily. Storage and transportation of finished food shall be under conditions that will protect

food against physical, chemical, and microbial contamination as well as against deterioration of the food and the container.

(b) Food products while in transit, shall be protected in such a manner as to preclude being contaminated by hazardous substances, microbial contamination, and against the deterioration of the food and the container.

(c) Vehicles transporting Time/Temperature Control for Safety food shall be equipped to maintain safe temperatures at all times. An accurate and easily visible thermometer shall be provided for monitoring the temperature of frozen and refrigerated storage areas while food is being held or transported.

[Source: Amended at 37 Ok Reg 1385, eff 9-11-20]

310:260-9-11. Exemptions

Bin warehouses, as defined, shall be exempt from the regulations pertaining to providing restroom facilities, and water under pressure.

[Source: Amended at 37 Ok Reg 1385, eff 9-11-20]

SUBCHAPTER 11. LICENSING, INSPECTIONS AND PLAN REVIEW [REVOKED]

310:260-11-1. Licensing [REVOKED]

[Source: Amended at 8 Ok Reg 3099, eff 7-18-91 (emergency); Amended at 9 Ok Reg 1493, eff 5-1-92 ; Revoked at 37 Ok Reg 1385, eff 9-11-20]

310:260-11-2. Inspections [REVOKED]

[Source: Amended at 8 Ok Reg 3099, eff 7-18-91 (emergency); Amended at 9 Ok Reg 1491, eff 5-1-92 ; Revoked at 37 Ok Reg 1385, eff 9-11-20]

310:260-11-3. Examination and condemnation of food [REVOKED]

[Source: Revoked at 37 Ok Reg 1385, eff 9-11-20]

310:260-11-4. Plan review [REVOKED]

[Source: Revoked at 37 Ok Reg 1385, eff 9-11-20]

SUBCHAPTER 13. SPECIAL RISK SITUATIONS [REVOKED]

310:260-13-1. Emergency occurrences [REVOKED]

[Source: Revoked at 37 Ok Reg 1385, eff 9-11-20]

310:260-13-2. Infection [REVOKED]

[Source: Revoked at 37 Ok Reg 1385, eff 9-11-20]

SUBCHAPTER 15. COMPLIANCE AND ENFORCEMENT

310:260-15-1. License required

(a) No person shall operate a food manufacturing establishment, food storage warehouse, or a salvage establishment, who does not have a valid license issued to such person by the Department pursuant to O.S. §63-1-1119. Only a person who is in virtual compliance with the requirements of these rules and regulations shall be entitled to receive or retain such a license.

(b) A license shall expire one year from the date of its issuance unless canceled or revoked prior to its expiration. For purposes in determining the expiration date of all licenses under this section, the date of issuance shall be deemed to be the date that an approved application for licensure is first issued by a duly authorized representative of the Health Department.

[Source: Added at 37 Ok Reg 1385, eff 9-11-20]

310:260-15-2. Examination and condemnation of food

Food may be examined or sampled by the Department as often as necessary for enforcement of these rules and regulations. The Department may place an embargo on food in accordance with the provisions of Title 63 O.S. 1-1105.

[Source: Added at 37 Ok Reg 1385, eff 9-11-20]

310:260-15-3. Variance

- (a) Whenever the Department adopts new rules or amends existing language in this Chapter, the owner of a food establishment may request that a variance be granted on any nonconforming use that may then exist, on or before the effective date of the rule change, at the license holder's place of operation.
- (b) Variances requested pursuant to this Subchapter are subject to approval by the Department. In order to have the variance approved, a license holder must submit a written application on a form provided by the Department. Any variance request shall be deemed denied unless the license holder subsequently receives notice of approval from the Department.
- (c) If the license holder replaces the equipment or reconstructs the portion of the facility that is the subject of the variance, the new equipment or construction must conform to the rules of this Chapter.
- (d) Variances are not considered to be part of the license and may be revoked at any time, for any reason, by the Department.

[Source: Added at 37 Ok Reg 1385, eff 9-11-20]

310:260-15-4. Documentation of proposed variance and justification

Variance requests are subject to review by the Department. During this process, the inspector must confirm the following:

- (1) The nature and extent of the nonconforming use;
- (2) That the equipment or portion of the facility in question is in an operable and sanitary condition, and can be maintained in satisfactory condition during the term of the variance;
- (3) That no public health threats or food-related illness will result if the variance is granted.

[Source: Added at 37 Ok Reg 1385, eff 9-11-20]

310:260-15-5. When plans are required

- (a) A license applicant or license holder shall submit to the Department properly prepared plans and specifications for review and approval before:
- (1) The construction of an establishment;
 - (2) The conversion of an existing structure for use as an establishment; or
 - (3) The extensive remodeling of an establishment or a change of operation.
- (b) If the Department deems such plans and specifications to not conform to the requirements or additional material information is required, the Department shall notify the person who submitted them of its objections or its need for additional information.

[Source: Added at 37 Ok Reg 1385, eff 9-11-20]

310:260-15-6. Contents of the plans and specifications

The plans and specifications for an establishment shall include the following information to demonstrate conformance with Code provisions:

- (1) Food items intended to be produced;
- (2) Anticipated volume of food to be prepared, held, and transported;
- (3) Proposed equipment types, manufacturer and model numbers (if available);
- (4) Proposed floor plan;
- (5) Installation layout of processing equipment to be installed on the food processing floor;
- (6) Location of handwashing facilities, restrooms, and employees locker rooms;
- (7) Other information as required by the Department.

[Source: Added at 37 Ok Reg 1385, eff 9-11-20]

310:260-15-7. Preoperational inspections

The Department may conduct one or more preoperational inspections to verify that the establishment is constructed and equipped in accordance with the approved plans and approved modifications of those plans, and is in compliance with law and this Chapter.

[Source: Added at 37 Ok Reg 1385, eff 9-11-20]

310:260-15-8. Form of submission

A person desiring to operate an establishment shall submit to the regulatory authority a written application for a license on a form provided by the regulatory authority.

[Source: Added at 37 Ok Reg 1385, eff 9-11-20]

310:260-15-9. Qualifications and responsibilities of applicants

To qualify for a license, an applicant shall:

- (1) Be an owner of the food establishment or an officer of the legal ownership;
- (2) Comply with the requirements of this Chapter;
- (3) As specified under OAC 310:260-15-17, agree to allow access to the food establishment and to provide required information; and
- (4) Pay the applicable license fees at the time the application is submitted.

[Source: Added at 37 Ok Reg 1385, eff 9-11-20]

310:260-15-10. Contents of the application

The application shall include:

- (1) The name, mailing address, telephone number, and signature of the person applying for the license and the name, mailing

address, and location, of the establishment;

(2) Information specifying whether the establishment is owned by an association, corporation, individual, partnership, or other legal entity.

[Source: Added at 37 Ok Reg 1385, eff 9-11-20]

310:260-15-11. New, converted, or remodeled establishments

For establishments that are required to submit plans as specified under OAC 310:260-15-5 the Commissioner of Health shall issue a license to the applicant after:

- (1) A properly completed application is submitted;
- (2) The required fee is submitted;
- (3) The required plans, specifications, and information are reviewed and approved; and
- (4) An inspection shows that the establishment is built or remodeled in accordance with the approved plans and specifications and that the establishment is in compliance with this Chapter.

[Source: Added at 37 Ok Reg 1385, eff 9-11-20]

310:260-15-12. Issuance of license

The Department may issue a license to a new owner of an existing food establishment after a properly completed application is submitted, reviewed, and approved, the fees are paid, and an inspection shows that the establishment is in compliance with this Chapter.

[Source: Added at 37 Ok Reg 1385, eff 9-11-20]

310:260-15-13. Denial of application for license, notice

If an application for a license to operate is denied, the regulatory authority shall provide the applicant with a notice that includes:

- (1) The specific reasons and Chapter citations for the license denial;
- (2) The actions, if any, that the applicant must take to qualify for a license; and
- (3) Advisement of the applicant's right of appeal and the process and time frames for appeal that are provided in law.

[Source: Added at 37 Ok Reg 1385, eff 9-11-20]

310:260-15-14. Responsibilities of the license holder

Upon acceptance of the license issued by the Commissioner of Health, the license holder in order to retain the license shall:

- (1) Post the license in a location in the establishment that is conspicuous to visitors;
- (2) Comply with the provisions of this Chapter;
- (3) Immediately discontinue operations and notify the Department if an imminent health hazard may exist as specified under OAC

310:260-15-25;

(4) Allow representatives of the Department access to the establishment as specified under OAC 310:260-15-17;

(5) Replace existing facilities and equipment with facilities and equipment that comply with this Chapter if:

(A) The Department directs the replacement because the facilities and equipment constitute a public health hazard or nuisance or no longer comply with the criteria upon which the facilities and equipment were accepted,

(B) The Department directs the replacement of the facilities and equipment because of a change of ownership, or

(C) The facilities and equipment are replaced in the normal course of operation;

(6) Comply with directives of the Department including time frames for corrective actions specified in inspection reports, notices, orders, warnings, and other directives issued by the Department in regard to the license holder's establishment or in response to community emergencies;

(7) Accept notices issued and served by the Department according to law;

(8) Be subject to the administrative, civil, injunctive, and criminal remedies authorized in law for failure to comply with this Chapter or a directive of the Department, including time frames for corrective actions specified in inspection reports, notices, orders, warnings, and other directives; and

(9) If applicable, submit the annual renewal application and pay all renewal license and late fees.

[Source: Added at 37 Ok Reg 1385, eff 9-11-20]

310:260-15-15. Licenses not transferable

A license may not be transferred from one person to another person, from one establishment to another, from one physical address to another, from one corporation to another, from one limited liability company or corporation to another, from one partnership to another, or from one type of operation to another if the food operation changes from the type of operation specified in the application under OAC 310:260-15-6 and the change in operation is not approved.

[Source: Added at 37 Ok Reg 1385, eff 9-11-20]

310:260-15-16. Competency of inspectors

An authorized representative of the Department who inspects an establishment or conducts plan review for compliance with this Chapter shall have the knowledge, skills, and ability to adequately perform the required duties, and be licensed pursuant to Title 59 O.S. §, 59-1150.1 et seq.

[Source: Added at 37 Ok Reg 1385, eff 9-11-20]

310:260-15-17. Allowed at reasonable times after due notice

After the Department presents official credentials and provides notice of the purpose of, and an intent to conduct, an inspection, the person in charge shall allow the Department to determine if the establishment is in compliance with this Chapter by allowing access to the establishment, allowing inspection, and providing information and records specified in this Chapter and to which the Department is entitled according to law, during the establishment's hours of operation and other reasonable times.

[Source: Added at 37 Ok Reg 1385, eff 9-11-20]

310:260-15-18. Refusal, notification of right to access, and final request for access

If a person denies access to the Department, the Department shall:

(1) Inform the person that:

(A) The license holder is required to allow access to the Department as specified under OAC 310:260-15-17 of this Chapter,

(B) Access is a condition of the acceptance and retention of an establishment license to operate as specified under OAC 310:260-15-14(4), and

(C) If access is denied, an order issued by the appropriate authority allowing access, hereinafter referred to as an inspection order, may be obtained according to law; and

(2) Make a final request for access.

[Source: Added at 37 Ok Reg 1385, eff 9-11-20]

310:260-15-19. Refusal, reporting

If after the regulatory authority presents credentials and provides notice as specified under OAC 310:260-15-17, explains the authority upon which access is requested, and makes a final request for access as specified in OAC 310:260-15-18, the person in charge continues to refuse access, the regulatory authority shall provide details of the denial of access on an inspection report form.

[Source: Added at 37 Ok Reg 1385, eff 9-11-20]

310:260-15-20. Inspection order to gain access

If denied access to a food establishment for an authorized purpose and after complying with OAC 310:260-15-18, the Department may issue, or apply for the issuance of an order to gain access as provided in law.

[Source: Added at 37 Ok Reg 1385, eff 9-11-20]

310:260-15-21. Documenting information and observations

The Department shall document on an inspection report form:

- (1) Administrative information about the establishment's legal identity, street and mailing addresses, type of establishment and operation as specified, inspection date, and other information such as type of water supply and sewage disposal, status of the license, and personnel certificates that may be required; and
- (2) Specific factual observations of violative conditions or other deviations from this Chapter that require correction by the license holder.

[Source: Added at 37 Ok Reg 1385, eff 9-11-20]

310:260-15-22. Specifying time frame for corrections

The regulatory authority may specify on the inspection report form the time frame for correction of the violations.

[Source: Added at 37 Ok Reg 1385, eff 9-11-20]

310:260-15-23. Issuing report and obtaining acknowledgment of receipt

At the conclusion of the inspection the regulatory authority shall provide a copy of the completed inspection report and the notice to correct violations to the license holder or to the person in charge, and request a signed acknowledgment of receipt.

[Source: Added at 37 Ok Reg 1385, eff 9-11-20]

310:260-15-24. Refusal to sign acknowledgment

The Department shall:

- (1) Inform a person who declines to sign an acknowledgment of receipt of inspectional findings as specified under OAC 310:260-15-23:
 - (A) An acknowledgment of receipt is not an agreement with findings,
 - (B) Refusal to sign an acknowledgment of receipt will not affect the license holder's obligation to correct the violations noted in the inspection report within the timeframes specified, and
 - (C) A refusal to sign an acknowledgment of receipt is noted in the inspection report and conveyed to the Department's historical record for the food establishment; and
- (2) Make a final request that the person in charge sign an acknowledgment receipt of inspectional findings.

[Source: Added at 37 Ok Reg 1385, eff 9-11-20]

310:260-15-25. Ceasing operations and reporting

(a) Except as specified in (b) of this Section, a license holder shall immediately discontinue operations and notify the regulatory authority if an imminent health hazard exists because of an emergency such as a fire,

flood, sewage backup, no water in the facility, insufficient refrigeration and/or hot food storage facilities available, substantial evidence or presence of a large number of insects or evidence of rodents in food or on food preparation surfaces, interruption of safe potable water supply to the facility, misuse of poisonous or toxic materials, onset of an apparent foodborne illness outbreak, interruption of electrical service for more than 4 hours, severe structural damage in the facility, an employee working with a Salmonella, Shigella, E. coli 0157:H7 or Hepatitis A infection, gross unsanitary occurrence or condition, or other circumstance as determined by the Commissioner of Health, or his designee, that shall endanger public health.

(b) A license holder need not discontinue operations in an area of an establishment that is unaffected by the imminent health hazard.

[Source: Added at 37 Ok Reg 1385, eff 9-11-20]

310:260-15-26. Resumption of operations

If operations are discontinued as specified under OAC 310:260-15-32 or otherwise according to law, the license holder shall notify the regulatory authority before resuming operations.

[Source: Added at 37 Ok Reg 1385, eff 9-11-20]

310:260-15-27. Obtaining information: personal history of illness, medical examination, and specimen analysis

The regulatory authority shall act when it has reasonable cause to believe that a food employee has possibly transmitted disease; may be infected with a disease in a communicable form that is transmissible through food; may be a carrier of infectious agents that cause a disease that is transmissible through food; or is affected with a boil, an infected wound, or acute respiratory infection, by:

- (1) Securing a confidential medical history of the employee suspected of transmitting disease or making other investigations as deemed appropriate; and
- (2) Requiring appropriate medical examinations, including collection of specimens for laboratory analysis, of a suspected employee and other employees.

[Source: Added at 37 Ok Reg 1385, eff 9-11-20]

310:260-15-28. Restriction or exclusion of employee with infection

When the Department has reasonable cause to suspect possible disease transmission by an employee of a food establishment, the Department may secure a morbidity history of the employee or make any other investigation as indicated and shall take appropriate action. The Department may require at a minimum any or all of the following measures:

- (1) The immediate exclusion of the employee from employment in food establishments;

- (2) The immediate closing of the food establishment concerned until no further danger of disease outbreak exists.
- (3) Restriction of the employee's services to some area of the establishment where there would be no danger of transmitting disease;
- (4) Adequate medical laboratory examination of the employee and other employees and of his and their body discharges.

CHAPTER 266. HEARING AID DEALERS AND FITTERS REGULATIONS

[Source: Codified 9-11-23]

SUBCHAPTER 1. GENERAL PROVISIONS

310:266-1-1. Purpose

The rules in this Chapter implement the Hearing Aid Dealers and Fitters Act, 63 O.S. § 1-1750 *et seq.* and 15 O.S. § 764.1. Hearing Aid Providers - Contracts - Rescission Period.

[Source: Added at 40 Ok Reg 1554, eff 9-11-23]

310:266-1-2. Definitions

The following words or terms, when used in this Chapter, shall have the following meaning, unless the context clearly indicates otherwise:

"Act" means those statutes relating to Hearing Aid Dealers and Fitters codified at 63 O.S. §§ 1-1750 through 1-1754 and 15 O.S. § 764.1.

"Air-conduction hearing aid" means *a hearing aid that conducts sound to the ear through the air.* [Title 21 CFR Part 800, § 800.30]

"Commissioner" means the State Commissioner of Health or his/her authorized representative.

"Department" means the Oklahoma State Department of Health.

"Direct on-site supervision" means a licensed hearing aid dealer and fitter shall accompany a temporary permit holder anytime the permit holder is performing the practice of fitting and dealing in hearing aids.

"Hearing aid" means any wearable instrument or device designed for or offered for the purpose of aiding or compensating for impaired human hearing. It includes both air conduction and bone conduction devices.

"Hearing aid provider " means *a hearing aid dealer or fitter licensed pursuant to Section 1-1750 et seq. of Title 63 of the Oklahoma Statutes.* [Title 15 O.S. § 764.1]

"Hearing Screening" means a binary pure tone screening at a preset intensity level for the purpose of determining if an individual screened needs further testing prior to the selection or sale of a hearing aid.

"Indirect supervision" means that the supervising licensed hearing aid dealer and fitter is not required to be present in the same facility as is the person being supervised, but is available for voice to voice contact by telephone, radio, or other means at the initiation of the person being supervised. It means specific supervisory activities, other than direct supervision, that are performed by a licensed hearing aid dealer and fitter and that may include consultation, record review, consulting, and evaluation of audiotaped or videotaped sessions, at a minimum on a weekly basis.

"Involvement of a licensed person" means *the supervision, prescription, or other order, involvement, or intervention of a licensed*

person. [Title 21 CFR Part 800, § 800.30]

"License" means a license issued by the Commissioner to hearing aid dealers and fitters.

"Over-the-counter hearing aid" means *an air-conduction hearing aid that does not require implantation or other surgical intervention, and is intended for use by a person age 18 or older to compensate for perceived mild to moderate hearing impairment. The device, through tools, tests, or software, allows the user to control the hearing aid and customize it to the user's needs. The device may use wireless technology or may include tests for self-assessment of hearing loss. The device is available over-the-counter, without the supervision, prescription, or other order, involvement, or intervention of a licensed person, to consumers through in-person transactions, by mail, or online, provided that the device satisfies the requirements in Title 21 CFR Part 800, § 800.30(b).*

"Poses a reasonable threat" means *the nature of criminal conduct for which the person was convicted involved an act or threat of harm against another and has a bearing on the fitness or ability to serve the public or work with others in the occupation.* [63 O.S. Section 1-1454(E)(2)]

"Practice of fitting and dealing in hearing aids" means those practices used for the purpose of selection, adaptation and sale of hearing aids including direct observation of the ear together with the counseling and instruction pertaining thereto, the testing of human hearing for these purposes and the making of impressions for earmolds.

"Rescission period" means *thirty (30) calendar days from the day the hearing aid is placed in the possession of the purchaser.* [15 O.S. § 764.1 (A) (3)]

"Sell" or "sale" means any transfer of title or of the right to use by lease, bailment, or any other contract, excluding wholesale transactions with distributors or dealers.

"Sponsor" means a person who is licensed and in good standing pursuant to this Chapter to fit and dispense hearing aids and who agrees to train and supervise a temporary permit holder.

"Substantially relates" means *the nature of criminal conduct for which the person was convicted has a direct bearing on the fitness of ability to perform one or more of the duties or responsibilities necessarily related to the occupation.* [63 O.S. 1-1454 (E)(1)]

"Temporary permit" means a permit issued while the applicant is training to become a licensed hearing aid dealer or fitter.

[Source: Added at 40 Ok Reg 1554, eff 9-11-23]

SUBCHAPTER 3. QUALIFICATIONS

310:266-3-1. General qualifications

(a) Applicants for a hearing aid dealer or fitter temporary permit or license must, at a minimum, meet the following criteria:

- (1) At least eighteen (18) years of age;
- (2) Has a GED or high school diploma; and

- (3) Has submitted to a background check.
- (b) A criminal record shall not itself bar an applicant from licensing, but evidence of such record may be considered along with other information in determining whether to issue a license.

[Source: Added at 40 Ok Reg 1554, eff 9-11-23]

310:266-3-2. Reciprocity

- (a) Whenever the Department determines another state or jurisdiction has requirements equivalent to or higher than those in effect pursuant to these regulations, and that such state or jurisdiction has a program equivalent to or stricter than the program for determining whether applicants pursuant to these regulations are qualified to dispense and fit hearing aids, the Department may issue an Oklahoma license to applicants who hold current, unsuspended and unrevoked certificates or licenses to fit and sell hearing aids in such other state or jurisdiction.
- (b) Applicants must submit an application for reciprocity on forms as designated by the Department.
- (c) Applicants must submit an Out-of-State Licensure Verification form filled out by the other licensing state.
- (d) Applicants must register with the Department.
- (e) Active duty military personnel and their spouses seeking a reciprocal license are not subject to the fees established for the first period of issuance of a license.

[Source: Added at 40 Ok Reg 1554, eff 9-11-23]

SUBCHAPTER 5. TEMPORARY PERMITS, EXAMINATIONS AND LICENSURE

310:266-5-1. Temporary permits

- (a) An applicant who is at least 18 years of age and has a GED or high school diploma shall be entitled to a temporary hearing aid dealer or fitter permit upon application to the Commissioner if minimum qualifications are met.
- (b) Once a complete application is received and eligibility confirmed, the Department will issue a temporary permit entitling the applicant to engage in the fitting and sale of hearing aids for a period up to twelve (12) months until the temporary permit holder becomes fully licensed.
- (c) The temporary permit holder shall complete training under the direct on-site supervision of a Sponsor who holds a valid Oklahoma Hearing Aid Dealers' and Fitters' License. The Sponsor shall be responsible for direct on-site supervision and training of a temporary permit holder until they have passed every portion of the practical exam.
- (d) The temporary permit holder must continue to receive indirect supervision from their Sponsor until they are fully licensed as a hearing aid dealer and fitter.
- (e) If full licensure is not achieved in the twelve (12) month period, an additional temporary permit may be issued one (1) time by the

Department within the subsequent twelve (12) months upon request for a payment of the Fifteen Dollar (\$15.00) fee.

(f) A maximum of three (3) people with temporary permits may work under the direct on-site supervision of a Sponsor holding a valid Oklahoma Hearing Aid Dealers' and Fitters' License at one time.

[Source: Added at 40 Ok Reg 1554, eff 9-11-23]

310:266-5-2. License or permit required

(a) No person shall engage in the sale or practice of fitting hearing aids or display a sign or in any other way advertise or represent themselves as a person who practices the fitting and sale of hearing aids without first obtaining a license or permit in accordance with these rules from the Department. The license shall be conspicuously posted in every physical place of business where the licensee practices. Duplicate licenses may be issued by the Department to valid license holders operating more than one office, without additional payment.

(b) A corporation, partnership, trust, association or other like organization may engage in the business of selling or offering for sale hearing aids at retail, provided it employs only properly licensed persons in the direct sale and fitting of such products. Such corporations, partnerships, trust, associations or other like organizations shall make available to the Department information related to licensed dealers upon request.

310:266-5-3. Examinations

(a) A Sponsor shall attest to the temporary permit holder's readiness to take the practical examination.

(b) An applicant must wait a minimum of seven (7) days before applying to retake any failed section of the practical examination. A temporary permit holder is not required to retake any previously passed section of the practical exam, provided they pass all sections of the practical exam within the allowable timeframe.

(c) Upon submission of the application to take the practical examination, a temporary permit holder is eligible to take the International Licensing Examination for Hearing Healthcare Professionals written exam or other written exam approved by the Department.

(d) Temporary permit holders must pass the practical and written examinations to be eligible for a full license.

(e) Any temporary permit holder who fails a section of the practical examination or the written examination three (3) times will have their temporary permit revoked and will be required to wait a minimum of one (1) year from their last failed testing date to reapply for a new temporary permit.

[Source: Added at 40 Ok Reg 1554, eff 9-11-23]

310:266-5-4. Contents of examinations

(a) The practical examination shall consist of tests pertaining to the sale and fitting of hearing aids as follows:

- (1) Technique
 - (A) Pure tone audiometry
 - (B) Recorded speech audiometry
- (2) Masking;
- (3) Earmold impressions; and
- (4) Detecting damage and defects.

(b) A temporary permit holder must pass all sections of the practical exam and the International Licensing Examination for Hearing Healthcare Professionals written examination or other Department approved written examination to be eligible for a full license.

[Source: Added at 40 Ok Reg 1554, eff 9-11-23]

310:266-5-5. Initial licensure

An applicant must meet the General Qualifications as required in OAC 310:266-3-1, file a complete application with the Department, pay the required fee in full, and pass all required examinations in order to be licensed.

[Source: Added at 40 Ok Reg 1554, eff 9-11-23]

310:266-5-6. Renewal of license

(a) Each person who engages in the fitting and sale of hearing aids shall pay to the Department the annual renewal fee, submit required documentation, and keep licensure certificate conspicuously posted in every place of business at all times. A license expired for a length of time greater than five years will require the holder of an expired license to follow the initial licensure process.

(b) At the time of renewal, the licensee must provide the following:

- (1) Documentation of required continuing education hours from an approved source;
- (2) Updated address(es) if applicable;
- (3) Copy of a current receipt or contract template;
- (4) Copy of a patient file template;
- (5) Verification all instruments meet the American National Standard Specifications for Audiometers according to factory standards, dated within the last three years;
- (6) The percentage of clients tested under an exception; and
- (7) Sponsor information to include the name and permit number of all temporary permit holders sponsored in the licensure year. Information shall include the start and end dates for each instance of direct on-site supervision.

[Source: Added at 40 Ok Reg 1554, eff 9-11-23]

310:266-5-7. Continuing education requirements

Each applicant for renewal of a hearing aid dealer or fitter license must submit written evidence showing completion of ten (10) clock hours

of continuing education, completed during the previous year pertaining to the hearing sciences. The continuing education hours must be approved by the International Hearing Society or the Oklahoma Hearing Aid Dispenser's Association.

SUBCHAPTER 7. FEES

310:266-7-1. Fees

(a) Fees for license applications, permits and examinations shall be as follows:

- (1) Temporary Permit Application Fee - \$15.00;
- (2) Temporary Permit Extension Fee - \$15.00;
- (3) Examination Fee - payable directly to the Department approved examination administrator;
- (4) Reexamination Fee - payable to the Department approved examination administrator;
- (5) Initial License Application Fee - \$50.00;
- (6) Renewal License Fee - \$50.00;
- (7) Renewal of License (within thirty-day grace period) - \$75.00; and
- (8) Renewal of License (after thirty-day grace period) - \$100.00.

(b) Application fees are non-refundable.

[Source: Added at 40 Ok Reg 1554, eff 9-11-23]

SUBCHAPTER 9. INSTRUMENTS AND TESTING

310:266-9-1. Procedures and instrumentation in fitting of hearing aids

(a) All instruments used to measure thresholds shall be certified to meet American National Standard Specifications for Audiometer, S3.6-1969 or a standard which supersedes it. In addition, some form of live voice or recorded voice testing must be made to obtain at least a subjective evaluation of the individual's ability to discriminate. In the case of live voice testing, the tests should be run without visual cue. A hearing aid of similar characteristics can be refitted to an individual without a hearing test if this is done within six (6) months of the original fitting and original hearing test.

(b) Hearing testing for the purpose of fitting hearing aids shall not be conducted where ambient noise levels exceed 45 dB measured on a slow weighted dB (a) scale. If the testing environment exceeds 45 dB, the testing shall be considered a Hearing Screening and individuals informed that further testing should be done to determine auditory thresholds for the selection of a hearing aid.

[Source: Added at 40 Ok Reg 1554, eff 9-11-23]

310:266-9-2. Exceptions

(a) If a patient is incapable of presenting at a testing center, the licensed hearing aid dealer and fitter must maintain information in the patient file detailing the physical address where the testing occurred and why the testing was not done in a testing center.

(b) When utilizing an exception, the licensed hearing aid dealer and fitter must provide documentation to the patient signed by both the licensed hearing aid dealer and fitter and the patient, the patient's guardian, parent or their power of attorney. The documentation shall include:

- (1) Testing environment specification requirements as outlined in this chapter;
- (2) A description of the alternate testing environment;
- (3) The physical address of the alternate testing location;
- (4) The reason for testing at the alternate location;
- (5) A list of any testing environment requirements that may not be met at the alternate location; and
- (6) Notification that the test may not be as accurate when conducted outside a testing center.

(c) Testing exceptions will not be granted for the purposes of mass gatherings and are only intended for patients who cannot be physically present at a testing center.

[Source: Added at 40 Ok Reg 1554, eff 9-11-23]

SUBCHAPTER 11. REGULATORY ENFORCEMENT

310:266-11-1. Revocation or suspension of license

(a) The Commissioner shall have the power and duty to deny, suspend, or revoke the license of any person registered under this act, after a hearing, based upon a substantiated finding that the licensee has not operated in compliance with applicable laws, rules, and standards. Any action taken relative to denial, suspension or revocation of a license shall be initiated in compliance with the Oklahoma Administrative Procedures Act.

(b) The Commissioner shall have the power and duty to request administrative penalties pursuant to 63 O.S. §1-1701 *et seq.*

[Source: Added at 40 Ok Reg 1554, eff 9-11-23]

310:266-11-2. Prohibited acts

No person shall:

- (1) Buy, sell, or fraudulently obtain a license;
- (2) Alter a license with fraudulent intent;
- (3) Use or attempt to use the valid license of another;
- (4) Willfully make a false or misleading statement in an application for a license or application for renewal;

- (5) Violate the temporary permit supervision requirements stated in 310:266-5-1;
- (6) Sell a hearing instrument to a minor without receiving documentation from a licensed physician within six (6) months prior to fitting;
- (7) Represent in any manner that a hearing aid dealer and fitter is a licensed physician or audiologist or performs diagnostic procedures to determine the cause of a hearing impairment;
- (8) Use false or misleading advertisement;
- (9) Receive a criminal conviction for any crime that substantially relates to the practice of hearing aid dealing and fitting and poses a reasonable threat to public safety;
- (10) Obtain any fee or make any sale by fraud or misrepresentation;
- (11) Directly or indirectly giving or offering to give money or anything of value to any person who advises another in a professional capacity as an inducement to influence the person or have the person influence others to purchase or contract to purchase products sold or offered for sale by a licensee or influencing person to refrain from dealing in the products of competitors;
- (12) Commit gross incompetence or negligence in the fitting and selling of hearing aids; or
- (13) Fail to respond to a written request by the Department within thirty (30) days.

[Source: Added at 40 Ok Reg 1554, eff 9-11-23]

SUBCHAPTER 13. REQUIRED DOCUMENTS AND COMPLAINT PROCEDURES

310:266-13-1. Contracts and return policies

(a) A receipt or contract shall be provided to each person supplied with a hearing aid. It shall contain the licensee's signature, physical business address, state license number, make and model specifications of the hearing aid purchased, and full terms of the sale clearly stated. If applicable, the receipt shall be clearly marked as "used" or "reconditioned", with any terms of guarantee.

(b) The receipt or contract for a hearing aid shall include an original signature of a licensed hearing aid dealer and fitter. The holder of a temporary license may not issue a receipt unless the original signature of the direct supervisor also appears on the receipt or contract. The receipt shall have the state license number of both the licensed hearing aid dealer and fitter and the temporary licensed person.

(c) *A hearing aid provider shall provide a thirty-day rescission period on a hearing aid purchase consistent with the following terms:*

- (1) The purchaser shall have the right to cancel for any reason if the hearing aid is returned to the hearing aid provider in the same condition as when purchased, ordinary wear and tear*

excepted, within thirty (30) days of the date of receipt of the hearing aid. The thirty-day recession period shall be tolled for any period during which the hearing aid provider takes possession or control of a hearing aid after its original delivery.

(2) The purchaser is entitled to receive a full refund of the purchase price, provided the hearing aid provider may be entitled to a cancellation fee no greater than ten percent (10%) of the total purchase price for the hearing aid or One Hundred Fifty Dollars (\$150.00) per hearing aid, whichever is less.

(3) The hearing receipt or contract shall include, in immediate proximity to the space reserved for the signature of the purchaser, the specific statement in all bold-faced type capital letters no smaller than the largest print used in the written receipt or contract: OKLAHOMA STATE LAW GIVES THE PURCHASER THE RIGHT TO CANCEL THIS PURCHASE FOR ANY REASON BY RETURNING THE HEARING AID TO THE HEARING AID PROVIDER AT ANY TIME PRIOR TO MIDNIGHT OF THE THIRTIETH CALENDAR DAY AFTER RECEIPT OF THE HEARING AID. BY LAW, THE HEARING AID PROVIDER MAY BE ENTITLED TO A CANCELLATION FEE NOT TO EXCEED TEN PERCENT (10%) OF THE TOTAL PURCHASE PRICE FOR THE HEARING AID OR ONE HUNDRED FIFTY DOLLARS (\$150.00) PER HEARING AID, WHICHEVER IS LESS, TO COVER THE COSTS INCURRED BY THE HEARING AID PROVIDER. IF THE PURCHASER RETURNS THE HEARING AID WITHIN THE THIRTY-DAY PERIOD, THE PURCHASER WILL RECEIVE A REFUND OF \$__.00 (HEARING AID PROVIDER MUST INSERT THE DOLLAR AMOUNT OF THE REFUND). IF THE HEARING AID PROVIDER FAILS TO COMPLY WITH THIS PROVISIONS, COMPLAINTS SHOULD BE FORWARDED TO: OKLAHOMA STATE DEPARTMENT OF HEALTH OCCUPATIONAL LICENSING DIVISION 123 ROBERT S. KERR AVENUE OKLAHOMA CITY, OK 73102 [Title 15 O.S. § 764.1(B)(3)]

[Source: Added at 40 Ok Reg 1554, eff 9-11-23]

310:266-13-2. Patient file

The following information and measurements shall be included in each customer/patient file or permanent record, and documented for the client:

- (1) A description, including location of any visible, congenital or deformity of the ear;
- (2) Whether the client has active, or a history of, drainage from the ear within the last 90 days.
- (3) Whether the client has acute or chronic dizziness;
- (4) Whether the client has unilateral hearing loss of a sudden or recent onset within the previous 90 days;
- (5) Whether the client has a history of sudden or rapidly progressive hearing loss within the previous 90 days;

(6) Whether the client has an Audiometric Air Bone Gap equal to or greater than 15 decibels at 500 Hertz, 1000 Hertz and 2000 Hertz;

(7) Whether the client has visible evidence of significant cerumen accumulation or a foreign body in the ear canal; and

(8) All documentation required in instances where exceptions have occurred.

[Source: Added at 40 Ok Reg 1554, eff 9-11-23]

310:266-13-3. Address of place of business

When a hearing aid dealer and fitter changes business addresses, the licensee shall notify the Department, in writing, within thirty (30) days of the address change. The address provided must be a physical address. A post office box number by itself does not fulfill this requirement.

[Source: Added at 40 Ok Reg 1554, eff 9-11-23]

310:266-13-4. Complaint procedures

Any person who believes a hearing aid dealer and fitter is operating contrary to the Act or these rules may file a complaint with the Department. The Department shall receive complaints verbally or in writing. Investigations will be completed and a written report of findings provided to the hearing aid dealer and fitter and to the complainant via email if a copy is requested. The identity of the complainant shall not be disclosed by the Department.

SUBCHAPTER 15. OVER-THE-COUNTER HEARING AIDS

310:266-15-1. Over-the-counter hearing aid sales

(a) Over-the-counter (OTC) hearing aids that satisfy the conditions in Title 21 CFR Part 800, § 800.30 may be available for sale over-the-counter, without the supervision, prescription, or other order intervention or involvement of a licensed person, to consumers through in-person transactions, by mail, or online. The term "sale" includes leases or rentals.

(b) OTC hearing aids are required to satisfy the conditions imposed by the Federal Food, Drug, and Cosmetic Act, 21 U.S.C. 9 § 301 *et seq.* and the U.S. Food and Drug Administration rules in Title 21 CFR Part 800 including without limitation:

- (1) Labeling;
- (2) Output limits;
- (3) Electroacoustic performance limits;
- (4) Design requirements; and

(5) Conditions for sale of an OTC hearing aid - consumer age minimum of 18 years old with perceived mild to moderate hearing impairment.

(c) A license issued under this Chapter is not required for the sale of OTC hearing aids. Persons licensed under this Chapter may sell OTC hearing aids.

CHAPTER 276. HOME INSPECTION INDUSTRY [REVOKED]

Editor's Note: *Effective 11-1-08, the authority to "adopt, amend, repeal, and promulgate rules as may be necessary to regulate . . . home inspectors" was transferred from the Oklahoma State Department of Health to the Construction Industries Board [see 59 O.S., § 1000.4]. The Construction Industries Board promulgated emergency rules on 11-14-08 [see 26 Ok Reg 387 and 390], and subsequently superseded those emergency rules with permanent rules at OAC 158:70 on 7-11-09 [see also OAC 158:10-3-1 for related fines]. The Department of Health later revoked the rules regulating home inspectors in this Chapter 276, effective 9-12-14. For additional information about this transfer, see Laws 2008, c. 405.*

CHAPTER 281. DIAGNOSTIC X-RAY SYSTEMS

[**Authority:** 63 O.S. Supp. 1991, §§ 1-1501 et seq.]

[**Source:** Codified 5-29-92]

SUBCHAPTER 1. GENERAL PROVISIONS

310:281-1-1. Purpose

Except as otherwise specifically provided, these regulations apply to all persons who use diagnostic x-ray systems.

[**Source:** Added at 8 Ok Reg 3503, eff 8-15-91 (emergency); Added at 9 Ok Reg 1643, eff 5-29-92 ; Amended at 21 Ok Reg 1037, eff 5-13-04]

310:281-1-2. Definitions

The following words or terms, when used in this Chapter, shall have the following meaning, unless the context clearly indicates otherwise.

"Absorbed dose" means the energy imparted to matter by ionizing radiation per unit mass of irradiated material at the place of interest. The special units of absorbed dose are the rad and the gray (Gy). (See definitions of "Rad" and "Gray" in this Section.)

"Accessible surface" means the external surface of the enclosure or housing provided by the manufacturer.

"ACR Technical Standard for Teleradiology" means the degree or level of requirements for the performance of teleradiology to include qualifications of personnel, equipment guidelines, licensing, credentialing, communication, quality control, and quality improvement to serve as a model for all physicians and health care workers who utilize teleradiology.

"Act" means applicable portions of the Oklahoma Public Health Code. (Title 63 O.S. Supp. 2001, Sections 1-1501.1 et seq.)

"Adult" means any individual 18 or more years of age.

"Aluminum equivalent" means the thickness of type 1100 aluminum alloy affording the same attenuation, under specified conditions, as the material in question. The nominal chemical composition of type 1100 aluminum alloy is 99.00 percent minimum aluminum, 0.12 percent copper.

"American College of Radiology" (ACR) means the principal organization of radiologists, radiation oncologists, and clinical medical physicists in the United States that is a non-profit professional society whose primary purposes are to advance the science of radiology, improve service to the patient, study socioeconomic aspects of the practice of radiology, and encourage continuing education for radiologists, radiation oncologists, medical physicists, and persons practicing in allied professional fields.

"Assembler" means any person engaged in the business of assembling, replacing, or installing one or more components into a diagnostic x-ray system or subsystem. The term includes the owner of a diagnostic x-ray system and/or his or her employee or an agent who assembles components into a diagnostic x-ray system that is

subsequently used to provide professional or commercial services.

"Attenuate" means to reduce the exposure rate upon passage of radiation through matter.

"Attenuation block" means a block or stack, having dimensions 20 centimeters by 20 centimeters by 3.8 centimeters, of type 1100 aluminum alloy or other materials having equivalent attenuation.

"Automatic exposure control" means a device which automatically controls one or more technique factors in order to obtain at a preselected location(s) a required quantity of radiation. (See also definition of "Phototimer" in this section.)

"Beam axis" means a line from the source through the centers of the x-ray fields.

"Beam-limiting device" means a device which provides a means to restrict the dimensions of the x-ray field.

"Beam quality" means a term that describes the penetrating power of the x-ray beam. This is identified by half-value layer and is influenced by kilovolt peak (kVp) and filtration.

"Bone densitometer" means a system intended for medical purposes to measure bone density and mineral content by x-ray transmission measurements through the bone and adjacent tissues.

"Calendar quarter" means not less than 12 consecutive weeks nor more than 14 consecutive weeks. The first calendar quarter of each year begins in January and subsequent calendar quarters are arranged so that no day is included in more than one calendar quarter and no day in any one year is omitted from inclusion within a calendar quarter. No permittee can change the method observed by that individual in determining calendar quarters for purposes of these regulations except at the beginning of a calendar year.

"Calendar year" means the time period running from January 1st through December 31st.

"Calibration" means the determination of: the response or reading of an instrument relative to a series of known radiation values over the range of the instrument; or the strength of a source of radiation relative to a standard.

"Central axis of the beam" means a line passing through the virtual source and the center of the plane figure formed by the edge of the first beam limiting device.

"Cephalometric system" means a system intended for the radiographic visualization and measurement of the dimensions of the human head.

"Certified components" means components of diagnostic x-ray systems, which are subject to regulations promulgated under the Radiation Control for Health and Safety Act of 1968. (21 CFR Parts 1000-1030.)

"Certified system" means any diagnostic x-ray system which has one or more certified component(s).

"CFR" means Code of Federal Regulations.

"Changeable filter" means any filter, exclusive of inherent filtration, which can be removed from the useful beam through any electronic, mechanical, or physical process.

"Coefficient of variation" (C) means the ratio of the standard deviation to the mean value of a population of observations.

"Collimator" means a device or mechanism by which the x-ray beam is restricted in size.

"Computed tomography" (CT) means the production of a tomogram by the acquisition and computer processing of x-ray transmission data.

"Computed tomography dose index" (CTDI) means the integral from -7T to +7T of the dose profile along a line perpendicular to the tomographic plane divided by the product of the nominal tomographic section thickness and the number of tomograms produced in a single scan.

"Contrast scale" (CS) means the change in the linear attenuation coefficient per CTN relative to water.

"Control panel" means that part of the radiation machine control upon which are mounted the switches, knobs, push buttons, and other hardware necessary for manually setting the technique factors.

"CT conditions of operation" means all selectable parameters governing the operation of a CT x-ray system including, but not limited to, nominal tomographic section thickness, filtration, and the technique factors as defined in 310:281-11-15.

"CT gantry" means the tube housing assemblies, beam limiting devices, detectors and the supporting structures and frames, which hold these components.

"CT number" (CTN) means the number used to represent the x-ray attenuation associated with each elemental area of the CT image.

"Dead-man switch" means a switch so constructed that a circuit closing contact can be maintained only by continuous pressure on the switch by the operator.

"Declared pregnant woman" means a woman who has voluntarily informed the permittee, in writing, of her pregnancy and the estimated date of conception. The declaration remains in effect until the declared woman voluntarily withdraws the declaration in writing or is no longer pregnant.

"Deep dose equivalent" (DDE) (H_D) means the dose which applies to external whole-body exposure and is the dose equivalent at a tissue depth of 1 cm (1000 mg/cm^2).

"Department" means the Oklahoma State Department of Health.

"Diagnostic source assembly" means the tube housing assembly with a beam-limiting device attached.

"Diagnostic-type tube housing" means an x-ray tube housing so constructed that the leakage radiation measured at a distance of 1 meter from the source cannot exceed 100 mr in 1 hour when the tube is operated at its maximum continuous rated current for the maximum rated tube potential.

"Diagnostic x-ray system" means an x-ray system designed for irradiation of any part of the human body for the purpose of diagnosis or visualization. Types of diagnostic x-ray systems are as follows:

(A) **"Mobile diagnostic x-ray system"** means a diagnostic x-ray system mounted on a permanent base

with wheels and/or casters for moving while completely assembled.

(B) **"Portable diagnostic x-ray system"** means a diagnostic x-ray system designed to be hand-carried.

(C) **"Stationary diagnostic x-ray system"** means a diagnostic x-ray system which is installed in a fixed location. A diagnostic x-ray system installed in a vehicle designed to be operated on the highway is considered to be a stationary x-ray system.

"Dose" means absorbed dose or dose equivalent as appropriate.

"Dose equivalent" (DE) (H_T) means a quantity that expresses on a common scale for all radiation a measure of the postulated effect on a given organ. It is the absorbed dose in rads times certain modifying factors. The units of dose equivalent are the rem and sievert (Sv). (See definitions of "Rem" and "Sievert" in this Section.)

"Dose limits" means the permissible upper bounds of radiation doses established in accordance with this Chapter. For the purposes of this Chapter, "limits" is an equivalent term.

"Dose monitoring system" means a system of devices for the detection, measurement, and display of quantities of radiation.

"Dose monitor unit" means a unit response from the dose monitoring system from which the absorbed dose can be calculated.

"Dose profile" means the dose as a function of position along a line.

"Effective dose equivalent" (EDE) (H_E) is the sum of the products of the dose equivalent to the organ or tissue (H_T) and the weighting factors (WT) applicable to each of the body organs or tissues that irradiated ($H_E = \sum W_T H_T$).

"Elemental area" means the smallest area within a tomogram for which the x-ray attenuation properties of a body are depicted.

"Embryo/fetus" means the developing human organism from conception until the time of birth.

"Entrance exposure" means the exposure, measured in air with the specified technique, calculated or adjusted to represent the exposure at the point where the center of the useful beam enters the patient expressed in roentgens.

"Entrance exposure rate" means the exposure per unit time at the point where the center of the useful beam enters the patient.

"Exposure" means the absolute value of the total charge of the ions of one sign produced in air when all the electrons (negatrons and positrons) liberated by photons in a unit mass volume of air are completely stopped in air. The special unit of exposure is the roentgen. (See definition of "Roentgen" in this Section.)

"Exposure rate" means the exposure per unit of time, such as roentgen per minute and milliroentgen per hour.

"Extremity" means hand, elbow, arm below the elbow, foot, knee, and leg below the knee. The arm above the elbow and the leg above the knee are considered part of the whole body.

"Facility" means the location at which one or more diagnostic x-ray systems, subject to these rules, are located and/or installed. Facilities

with several such systems located and/or installed in different buildings and/or vehicles, but at the same street address and under the same administrative control will be considered to be one facility.

"Field emission systems" means systems which uses an x-ray tube in which electron emission from the cathode is due solely to the action of an electric field.

"Field flattening filter" means a filter used to provide dose uniformity over the area of a useful beam of x-rays at a specified depth.

"Field size" means the dimensions along the major axes of an area in a plane perpendicular to the central axis of the useful beam of incident radiation at the normal treatment distance and defined by the intersection of the major axes and the 50 percent isodose line. Material shall be placed in the beam such that the dose maximum is produced at the normal treatment distance when the field size is being determined.

"Filter" means material placed in the useful beam to absorb preferentially selected radiations.

"Fluoroscopic imaging assembly" means a subsystem in which x-ray photons produce a fluoroscopic image. It includes the image receptor(s) such as the image intensifier and spot-film device, electrical interlocks, if any, and structural material providing linkage between the image receptor and diagnostic source assembly.

"Focal spot" means the area projected on the anode of the x-ray tube by the electrons accelerated from the cathode and from which the useful beam originates.

"Fog test" means an evaluation of increased density and reduced contrast on film, which has not been exposed to the radiation field. This is usually done by processing unexposed film and measuring the density.

"Gantry" means that part of the system supporting and allowing possible movement of the radiation head.

"General purpose x-ray system" means any diagnostic x-ray system, which, by design, is not limited to radiographic examination of specific anatomical regions.

"Gonadal shield" means a protective barrier for the testes or ovaries.

"Gray" (Gy) means the SI unit of absorbed dose. One gray is equal to an absorbed dose of 1 joule/kilogram (100 rads) of tissue.

"Half-value layer" (HVL) means the thickness of specified material which attenuates the beam of radiation to an extent such that the exposure rate is reduced to one-half of its original value. In this definition, the contribution of all scattered radiation, other than any which might be present initially in the beam concerned, is deemed to be excluded.

"Healing arts" means those professional disciplines authorized by the laws of this state to use x-rays in the diagnosis of human or animal disease.

"Healing arts screening" means the testing of human beings using diagnostic x-ray systems for the detection or evaluation of health indications when such tests are not specifically and individually ordered by a licensed practitioner of the healing arts legally authorized to prescribe such x-ray examinations for the purpose of diagnosis.

"High radiation area" means any area, accessible to individuals, in which there exists radiation at such levels that a major portion of the body could receive in any one hour a dose in excess of 100 millirems.

"Human use" means the external administration of radiation to human beings.

"Image intensifier" means a device installed in its housing, which instantaneously converts an x-ray pattern into a corresponding light image of higher energy density.

"Image receptor" means any device such as a fluorescent screen or radiographic film which transforms incident x-ray photons either into a visible image or into another form which can be made into a visible image by further transformations.

"Image receptor support" means for mammographic systems that part of the system designed to support the image receptor in a horizontal plane during a mammographic examination.

"Inspection" means an official examination or observation including, but not limited to, records, tests, surveys, and monitoring to determine compliance with rules, regulations, orders, requirements, and conditions of the Department.

"Interlock" means: a device arranged or connected such that the occurrence of an event or condition is required before a second event or condition can occur or continue to occur; or a device for precluding access to an area of high radiation by automatically reducing the exposure rate.

"Irradiation" means the exposure of matter to ionizing radiation.

"Kilovolts peak (kVp)" means the maximum value of the potential difference across the x-ray tube during an exposure and is the equivalent to kilovolts peak (kVp).

"kV" means kilovolts.

"kWs" means kilowatt second. It is equivalent to 10^3 (kV) x (mA) x (s)

"Lead equivalent" means the thickness of lead affording the same attenuation, under specified conditions, as the material in question.

"Leakage radiation" means radiation emanating from the diagnostic source assembly except for: the useful beam, and radiation produced when the exposure switch or timer is not activated.

"Leakage technique factors" means the technique factors associated with the diagnostic assembly, which are used in measuring leakage radiation. The technique factor(s) are defined as follows: For diagnostic source assemblies intended for capacitor energy storage equipment, it is the maximum-rated peak tube potential and the maximum-rated number of exposures in an hour for operation at the maximum-rated peak tube potential with the quantity of charge per exposure being 10 millicoulombs, i.e., 10 milliampere seconds, or the minimum obtainable from the unit, whichever is larger. For diagnostic source assemblies intended for field emission equipment rated for pulsed operation, it is the maximum-rated peak tube potential and the maximum-rated number of x-ray pulses in an hour for operation at the maximum-rated peak tube potential. For all other diagnostic source assemblies, it is the maximum-rated peak tube potential and the

maximum-rated continuous tube current for the maximum-rated peak tube potential.

"Lens dose equivalent (LDE)" means the external DE to the lens of the eye at a tissue depth of 0.3 cm (300 mg/cm²).

"Light field" means that area of the intersection of the light beam from the beam-limiting device and one of the sets of planes parallel to and including the plane of the image receptor, whose perimeter is the locus of points at which the illumination is one-fourth of the maximum in the intersection.

"Linear attenuation coefficient" (μ) means the quotient of dN/N by dl when dN/N is the fraction of uncharged ionizing radiation that experience interactions in traversing a distance dl in a specified material.

"mA" means milliamperere.

"mAs" means milliamperere second.

"Mean" (\bar{X}) means the average value of a set of numbers.

"Medical physicist" means an individual having the knowledge and training to measure ionizing radiation, to evaluate safety techniques, and to advise regarding radiation protection needs. For example, "medical physicists" may include individuals certified in the field of diagnostic x-ray systems by the American Board of Radiology in physics, the American Board of Health Physics, the American Board of Medical Physics, individuals licensed by an appropriate state agency, or individuals otherwise deemed by the Department to have equivalent qualifications.

"MeV" means million electron volts.

"Minor" means any individual less than 18 years of age.

"Multiple tomogram systems" means a computed tomography system, which obtains x-ray transmission data simultaneously during a single scan to produce more than one tomogram.

"Multiple scan average dose (MSAD)" means the average dose at the center of a series of scans, specified at the center of the axis of rotation of a computed tomography system.

"Nominal tomographic section thickness" means the full-width at half-maximum of the sensitivity profile taken at the center of the cross sectional volume over which x-ray transmission data are collected.

"Noise" means the standard deviation of the fluctuations in CTN expressed as a percentage of the attenuation coefficient of water.

"Occupational dose" means radiation exposure received by an individual in the course of employment in which the individual's duties involve exposure to radiation. Occupational dose does not include any radiation exposure of an individual for the purpose of diagnosis.

"Patient" means an individual subjected to healing arts examination or diagnosis.

"Permittee" means any person which is issued a permit by the Department in accordance with these regulations and the Act.

"Person" means any individual, corporation, partnership, firm, association, trust, estate, public or private institution, group, agency, political subdivision of this State, any other State or political subdivision or agency thereof, and any legal successor, representative, agent, or

agency of the foregoing.

"Personnel monitoring equipment" means devices such as film badges, pocket dosimeters, and thermoluminescent dosimeters designed to be worn or carried by an individual for the purpose of estimating the dose received by the individual.

"Phantom" means a volume of material behaving in a manner similar to tissue with respect to the attenuation and scattering of radiation.

"Phototimer" means a method for controlling radiation exposures to image receptors by the amount of radiation which reaches a radiation monitoring device(s). The radiation monitoring device(s) is part of an electronic circuit which controls the duration of time the tube is activated. (See definition of "Automatic exposure control" in this Section.)

"Physician" means a person who is licensed by either the Oklahoma State Board of Medical Licensure and Supervision or by the Oklahoma State Board of Osteopathic Examiners to practice medicine, radiology, and/or surgery.

"Primary scattered radiation" means that scattered radiation which has been deviated in direction only by materials irradiated by the useful beam. (See also definition of "scattered radiation" in this Section.)

"Protective apron" means an apron made of radiation absorbing materials used to reduce radiation exposure.

"Protective barrier" means a barrier of radiation absorbing material(s) used to reduce radiation exposure. The types of protective barriers are as follows:

"Primary protective barrier" means the material, excluding filters, placed in the useful beam, for protection purposes, to reduce the radiation exposure.

"Secondary protective barrier" means a barrier sufficient to attenuate the stray radiation to the required degree.

"Protective glove" means a glove made of radiation absorbing materials used to reduce radiation exposure.

"Qualified expert" (see definition of "Medical Physicist".)

"Rad" means the special unit of absorbed dose. One rad equals 0.01 joule per kilogram (100 ergs per gram) of material; for example; if tissue is the material of interest, then 1 rad equals 0.01 joule per kilogram (0.01 gray) of tissue. (See definition of "Absorbed Dose" in this section.)

"Radiation" means ionizing radiation delivered by x rays.

"Radiation area" means any area, accessible to individuals, in which radiation levels could result in an individual receiving a dose equivalent in excess of 0.005 rem (0.05 mSv) in 1 hour at 30 centimeters from the radiation source or from any surface that the radiation penetrates.

"Radiation detector" means a device which, in the presence of radiation, provides a signal or other indication suitable for use in measuring one or more quantities of incident radiation.

"Radiation head" means the structure from which the useful beam emerges.

"Radiation machine" means any device capable of producing radiation except those which produce radiation only from radioactive material.

"Radiation safety officer" (RSO) means one who has been delegated the responsibility to apply all of the appropriate radiation protection regulations.

"Radioactivity" means the transformation of unstable atomic nuclei by the emission of radiation.

"Radiograph" means an image receptor on which the image is created directly or indirectly by an x-ray pattern and results in a permanent record.

"Radiographic imaging system" means any system whereby a permanent or semi-permanent image is recorded on an image receptor by the action of ionizing radiation.

"Rating" means the operating limits as specified by the component manufacturer.

"Recording" means producing a permanent form of an image resulting from x-ray photons.

"Reference plane" means a plane which is displaced from and parallel to the tomographic plane.

"Registration" means registration with the Department in accordance with this Chapter.

"Rem" means a special unit of the dose equivalent. One millirem (mrem) = 0.001 rem (See definition of "Dose Equivalent" in this Section.) For the purpose of these regulations, any of the following is considered to be equal to one rem:

- (A) exposure of 1 roentgen of x-ray or gamma radiation.
- (B) an absorbed dose of 1 rad due to x-ray, gamma, or beta radiation.
- (C) an absorbed dose of 0.05 rad due to particles heavier than protons and with sufficient energy to reach the lens of the eye.
- (D) an absorbed dose of 0.1 rad due to fast neutrons or high energy protons.
- (E) an absorbed dose of 0.4 rad due to thermal neutrons.
- (F) 1 rem = 0.01 sievert.

"Research" means:

- (A) theoretical analysis, exploration, or experimentation;
or
- (B) the extension of investigative findings and theories of a scientific or technical nature into practical application for experimental and demonstration purposes, including the experimental production and testing of models, devices, equipment, materials, and processes. Research and development does not include the internal or external administration of radiation to human beings.

"Response time" means the time required for an instrument system to reach 90 percent of its final reading when the radiation-sensitive volume of the instrument system is exposed to a step change in radiation flux from zero sufficient to provide a steady state midscale reading.

"Restricted area" (controlled area) means any area, access to which is controlled by the permittee for the purpose of protecting individuals from exposure to radiation. A restricted area does not include any areas used for residential quarters, although a room or rooms in a residential building may be set apart as a restricted area.

"Roentgen" (R) means the special unit of exposure. One roentgen (R) equals 2.58×10^{-4} coulombs/kilogram of air. (See definition of "Exposure" in this Section.)

"Scan" means the complete process of collecting x-ray transmission data for the production of a tomogram. Data can be collected simultaneously during a single scan for the production of one or more tomograms.

"Scan increment" means the amount of relative displacement of the patient with respect to the CT x-ray system between successive scans measured along the direction of such displacement.

"Scan sequence" means a preselected set of two or more scans performed consecutively under preselected CT conditions of operation.

"Scan time" means the periods of time between the beginning and end of x-ray transmission data accumulation for a single scan.

"Scattered radiation" means radiation that, during passage through matter, has been deviated in direction. (See definition of "Direct scattered radiation" in this Section.)

"Secondary dose monitoring system" means a system which will terminate irradiation in the event of failure of the primary system.

"Shallow dose equivalent (SDE)" means the DE at a tissue depth of 0.007 cm (7 mg/cm²) averaged over an area of 1 square centimeter (cm²). (SDE applies to the external exposure of the skin or an extremity.)

"Shutter" means a device attached to the tube housing assembly which can totally intercept the useful beam and which has a lead equivalency not less than that of the tube housing assembly.

"SI" means the abbreviation for the International System of Units.

"Single tomogram system" means a CT x-ray system, which obtains x-ray transmission data during a scan to produce a single tomogram.

"Sievert" (Sv) means the SI unit of any of the qualities expressed as dose equivalent. The dose equivalent in sieverts is equal to the absorbed dose in grays multiplied by the quality factor (1 Sv = 100 rems).

"Source" means the focal spot of the x-ray tube.

"Source-to-image receptor distance (SID)" means the distance from the source to the center of the input surface of the image receptor.

"Source of radiation" means any instrument capable of producing or emitting radiation. (i.e., x-ray tube assembly.)

"Source-to-skin distance (SSD)" means the distance between the source and the skin of the patient.

"Special procedures" means the application of special x-ray systems and specialized techniques to obtain required diagnostic information. This usually provides enhanced detail of a given anatomical structure but with reduced visualization of other structures. Special procedures include, but are not limited to, angiography, cardiac

catheterization, myelography, and surgery.

"Special purpose x-ray system" means any diagnostic x-ray system, which is limited, by design, to radiographic examinations of specific anatomical regions. Special purpose x-ray systems include, but are not limited to, mammography systems, dedicated chest systems, cystography systems, and head and skull systems.

"Spot check" means a procedure which is performed to assure that a previous calibration continues to be valid.

"Spot film" means a radiograph which is made during a fluoroscopic examination to permanently record conditions which exist during that fluoroscopic procedure.

"Spot-film device" means a device intended to transport and/or position a radiographic image receptor between the x-ray tube head and fluoroscopic image receptor. It includes a device intended to hold a cassette over the input end of an image intensifier for the purpose of making a radiograph.

"Standard deviation" (s) means a measure of the dispersion or variation in distribution, equal to the square root of the mean of the squares of the deviations from the mean root of the distribution

"Stored system" means a diagnostic x-ray system which has been disabled such that when power is supplied to the control panel (technique indicators), the x-ray tube may not be energized.

"Stray radiation" means the sum of leakage and scattered radiation.

"Supervision" means the delegating of the task of applying radiation pursuant to these regulations by persons, not licensed in the healing arts or veterinary medicine, who provide services under the practitioner's control. The licensed practitioner assumes full responsibility for these tasks and must assure that the tasks will be administered correctly.

"Survey" means an evaluation of the production, use, release, disposal, and/or presence of sources of radiation under a specific set of conditions to determine actual or potential radiation hazards. When appropriate, such evaluation includes, but is not limited to, tests, physical examinations, and measurements of levels of radiation or concentrations of radioactive material present.

"Technique chart" means a chart that provides all necessary generator control settings and geometry needed to make clinical radiographs when the radiography system is in manual mode.

"Technique factors" mean the conditions of operation. Technique factor(s) are specified as follows:

- (A) for capacitor energy storage systems, it is peak tube potential in kV and quantity of charge in mAs;
- (B) for field emission systems rated for pulsed operation, it is peak tube potential in kV and number of x-ray pulses;
- (C) for CT systems designed for pulsed operations, it is peak tube potential in kV, scan time in seconds, and either tube current in mA, x-ray pulse width in seconds, and the number of x-ray pulses per scan or the product of tube current, x-ray pulse width, and the number of x-ray pulses in mAs;

(D) for CT systems not designed for pulsed operation, it is peak tube potential in kV, and either tube current in mA and scan time in seconds or the product of tube current and exposure time in mAs and the scan time when the scan time and exposure time are equivalent; and
(E) for all other systems, it is peak tube potential in kV and either tube current in mA and exposure time in seconds or the product of tube current and exposure time in mAs.

"Teleradiology" means the electronic transmission of radiological images from one location to another for the purposes of interpretation and/or consultation.

"Test" means the process of verifying compliance with an applicable regulation.

"These regulations" means all subchapters of the Diagnostic X-ray Systems Regulations. (Chapter 281 of this Title.)

"Tomogram" means the depiction of the x-ray attenuation properties of a section through the body.

"Tomographic plane" means that geometric plane which is identified as corresponding to the output tomogram.

"Tomographic section" means the volume of an object whose x-ray attenuation properties are imaged in a tomogram.

"Total Effective Dose Equivalent (TEDE)" means, for external exposure only to x-ray radiation from diagnostic x-ray systems, the TEDE is equal to the DDE. If an individual receives an occupational dose from both diagnostic x-ray systems and radioactive materials, the TEDE is the sum of the deep-dose equivalent (for external exposures) and the committed effective dose equivalent (for internal exposures).

"Traceable to a national standard" means that a quantity or a measurement has been compared to a national standard directly or indirectly through one or more intermediate steps and that all comparisons have been documented.

"Transfer" means:

(A) To change the possession or legal title of a diagnostic x-ray system; or

(B) To relocate from one physical address to another.

"Tube housing assembly" means the tube housing with tube installed. It includes high-voltage and/or filament transformers and other appropriate elements when such are contained within the tube housing.

"Unrestricted area" (uncontrolled area) means any area access which is not controlled by the permittee for purposes of protection of individuals from exposure to radiation and any area used for residential quarters.

"Useful beam" means the radiation emanating from the tube housing port or the radiation head and passing through the aperture of the beam limiting service when the exposure controls are in a mode to cause the system to produce radiation.

"User" means any person who causes any radiation producing machine, subject to these regulations, to be energized.

"Virtual source" means a point from which radiation appears to originate.

"Visible area" means that portion of the input surface of the image receptor over which incident x-ray photons produce a visible image.

"Wedge filter" means an added filter effecting continuous progressive attenuation on all or part of the useful beam.

"Whole Body" means for purposes of external exposure, head, trunk (including male gonads), arms above the elbow, or legs above the knee.

"Worker" means an individual engaged in work in a facility issued a permit by the Department and controlled by a permittee, but does not include the permittee.

"X-ray control" means a device which controls input power to the x-ray high-voltage generator or the x-ray tube. It includes equipment such as timers, phototimers, automatic brightness stabilizers, and similar devices which control the technique factors of an x-ray exposure.

"X-ray field" means that area of the intersection of the useful beam and any one of the set of planes parallel to and including the plane of the image receptor whose perimeter is the locus of points at which the exposure rate is one-fourth of the maximum in the intersection.

"X-ray high-voltage generator" means a device which transforms electrical energy from the potential supplied by the x-ray control to the tube operating potential. The device may also include means for transforming alternating current to direct current, filament transformers for the x-ray tube(s), high-voltage switches, electrical protective devices, and other appropriate elements.

"X-ray system" means an assemblage of components for the controlled production of x-rays. It includes minimally an x-ray high-voltage generator, an x-ray control, a tube housing assembly, a beam-limiting device, and the necessary supporting structures. Additional components which function with the system are considered integral parts of the system.

"X-ray tube" means any electron tube which is designed to be used primarily for the production of x-rays.

310:281-1-3. Exemptions from the regulatory requirements

The Department may, upon application therefore or upon its own initiative, grant such exemptions or exceptions from the requirements of these regulations as it determines are authorized by law and will not result in undue hazard to public health and safety or property.

[Source: Added at 8 Ok Reg 3503, eff 8-15-91 (emergency); Added at 9 Ok Reg 1643, eff 5-29-92 ; Amended at 21 Ok Reg 1037, eff 5-13-04]

310:281-1-4. General regulatory requirements

(a) **Records.** Each permittee shall maintain records showing the receipt, transfer, and disposal of all diagnostic x-ray systems.

(b) **Inspections.**

(1) Each permittee shall afford the Department at all reasonable times opportunity to inspect diagnostic x-ray systems and the

premises and facilities wherein such diagnostic x-ray systems are used or stored.

(2) Each permittee shall make available to the Department for inspection, upon reasonable notice, records maintained pursuant to these regulations.

(c) **Tests.** Each permittee shall perform upon instructions from the Department, or allow the Department to perform, such reasonable tests as the Department deems appropriate or necessary to ensure safety including, but not limited to, tests of:

- (1) facilities wherein diagnostic x-ray systems are used or stored;
- (2) radiation detection and monitoring instruments; and
- (3) other equipment and devices used in connection with utilization or storage of permitted diagnostic x-ray systems.

(d)

(e)

(f)

(g) **Prohibited uses.**

(1) Fluoroscopic screens used in conjunction with a source of radiation shall not be held by an individual.

(2) The intentional exposure of persons to ionizing radiation by persons other than licensed practitioners of the healing arts or persons acting under their direction is prohibited.

(h) **Communications.** All communications and reports concerning these regulations, and permit applications or registration filed thereunder, should be addressed to the Oklahoma State Department of Health, Consumer Health Service, 123 Robert S. Kerr Avenue, Oklahoma City, Oklahoma, 73102.

(i) **Severability.** If any regulation is determined to be unconstitutional or invalid, it does not impact the enforceability or validity of any other regulation in this Chapter.

[Source: Added at 8 Ok Reg 3503, eff 8-15-91 (emergency); Added at 9 Ok Reg 1643, eff 5-29-92 ; Amended at 21 Ok Reg 1037, eff 5-13-04 ; Amended at 38 Ok Reg 1954, eff 9-11-21]

SUBCHAPTER 3. REGISTRATION OF DIAGNOSTIC X-RAY SYSTEMS

310:281-3-1. Purpose

(a) This subchapter provides for the registration of diagnostic x-ray systems.

(b) In addition to the requirements of this subchapter, all registrants are subject to the applicable provisions of all subchapters of these regulations.

[Source: Added at 8 Ok Reg 3503, eff 8-15-91 (emergency); Added at 9 Ok Reg 1643, eff 5-29-92 ; Amended at 21 Ok Reg 1037, eff 5-13-04]

310:281-3-2. Exemptions

(a) Electronic systems that produces x-ray radiation incidental to its operation for other purposes are exempt from the registration and notification requirements of this part, provided dose equivalent rate averaged over an area of 10 square centimeters does not exceed 0.5 millirem per hour at 5 centimeters from any accessible surface of such systems. The production, testing, or factory servicing of such system shall not be exempt.

(b) Diagnostic x-ray systems while in transit or storage incident thereto are exempt from the requirements of this subchapter.

[Source: Added at 8 Ok Reg 3503, eff 8-15-91 (emergency); Added at 9 Ok Reg 1643, eff 5-29-92 ; Amended at 21 Ok Reg 1037, eff 5-13-04]

310:281-3-3. Registration [REVOKED]

[Source: Added at 8 Ok Reg 3503, eff 8-15-91 (emergency); Added at 9 Ok Reg 1643, eff 5-29-92 ; Amended at 21 Ok Reg 1037, eff 5-13-04 ; Revoked at 38 Ok Reg 1954, eff 9-11-21]

310:281-3-4. Report of changes

The owner or lessee shall notify the Department in writing before making any change which would render the information contained in the application for registration and/or the permit inaccurate. Changes in diagnostic x-ray system status shall be made at the time of permit renewal.

[Source: Added at 8 Ok Reg 3503, eff 8-15-91 (emergency); Added at 9 Ok Reg 1643, eff 5-29-92 ; Amended at 21 Ok Reg 1037, eff 5-13-04]

310:281-3-5. Approval not implied [REVOKED]

[Source: Added at 8 Ok Reg 3503, eff 8-15-91 (emergency); Added at 9 Ok Reg 1643, eff 5-29-92 ; Revoked at 38 Ok Reg 1954, eff 9-11-21]

310:281-3-6. Assembler and/or transferor obligation

(a) Except as provided under 310:281-3-2(b), any person who sells, leases, transfers, lends, disposes, assembles, or installs diagnostic x-ray systems in this state shall record the following information and submit it to the Department within 15 days:

- (1) the name and address of persons who have received these systems;
- (2) the manufacturer, model, and serial number of each diagnostic x-ray system transferred; and
- (3) the date of transfer of each diagnostic x-ray system.

(b) In the case of diagnostic x-ray systems which contain certified components, a copy of the assembler's report prepared in compliance with the Federal diagnostic x-ray standard (21 CFR 1020.30 (d)) shall be submitted to the Department within 15 days following completion of the assembly. Such report will suffice in lieu of any other report by the assembler.

(c) No person shall make, sell, lease, transfer, lend, assemble, or install diagnostic x-ray systems or the supplies used in connection with such

systems unless such supplies and systems when properly placed in operation meet the requirements of these regulations.

[Source: Added at 8 Ok Reg 3503, eff 8-15-91 (emergency); Added at 9 Ok Reg 1643, eff 5-29-92 ; Amended at 21 Ok Reg 1037, eff 5-13-04 ; Amended at 38 Ok Reg 1954, eff 9-11-21]

310:281-3-7. Out-of-state diagnostic x-ray systems

(a) Whenever any diagnostic x-ray system is initially brought into the State, for diagnostic use other than in a permanent facility, notice to the Department will be provided at least three (3) working days before such systems are to be used in the State, and such systems will be registered with the Department. The notice shall include:

- (1) the number(s) and type(s) of diagnostic x-ray systems;
- (2) the nature, start date, duration, and scope of use;
- (3) the exact location(s) where the diagnostic x-ray systems are to be used;
- (4) the name(s) and address (es) where the equipment user(s) can be reached while in the state;
- (5) if other than an individually owned machine, the designated service agent shall also be listed;
- (6) comply with all applicable regulations of the Department; and
- (7) supply the Department with such other information as the Department may reasonably request.

(b) If, for a specific case, the three working-day period would impose an undue hardship on the person, approval to proceed sooner may be granted upon request to the Department.

[Source: Added at 8 Ok Reg 3503, eff 8-15-91 (emergency); Added at 9 Ok Reg 1643, eff 5-29-92 ; Amended at 21 Ok Reg 1037, eff 5-13-04 ; Amended at 38 Ok Reg 1954, eff 9-11-21]

SUBCHAPTER 5. PERMITS

310:281-5-1. General

No person shall use, operate or cause to be operated a diagnostic x-ray system which does not have a valid facility permit issued to the owner or lessee of that system by the Oklahoma State Department of Health pursuant to Title 63 O.S. Sections 1-1501.1 through 1-1505, as amended. Only a person who is in substantial compliance with the requirements of these rules and regulations is entitled to receive or retain such a permit. Permits are not transferable. A valid permit shall be posted in each facility where the diagnostic x-ray system is located.

[Source: Added at 8 Ok Reg 3503, eff 8-15-91 (emergency); Added at 9 Ok Reg 1643, eff 5-29-92 ; Amended at 21 Ok Reg 1037, eff 5-13-04 ; Amended at 38 Ok Reg 1954, eff 9-11-21]

310:281-5-2. Issuance of permit

(a) Any person(s) wishing to operate or cause to be operated a diagnostic x-ray system shall :

- (1) be the owner or lessee of the system; and

- (2) make application for a permit on forms provided by the Oklahoma State Department of Health; and
 - (3) Submit an application within 30 days following the commencement of operation of a diagnostic x-ray system.
- (b) No permit will be issued except upon successful registration of the diagnostic x-ray system with the Department, compliance with applicable rules, and payment of the appropriate permit fee.

[Source: Added at 8 Ok Reg 3503, eff 8-15-91 (emergency); Added at 9 Ok Reg 1643, eff 5-29-92 ; Amended at 21 Ok Reg 1037, eff 5-13-04 ; Amended at 38 Ok Reg 1954, eff 9-11-21]

310:281-5-3. Expiration of permit

A permit expires one year from the date of issuance unless canceled or revoked prior to its expiration. For purposes of determining the expiration date of all permits, the date of issuance is the date that a permit is first issued by a duly authorized representative of the Department. An expired permit shall follow the regulations listed in 310:250-3-4. Late Renewal.

[Source: Added at 8 Ok Reg 3503, eff 8-15-91 (emergency); Added at 9 Ok Reg 1643, eff 5-29-92 ; Amended at 38 Ok Reg 1954, eff 9-11-21]

310:281-5-4. Renewal of permit [REVOKED]

[Source: Added at 8 Ok Reg 3503, eff 8-15-91 (emergency); Added at 9 Ok Reg 1643, eff 5-29-92 ; Revoked at 38 Ok Reg 1954, eff 9-11-21]

310:281-5-5. Revocation or suspension of permit

A permit may be revoked or suspended for noncompliance with 63 O.S., sections 1-1501.1 through 1-1505, as amended, or any rules or regulations promulgated thereunder.

[Source: Added at 8 Ok Reg 3503, eff 8-15-91 (emergency); Added at 9 Ok Reg 1643, eff 5-29-92 ; Amended at 21 Ok Reg 1037, eff 5-13-04 ; Amended at 38 Ok Reg 1954, eff 9-11-21]

SUBCHAPTER 7. [RESERVED]

SUBCHAPTER 9. STANDARDS FOR PROTECTION AGAINST RADIATION

310:281-9-1. Purpose

(a) This subchapter establishes standards for protection against radiation hazards. Except as otherwise specifically provided, this subchapter applies to all permittees. It is the purpose of the regulations in this subchapter to control the use and transfer of diagnostic x-ray systems by any permittee in such a manner that the total dose to an individual does not exceed the standards of radiation protection prescribed in this subchapter. This subchapter should not be interpreted as limiting the intentional exposure of patients to radiation for the purpose of medical

diagnosis.

(b) In addition to complying with the requirements set forth in this subchapter, every reasonable effort shall be made to maintain radiation exposures to unrestricted areas to as low as is reasonably achievable.

[Source: Added at 8 Ok Reg 3503, eff 8-15-91 (emergency); Added at 9 Ok Reg 1643, eff 5-29-92 ; Amended at 21 Ok Reg 1037, eff 5-13-04 ; Amended at 38 Ok Reg 1954, eff 9-11-21]

310:281-9-2. Radiation dose standards for individuals in restricted areas

(a) For determining the doses specified in this section, a dose from x-rays up to 10 MeV may be assumed to be equivalent to the exposure measured by a properly calibrated appropriate instrument in air at or near the body surface in the region of the highest dose rate. In accordance with the provisions of 310:281-9-3(a), and except as provided in 310:281-9-2(b) and 310:281-9-3 (c), no permittee shall use or transfer diagnostic x-ray systems in such a manner as to cause any individual in a restricted area to receive in any period of one calendar year from all diagnostic x-ray systems a total occupational dose in excess of the standards specified in 310:281-9-2(b).

(b) Rems per Calendar Year

- (1) Total effective dose equivalent (TEDE) is 5 Rems;
- (2) Deep dose equivalent (DDE) and committed dose equivalent (CDE) to any individual organ or tissue (other than the lens of the eye) are 50 Rems;
- (3) Lens dose equivalent (LDE) is 15 Rems; and
- (4) Shallow dose equivalent (SDE) to the skin or any extremity is 50 Rems.

(c) A permittee may permit an individual in a restricted area to receive a total occupational dose to the whole body greater than that permitted under 310:281-9-2(a), provided:

- (1) during any calendar quarter, the total occupational dose to the whole body cannot exceed 3 rem;
- (2) the permittee has determined the individual's accumulated occupational dose to the whole body on a form provided by the Department or on a clear and legible record containing all the information required in that form and has otherwise complied with 310:281-9-3. As used in this subsection, "dose to the whole body" includes any dose to the whole body, gonads, active blood-forming organs, head and trunk, or lens of eye.

[Source: Added at 8 Ok Reg 3503, eff 8-15-91 (emergency); Added at 9 Ok Reg 1643, eff 5-29-92 ; Amended at 21 Ok Reg 1037, eff 5-13-04 ; Amended at 38 Ok Reg 1954, eff 9-11-21]

310:281-9-3. Determination of accumulated occupational dose **(a) Excess of quarterly occupational dose.**

- (1) Each permittee shall require any individual, prior to first entry of the individual into the permittee's restricted area during each employment or work assignment under such circumstances that the individual will receive or is likely to receive in any period of one calendar quarter an occupational dose in excess of 25 percent

of the applicable standards specified in 310:281-9-2(a) and 310:281-9-5, to disclose in a written, signed statement, either;

(A) that the individual had no prior occupational dose during the current calendar quarter, or

(B) the nature and amount of any occupational dose which the individual may have received during the specifically identified current calendar quarter from sources of radiation used or controlled by other persons.

(2) Each permittee shall maintain records of such statements until the Department authorizes disposition.

(b) Previously accumulated occupational doses.

(1) In the preparation of a form provided by the Department or a clear and legible record containing all the information required in that form, the permittee shall make a reasonable effort to obtain reports of the individual's previously accumulated occupational dose. For each period for which the permittee obtains such reports, he shall use the dose shown in the report in preparing the form. In any case where a permittee is unable to obtain reports of the individual's occupational dose for a previous complete calendar quarter, it is assumed that the individual has received the occupational dose specified in 310:281-9-3(b)(2) and (3).

(2) Assumed dose in Rems for calendar quarters prior January 1, 1961 for wholebody gonads is $3\frac{3}{4}$ for active blood forming organs, head, trunk and lens of eye.

(3) Assumed dose in Rems for calendar quarters beginning on or after January 1, 1961 is $1\frac{1}{4}$ for active blood forming organs, head, trunk and lens of eye.

(4) The permittee shall retain and preserve records used in preparing forms required by the Department until the Department authorizes their disposition.

(c) Determination of occupational effective dose for individuals wearing protective lead clothing during diagnostic x-ray procedures.

When a protective apron is worn while working with radiographic and fluoroscopic x-ray systems used for clinical diagnostic or research purposes, the effective dose equivalent (EDE) for external radiation is determined as follows:

(1) When only one personal monitoring device (310:281-9-12) is used and it is located at the neck (collar) outside the protective apron, the deep dose equivalent (DDE) is the EDE for external radiation; or

(2) When only one personal monitoring device is used and it is located at the neck (collar) outside the protective apron, the reported DDE value will be multiplied by 0.3 and is the EDE for external radiation; or

(3) When personal monitoring devices are worn, both under the protective apron at the waist and outside the protective apron at the neck (collar), the EDE for external radiation is assigned the value of the sum of the DDE reported for the personal monitoring device located at the waist under the protective apron multiplied by 1.5 and the DDE reported for the personal monitoring device

located at the neck (collar) outside the protective apron multiplied by 0.04.

[Source: Added at 8 Ok Reg 3503, eff 8-15-91 (emergency); Added at 9 Ok Reg 1643, eff 5-29-92 ; Amended at 21 Ok Reg 1037, eff 5-13-04 ; Amended at 38 Ok Reg 1954, eff 9-11-21]

310:281-9-4. Exposure of individuals to concentrations of radioactive material in restricted areas. [REVOKED]

[Source: Added at 8 Ok Reg 3503, eff 8-15-91 (emergency); Added at 9 Ok Reg 1643, eff 5-29-92 ; Revoked at 21 Ok Reg 1037, eff 5-13-04]

310:281-9-5. Exposure of minors

No permittee shall use or transfer any diagnostic x-ray system in such a manner as to cause any individual within a restricted area, who is under 18 years of age, to receive in any period of one calendar year from all diagnostic x-ray systems in the permittee's possession a dose in excess of 10 percent of the standards specified in 310:281-9-2 (a).

[Source: Added at 8 Ok Reg 3503, eff 8-15-91 (emergency); Added at 9 Ok Reg 1643, eff 5-29-92 ; Amended at 21 Ok Reg 1037, eff 5-13-04 ; Amended at 38 Ok Reg 1954, eff 9-11-21]

310:281-9-6. Permissible levels of radiation from diagnostic x-ray systems in unrestricted areas

(a) Any person may apply to the Department for proposed limits upon levels of radiation in unrestricted areas resulting from the applicant's possession or use of diagnostic x-ray systems. Such applications shall include information as to anticipated average radiation levels and anticipated occupancy times for each unrestricted area involved. The Department will approve the proposed limits if the applicant demonstrates to the satisfaction of the Department that the proposed limits are not likely to cause any individual to receive a dose to the whole body in any period of one calendar year in excess of 0.5 rem.

(b) Except as authorized by the Department pursuant to 310:281-9-6(a), no permittee shall use or transfer diagnostic x-ray systems in such a manner as to create in any unrestricted area from such diagnostic x-ray systems in his possession:

(1) radiation levels which, if an individual were continuously present in the area, could result in his receiving a dose in excess of 2 millirems in any one hour; or

(2) radiation levels which, if an individual were continuously present in the area, could result in his receiving a dose in excess of 100 millirems in any seven consecutive days.

(c) Radiation levels shall be limited so that individuals in unrestricted areas would not receive a dose to the whole body in excess of 0.5 rem in any one-year. If in specific instances, it is determined by the Department that this intent is not met, the Department may, pursuant to 310:281-1-4 impose such additional requirements on the permittee as may be necessary to meet the intent.

310:281-9-9. [RESERVED]

[Source: Reserved at 8 Ok Reg 3503, eff 8-15-91 (emergency); Reserved at 9 Ok Reg 1643, eff 5-29-92]

310:281-9-10. Surface contamination limits for facilities and equipment [REVOKED]

[Source: Added at 8 Ok Reg 3503, eff 8-15-91 (emergency); Added at 9 Ok Reg 1643, eff 5-29-92 ; Amended at 21 Ok Reg 1037, eff 5-13-04]

310:281-9-11. Surveys

- (a) Each permittee shall make or cause to be made such surveys as may be necessary to establish compliance with these rules.
- (b) Any survey instruments used to make physical radiation surveys in accordance with 310:281-9-11(a) shall be calibrated and operable.
- (c) Each radiation survey instrument shall be calibrated:
 - (1) by a person recognized by the Department as competent to perform such service;
 - (2) at intervals not to exceed 12 months unless a more restrictive time interval is specified in another subchapter of these rules;
 - (3) after each survey instrument repair;
 - (4) for the types of radiation used and at energies appropriate for use; and at an accuracy within 20 percent of the true radiation level.
- (d) Records of survey instrument calibrations shall be maintained for inspection by the Department.

[Source: Added at 8 Ok Reg 3503, eff 8-15-91 (emergency); Added at 9 Ok Reg 1643, eff 5-29-92 ; Amended at 21 Ok Reg 1037, eff 5-13-04 ; Amended at 38 Ok Reg 1954, eff 9-11-21]

310:281-9-12. Personnel monitoring

- (a) Each permittee shall supply and require the use of appropriate personnel monitoring equipment to:
 - (1) each individual who enters a controlled radiation area;
 - (2) each individual who enters a high radiation area; and

(3) each individual who uses or operates any source of radiation.

(b) The Department may, upon written request from a permittee grant an exemption to 310:281-9-12(a) provided, in the opinion of the Department upon consideration of information submitted in support of such a request, that no individual is likely to receive a dose in any calendar year in excess of 25 percent of the applicable value specified in 310:281-9-2 and that no individual under 18 years of age is likely to receive a dose in any calendar year in excess of 5 percent of the applicable value specified in 310:281-9-2.

(c) After the effective date of these rules, all personnel monitoring equipment (except extremity dosimeters and pocket ionization chambers) that require processing to yield a dose value and that are provided to comply with 310:281-9-2 and 310:281-9-12(a), or the applicable terms and conditions of any license or certificate of registration issued by the Department shall:

(1) be processed by a processor accredited by the National Voluntary Laboratory Accreditation Program for Personnel Dosimetry Processors of the National Bureau of Standards in accordance with accreditation criteria established in 15 CFR Part 7b; and

(2) be approved in this accreditation process for the type of radiation or radiations and the time period for which the individual wearing the dosimeter is monitored.

(d) Location and use of individual monitoring equipment.

(1) Each permittee shall ensure that individuals who are required to monitor occupational doses in accordance with 310:281-9-12(a) wear and use individual monitoring equipment as follows:

(A) Individual monitoring equipment is assigned to and worn by only one individual.

(B) Individual monitoring equipment used for monitoring the dose to the whole body shall be worn at the unshielded location of the whole body likely to receive the highest exposure. When a protective apron is worn, the location of the individual monitoring equipment is typically at the neck (collar).

(C) If additional individual monitoring equipment is used for monitoring the dose to an embryo/fetus of a declared pregnant woman, in accordance with 310:281-9-40, it shall be located at the waist under any protective apron being worn by the woman.

(D) Individual monitoring equipment used for monitoring LDE, to demonstrate compliance with 310:281-9-2(a), shall be located at the neck (collar) or at a location closer to the eye, outside any protective apron being worn by the monitored individual.

(E) Individual monitoring equipment used for monitoring the dose to the extremities, to demonstrate compliance with 310:281-9-2(a), shall be worn on the extremity likely to receive the highest exposure. Each individual monitoring equipment, to the extent practicable, shall be oriented to measure the highest dose to the extremity

being monitored.

(F) Individual monitoring equipment shall be worn for the period of time authorized by the dosimetry processor's certificate of registration or for no longer than three months, whichever is more restrictive.

[Source: Added at 8 Ok Reg 3503, eff 8-15-91 (emergency); Added at 9 Ok Reg 1643, eff 5-29-92 ; Amended at 21 Ok Reg 1037, eff 5-13-04 ; Amended at 38 Ok Reg 1954, eff 9-11-21]

310:281-9-13. Caution signs, labels and signals

(a) General.

(1) Except as otherwise authorized by the Department, symbols prescribed by 310:281-9-14 shall use the conventional radiation caution colors (magenta or purple on yellow background). The symbol prescribed by this section is the conventional three-blade design, as set forth in Appendix A of this Chapter.

(2) In addition to the contents of signs and labels prescribed in this section, a permittee may provide on or near such signs and labels any additional information which may be appropriate in aiding individuals to minimize exposure to radiation.

(b) Radiation Areas. Each radiation area shall be conspicuously posted with a sign or signs bearing the radiation caution symbol and the words:

(1) CAUTION or DANGER

(2) RADIATION AREA

(c) High Radiation Areas.

(1) Each high radiation area shall be conspicuously posted with a sign or signs bearing the radiation caution symbol and the words:

(A) "CAUTION" Or "DANGER"

(B) HIGH RADIATION AREA

(2) Each entrance or access point to high radiation area shall be:

(A) equipped with a control device that causes the level of radiation to be reduced below that at which an individual might receive a dose of 100 millirems in 1 hour upon entry into the area; or

(B) equipped with a control device that energizes a conspicuous visible or audible alarm signal in such a manner that the individual entering the high radiation area and the permittee, a supervisor of the activity are made aware of the entry; or

(C) maintained locked except during periods when access to the area is required, with positive control over each individual entry.

(3) The controls required by 310:281-9-13(c)(2) shall be established in such a way that no individual will be prevented from leaving a high radiation area.

(4) The controls required by 310:281-9-13(c)(2)(A) shall be constructed in such a manner that the primary radiation cannot be reactivated until all entrances have been secured, and the radiation on-off control is reset at the control panel.

(5) The controls required by 310:281-9-13(c)(2)(B) shall be constructed in such a manner that when the warning device is

activated, it shall be necessary to shut off or secure the source of radiation and secure all tripped entrances prior to being able to de-activate the alarm system.

(6) Control devices required by either 310:281-9-13(c)(2)(A) or 310:281-9-13(c)(2)(B) shall be tested for proper operation at intervals not to exceed six months. If such testing indicates failure of the device, corrective action shall be taken immediately to restore the control device to proper working order.

(7) In the case of a high radiation area established for a period of 30 days or less, direct surveillance to prevent unauthorized entry may be substituted for the controls required by 310:281-9-13(c)(2).

(8) Any permittee may apply to the Department for approval of methods not included in 310:281-9-13(c)(2) and (7) for controlling access to high radiation areas. The Department may approve the proposed alternatives if the permittee demonstrates that the alternative methods of control will prevent unauthorized entry into a high radiation area, and that the requirement of 310:281-9-7(c)(3) is met.

310:281-9-14. Exceptions from posting and labeling requirements

Notwithstanding the provisions of 310:281-9-13 a room or area is not required to be posted with a caution sign due to the presence of a diagnostic x-ray system provided that there are personnel in attendance during the production of x-rays who will take the precautions necessary to prevent the exposure of any individual to radiation in excess of the limits established in the regulations in this subchapter.

310:281-9-29. Records of surveys, radiation monitoring, and disposal

- (a) Each permittee shall maintain records showing the radiation exposures of all individuals for whom personnel monitoring are required under 310:281-9-12. Such records shall be kept on forms provided by the permittee, in accordance with the instructions contained in that form, or on clear and legible records containing all the information required by such forms. The doses entered on the forms or records shall be for periods of time not exceeding one calendar year.
- (b) Each permittee shall maintain records in the same units used in this subchapter, showing the results of surveys required by 310:281-9-11 of these regulations.
- (c) Each permittee shall maintain records showing the results of control device testing and corrective actions taken pursuant to 310:281-9-13(c) (6).
- (d) Records required pursuant to 310:281-1, 310:281-9-29(b), and 310:281-9-29(c) shall include the date, the identification of the individual(s) making the record, a unique identification of survey instrument(s) used, and an exact description of the location of the survey. Records of receipt, transfer, and disposal of diagnostic x-ray systems shall uniquely identify the diagnostic x-ray system. Records required by these rules shall be preserved and available for inspection at the request of Department. These records may be maintained in the form of microfilm or in computer files.

[Source: Added at 8 Ok Reg 3503, eff 8-15-91 (emergency); Added at 9 Ok Reg 1643, eff 5-29-92 ; Amended at 21 Ok Reg 1037, eff 5-13-04]

310:281-9-30. Reports of theft or loss of diagnostic x-ray systems

- (a) Each permittee shall report to the Department the theft or loss of any permitted diagnostic x-ray system immediately after such occurrence becomes known.
- (b) Each permittee who is required to make a report pursuant to 310:281-9-30(a) shall, within 30 days after the permittee learns of the loss or theft, make a report in writing to the Department, setting forth the following information:
 - (1) a description of the diagnostic x-ray system involved, including the kind, quantity, chemical, physical form, and/or model and serial numbers;
 - (2) a description of the circumstances under which the loss or theft occurred;

- (3) a statement of disposition or probable disposition of the diagnostic x-ray system involved;
 - (4) radiation exposures to individuals, circumstances under which the exposures occurred, and the extent of possible hazard to persons in unrestricted areas;
 - (5) actions which have been taken, or will be taken, to recover the diagnostic x-ray system; and procedures or measures which have been or will be adopted to prevent a recurrence of the loss or theft of diagnostic x-ray system.
- (c) Subsequent to filling the written report, the permittee shall also report any substantive information on the loss or theft which becomes available to the permittee within 30 days after learning of such information.

[Source: Added at 8 Ok Reg 3503, eff 8-15-91 (emergency); Added at 9 Ok Reg 1643, eff 5-29-92 ; Amended at 21 Ok Reg 1037, eff 5-13-04 ; Amended at 38 Ok Reg 1954, eff 9-11-21]

310:281-9-31. Notification of incidents

(a) **Immediate notification.** Each permittee shall immediately notify the Department by telephone, email, or facsimile of any incident involving any diagnostic x-ray system used and which may have caused or threatens to cause:

- (1) a dose to the whole body of any individual of 25 rems or more of radiation; a dose to the skin of the whole body of any individual of 150 rems or more of radiation;
- (2) or a dose to the feet, ankles, hands, or forearms of any individual of 375 rems or more of radiation; or
- (3) a loss of 1 working week or more of the operation of any facilities affected; or damage to property in excess of \$200,000.

(b) **Twenty-four hour notification.** Each permittee shall within 24 hours notify the Department by telephone, email, or facsimile, of any incident involving any diagnostic x-ray system used and which may have caused or threatens cause:

- (1) a dose to the whole body of any individual of 5 rems or more of radiation; a dose to the skin of the whole body of any individual of 30 rems or more of radiation; or a dose to the feet, ankles, hands, or forearms of 75 rems or more of radiation; or
- (2) a loss of 1 day or more of the operation of any facilities affected; or
- (3) damage to property in excess of \$2,000.

[Source: Added at 8 Ok Reg 3503, eff 8-15-91 (emergency); Added at 9 Ok Reg 1643, eff 5-29-92 ; Revoked at 21 Ok Reg 1037, eff 5-13-04]

310:281-9-39. Acceptable surface contamination levels [REVOKED]

[Source: Added at 8 Ok Reg 3503, eff 8-15-91 (emergency); Added at 9 Ok Reg 1643, eff 5-29-92 ; Revoked at 21 Ok Reg 1037, eff 5-13-04]

310:281-9-40. Exposure to pregnant employees

If an employee of any permittee declares her pregnancy by written notification, the permittee shall ensure that the DE to an embryo/fetus during the entire pregnancy, due to occupational exposure of a declared pregnant woman, does not exceed 0.5 rem (5 mSv).

(1) If a woman chooses not to declare pregnancy the occupational dose limits specified in 310:281-9-2 (a).

(2) The permittee shall make efforts to avoid substantial variation above a uniform monthly exposure rate to a declared pregnant woman so as to satisfy the limit in 310:281-9-40 (a). The National Council on Radiation Protection and Measurement in NCRP Report No. 91 "Recommendations on Limits for Exposure to Ionizing Radiation" (June 1, 1987) states that no more than 0.05 rem (0.5 mSv) to the embryo/fetus be received in any one month will be adopted.

(3) If by the time the woman declares pregnancy the permittee the DE to the embryo/fetus has exceeded 0.45 rem (4.5 mSv), the permittee is in compliance with 310:281-9-40 (a), if the additional DE to the Embryo/fetus does not exceed 0.05 rem (0.5 mSv) during the remainder of the pregnancy.

(4) The DE to an embryo/fetus shall be taken as the DE that is most representative of the DE to the embryo/fetus from external radiation. The DE from the mother's lower torso region will be used.

(5) If multiple measurements have been made, assignment of the DDE for the declared pregnant woman for the personal monitoring device that is most representative of the DE to the embryo/fetus shall be the DE to the embryo/fetus. Assignment of the highest DDE for the declared woman to the embryo/fetus is not required unless that dose is also the most representative DDE for the region of the embryo/fetus.

(6) If multiple measurements have not been made, assignment of the highest DDE for the declared pregnant woman shall be the embryo/fetus.

SUBCHAPTER 11. USE OF X-RAYS IN THE HEALING ARTS AND VETERINARY MEDICINE

310:281-11-1. Purpose

(a) This Subchapter establishes requirements for the use of diagnostic x-ray systems in the healing arts and in the practice of veterinary medicine. All usage of such systems under this Subchapter shall be made by or under the supervision of an individual licensed in accordance with Oklahoma law to practice the healing art or veterinary medicine in which a diagnostic x-ray system is used.

(b) The requirements of this Subchapter are intended to ensure that adequate radiation protection is provided for the public and workers. These rules are not intended to replace calibration, survey, quality assurance, and/or quality control services by a radiological physicist or a qualified expert.

[Source: Added at 8 Ok Reg 3503, eff 8-15-91 (emergency); Added at 9 Ok Reg 1643, eff 5-29-92 ; Amended at 21 Ok Reg 1037, eff 5-13-04]

310:281-11-1.1. Definitions [REVOKED]

[Source: Added at 8 Ok Reg 3503, eff 8-15-91 (emergency); Added at 9 Ok Reg 1643, eff 5-29-92 ; Revoked at 21 Ok Reg 1037, eff 5-13-04]

310:281-11-2. Accountability

(a) The permittee is responsible for directing the operation of the diagnostic x-ray systems under the administrative control of the permittee. The permittee is responsible for assuring that the requirements of this subchapter are met in the operation of such diagnostic x-ray systems.

(b) The provisions of this subchapter are in addition to, and not in substitution for, other applicable provisions of these regulations.

[Source: Added at 8 Ok Reg 3503, eff 8-15-91 (emergency); Added at 9 Ok Reg 1643, eff 5-29-92 ; Amended at 21 Ok Reg 1037, eff 5-13-04 ; Amended at 38 Ok Reg 1954, eff 9-11-21]

310:281-11-3. Prohibitions

(a) The Department may prohibit use of diagnostic x-ray systems, which pose significant threat or endanger public health and safety.

(b) Individuals shall not be exposed to the useful beam except for healing arts purposes and unless such exposure has been authorized by a licensed practitioner of the healing arts. This provision specifically prohibits deliberate exposure for the following purposes:

(1) exposure of an individual for training, demonstration, or other non-healing arts purposes; and

(2) exposure of an individual for the purpose of healing arts screening except as authorized by 310:281-11-4(g).

(c) Non-image-intensified fluoroscopic equipment shall not be used.

(d) Exposure of a personnel monitoring device to deceptively indicate a dose delivered to an individual is prohibited.

(e) Cardboard film holders without screens shall not be used.

[Source: Added at 8 Ok Reg 3503, eff 8-15-91 (emergency); Added at 9 Ok Reg 1643, eff 5-29-92 ; Amended at 21 Ok Reg 1037, eff 5-13-04]

310:281-11-4. Diagnostic operational requirements for practitioners

(a) **Technique chart.** A chart or manual shall be provided in the vicinity of the control panel of each non-APR diagnostic x-ray system, CR portable, or DR portable system which specifies, for all diagnostic examinations usually performed with that diagnostic x-ray system, the

following information:

- (1) technique factors to be utilized versus patient's anatomical size (except for diagnostic x-ray systems which have only automatic exposure controls);
- (2) type of the film or film-screen combination to be used, if any;
- (3) type of the grid to be used, if any; and
- (4) source-to-image receptor distance to be used.

(b) **Safety procedures.** Written operating and safety procedures shall be made available to each individual who operates diagnostic x-ray systems. These procedures shall include restrictions required for the safe operation of each diagnostic x-ray system.

(c) **Radiation dose limitation and personnel monitoring.** Except as otherwise exempted, all individuals who are associated with the operation of a diagnostic x-ray system are subject to the radiation dose requirements of 310:281-9-2, 310:281-9-3, 310:281-9-5 regarding dose limits to individuals, 310:281-9-40 and the personnel monitoring requirements of 310:281-9-12.

(d) **Protective clothing and devices.** Such protective clothing and devices shall be utilized when required, as in 310:281-11-6(c)- (e), 310:281-11-7(c), and 310:281-11-11(d).

(1) When protective clothing or devices are worn on portions of the body (such as trunk apron) and personnel monitoring is required, the whole body badge shall be worn in accordance with 310:281-9-12 (d). The dose measured by this device shall be recorded as the whole body dose on the personnel radiation exposure records, as required by 310:281-9-29.

(2) Protective equipment including aprons, gloves, and shields shall be checked annually for defects, such as holes, cracks, and tears to assure reliability and integrity. A record of this test shall be made and maintained for inspection by the Department. If such defect is found, equipment shall be replaced or removed from service until repaired.

(e) **Information and records.** The permittee shall maintain the following information for each diagnostic x-ray system for inspection by the Department:

- (1) records of receipt, transfer, and disposal;
- (2) a copy of all correspondence to and from the Department regarding each diagnostic x-ray system; and
- (3) records of surveys, calibrations, spot checks, maintenance, and modifications performed on the diagnostic x-ray system. The signature of the individual performing the service and the date it was performed shall be on the record.

(f) **Operator training.** Individuals who operate diagnostic x-ray systems shall be instructed in and be able to demonstrate competence with the permittee's operating and safety procedures.

(g) **Healing arts screening.** Any person proposing to conduct a healing arts screening program for humans shall not initiate such a program without prior approval of the Department. When requesting such approval, that person shall submit the information outlined in 310:281-11-21. If any information submitted to the Department becomes invalid or outdated, the Department shall be notified within 15 days.

(h) **Processor control.**

(1) In conjunction with all human diagnostic x-ray systems, all processors shall be maintained on a predetermined schedule for quality assurance.

(A) A log shall be kept that states the following:

- (i) type of test;
- (ii) acceptability limits for that particular test;
- (iii) results of the test;
- (iv) the date the test was performed;
- (v) initials of technician or testing individual;
- (vi) if needed, corrective action taken.

(B) Tests shall include, but not be limited to, fog test, chemical replacement, and darkroom light leak.

(C) All processing shall be by the time/temperature method. The predetermined method shall be documented and state the manufacturer, development time, and type of all chemicals used in the film processing method (including hand processing methods).

(D) Deviations from the recommended use (as detailed by the manufacturer) or changes in the method or manufacturer shall be documented (date, initials of technician) in the processor log.

(E) Lighting in the film processing/loading area shall be with the filter, bulb wattage, and distances recommended by the film manufacturer for that film emulsion. When 2 or more types of film are used, the more sensitive type will be accommodated.

(2) For dental and veterinary diagnostic x-ray systems, the film manufacturer's recommendations, including maintenance of the equipment and maintenance of the developing solutions of a constant temperature, shall be used for processing film.

(i) **Diagnostic x-ray system requirements.** Each permittee is responsible for satisfying the following diagnostic x-ray equipment requirements:

(1) **Warning label.** The control panel containing the main power switch shall bear the radiation symbol and a statement, legible and plainly visible to view, containing the following or similar wording: "WARNING" or "Caution": "This machine produces radiation when energized."

(2) **Mechanical support of tube head.** The tube housing assembly shall be adjusted such that it will remain stable during an exposure. If tube housing movement is a designed function of the diagnostic x-ray system the tube housing assembly shall be adjusted such that it will remain stable except during such a designed function.

(A) The tube housing assembly supports shall not be hand-held.

(B) Veterinary portable units designed to be hand-held are exempted if they provide a diagnostic-type tube housing.

(j) **Film and image retention.** Human radiographic images shall be retained for a minimum of five years with the exception of

mammographic images. In accordance with 310:281-11-9 mammographic images are to be maintained for ten years.

[Source: Added at 8 Ok Reg 3503, eff 8-15-91 (emergency); Added at 9 Ok Reg 1643, eff 5-29-92 ; Amended at 10 Ok Reg 73, eff 10-5-92 (emergency); Amended at 10 Ok Reg 1695, eff 6-1-93 ; Amended at 21 Ok Reg 1037, eff 5-13-04 ; Amended at 38 Ok Reg 1954, eff 9-11-21]

310:281-11-5. Radiographic entrance exposure limits

The in-air exposure determined for the technique used for the specified average human adult patient thickness for routine medical radiography cannot exceed the entrance exposure or dose limits shown below.

(1) Entrance exposure and dose limits for the following radiographic technique are:

(A) for a 23 cm P/A chest has the exposure of 2 mR and the exposure/dose limit of 30 mR;

(B) for a 23 cm P/A grid chest has the exposure of 25 mR and the exposure/dose limit of 35 mR;

(C) for a 23 cm abdomen(KUB) has the exposure of 500 mR and the exposure/dose limit of 600 mR;

(D) for a 23 cm lumbar spine (A/P) has the exposure of 500 mR and the exposure/dose limit of 800 mR;

(E) for a 13 cm cervical spine (AP) has the exposure of 125 mR and the exposure/dose limit of 200 mR;

(F) for a 15 cm skull (lateral) has the exposure of 150 mR and the exposure/dose limit of 250 mR;

(G) dental intraoral exams have a exposure of 00 mR and the exposure/dose limit of 600 mR; and

(H) for computed tomography exposures for the following techniques are:

(i) for a 16 cm adult head the exposure is 600 mR;

(ii) for a 32 cm adult abdomen the exposure is 3500 mR; and

(iii) for a 16 cm pediatric abdomen the exposure is 2500 mR.

(iv) These are CTDI_w dose measurements as recommended by the American College of Radiology in their voluntary certification of CT system.

310:281-11-6. Additional requirements for use of diagnostic x-ray systems in the healing arts of medicine, podiatry, and chiropractic

(a) **Viewing system.** Windows, mirrors, closed circuit television, or an equivalent system shall be provided to permit operator to continuously observe the patient during irradiation.

(b) **Control panel.** Each x-ray control shall be located in such a way as to meet the following requirements:

(1) Stationary diagnostic x-ray systems are required to have the x-ray control permanently mounted in a permanent control booth or station so that the operator is required to remain in that area during the entire exposure and not be exposed to greater than 2 millirems in any 1 hour. See section 310:281-11-20 for measurement protocol to determine compliance.

(2) Mobile and portable diagnostic x-ray systems shall meet the requirements of a stationary diagnostic x-ray system when used for greater than 7 consecutive working days in the same location.

(3) For mobile and portable diagnostic x-ray systems, single event exposures and configuration, the x-ray control shall be positioned so that the operator is at least 6 feet away from the tube housing and the patient during an exposure and is not exposed to greater than 2 millirems in any 1 hour.

(4) The operator shall be able to maintain visual and aural contact with the patient.

(c) **Exposure of individuals other than the patient.** Except for other patients who cannot be moved out of the area where the diagnostic x-ray system is to be used (e.g., ICU or trauma units) or individuals specified in 310:281-11-6(e), only the staff and ancillary personnel required for the medical procedure or training shall be in the area where the diagnostic x-ray system is to be used during the radiation exposure.

(1) All individuals, other than the patient being examined, shall be positioned such that no part of the body will be struck by the useful (direct) beam unless protected by an apron, gloves, or other shielding having 0.5 millimeter lead equivalent material.

(2) Staff and ancillary personnel shall be protected from primary scatter (once-scattered) radiation by protective aprons or whole body protective barriers of not less than 0.25 millimeter lead equivalent material.

(3) Notwithstanding the provisions of 310:281-11-6(c)(1), other patients who are in line with the primary beam and who cannot be removed from the room, shall be protected by whole body protective barriers of 0.25 millimeter lead equivalent material or so positioned that the nearest portion of their body is at least 6 feet from both the tube head and the nearest edge of the image receptor.

(d) **Gonadal shielding.** For patients who have not passed the reproductive age, gonadal shielding shall be used when the gonads are in or within 5 centimeters of the useful beam. This requirement does not apply if the shielding will interfere with the diagnostic procedure. Gonadal shielding shall be of at least 0.5 millimeter lead equivalent material.

(e) **Holding of patient or film.** When a patient or film must be provided with auxiliary support during a radiation exposure:

(1) Mechanical holding devices shall be used when the technique permits. In accordance with 310:281-11-4(b) the written safety procedures shall list circumstances in which mechanical holding devices cannot be routinely utilized.

(2) The requirements for selecting an individual who holds or supports the patient, and the procedure which the holder follows,

shall be included in the written safety procedures, as required by 310:281-11-4(b).

(3) In accordance with 310:281-11-6(c), the human holder shall be protected.

(4) An individual cannot be used routinely to hold film or patients.

[Source: Added at 8 Ok Reg 3503, eff 8-15-91 (emergency); Added at 9 Ok Reg 1643, eff 5-29-92 ; Amended at 21 Ok Reg 1037, eff 5-13-04 ; Amended at 38 Ok Reg 1954, eff 9-11-21]

310:281-11-7. Additional operational controls for fluoroscopic x-ray systems and spot-film devices

(a) Fluoroscopic configuration, including fluoroscopic table designs when combined with operating and safety procedures, shall not permit any portion of any individual's body, except the head, neck, and extremities, to be exposed to scattered radiation emanating from above or below the tabletop unless the radiation has passed through not less than a total of 0.25 millimeter lead equivalent material. The material may be, but is not limited to, drapes, self-supporting curtains, or viewing shields, in addition to any lead equivalency provided by a protective apron.

(b) Where sterile fields or special procedures prohibit the use of normal protective barriers or drapes, 310:281-11-7(a) does not apply, if all of the following conditions are met:

(1) All persons, except the patient, in the room where fluoroscopy is performed, shall wear protective aprons which provide a shielding equivalent of 0.5 millimeter of lead.

(2) The fluoroscopist and all other personnel in the room, except the patient, shall have appropriate personnel monitoring devices.

(3) The fluoroscopic field size shall be reduced to the absolute minimum required for the procedure being performed (area of clinical interest).

(4) Operating and safety procedures shall reflect the above conditions, and fluoroscopy personnel shall exhibit awareness of situations requiring the use and/or nonuse of the protective drapes.

(c) For image-intensified fluoroscopic systems with only a manual mode of collimation, the x-ray field produced shall be limited to the area of the spot-film cassette at 16 inches above tabletop. Additionally, during fluoroscopy, the beam shall be restricted to the area of the input phosphor.

[Source: Added at 8 Ok Reg 3503, eff 8-15-91 (emergency); Added at 9 Ok Reg 1643, eff 5-29-92 ; Amended at 21 Ok Reg 1037, eff 5-13-04 ; Amended at 38 Ok Reg 1954, eff 9-11-21]

310:281-11-8. Additional operational controls for CT x-ray systems

(a) The CT x-ray system shall not be operated except by an individual who has been specifically trained in its operation.

(b) The control panel must include the following information for the system's operation and evaluation:

(1) dates of the latest evaluation and spot checks, and the location within the facility where the results of those tests may be obtained;

- (2) the results of at least the most recent spot checks conducted on the system; and
- (3) the distance in millimeters between the tomographic plane and the reference plane, if a reference plane is utilized.

[Source: Added at 8 Ok Reg 3503, eff 8-15-91 (emergency); Added at 9 Ok Reg 1643, eff 5-29-92 ; Amended at 21 Ok Reg 1037, eff 5-13-04 ; Amended at 38 Ok Reg 1954, eff 9-11-21]

310:281-11-9. Additional operational controls for mammography systems

Incorporation by reference: Adopted reference. Except as otherwise specifically provided, the performance of mammography shall conform to standards as described in "Quality Mammography Standards" Code of Federal Regulations (CFR) 21 CFR Parts 900, et. seq. effective April 28, 1999, as amended, promulgated pursuant to be the federal "Mammography Quality Standards Act." Final Rule as published in Federal Register of October 28, 1997 and corrected in Federal register of November 10, 1997.

[Source: Added at 8 Ok Reg 3503, eff 8-15-91 (emergency); Added at 9 Ok Reg 1643, eff 5-29-92 ; Amended at 10 Ok Reg 73, eff 10-5-92 (emergency); Amended at 10 Ok Reg 1695, eff 6-1-93 ; Amended at 21 Ok Reg 1037, eff 5-13-04 ; Amended at 38 Ok Reg 1954, eff 9-11-21]

310:281-11-10. Additional operational controls for dental radiographic systems

- (a) Film holding devices shall be used except in individual cases in which the practitioner has determined that such holding devices are contraindicated. Written safety procedures required by 310:281-11-4(b) state the criteria under which the exception may apply.
- (b) The tube housing support shall be constructed and adjusted so that the tube housing cannot drift from its set position during an exposure. Neither the tube housing nor support housing shall be hand-held during an exposure.
- (c) The operator shall stand at least 6 feet from the useful beam or behind a protective barrier. Where a protective barrier is utilized, a viewing system shall be provided.
- (d) Individuals who operate only dental radiographic systems are exempted from the personnel monitoring requirements of 310:281-9-12.

[Source: Added at 8 Ok Reg 3503, eff 8-15-91 (emergency); Added at 9 Ok Reg 1643, eff 5-29-92 ; Amended at 38 Ok Reg 1954, eff 9-11-21]

310:281-11-11. Additional operational controls for veterinary x-ray systems

- (a) In no case shall an individual hold the x-ray tube during any radiographic exposure.
- (b) Unless required to restrain an animal, the operator shall stand at least 6 feet away from the useful beam and the animal during radiographic exposures.
- (c) No individual, other than the operator, shall be in the x-ray room or area while exposures are being made unless such individual's assistance

is required.

(d) When an animal must be held in position during radiography, mechanical supporting or restraining devices may be used when technique permits.

(1) If the animal must be held by an individual, that individual shall be protected with appropriate shielding devices, such as protective gloves and apron, and the person shall be so positioned that no part of his/her body except hands and arms will be struck by the useful beam.

(2) The exposure of any individual who holds animals shall be monitored by film badge, TLD, or other appropriate device.

[Source: Added at 8 Ok Reg 3503, eff 8-15-91 (emergency); Added at 9 Ok Reg 1643, eff 5-29-92 ; Amended at 10 Ok Reg 73, eff 10-5-92 (emergency); Amended at 10 Ok Reg 1695, eff 6-1-93 ; Amended at 38 Ok Reg 1954, eff 9-11-21]

310:281-11-12. General requirements for all human diagnostic x-ray systems

(a) **Battery charge indicator.** On battery-powered x-ray generators, visual means shall be provided on the control panel to indicate whether the battery is in a state of charge adequate for proper operation.

(b) **Leakage radiation from the diagnostic x-ray tube assembly.** The leakage radiation from the diagnostic x-ray tube assembly measured at a distance of 1 meter in any direction from the x-ray tube assembly shall not exceed 100 milliroentgens in 1 hour when the x-ray tube is operated at its leakage technique factors. Measurement is averaged over an area of 100 square centimeters with no linear dimension greater than 20 centimeters.

(c) **Radiation from components other than the diagnostic x-ray tube assembly.** The radiation emitted by a component other than the diagnostic x-ray tube assembly cannot exceed 2 milliroentgens in 1 hour at 5 centimeters from any accessible surface of the component when it is operated in an assembled x-ray system under any conditions for which it was designed. Measurement is averaged over an area of 100 square centimeters with no linear dimension greater than 20 centimeters.

(d) **Beam quality.**

(1) **Half-value layer (HVL).**

(A) The half-value layer of the useful beam for a given x-ray tube potential shall not be less than the values shown below. If it is necessary to determine such half-value layer at an x-ray tube potential which is not listed in the following table, linear interpolation may be made. Half-value layer measurements shall be made at no less than 90 percent maximum rated potential or 80 kVp, whichever is lower for the unit.

(i) the half-value layer for the selected tube potential of 30 kVp is 0.3 mm of aluminum; (terminology and units listed below are the same listed here);

(ii) 40 kVp is 0.4

(iii) 50 kVp is 0.5

- (iv) 51 kVp is 1.2
- (v) 60 kVp is 1.3
- (vi) 70 kVp is 1.5
- (vii) 71 kVp is 2.1
- (viii) 80 kVp is 2.3
- (ix) 90 kVp is 2.5
- (x) 100 kVp is 2.7
- (xi) 110 kVp is 3.0
- (xii) 120 kVp is 3.2
- (xiii) 130 kVp is 3.5
- (xiv) 140 kVp is 3.8 and
- (xv) 150 kVp is 4.1

(B) In addition to the requirements of 310:281-11-12(d)(1)

(A)(i), all intraoral dental radiographic systems manufactured on or after December 1, 1980, shall have a minimum half-value layer not less than 1.5 millimeters aluminum equivalent filtration permanently installed in the useful beam.

(C) For capacitor energy storage equipment, compliance with the requirements of 310:281-11-12(d) is determined with the maximum quantity of charge per exposure. (D) The required minimal aluminum equivalent filtration includes the filtration contributed by all materials which are always present between the source and the patient.

(2) **Filtration controls.** For diagnostic x-ray systems which have variable kVp and variable filtration for the useful beam, a device shall link the kVp selector with the filters and prevent an exposure unless the minimum amount of filtration as stated in 310:281-11-12(d)(1) is in the useful beam for the given kVp which has been selected.

(e) **Multiple tubes.** Where two or more diagnostic x-ray tubes are controlled by one exposure switch, the tube or tubes which have been selected shall be clearly indicated prior to initiation of the exposure. This indication shall be both on the x-ray control panel and at or near the tube housing assembly which has been selected.

(f) **Technique and exposure indicators.**

(1) The system shall display the selected exposure factors before the exposure begins.

(2) The requirement of 310:281-11-12(f)(1) may be met by permanent markings on equipment having fixed technique factors.

(3) The x-ray control shall provide visual indication of the production of x-rays.

(g) **Certified diagnostic x-ray systems.** In addition to the requirements of these rules, the permittee shall not make, nor cause to be made, any modification of components or installations of components certified pursuant to U.S. Food and Drug Administration Regulation 21 CFR 1020, "Performance Standards for Ionizing Radiation Emitting Products," in any manner that could cause the installations or the components to fail to meet the requirements of the applicable parts of the standards specified in 21 CFR 1020, except where a variance has been granted by the

Director, Center for Devices and Radiological Health, Food and Drug Administration.

[Source: Added at 8 Ok Reg 3503, eff 8-15-91 (emergency); Added at 9 Ok Reg 1643, eff 5-29-92 ; Amended at 21 Ok Reg 1037, eff 5-13-04 ; Amended at 38 Ok Reg 1954, eff 9-11-21]

310:281-11-13. Fluoroscopic x-ray systems and spot-film devices except radiation therapy simulators

(a) Limitation of useful beam.

(1) Primary barrier.

(A) The fluoroscopic imaging assembly shall be provided with a primary protective barrier which intercepts the entire cross section of the useful beam at any source-to-image receptor distance (SID).

(B) The x-ray tube used for fluoroscopy shall not produce x-rays unless the barrier is in position to intercept the useful beam and the imaging device is in place and operable.

(2) X-Ray field.

(A) Means shall be provided for stepless (continuous) adjustment of the field size.

(B) The minimum field size at the greatest SID shall be equal to or less than 5 centimeters by 5 centimeters.

(C) Neither the length nor the width of the x-ray field in the plane of the image receptor shall exceed that of the visible area of the image receptor by more than 3 percent of the SID. The sum of the excess length and the excess width shall be no greater than 4 percent of the SID.

(D) Spot-film devices shall meet the following additional requirements:

(i) Means shall be provided between the source and the patient for adjustment of the x-ray field size in the plane of the film to the size of that portion of the film which has been selected on the spot-film selector.

(ii) Such adjustment shall be automatically accomplished except when the x-ray field size in the plane of the film is smaller than that of the selected portion of the film.

(iii) The total misalignment of the edges of the x-ray field with the respective edges of the selected portion of the image receptor along the length or width dimensions of the x-ray field in the plane of the image receptor shall not exceed 3 percent of the SID when adjusted for full coverage of the selected portion of the image receptor.

(iv) The sum, without regard to sign of the misalignment along any 2 orthogonal dimensions, shall not exceed 4 percent of the SID.

(v) The center of the x-ray field in the plane of the film shall be aligned with the center of the selected

portion of the film to within 2 percent of the SID.

(E) Compliance with 310:281-11-13(a)(2) is determined with the beam axis perpendicular to the plane of the image receptor.

(b) **Activation of the fluoroscopic tube.** X-ray production in the fluoroscopic mode shall be controlled by a device which requires continuous pressure by the fluoroscopist for the entire time of the exposure (dead-man switch). When recording serial fluoroscopic images, the fluoroscopist shall be able to terminate the x-ray exposures at any time, but means may be provided to permit completion of any single exposure of the series in process.

(c) **Exposure rate limits:**

(1) **Entrance Exposure Rate Allowable Limits.**

(A) Fluoroscopic equipment provided with automatic exposure rate control mode (no manual mode) shall not be operable at any combination of tube potential and current that will result in an exposure rate in excess of 2.6 mC/kg (10 roentgens) per minute at the point where the center of the useful beam enters the patient, except:

- (i) During recording of fluoroscopic images; or
- (ii) When an optional high level control is provided. When so provided, the equipment shall not be operable at any combination of tube potential and current which will result in an exposure rate in excess of 2.6 mC/kg (10 roentgens) per minute at the point where the center of the useful beam enters the patient unless the high level control is activated. Special means of activation of high level controls shall be required. The high level control shall only be operable when continuous manual activation is provided by the operator. A continuous signal audible to the fluoroscopist shall indicate that the high level control is being employed.

(B) Fluoroscopic equipment (manual mode only) not provided with automatic exposure rate control shall not be operable at any combination of tube potential and current that will result in an exposure rate in excess of 2.6 mC/kg (10 roentgens) per minute at the point where the center of the useful beam enters the patient, except:

- (i) During recording of fluoroscopic images; or
- (ii) When an optional high level control is activated. The high level control shall only be operable when continuous manual activation is provided by the operator. A continuous signal audible to the fluoroscopist shall indicate that the high level control is being employed.

(C) Fluoroscopic equipment, provided with both automatic exposure rate control and manual modes, shall not be operable at any combination of tube potential and current that shall result in an exposure rate in excess of 2.6 mC/kg (10 roentgens) per minute in either mode at the point

where the center of the useful beam enters the patient, except:

- (i) During recording of fluoroscopic images; or
- (ii) When the mode or modes have an optional high level control, in which case the mode or modes shall not be operable at any combination of tube potential and current that results in an exposure rate in excess of 2.6 mC/kg (10 roentgens) per minute at the point where the center of the useful beam enters the patient, unless the high level control is activated. Special means of activation of high level controls shall be required. The high level control shall only be operable when continuous manual activation is provided by the operator. A continuous signal audible to the fluoroscopist will indicate that the high level control is being employed.

(D) Any fluoroscopic equipment manufactured after May 19, 1995 which can exceed 1.3 mC/kg (5 roentgens) per minute shall be equipped with an automatic exposure rate control. All entrance exposure rates are limited to 2.6 mC/kg (10 roentgens) per minute with an upper limit of 5.2 mC/kg (20 roentgens) per minute when the high level control is activated.

(E) Compliance with the requirements of OAC 310:281-11-13 is determined as follows:

- (i) If the source is below the x-ray table, then the exposure rate is measured 1 centimeter above the tabletop or cradle;
- (ii) If the source is above the x-ray table, the exposure rate shall be measured at 30 centimeters above the tabletop with the end of the beam-limiting device or spacer positioned as closely as possible to the point of measurement;
- (iii) For a c-arm type of fluoroscope, then the exposure rate is measured 30 centimeters from the input surface of the fluoroscopic imaging assembly, with the source positioned at any available SID, provided that the end of the beam-limiting device or spacer is no closer than
- (iv) For a lateral type fluoroscope, the exposure rate is measured at a point 15 centimeters for the centerline of the x-ray table and in the direction of the x-ray source with the end of the beam-limiting device or spacer positioned as closely to the point of measurement. If the tabletop is movable, it shall be positioned as closely as possible to the lateral x-ray source, with the end of the beam-limiting device or spacer no closer than 15 centimeters to the centerline of the x-ray table.

(2) **Periodic Measurements.** Periodic measurements of the entrance exposure rate shall be performed by a qualified expert for both typical and maximum values as follows (Materials should be placed in the useful beam to protect the imaging system when conducting these periodic measurements.):

(A) Such measurements shall be made annually or after any maintenance of the system which might affect the exposure rate;

(B) Measurement results must be kept where any fluoroscopist may have ready access to such results while using the fluoroscope, and include the following information:

(i) stated in coulombs per kilogram (roentgens) per minute;

(ii) include the technique factors used in determining such results;

(iii) The name of the individual performing the measurements; and

(iv) the date the measurements were performed.

(C) Conditions of periodic measurement of typical entrance exposure rate are as follows:

(i) The measurements shall be made under the conditions that satisfy the conditions of OAC 310:281-11-13(c)(1)(E);

(ii) The kVp, mA, and/or other selectable parameters shall be adjusted to those settings typical of clinical use on a 23 cm thick abdominal patient;

(iii) The x-ray system that incorporates automatic exposure rate control shall have sufficient attenuative material placed in the useful beam to produce a milliamperage and/or kilovoltage to satisfy the conditions of OAC 310:281-11-13(c)(2)(C)(ii);

(D) Conditions of periodic measurement of maximum entrance exposure rate are as follows:

(i) The measurement shall be made under the conditions that satisfy 310:281-11-13(c)(1)(E);

(ii) The kVp, mA and/or other selectable parameters shall be adjusted to those settings which give the maximum entrance exposure rate;

(iii) The x-ray system(s) that incorporates automatic exposure control shall have sufficient attenuative material placed in the useful beam to produce the maximum entrance exposure rate of the system.

(d) **Barrier transmitted radiation rate limits.**

(1) **Primary barrier transmission.** The exposure rate due to transmission through the primary protective barrier with the attenuation block in the useful beam combined with radiation from the image intensifier shall not exceed 2 milliroentgens per

hour for each roentgen per minute exposure rate. Measurements shall be made at 10 centimeters from any accessible surface of the fluoroscopic imaging assembly beyond the plane of the image receptor.

(2) Measuring compliance of barrier transmission.

(A) The exposure rate due to transmission through the primary protective barrier combined with radiation from the image intensifier is determined by measurements averaged over an area of 100 square centimeters with no linear dimension greater than 20 centimeters.

(B) If the source is below the tabletop, then the measurement is made with the input surface of the fluoroscopic imaging assembly positioned 30 centimeters above the tabletop.

(C) If the source is above the tabletop and the SID is variable, then the measurement is made with the end of the beam-limiting device or spacer as close to the tabletop as it can be placed, provided that it shall not be closer than 30 centimeters.

(D) Movable grids and compression devices shall be removed from the useful beam during the measurement.

(E) The attenuation block shall be positioned in the useful beam 10 centimeters from the point of measurement of entrance exposure rate and between this point and the input surface of the fluoroscopic imaging assembly.

(F) The collimator shall be fully open when the measurement is made.

(e) **Indication of potential and current.** During fluoroscopy and cinefluorography, the kV and the mA shall be continuously indicated at the control panel and/or the fluoroscopist's position.

(f) **Source-to-Skin distance.** The SSD shall not be less than:

- (1) 38 centimeters on all stationary fluoroscopes,
- (2) 30 centimeters on all mobile fluoroscopes, and
- (3) 20 centimeters for image intensified fluoroscopes used for specific surgical application.

(g) **Fluoroscopic timer.**

(1) Means shall be provided to preset the cumulative on-time of the fluoroscopic x-ray tube. The maximum cumulative time of the timing device shall not exceed 5 minutes without resetting.

(2) A signal audible to the fluoroscopist shall indicate the completion of any preset cumulative on-time. Such signal will continue to sound while x-rays are produced until the timing device is reset.

(h) **Radiation therapy simulation systems.** If a radiation therapy simulation system complies with (1) and (2) of this subsection, then it is exempt from all the requirements of 310:281-11-13(a), (c), (d), and (g) provided that:

- (1) such systems are designed and used in such a manner that no individual other than the patient is in the x-ray room during periods of time when the system is producing x-rays; and

(2) systems which do not meet the requirements of 310:281- 11-13(g) are provided with a means of indicating the cumulative time that an individual patient has been exposed to x-rays. Procedures shall require in such cases that the timer be reset between examinations.

[Source: Added at 8 Ok Reg 3503, eff 8-15-91 (emergency); Added at 9 Ok Reg 1643, eff 5-29-92 ; Amended at 21 Ok Reg 1037, eff 5-13-04 ; Amended at 27 Ok Reg 2512, eff 7-25-10 ; Amended at 38 Ok Reg 1954, eff 9-11-21]

310:281-11-14. Radiographic diagnostic x-ray systems

(a) **Beam limitation.** This Subsection applies to radiographic systems used in the healing arts of medicine, chiropractic, and podiatry. It does not apply to fluoroscopic, dental, veterinary, or computed tomography systems.

(1) General purpose stationary, mobile and portable diagnostic x-ray systems.

(A) The tube housing shall be of diagnostic type.

(B) Adjustable collimators, with the same degree of protection as is required of the housing, shall be provided to restrict the useful beam to the area of clinical interest. They shall provide for independent, stepless adjustment of at least two dimensions of the x-ray field.

(C) A method shall be provided for visually defining the perimeter of the x-ray field. The total misalignment of the edges of the visually defined field with the respective edges of the x-ray field along either the length or width of the visually defined field shall not exceed 2 percent of the distance from the source to the center of the visually defined field when the surface upon which it appears is perpendicular to the axis of the x-ray beam.

(2) Additional requirements for stationary general purpose diagnostic x-ray systems. In addition to the requirements of 310:281-11-14(a)(1), all stationary general purpose diagnostic x-ray systems shall meet the following requirements:

(A) A method shall be provided to align the center of the x-ray field with respect to the center of the image receptor to within 2 percent of the SID.

(B) The beam-limiting device shall indicate numerically the field size in the plane of the image receptor to which it is adjusted.

(C) Indication of field size dimensions and SID's shall be specified in inches and/or centimeters, and shall be such that aperture adjustments result in x-ray field dimensions in the plane of the image receptor which deviate from those indicated by the beam-limiting device by no more than 2 percent of the SID when the beam axis is indicated to be perpendicular to the plane of the image receptor.

(3) General purpose diagnostic x-ray systems designed for one image receptor size. Radiographic systems designed for only one image receptor size at a fixed SID shall be provided with

means to limit the field at the plane of the image receptor to dimensions no greater than those of the image receptor, and to align the center of the x-ray field with the center of the image receptor to within 2 percent of the SID, or shall be provided with means to both size and align the x-ray field such that the x-ray field at the plane of the image receptor does not extend beyond any edge of the image receptor.

(4) Special purpose diagnostic x-ray systems.

(A) A means shall be provided to limit the x-ray field in the plane of the image receptor so that such field does not exceed each dimension of the image receptor by more than 2 percent of the SID when the axis of the x-ray beam is perpendicular to the plane of the image receptor.

(B) A means shall be provided to align the center of the x-ray field with the center of the image receptor to within 2 percent of the SID, or means shall be provided to both size and align the x-ray field such that the x-ray field at the plane of the image receptor does not extend beyond any edge of the image receptor.

(C) The above 310:281-11-14(a)(4)(A) and (B) may be met with a system that meets the requirements for general purpose x-ray system as specified in 310:281-11-14(a)(1) or, when alignment means are also provided, may be met with either:

- (i) an assortment of removable, fixed-aperture, beam-limiting devices sufficient to meet the requirement for each combination of image receptor size and SID for which the unit is designed with each such device having clear and permanent markings to indicate the image receptor size and SID for which it is designed; or
- (ii) a beam-limiting device having multiple fixed apertures sufficient to meet the requirement for each combination of image receptor size and SID for which the unit is designed. Permanent, clearly legible markings shall indicate the image receptor size and SID for which each aperture is designed and shall indicate which aperture is in position for use.

(b) Radiation exposure control devices.

(1) X-Ray control.

(A) An x-ray control shall be incorporated into each diagnostic x-ray system such that an exposure can be terminated by the operator at any time except:

- (i) for exposure of 0.5 second or less; or
- (ii) during serial radiography when means shall be provided to permit completion of any single exposure of the series in process.

(B) The exposure switch shall be of the dead-man type.

(2) Timers. A means shall be provided to terminate the exposure at a preset time interval, preset product of current and time, a

preset number of pulses, or a preset radiation exposure to the image receptor. In addition, it shall not be possible to make an exposure when the timer is set to a "zero" or "off" position.

(3) **Automatic exposure controls.** When an automatic exposure control is provided:

(A) Indication shall be made on the control panel when this mode of operation is selected.

(B) If the x-ray tube potential is equal to or greater than 50 kVp, the minimum exposure time for field emission equipment rated for pulsed operation shall be equal to or less than a time interval equivalent to two pulses.

(C) The minimum exposure time for all systems other than that specified in 310:281-11-14(b)(3)(B) shall be equal to or less than 0.0167 second or a time interval required to deliver 5 mAs, whichever is greater.

(D) Either the product of peak x-ray tube potential, current, and exposure time shall be limited to not more than 60 kW per exposure, or the product of x-ray tube current and exposure time shall be limited to not more than 600 mAs per exposure except that, when the x-ray tube potential is less than 50 kVp, the product of x-ray tube current and exposure time shall be limited to not more than 2000 mAs per exposure.

(E) A visible signal will indicate when an exposure has been terminated at the limits required by 310:281-11-14(b)(3)(iv), and manual resetting shall be required before further automatically timed exposures can be made.

(4) **Reproducibility.** With a timer setting of 0.5 second or less, the average exposure period (T) shall be greater than or equal to 5 times the maximum exposure period (T_{\max}) minus the minimum exposure period (T_{\min}) when 4 timer tests are performed: $T > 5(T_{\max} - T_{\min})$

(5) **Accuracy.** Deviation of measured technique factors from indicated values of kVp and exposure time shall not exceed the limits specified for that system by its manufacturer. In the absence of manufacturer's specifications, the deviation shall not exceed 10 percent of the indicated value for kVp and for times greater than 0.05 (1/20) seconds.

(c) **Source-to-Skin Distance (SSD).** All mobile or portable diagnostic x-ray systems shall be provided with means to limit the SSD to 30 centimeters or greater.

(d) **Exposure reproducibility.** The coefficient of variation of exposure shall not exceed 0.10 when all technique factors are held constant. This requirement is met when 4 exposures are made at identical technique factors, and the value of the average exposure (E) is greater than or equal to 5 times the maximum exposure (E_{\max}) minus the minimum exposure (E_{\min}): $E > 5(E_{\max} - E_{\min})$

(e) **Linearity.** The average ratios of exposure (mR) to the indicated milliamperere-seconds (mAs) product obtained at any two consecutive tube

current settings shall not differ by more than 0.10 times their sum: $[X_1 - X_2] < 0.10(X_1 + X_2)$ where X_1 and X_2 are the average mR/mAs values obtained at each of two consecutive tube current settings.

(f) **Radiation from capacitor energy storage systems in standby status.** Radiation emitted from the x-ray tube when the exposure switch or timer is not activated shall not exceed a rate of 2 milliroentgens per hour at 5 centimeters from any accessible surface of the diagnostic source assembly, with the beam-limiting device fully open.

[Source: Added at 8 Ok Reg 3503, eff 8-15-91 (emergency); Added at 9 Ok Reg 1643, eff 5-29-92 ; Amended at 21 Ok Reg 1037, eff 5-13-04 ; Amended at 38 Ok Reg 1954, eff 9-11-21]

310:281-11-15. Computed tomography x-ray systems

(a) System requirements.

(1) Tomographic plane indication and alignment.

(A) For any single tomogram system, means shall be provided to permit visual determination of the tomographic plane or a reference plane offset from the tomographic plane.

(B) For any multiple tomogram system, means shall be provided to permit visual determination of the location of a reference plane. The reference plane can be offset from the location of the tomographic planes.

(C) If a device using a light source is used to satisfy 310:281-11-15(a)(1)(A) or (B), the light source shall provide illumination levels sufficient to permit visual determination of the location of the tomographic plane or reference plane under ambient light conditions of up to 500 lux.

(2) **Indication of CT conditions of operation.** The CT x-ray system shall be designed such that the CT conditions of operation to be used during a scan or a scan sequence are indicated prior to the initiation of a scan or a scan sequence. On a system having all or some of these conditions of operation at fixed values, this requirement may be met by permanent markings. Indication of CT conditions of operation shall be visible from any position from which scan initiation is possible.

(3) Initiation of operation.

(A) The x-ray control and gantry shall provide visual indication whenever x-rays are produced and, if applicable, whether the shutter is open or closed.

(B) Means shall be provided to require operator initiation of each individual scan or series of scans.

(C) All emergency buttons/switches shall be clearly labeled as to their functions.

(4) Termination of exposure.

(A) Means shall be provided to terminate the x-ray exposure automatically by either de-energizing the x-ray source or shuttering the x-ray beam in the event of the equipment failure affecting data collection. Such

termination shall occur within an interval that limits the total scan time to no more than 110 percent of its preset value through the use of either a backup timer or devices which monitor equipment function.

(B) A visible signal shall indicate when the x-ray exposure has been terminated through the means required by 310:281-11-15(a)(4)(A).

(C) The operator shall be able to terminate the x-ray exposure at any time during a scan, or series of scans under x-ray system control, of greater than 0.5 second duration. Termination of the x-ray exposure shall necessitate resetting of the CT conditions of operation prior to initiation of another scan.

(5) **Extraneous radiation.** The system shall perform such that the radiation produced adjacent to the tube housing assembly, including the tube port, during periods of time that scans are not being performed does not exceed the levels permitted by 310:281-11-12(c).

(6) **Additional requirements applicable to CT x-ray systems containing a gantry manufactured after September 3, 1985.**

(A) The total error in the indicated location of the tomographic plane or reference plane shall not exceed 5 millimeters.

(B) If the x-ray production period is less than 0.5 second, the indication of x-ray production shall be activated for at least 0.5 second. Indicators at or near the gantry shall be discernible from any point external to the patient opening where insertion of any part of the human body into the primary beam is possible.

(C) The deviation of indicated scan increment versus actual increment shall not exceed to within 1 millimeter with any mass from 0 to 100 kilograms resting on the support device. The patient support device shall be incremented from a typical starting position to the maximum incremented distance or 30 centimeters, whichever is less, and then returned to the starting position. Measurement of actual versus indicated scan increment can be taken anywhere along this travel.

(D) Premature termination of the x-ray exposure by the operator shall necessitate resetting of the CT conditions of operation prior to the initiation of another scan.

(7) **Maximum surface CTDI identification.** The angular position where the maximum surface CTDI occurs shall be identified to allow for reproducible positioning of a CT dosimetry phantom.

(b) **Facility design requirements.**

(1) **Aural communication.** Provision shall be made for two-way aural communication between the patient and the operator at the control panel.

(2) **Viewing systems.**

(A) Windows, mirrors, closed-circuit television, or an equivalent shall be provided to permit continuous observation of the patient during irradiation and positioned to allow the operator to observe the patient from the control panel.

(B) When the primary viewing system is by electronic means, an alternate viewing system (which may be electronic) shall be available for use in the event of failure of the primary viewing system.

(c) Surveys, dose measurements, spot checks, operating procedures, and preventative maintenance services.

(1) Surveys.

(A) All CT systems shall have a survey made by or under the direct supervision of a medical physicist.

(i) All dental cone beam CTs under 120 kVp are exempt from this requirement; and

(ii) CT systems not used for diagnostic purposes are exempt from this requirement.

(B) Performance surveys by a medical physicist shall be made:

(i) at intervals not to exceed 1 year;

(ii) when major maintenance, except x-ray tube replacement, that could affect radiation output is performed; and

(iii) when a major change in the systems operation is accomplished; for example, introduction of a new software package.

(C) The permittee shall obtain a written report of the survey from the medical physicist and a copy of the report shall be made available to the Department upon request.

(2) Dose measurements.

(A) The dose measurements of the radiation output of the CT system will be done by a medical physicist. Dose limits for adult head, adult abdomen, and pediatric abdomen are listed in 310:281-11-5.

(B) Any calibration or recalibration on a CT system required by the medical physicist's survey shall be done by a qualified service representative. Any work deemed necessary by the permittee, other than that permitted by the manufactures' operators manual, shall be performed by a qualified service representative.

(C) Calibration of the dose measurements of a CT system is required for each type of head, body, or whole-body scan performed at the facility.

(D) Dose measurements shall meet the following requirements:

(i) The dose profile along the center axis of the CT phantom for the minimum, maximum, and midrange values of the nominal tomographic section thickness used by the permittee shall be measurable. Where less than 3 nominal

tomographic thicknesses can be selected, the dose profile determination shall be performed for each available nominal tomographic section thickness.

(ii) The CTDI along the two axes specified in 310:281-11-15(c)(3)(A)(ii) shall be measured. The CT dosimetry phantom shall be oriented so that the measurement point 1.0 centimeter from the outer surface and within the phantom is in the same angular position within the gantry as the point of maximum surface CTDI identified. The CT conditions of operation shall correspond to typical values used by the permittee.

(E) Calibration of the dose measurements of a CT equipment shall be performed with a calibrated dosimetry system.

(i) Calibration of such a system shall be traceable to the national standard. The dosimetry system shall have been calibrated within the preceding 2 years.

(ii) Calibration procedures of the dosimetry system shall be in writing. Records of calibration performed shall be available for inspection by the Department.

(3) **CT dosimetry phantom(s).** CT dosimetry phantom(s) shall be used in determining the radiation output of CT systems. Such phantom(s) shall meet the following specifications and conditions of use:

(A) CT dosimetry phantom(s) shall be made of a material analogous to human tissue. (Water and acrylic are acceptable). If they are made of acrylic, they should have a density of 1.19 plus or minus 0.01 grams per cubic centimeter. The phantom(s) shall be at least 14 centimeters in length and have a diameter of 32.0 centimeters for testing CT systems designed to image any section of the body and 16.0 centimeters for equipment designed to image the head or for whole body equipment operated in the head scanning mode.

(B) CT dosimetry phantoms shall provide a means for the placement of a dosimeter(s) along the axis of rotation and a line parallel to the axis of rotation 1.0 centimeter from the outer surface and within the phantom. Means for the placement of dosimeter or alignment devices at other locations should be provided.

(C) Any effects on the doses measured due to the removal of phantom material to accommodate dosimeters shall be accounted for through appropriate corrections to the reported data or included in the statement of maximum deviation for the values obtained using the phantom.

(D) All dose measurements shall be performed with the CT phantom placed on the patient couch or support devices without additional attenuation materials present.

(E) If contrast studies are done, the materials used should be made of water, acrylic, polyethelene, and air. They will be used to simulate bone and different types of tissue.

(4) Spot checks.

(A) Spot check procedures shall be developed by a medical physicist.

(B) All spot checks shall be included in the medical physicist survey required by 310:281-11-15(c)(2), and otherwise at time intervals and under equipment conditions specified by a medical physicist.

(C) Spot checks shall include acquisition of images obtained with the CT dosimetry phantom(s) using the same processing mode and CT conditions of operation as are used to perform dose measurements required by 310:281-11-15(c)(2). The images shall be retained, until a new dose measurement is performed, in two forms as follows:

- (i) photographic copies of the images obtained from the image display device; and
- (ii) images stored in digital form of the most recent spot check on a storage medium compatible with the CT x-ray system.

(D) Written records of the spot checks performed shall be maintained for inspection by the Department.

(5) Operating procedures.

(A) The CT system shall not be operated except by an individual who has been specifically trained in its operation. Documentation of this training must be available upon request of the Department inspector.

(B) Information shall be available at the control panel regarding the operation and calibration of the system.

Such information shall include the following.

- (i) Dates of the latest survey, preventative maintenance service, spot checks, and location within the facility of where to find the results of those tests;
- (ii) Instructions on the use of the CT dosimetry phantom(s) including a schedule of spot checks appropriate for the system, allowable variations for the indicated parameters, and the results of at least the most recent spot checks conducted on the system;
- (iii) The distance in millimeters between the tomographic plane and the reference plane if a reference plane is utilized; and
- (iv) A current technique chart available at the control panel which specifies, each routine examination, the CT conditions of operation, and the number of scans per examination.

(C) If the medical physicist survey or spot checks of the CT system identifies that a systems operating parameter(s)

has exceeded a tolerance established by the medical physicist, use of the CT equipment on patients shall be limited to those uses permitted by established written instructions of the medical physicist.

(6) **Preventative maintenance services.** Each permittee shall establish a preventative maintenance schedule where their CT system is serviced at least once every 3 months by a qualified service representative.

[Source: Added at 8 Ok Reg 3503, eff 8-15-91 (emergency); Added at 9 Ok Reg 1643, eff 5-29-92 ; Amended at 21 Ok Reg 1037, eff 5-13-04 ; Amended at 38 Ok Reg 1954, eff 9-11-21]

310:281-11-16. Dental radiographic systems

(a) General requirements.

(1) **Timers.** Means shall be provided to terminate the exposure at a preset time interval, preset product of current and time, a preset number of pulses, or a preset radiation exposure to the image receptor. In addition, it shall not be possible to make an exposure when the timer is set to a "zero" or "off" position if either position is provided.

(2) **Reproducibility.** With a timer setting of 0.3 second or less, the average exposure period (T) shall be greater than or equal to 5 times the maximum exposure period (T_{\max}) minus the minimum exposure period (T_{\min}) when 4 timer tests are performed: $T > 5(T_{\max} - T_{\min})$

(3) **X-Ray control.**

(A) An x-ray control shall be incorporated into each dental x-ray system such that an exposure can be terminated by the operator at any time, except for exposures of 0.5 second or less.

(B) The exposure switch shall be of the dead-man type.

(C) Each x-ray control shall be located in such a way as to permit the operator to remain in an area of less than 2 millirems in any 1 hour during the entire exposure.

(4) **Exposure reproducibility.** The coefficient of variation shall not exceed 0.10 when all technique factors are held constant. This requirement is met when 4 exposures are made at identical technique factors, the value of the average exposure (E) is greater than or equal to 5 times the maximum exposure (E_{\max}) minus the minimum exposure (E_{\min}): $E > 5(E_{\max} - E_{\min})$

(b) Additional requirements for dental intraoral systems.

(1) **Source-to-Skin distance (SSD).** Dental x-ray systems designed for use with an intraoral image receptor shall be provided with means to limit SSD to not less than:

(A) 18 centimeters if operable above 50 kVp; or

(B) 10 centimeters if not operable above 50 kVp.

(2) **Field limitation.**

(A) Dental x-ray systems designed for use with an intraoral image receptor shall be provided with means to limit the x-ray beam such that the x-ray field, at the minimum SSD, is

containable in a circle having a diameter of no more than 7 centimeters or a rectangle with a longer side of no more than 5cm.

(B) An open-ended, shielded, beam-indicating device shall be used.

(c) Additional requirements for dental extraoral system field limitation.

(1) Dental rotational panoramic systems shall be provided with means to limit the x-ray beam to the imaging slit in the transverse axis and shall not exceed a total of 0.5 inch larger than the imaging slit in the vertical axis.

(2) All other dental extraoral x-ray systems (e.g., cephalometric) shall be provided with means to both size and align the x-ray field so that it does not extend beyond any edge of the image receptor by more than 2 percent of the SID.

[Source: Added at 8 Ok Reg 3503, eff 8-15-91 (emergency); Added at 9 Ok Reg 1643, eff 5-29-92 ; Amended at 21 Ok Reg 1037, eff 5-13-04 ; Amended at 38 Ok Reg 1954, eff 9-11-21]

310:281-11-17. Veterinary x-ray systems

(a) Systems.

(1) The system shall display the selected exposure factors before the exposure begins.

(A) The requirement of 310:281-11-17(a)(1)(A) may be met by permanent markings on equipment having fixed technique factors. Indication of technique factors shall be visible from the operator's position except in the case of spot films made by the fluoroscopist.

(B) The x-ray control shall provide visual indication of the production of x-rays observable at or from the operator's protected position whenever x-rays are produced.

(2) The leakage radiation from the diagnostic tube head assembly measured at a distance of 1 meter in any direction from the source shall not exceed 100 milliroentgens in 1 hour when the x-ray tube is operated at its leakage technique factors.

Measurement is averaged over an area of 100 square centimeters with no linear dimension greater than 20 centimeters.

(3) The useful beam shall be restricted to the area of clinical interest and no larger than the size of the image receptor.

(4) Collimating devices shall be provided and shall limit the beam to the area of the image receptor to within 2 percent of the SID, and shall provide the same degree of protection as is required of the housing.

(5) The half-value layer of the useful beam shall not be less than 0.5 millimeter aluminum equivalent for systems operating up to 50 kVp, 1.5 millimeters aluminum equivalent for systems operating between 50 and 70 kVp, and 2 millimeters aluminum equivalent for systems operating above 70 kVp.

(6) A device shall be provided to terminate the exposure after a preset time or exposure.

(7) A dead-man type of exposure switch shall be provided, together with an exposure control cord of sufficient length, so that the operator can stand out of the useful beam and at least 6 feet from the animal during all x-ray exposures.

(8) The coefficient of variation for exposure shall not exceed 0.10 when all technique factors are held constant. This requirement is met when 4 exposures are made at identical technique factors, the value of the average exposure (E) is greater than or equal to 5 times the maximum exposure (E_{\max}) minus the minimum exposure (E_{\min}): $E \geq 5(E_{\max} - E_{\min})$

(9) The primary beam shall be aligned with the film by using specified technique in the facility's operating procedures.

(10) Fluoroscopic and CT systems used in veterinary facilities shall meet the requirements of 310:281-11-13 and 310:281-11-15 respectively, except the aural communications requirements of 310:281-11-15(b)(1).

(11) Portable systems shall be used in a manner which complies with these rules.

(b) **X-ray control location.** Each x-ray control shall be located in such a way as to permit the operator to remain in an area of less than 2 millirems in any 1 hour during the entire exposure.

[Source: Added at 8 Ok Reg 3503, eff 8-15-91 (emergency); Added at 9 Ok Reg 1643, eff 5-29-92 ; Revoked at 21 Ok Reg 1037, eff 5-13-04]

310:281-11-20. Determining skin entrance exposures

The following is the method for measuring and calculating patient entrance skin exposures in diagnostic x-ray examinations.

(1) Have the operator set the x-ray tube at the source to image receptor distance (SID) routinely used, and adjust the collimation as though a patient was in the beam. Measure the distance from the x-ray source to the surface against which the patient rests. Subtract the thickness of the patient part to obtain the source to skin distance (SSD).

(2) Place the ionization chamber in the center of the x-ray field and measure the source to chamber distance (SCD). Use of a test stand (such as the CDRH stand) to position the chamber at a reasonable distance from the table will reduce backscatter contribution. Placing the chamber at the actual SSD will

accomplish this and allow direct reading of the ESE.

(3) Record the routine technical factors used by the facility for the standard patient thickness (Table I) and make exposures utilizing these techniques.

(4) For phototimed procedures a phantom must be utilized to control the exposure time and achieve an accurate exposure estimate. When utilizing a phantom, the measuring chamber should be positioned in the beam between the phantom and the x-ray tube (but not placed over an active photocell), and should be located approximately nine inches from the phantom to reduce backscatter contribution.

(5) Calculate the entrance skin exposure as follows if a direct result was not obtained: $ESE = (Raw\ mR) \times (SCD)^2 / (SSD)^2$

(6) Compare the results of these measurements for the speed of the imaging system used by the facility with the ESE guides published by the Conference of Radiation Control Program Directors, Publication 88-5 "Average Patient Exposure Guides - 1988", or a similarly derived group of values, (allowing for the speed of the imaging system used by the facility).

(7) There are many different techniques for measuring ESE, which may result in significant differences in measured values. Factors that can cause variations include instrument calibration, backscatter, collimation, estimation of focal spot location, choice of phantom, and location of chamber in the primary beam.

310:281-11-21. Additional information required for healing arts screening

Persons requesting that the Department approve a healing arts screening program shall submit the following information and evaluation:

(a) Administrative controls.

(1) The name and address of the applicant and, where applicable, the names and addresses of agents within Oklahoma.

(2) The diseases or conditions for which the x-ray examinations are to be used in diagnosis.

(3) A detailed description of the x-ray examinations proposed in the screening program.

(4) A description of the population to be examined in the screening program (i.e., age, sex, physical condition.)

(5) An evaluation of any known alternate methods not involving radiation which could achieve the goals of the screening program and why these methods are not being utilized.

(6) All screening exams must have an order from an Oklahoma licensed medical practitioner. The exam order must be within the scope of the practitioner's license. The only exceptions to this are screening mammography and bone density exams.

(b) Operating procedures.

(1) An evaluation by a medical physicist of the diagnostic x-ray systems to be used in the screening program. The evaluation by

the medical physicist shall show compliance with these rules.

(2) A description of the diagnostic film quality control program.

(3) A copy of the technique chart to be used for the x-ray examination procedures.

(c) Training.

(1) The qualifications of each individual who will be operating the diagnostic x-ray systems.

(2) The qualifications of the individual who will be supervising the operators of the diagnostic x-ray systems. The extent of supervision and the method of work performance evaluation shall be specified.

(3) The name and address of the practitioner who will interpret the radiographs.

(d) Records.

(1) A description of the procedures to be used in advising the individuals screened, and their private practitioners of the healing art, of the results of the screening procedure and any further medical needs indicated.

(2) A description of the procedures for the retention or disposition of the radiographs and other records pertaining to the x-ray examinations.

SUBCHAPTER 17. USE OF TELERADIOLOGY IN HEALING ARTS

310:281-17-1. Incorporation by reference

(a) **Adopted reference.** Except as otherwise specifically provided, the performance of teleradiology shall conform to standards as described in the 2002 revised edition of the "ACR Technical Standard for Teleradiology" as defined in the American College of Radiology Practice Guidelines and Technical Standards.

(b) Exceptions.

(1) Section III, Qualifications of Personnel, "In all cases this means a licensed and/or registered radiologic technologist, radiation therapist, nuclear medicine technologist or sonographer is not incorporated by reference.

(2) Section III,B,1 "Certified by the appropriate registry and/or possess unrestricted state licensure" is not incorporated by reference.

(3) Section V, Licensing, Credentialing, And Liability, "Physicians who provide the official interpretation of images transmitted by teleradiology should maintain licensure as may be required for

provision of radiologic service at both the transmitting and receiving sites" is not incorporated by reference.

(4) Doctors of Veterinary Medicine are exempted from this subchapter.

CHAPTER 285. LODGING ESTABLISHMENTS

[**Authority:** 63 O.S., §§ 1-104 and 1-1201 et seq.]

[**Source:** Codified 12-31-91]

SUBCHAPTER 1. GENERAL PROVISIONS

310:285-1-1. Purpose

The rules in this Chapter implement the Lodging Establishment Statute, 63 O.S. Section 1-1201 et seq.

[**Source:** Amended at 38 Ok Reg 1982, eff 9-11-21]

310:285-1-1.1. Scope

The rules in this chapter shall apply only to guest rooms and any supporting facilities. It is not the intent of this chapter to license or regulate:

- (1) Living quarters where permanent residents reside; or
- (2) Establishments which require the rental of the entire establishment and grounds.

[**Source:** Added at 38 Ok Reg 1982, eff 9-11-21]

310:285-1-2. Definitions

The following words or terms, when used in this Chapter, shall have the following meaning, unless the context clearly indicates otherwise:

"Bedding" means mattresses, sleeper sofas, mattress covers, mattress pads, bedskirts, quilts, blankets, sheets, pillows, pillow cases, comforters and spreads.

"Cabin" means a single structure where sleeping accommodations are furnished to the transient, traveling, or vacationing public. A group of less than four (4) cabins, at the same location and under the same ownership shall be exempt from this chapter.

"Certified applicator" means any individual who is certified under 7 U.S.C., Section 136(e)(1) or by the Oklahoma State Department of Agriculture Food and Forestry as authorized to use or supervise the use of any pesticide that is classified for restricted use. Any applicator who holds or applies registered pesticides or uses dilutions of registered pesticides consistent with the product labeling only to provide a service of controlling pests without delivering any unapplied pesticide to any person so served is not deemed to be a seller or distributor of pesticides.

"Clean" means free of visible stains, dirt, dust, sludge, foam, slime (including algae and fungi), mold, rust, scale, mineral deposits, accumulation of impurities, food debris, and other foreign material.

"Commissioner" means the State Commissioner of Health and authorized representatives or designated agents thereof.

"Continental breakfast" means a morning meal consisting of no more than the food items described in OAC 310:285-5-6(a) and this Chapter, or an authorized agent thereof.

"Department" means the Oklahoma State Department of Health and a health department designated in writing by the State Commissioner of Health to perform official duties or other acts authorized under 63 O.S. § 1- 101 et seq.

"Employee" means the permit holder, individuals having supervisory or management duties and any other person working in a lodging establishment whose duties include the cleaning of rooms, toilets, linens, utensils, or any part of the building or the rendering of any service to guests.

"EPA-registered" means any chemical or substances, including sanitizers, sterilizers, biocides, or other substances which must be registered with the United States Environmental Protection Agency under 7 U.S.C. § 136 et seq. prior to their distribution and use by industry and consumers.

"Food" means any raw, cooked, or processed edible substance, ice, beverage or ingredient used or intended for use or for sale in whole or in part for human consumption.

"Guest room" means any room in a lodging establishment which is offered for occupancy on a daily basis or for a period of less than thirty (30) days.

"Housekeeper's cart" means a vehicle which is used to transport cleaning materials, room supplies, clean and soiled linens and refuse.

"Imminent health hazard" means a significant threat or danger to health that is considered to exist when there is evidence sufficient to show that a product, practice, circumstance, or event creates a situation that requires immediate correction or cessation of operation to prevent injury based on the number of potential injuries, and the nature, severity, and duration of the anticipated injury.

"Infestation" means the presence of vermin, which includes but is not limited to bed bugs, cockroaches, or rodents, which is indicated by observation of living or dead vermin or vermin carapace, eggs or egg casings, or the typical brownish or blood spotting on linens, mattresses, or furniture, or the presence of vermin droppings.

"Kitchenette" means a room or area within a single guest room of a lodging establishment that has the following amenities:

- (A) A kitchen sink supplied with hot and cold potable water;
- (B) Properly vented cooking facilities such as a microwave oven, convection oven, or stove;
- (C) An easily cleanable, non-porous counter for food preparation;
- (D) A refrigerator capable of holding 41 °F or less; and
- (E) A cupboard or other kitchen cabinetry.

"Law" means state statutes and rules.

"Lodging establishment" means and includes any hotel, motel, tourist court, apartment house, rooming house or other place where sleeping accommodations are furnished or offered for pay for transient guests, if five (5) or more rooms are available therein for transient guests.

"Person" means any individual, partnership, corporation, association, or other legal entity.

"Person in charge" means the individual present in a lodging establishment who is the supervisor of the lodging establishment at the time of inspection. If no individual is the supervisor, then any employee present is the person in charge.

"Physical facilities" means the structure and interior surfaces of a lodging establishment including accessories such as soap and towel dispensers and attachments such as light fixtures and heating or air conditioning system vents.

"Potable water" means water which is safe for human consumption in that it is free from impurities in amounts sufficient to cause disease or harmful physiological effects and, for the purpose of this definition, approved by the Department of Environmental Quality prior to serving to the general public.

"Premises" means the physical establishment, its contents, and the contiguous land or property under the control of the license holder which operated as a single business.

"Putrescible" means capable of being decomposed by microorganisms with sufficient rapidity as to cause nuisances from odors or gases.

"Ready-to-eat food" means a food product that is intended to be consumed without any further preparation or cooking processes.

"Regulatory authority" means a representative, such as an onsite inspector, of the Department.

"Restricted use pesticide" means a pesticide product that contains the active ingredients specified in 40 CFR 152.175, pesticides classified for restricted use, and pesticides limited to use by or under the direct supervision of a certified applicator.

"Sanitization" means effective bactericidal treatment by a process that provides enough accumulative heat or concentration of chemicals for enough time to reduce the bacterial count, including pathogens to a safe level as determined by applicable state and federal requirements on utensils and equipment.

"Sewage" means liquid waste containing animal or vegetable matter in suspension or solution and may include liquids containing chemicals in solution.

"Single-service articles" means cups, containers, lids, closures, knives, forks, spoons, stirrers, paddles, straws, wrapping materials, and similar utensils intended to be discarded after one use.

"Substantial compliance" means a level of compliance with the requirements of participation such that any identified deficiencies pose no greater risk to resident health or safety than the potential for causing minimal harm.

"Time/Temperature Control for Safety Food" means a food that requires time/temperature control for safety (TCS) to limit pathogenic microorganism growth or toxin formation.

(A) Time/Temperature Control for Safety Food includes: An animal food that is raw or heat-treated; a plant food that is heat-treated or consists of raw seed sprouts, cut melons, cut leafy greens, cut tomatoes or mixtures of cut tomatoes that are not modified in a way so that they are unable to support pathogenic microorganism growth or toxin

formation, or garlic-in-oil mixtures that are not modified in a way that results in mixtures that do not support growth or toxin formation; and

(B) Time/Temperature Control for Safety Food does not include:

- (i) An air-cooled hard-boiled egg with shell intact, or a shell egg that is not hard-boiled, but has been pasteurized to destroy all viable *Salmonellae*;
- (ii) A food in an unopened hermetically sealed container that is commercially processed to achieve and maintain commercial sterility under conditions of non-refrigerated storage and distribution;
- (iii) A food that because of its aW or pH values, is designated as a non-TCS food.

"Utensil" means any multi-use or single service implement used in the storage, preparation, transportation, or service of ice, beverage, or other food.

"Variance" means a written document issued by the Department that authorizes a modification or waiver of one or more requirements of this Chapter, if, in the opinion of the regulatory authority, a health hazard or nuisance will not result from the modification or waiver.

[Source: Amended at 38 Ok Reg 1982, eff 9-11-21 ; Amended at 41 Ok Reg, Number 22, effective 8-11-24]

310:285-1-3. Captions

Section tag lines and subsection tag lines are part of the rules of this Chapter.

310:285-1-4. Severability

If any provision or application of any provision of the rules in this Chapter is held invalid, that invalidity shall not affect other provisions or applications of the rules in this Chapter.

SUBCHAPTER 3. ESTABLISHMENT MAINTENANCE

310:285-3-1. Establishment maintenance

(a) All buildings and appurtenances used in the operation of any lodging establishment, excluding the buildings and appurtenances of hotels as defined in 63 O.S. § 1-1201(A), shall be maintained as necessary to safeguard the health, comfort and safety of guests accommodated therein. Hotels remain subject to the Department's rules governing *cleanliness and bactericidal treatment of equipment and utensils; cleanliness and hygiene of personnel; toilet facilities; disposal of wastes; water supply; and any other items deemed necessary to safeguard the health, comfort and safety of guests accommodated therein.* [63 O.S. § 1-1201(A)]

- (b) The floors in areas used for washing and sanitizing multiuse utensils, laundry areas, kitchenettes, and in areas in restrooms, which are next to the tub, shower, or toilet, shall be constructed of smooth, durable, nonabsorbent, and easily cleanable material.
- (c) All floors, walls, ceilings, equipment, and other appurtenances in hallways, common areas, and foodservice areas shall be maintained clean and in good repair.
- (d) Studs, joists, rafters, and beams shall not be left exposed in restrooms, laundry rooms, or kitchenettes. If left exposed in other areas, these structural members shall be suitably finished and be kept clean and in good repair.

[Source: Amended at 38 Ok Reg 1982, eff 9-11-21 ; Amended at 41 Ok Reg, Number 22, effective 8-11-24]

310:285-3-1.1. Smoking

A lodging establishment may allow smoking in no more than twenty-five percent (25%) of the guest rooms as stated in 63 O.S. § 1-1523 and shall comply with OAC 310: 355, relating to smoking in public and indoors.

[Source: Added at 38 Ok Reg 1982, eff 9-11-21]

310:285-3-2. Plumbing

Plumbing shall be maintained in a safe manner and comply with applicable laws.

- (1) There shall be no apparent cross-connection between the potable water supply and any non-potable or questionable water supply nor any source of pollution through which the potable water supply might become contaminated.
- (2) Each washing machine, dishwasher, or sink used for washing laundry, tableware or utensils, and all ice machines, shall drain through an approved air gap.
- (3) Hot water at handwashing sinks shall be at least 100°F and 110°F at ware washing sinks.

[Source: Amended at 38 Ok Reg 1982, eff 9-11-21]

310:285-3-3. Electrical

The electrical distribution system shall be maintained in a safe manner and comply with applicable law.

[Source: Amended at 38 Ok Reg 1982, eff 9-11-21]

310:285-3-4. Light

Lighting shall be provided to promote cleanliness and safety.

- (1) Each lodging unit shall maintain at least one lighting fixture which will provide at least fifty (50) foot-candles of light measured at thirty (30) inches above the floor.

- (2) At least fifty (50) foot-candles of light measured at thirty (30) inches above the floor shall be provided in each area used for preparing food, at ice machines, and in each kitchenette.
- (3) At least twenty (20) foot-candles of light at a distance of thirty (30) inches from the floor shall be provided in each laundromat area for guest use, toilet room, bathroom, continental food service areas, in ware washing areas, in laundry rooms, and in each other area during cleaning.
- (4) At least fifteen (15) foot-candles of light shall be provided in any living or sleeping area.

[Source: Amended at 38 Ok Reg 1982, eff 9-11-21]

310:285-3-5. Safety

(a) **Fire extinguishers.** Fire extinguishers shall be provided as required by law and maintained in working order at all times as indicated by the manufacturer's recommendation.

- (1) The employer shall distribute portable fire extinguishers for use by employees on Class A (Ordinary combustibles) fires so that the travel distance for employees to any extinguisher is 75 feet (22.9 m) or less.
- (2) The employer shall distribute portable fire extinguishers for use by employees on Class K (Commercial Cooking Equipment) fires so that the travel distance for employees to any extinguisher is 30 feet (9.1 m) or less.

(b) **Smoke detectors.** Each guest room shall be equipped with at least one working smoke detector, clearly audible over background noise, and maintained free of foreign matter that could impair its proper function. Electronic smoke detectors shall be tested and approved annually by a sprinkler company, fire alarm company, fire department representative, or other entity. Record of the most recent test shall be made available to the regulatory authority upon request

- (1) All battery operated smoke detectors shall be checked each time the room is cleaned.
- (2) If the smoke detector is not working properly, the room shall be closed until the smoke detector can be repaired to working order.
- (3) Facilities constructed after the effective date of these regulations shall have electronically operated smoke detectors.

(c) **Carbon monoxide detectors.** Carbon monoxide detectors shall be required in each guest room which has a gas appliance inside it.

(d) **Fire escapes.** All fire escapes shall be maintained in good repair, unobstructed, easily accessible at all times, and marked with a colored lighted sign.

- (1) Conspicuous directions to all fire escapes shall be posted in all hallways or walkways.
- (2) An evacuation route diagram, showing location of room, layout of floor, and nearest available exits, shall be posted in a conspicuous location in each guest room.

(e) **Platforms.** All platform areas accessible to persons, such as porches, decks, or lofts elevated more than thirty (30) inches, shall be enclosed by a rail at least twenty-eight (28) inches high and with openings of no greater than four (4) inches.

(f) **Ventilation.** There must be a forced air vent or window that can be opened to provide ventilation of all guest rooms. Windows which can be opened must be screened and the screen must be removable.

[Source: Amended at 38 Ok Reg 1982, eff 9-11-21]

310:285-3-6. Restroom facilities

(a) All lodging establishments shall provide toilet facilities and lavatories on each floor for use by those guests without private toilet facilities in their rooms.

(b) The walls, floors, and ceilings, toilet bowls, lavatories, bath tubs, shower stalls, and other equipment and appurtenances in all restrooms shall be maintained clean and in good repair.

(c) Towels, soap, and toilet paper shall be provided in each guest room toilet facility. Locked, permanently-mounted stocked soap and shampoo dispensers may be provided for tub, shower, or lavatory use.

(d) Every surface of a bathtub, shower, shower enclosure, toilet, and lavatory, which may come in contact with a person's body, shall be sanitized each day the rooms are in use, unless the guest has declined regular guest room services. If a guest declines regular guest room services, the lodging establishment shall ensure these surfaces are cleaned and sanitized at least once per week and between guests.

(e) All public and employee restrooms shall be stocked with a sufficient supply of toilet paper, disposable paper or single-use cloth towels, and soap. Cloth towels provided in public restrooms for use by guests and customers shall be dispensed in a manner that clearly facilitates single use prior to laundering. If cloth towels are provided for this purpose, they shall be stored for use, dispensed, and stored for re-laundering in a sanitary manner.

(f) Ventilation in all restroom areas shall be installed and maintained according to applicable laws.

[Source: Amended at 38 Ok Reg 1982, eff 9-11-21]

310:285-3-7. Refuse storage and disposal

(a) Each public lodging establishment shall have solid waste containers of sufficient number and size to store all the solid waste in a manner that does not exceed the waste container capacity.

(1) Containers shall be emptied at least weekly or sooner at an interval which prevents putrescible waste from becoming a nuisance.

(2) Exterior waste containers shall be kept clean, covered, and closed with a tight fitting lid at all times except when being filled.

(b) At least one nonperforated metal or plastic waste basket shall be provided for each guest room.

[Source: Amended at 38 Ok Reg 1982, eff 9-11-21]

310:285-3-8. Premises

The premises of all lodging establishments shall be adequately drained and kept clean and free from high weeds, clutter, and refuse.

(1) Only those chemicals necessary to the operation of the lodging establishment shall be stored on the premises.

(2) Chemicals and pesticides used on the premises must be used in accordance with the manufacturer's recommended directions and stored in a safe manner.

(3) A restricted use pesticide shall be applied only by an applicator certified as defined in 7 U.S.C., Section 136(e)(1), or a person under the direct supervision of a certified applicator.

(4) Chemicals removed from their original container shall be properly labeled. All chemical storage areas shall be properly identified.

(5) Chemicals shall not be stored with or above food, food equipment or utensils, or clean linens or bedding.

[Source: Amended at 38 Ok Reg 1982, eff 9-11-21]

310:285-3-9. Vermin control

Effective methods of vermin control shall be provided for all buildings and appurtenances thereto. Premises shall be kept free of conditions conducive to harborage and infestation at all times. Guest rooms found to have evidence of or live rodents, cockroaches, bed bugs, or other vermin in type and number to cause a public health nuisance shall be closed to the public immediately and until the presence or infestation is eliminated. Measures to control such infestations shall be implemented and documented. Such documentation shall be maintained for a period of one year.

[Source: Amended at 38 Ok Reg 1982, eff 9-11-21]

310:285-3-10. Restriction of animals and fowl

The keeping of animals or fowl in a guest room may be permitted by the lodging establishment. Each room occupied by any animal or fowl shall be adequately cleaned, including wet scrubbing of carpet if need is indicated, to assure that the room is clean and free of vermin infestation. Pesticides shall be applied according to the manufacturer's instructions to prevent any health hazard from pesticide residue to subsequent occupants.

[Source: Amended at 38 Ok Reg 1982, eff 9-11-21]

310:285-3-11. Public bathing places

All public bathing places, even if use is restricted to guests of the lodging establishment, shall be maintained in compliance with standards and rules and regulations adopted by the Department.

[Source: Amended at 38 Ok Reg 1982, eff 9-11-21]

310:285-3-12. Sewage

All sewage shall be disposed of by a public sewage system or by a sewage disposal system maintained in compliance with the standards and rules and regulations adopted by the Oklahoma Department of Environmental Quality.

[Source: Amended at 38 Ok Reg 1982, eff 9-11-21]

310:285-3-12.1. In-room spas

A hot tub or spa located in a guest room shall be drained, cleaned, and sanitized according to the manufacturer's recommendations for public use between each room occupant, and monitored for sanitation at least weekly when offered for use. Indoor, single room hot tubs or spas shall be in an enclosed area constructed such that no person, other than the occupants of that room, can access the tub or spa for use.

[Source: Added at 38 Ok Reg 1982, eff 9-11-21]

310:285-3-13. Water

Potable water shall be obtained from an approved source that is:

- (1) A public water system, or
- (2) A nonpublic water system that is constructed, maintained, and operated according to law.

[Source: Amended at 38 Ok Reg 1982, eff 9-11-21]

310:285-3-14. Food service [REVOKED]

[Source: Amended at 19 Ok Reg 2916, eff 7-26-02 (emergency); Amended at 20 Ok Reg 88, eff 10-29-02 (emergency); Amended at 20 Ok Reg 1181, eff 5-27-03 ; Amended at 21 Ok Reg 1284, eff 5-27-04 ; Revoked at 38 Ok Reg 1982, eff 9-11-21]

SUBCHAPTER 5. SANITARY OPERATIONS AND CONTROLS

310:285-5-1. Ice

(a) **Equipment.** Ice provided to customers shall be manufactured with equipment that is maintained in a clean manner and meets design, construction, installation and service requirements which comply with manufacturer's recommendations and the Department's Food Establishment Regulations. Ice machines shall be located in a protected

or enclosed hallway or room.

(b) Customer self-service.

(1) Automatically dispensed ice which eliminates human contact with the ice other than that portion being dispensed may be used provided the equipment conforms to the installation and operation requirements of the manufacturer. Automatic ice dispensing equipment shall be installed when existing machines are replaced.

(2) Ice containers may be placed in the guest room or made available at the registration desk, or other location under the direct continuous control of the employees. Multi-use containers must be constructed of smooth, non-porous materials which must be cleaned and sanitized before being offered to the customer. Containers may be lined with approved single-service plastic film liners.

(3) Ice Makers provided in guest rooms must be emptied, cleaned, and sanitized between guests.

(c) Operator-dispensed ice. Ice dispensed by the operator or employee shall be obtained from an approved source, or from an ice machine installed in a protected location not accessible to patrons and not located in private or tenant quarters. The ice must be dispensed into a sanitized container or food grade single-use bag.

(d) Pre-packaged ice. The lodging establishment operator may purchase bulk ice from an approved source for packaging in individual containers, may provide an on-premises machine, or ice may be obtained pre-packaged in individual service size from an approved source. Pre-packaged ice obtained from a manufacturer in individual service size shall be offered to the consumer in its original, unbroken, entire package.

(e) Other methods. Any other method that provides for manufacture, storage, dispensing, or serving of ice may be offered upon approval by the Department.

[Source: Amended at 38 Ok Reg 1982, eff 9-11-21]

310:285-5-2. Laundry

(a) Physical arrangement. Those lodging establishments electing to provide their own laundry shall comply with the following provisions:

(1) The physical arrangement of the laundry facility shall include a laundry area for receiving and handling soiled laundry, a washing and extracting area, a finishing area (where the laundry is dried, tumbled, ironed, pressed or folded) and a clean article storage area.

(2) Floors, walls, ceilings, pipes and equipment shall be kept clean, free of dirt or grease, and in good repair.

(3) Laundry chutes, if used, shall discharge soiled linens into a suitable container.

(4) Every room with laundry facilities shall have a floor drain and the floor shall be sloped to provide proper drainage to the floor drain.

(5) Every room with laundry facilities shall have a dedicated handwashing sink available at all times. The sink shall be equipped with:

- (A) Handwashing soap,
- (B) Disposable paper towels,
- (C) Hot and cold running water,
- (D) A sign reminding employees to wash hands before returning to work.

(6) Shelving shall have a smooth, easily cleanable, and non-absorbent finish. When existing shelving is replaced, it may be replaced with the same material as long as it is sealed to create a smooth cleanable finish.

(b) Laundry storage.

- (1) All washable items, when laundered, shall be stored in the clean laundry area, or in a guest room.
- (2) Clean linens shall be stored separate from the "soiled laundry area".
- (3) Soiled laundry containers shall be lined with a disposable plastic liner or shall be cleaned and sanitized daily.

[Source: Amended at 38 Ok Reg 1982, eff 9-11-21]

310:285-5-3. Housekeeper cart

The housekeeper cart shall be arranged so that clean replacement supplies, clean linens and cleaned and sanitized multi-use equipment and utensils shall be protected from soiled items being removed from each room. Soiled linens and refuse shall be placed in appropriate containers if placed on the housekeeper's cart and handled in such a manner as to not contaminate other items on that cart.

- (1) Housekeeper carts shall be kept in a sanitary manner and in good repair.
- (2) Cloths used for cleaning and sanitizing dirty environmental surfaces of the guest room shall be used in one guest room only, and then placed in the dirty compartment of the housekeeping cart when the guest room attendant has completed cleaning that room.
- (3) Leftover room service food items and used tableware shall be removed from public hallways at least every 4 hours.

[Source: Amended at 38 Ok Reg 1982, eff 9-11-21]

310:285-5-4. Guest rooms

(a) Furnishings.

- (1) All furniture, windows, shades, draperies, floors, floor coverings, walls, ceilings, and other equipment and appurtenances shall be kept clean.
- (2) All furniture, windows, shades, draperies, floors, floor coverings, walls, ceilings, and other equipment and appurtenances must be maintained in good repair.

(b) Beds, bedding and linens.

- (1) All beds, springs, mattresses, bedding and linens, shall be in good repair.
- (2) All beds, springs, mattresses, bedding, and linens shall be kept clean.
- (3) A minimum of two sheets and one mattress cover of appropriate size shall be provided for each bed. A pillow cover and a pillow case shall be provided for each pillow.
- (4) Mattresses, pillows, and any bedding appearing soiled or stained shall be subjected to a cleaning and sanitizing process, or removed from service. Such items found in service shall be ordered removed from service and shall be returned to service only after cleaning, sanitizing, and stain removal.

(c) **Service.**

- (1) Bar soap and other individually packaged used personal hygiene items left by departing guests shall not be reused for customer service. Used hygiene items can be donated to non-profit shelters, Food Banks, or other similar establishments.
- (2) All sheets, pillow cases, and towels shall be changed after each occupancy.

[Source: Amended at 38 Ok Reg 1982, eff 9-11-21]

310:285-5-5. Storage, cleaning, and bactericidal treatment of utensils

(a) **Multi-use utensils.**

- (1) All multi-use utensils shall be removed from the room after each occupancy for cleaning and sanitizing.
- (2) All multi-use utensils shall be in good condition.
- (3) All multi-use utensils shall be stored at least six inches above floor level in a clean and dry location which is protected from splash, dust, and other contamination.
- (4) A room separate from the laundry shall be provided for washing, rinsing and sanitizing multi-use utensils.

(b) **Manual cleaning and sanitizing.** Multi-use equipment and utensils shall be washed in a 3-compartment sink, with soap and hot water of at least 110°F, rinsed in clear water, sanitized with a chlorine sanitizer of 50-100 ppm, or any other sanitizer allowed under 40 CFR 180.940 and then allowed to air dry.

(c) **Mechanical cleansing and sanitizing.** Cleaning and sanitizing may be done by mechanical dishwashing machines provided that:

- (1) The dish temperature reaches °160°F during the final rinse; or
- (2) After cleaning and rinsing, the dish is sanitized with chlorine at a concentration of 50 ppm and a water temperature of at least 75°F, or any other sanitizing agent allowed by 40 CFR 180.940; and
- (3) The machine is operated according to the manufacturer's instructions on the data plate
- (4) A test kit, an irreversible registering temperature indicator, or other device that accurately measures the concentration in mg/L

of sanitizing solutions shall be provided.

310:285-5-6. Employees [REVOKED]

[Source: Revoked at 38 Ok Reg 1982, eff 9-11-21]

310:285-5-6.1. Food service

(a) Food service, if provided, shall be limited under a lodging license. The products shall be from an approved source and limited to the following:

- (1) Coffee;
- (2) Tea;
- (3) Commercially processed fruit juices;
- (4) Carbonated beverages. Beverage dispensers may be used if the source of ice for the dispenser is automatic dispensing;
- (5) Fresh, washed, uncut fruits, or fruits that are processed in a regulated establishment;
- (6) Baked goods;
- (7) Cereals;
- (8) Jams, jellies, syrups;
- (9) Pasteurized Grade A milk, Pasteurized Grade A cream, non-dairy creamers;
- (10) Butters, margarines, or products of similar nature;
- (11) Commercially produced hard cheeses, cream cheese, and yogurt;
- (12) Except for (9), (13), and (14) of this subsection, Time/Temperature Control for Safety foods commercially packaged in individual servings;
- (13) Bulk or individual waffle mixes from a commercial producer that is regulated by a food regulatory agency. Prepared mixes shall be discarded after the food service has ended.
- (14) Gravy in bulk form from a commercial producer that is regulated by a food regulatory agency. Prepared gravy shall be heated to 135°F or above prior to service and discarded after the food service has ended; and
- (15) Left over, non-packaged food items from the continental breakfast shall not be reused for customer service.

(b) Equipment required to conduct food service under a lodging license shall consist of at least the following:

- (1) A three (3) compartment warewashing sink or commercial dish washing machine dedicated solely to the cleaning of utensils and equipment used in the food service operation or the multiuse utensils supplied to guest rooms.
 - (A) The warewashing sink shall not be used for handwashing.
 - (B) Sink compartments shall have smooth rounded corners and be large enough to permit the accommodation of the equipment and utensils.

- (C) Each compartment of the sink shall be supplied with hot and cold potable running water.
- (D) Warewashing facilities shall not be located in laundry areas, living, or tenant quarters.
- (2) Test strips to measure sanitization;
- (3) A handwashing sink, supplied with hot and cold running water, separate from the three (3) compartment sink in the food preparation area that shall be used for no other purpose;
- (4) Commercial refrigeration that is capable of holding 41°F or less;
- (5) Thermometers for all refrigerators used to store Time/Temperature Control for Safety Foods;
- (6) Sneeze guards and covers for self-service foods that are not wrapped or protected; and
- (7) Calibrated, probe type thermometer.
- (c) Milk, milk products, prepared waffle mixes, and juices removed from the original container for dispensing or consumption shall be discarded after the food service has ended. Milk, milk products, and other Time/Temperature Control for Safety Foods may be held above 41°F but less than 70°F for no more than six (6) hours and then discarded or discarded at the end of four (4) hours if the temperature exceeds 70°F. The food shall have an initial temperature of 5°C (41°F) or less when removed from cold holding temperature control.
- (d) All food and food contact surfaces shall be stored at least six inches above floor level in a clean and dry location so that it is protected from splash, dust and other contamination.
- (e) Lodging establishments may offer prepackaged food or beverage for sale in guest rooms or at the check in area using a cabinet, refrigerator, freezer, or mini-bar.
- (f) Lodging establishments providing any food service in excess of this section must obtain a food service license from the Department and shall comply with the requirements of OAC 310:257, Food Establishments.
- (g) All food shall be from sources approved by law.

[Source: Added at 38 Ok Reg 1982, eff 9-11-21]

310:285-5-7. Employees

- (a) No person known or suspected of being infected with a disease in a communicable form, or who is a carrier of organisms that cause such a disease or while affected with a boil, an infected wound, or an acute respiratory infection, shall work in a lodging establishment in any capacity in which there is a likelihood of such person contaminating food or food-contact surfaces with pathogenic organisms or transmitting disease to other persons. Such areas include but are not limited to the food service area, guest rooms, laundry room, and the rooms in which multi-use utensils are cleaned, sanitized and stored.
- (b) Clean outer garments shall be worn and good personal hygiene shall be practiced by all employees.
- (c) Whenever the responsible person knows or suspects that a guest room has been occupied by a person with a reportable infectious illness,

the guest room shall be thoroughly cleaned and sanitized, including fumigation, as needed, depending on the suspected or known pathogen.

(d) Food employees shall wash their hands and any exposed portions of their arms, as described in OAC 310:285-5-12 of this Chapter, before handling clean utensils or dishware, ice, beverages, food, or clean laundry.

(e) Food employees shall not use bare hands to handle ready-to-eat foods, except as where provided in OAC 310:285-5-8 (d) in this Chapter.

(f) Single use gloves shall be available for food employees, housekeeping, and laundry staff and provided in the food, laundry, and housekeeping areas. Single use gloves shall be used for only one task, such as handling ready-to-eat food, used for no other purpose, and discarded when damaged, soiled, contaminated, or when interruptions occur in the operation.

(g) Employee personal items shall not be stored with food, equipment or utensils, or bedding items.

[Source: Added at 38 Ok Reg 1982, eff 9-11-21]

310:285-5-8. Preventing contamination from hands

(a) Employees shall wash their hands as specified under OAC 310:285-5-12.

(b) Except when washing fruits and vegetables or as specified in (d) of this section, food employees may not contact exposed, ready-to-eat food with their bare hands and shall use suitable utensils such as deli tissue, spatulas, tongs, single-use gloves, or dispensing equipment.

(c) Food employees shall minimize bare hand and arm contact with exposed food that is not in a ready-to-eat food form.

(d) Food employees may contact exposed, ready-to-eat food with their bare hands if:

(1) The permit holder obtains prior approval from the regulatory authority;

(2) A written employee health policy that details how the establishment complies with OAC 310:285-5-9, OAC 310:285-5-10, and OAC 310:285-5-11 including:

(A) Documentation that employees acknowledge that they are informed to report information about their health and activities as they relate to gastrointestinal symptoms and diseases that are transmittable through food as specified under OAC 310:285-5-9(a),

(B) Documentation that employees acknowledge their responsibilities as specified under OAC 310:285-5-9(e), and

(C) Documentation that the person in charge acknowledges the responsibilities as specified under OAC 310:285-5-9(b), (c) and (d), and OAC 310:285-5-10, and OAC 310:285-5-11;

(3) Documentation that employees acknowledge that they have received training in:

- (A) The risks of contacting the specific ready-to-eat foods with bare hands,
 - (B) Proper handwashing as specified under OAC 310:285-5-12,
 - (C) When to wash their hands as specified under OAC 310:285-5-13,
 - (D) Where to wash their hands as specified under OAC 310:285-5-14,
 - (E) Proper fingernail maintenance as specified under OAC 310:285-5-15,
 - (F) Prohibition of jewelry as specified under OAC 310:285-5-16, and
 - (G) Good hygienic practices as specified under OAC 310:285-5-17 and OAC 310:285-5-18;
- (4) Documentation that employees contacting ready-to-eat foods with bare hands use two or more of the following control measures to provide additional safeguards to hazards associated with bare hand contact:
- (A) Double handwashing,
 - (B) Nail brushes,
 - (C) A hand antiseptic after handwashing, or
 - (D) Other control measures approved by the Department;
- and
- (5) Documentation that corrective action is taken when (d)(1) - (5) of this section are not followed.

[Source: Added at 38 Ok Reg 1982, eff 9-11-21]

310:285-5-9. Reporting responsibility of license holder, person in charge, and employees

(a) The license holder shall require food employees to report to the person in charge information about their health and activities as they relate to diseases that are transmissible through food. A food employee shall report the information in a manner that allows the person in charge to reduce the risk of foodborne disease transmission, including providing necessary additional information, such as the date of onset of symptoms and an illness, or of a diagnosis without symptoms, if the food employee:

- (1) Has any of the following symptoms:
- (A) Vomiting,
 - (B) Diarrhea,
 - (C) Jaundice,
 - (D) Sore throat with fever, or
 - (E) A lesion containing pus such as a boil or infected wound that is open or draining and is:
 - (i) On the hands or wrists, unless an impermeable cover such as a finger cot or stall protects the lesion and a single-use glove is worn over the impermeable cover,
 - (ii) On exposed portions of the arms, unless the lesion is protected by an impermeable cover, or

- (iii) On other parts of the body, unless the lesion is covered by a dry, durable, tight-fitting bandage;
- (2) Has an illness diagnosed by a health practitioner due to:
 - (A) Norovirus,
 - (B) Hepatitis A virus,
 - (C) *Shigella* spp.,
 - (D) Shiga Toxin-Producing *Escherichia Coli*,
 - (E) Typhoid fever (caused by *Salmonella Typhi*) or
 - (F) *Salmonella* (nontyphoidal);
- (3) Had Typhoid fever, diagnosed by a health practitioner, within the past 3 (three) months, without having received antibiotic therapy, as determined by a health practitioner;
- (4) Has been exposed to, or is the suspected source of, a confirmed disease outbreak, because the food employee consumed or prepared food implicated in the outbreak, or consumed food at an event prepared by a person who is infected or ill with:
 - (A) Norovirus within the past 48 (forty eight) hours of the last exposure,
 - (B) Shiga Toxin-Producing *Escherichia Coli* or *Shigella* spp. within the past 3 (three) days of the last exposure,
 - (C) Typhoid fever within the past 14 (fourteen) days of the last exposure, or
 - (D) Hepatitis A virus within the past 30 (thirty) days of the last exposure; or reportable history of exposure.
- (5) Has been exposed by attending or working in a setting where there is a confirmed disease outbreak, or living in the same household as, and has knowledge about, an individual who works or attends a setting where there is a confirmed disease outbreak, or living in the same household as, and has knowledge about, an individual diagnosed with an illness caused by:
 - (A) Norovirus within the past 48 (forty eight) hours of the last exposure,
 - (B) Shiga Toxin-Producing *Escherichia Coli* or *Shigella* spp. within the past 3 (three) days of the last exposure,
 - (C) Typhoid fever (caused by *Salmonella Typhi*) within the past 14 (fourteen) days of the last exposure, or
 - (D) Hepatitis A virus within the past 30 (thirty) days of the last exposure.
- (b) The person in charge shall notify the regulatory authority when a food employee is:
 - (1) Jaundiced; or
 - (2) Diagnosed with an illness due to a pathogen as specified under (a)(2)(A) - (F) of this section.
- (c) The person in charge shall ensure that a food employee who exhibits or reports a symptom, or who reports a diagnosed illness or a history of exposure as specified under (a)(1) - (5) of this section is:
 - (1) Excluded as specified under OAC 310:285-5-11(a) - (c), and in compliance with the provisions specified under OAC 310:285-5-11(a) - (h); or

- (2) Restricted as specified under OAC 310:285-5-10(d), (e), (f), (h), (i) and in compliance with the provisions specified under OAC 310:285-5-11(d) - (i).
- (d) A food employee shall report to the person in charge the information as specified under (a) of this section.
- (e) A food employee shall:
 - (1) Comply with an exclusion as specified under OAC 310:285-5-10(a) - (c) and with the provisions specified under OAC 310:285-5-11(a) - (h); or
 - (2) Comply with a restriction as specified under OAC 310:285-5-10(d), (e), (f), (g), (h), or (i) and comply with the provisions specified under OAC 310:285-5-11(d) - (i).

[Source: Added at 38 Ok Reg 1982, eff 9-11-21]

310:285-5-10. Food employee exclusions and restrictions

- (a) The person in charge shall exclude or restrict a food employee from an establishment in accordance with the following:
 - (1) Except when the symptom is from a noninfectious condition, exclude an employee if the employee is:
 - (A) Symptomatic with vomiting or diarrhea; or
 - (B) Symptomatic with vomiting or diarrhea and diagnosed with an infection from Norovirus, Shigella spp., Salmonella (nontyphoidal), or Shiga Toxin-Producing Escherichia Coli.
 - (2) Exclude an employee who is:
 - (A) Jaundiced and the onset of jaundice occurred within the last 7 (seven) calendar days, unless the employee provides to the person in charge written medical documentation from a health practitioner specifying that the jaundice is not caused by hepatitis A virus or other fecal-orally transmitted infection;
 - (B) Diagnosed with an infection from hepatitis A virus within 14 (fourteen) calendar days from the onset of any illness symptoms, or within 7 (seven) calendar days of the onset of jaundice; or
 - (C) Diagnosed with an infection from hepatitis A virus without developing symptoms.
- (b) Exclude an employee who is diagnosed with Typhoid fever, or reports having had Typhoid fever within the past 3 (three) months as specified under OAC 310:285-5-9(a)(3).
- (c) If an employee is diagnosed with an infection from Norovirus and is asymptomatic, restrict the employee.
- (d) If an employee is diagnosed with an infection from Shigella spp. and is asymptomatic, restrict the employee.
- (e) If an employee is diagnosed with an infection from Shiga Toxin-Producing Escherichia Coli, and is asymptomatic, restrict the employee.
- (f) If an employee is diagnosed with an infection from Salmonella (nontyphoidal) and is asymptomatic, restrict the employee.

(g) If an employee is ill with symptoms of acute onset of sore throat with fever, restrict the employee.

(h) If an employee is infected with a skin lesion containing pus such as a boil or infected wound that is open or draining and not properly covered as specified under OAC 310:285-5-9(a)(1)(E), restrict the employee.

[Source: Added at 38 Ok Reg 1982, eff 9-11-21]

310:285-5-11. Removal, adjustment, or retention of exclusions and restrictions for food employees

(a) The person in charge shall adhere to the following conditions when removing, adjusting, or retaining the exclusion or restriction of an employee: Except when an employee is diagnosed with Typhoid fever or an infection from hepatitis A virus:

(1) Reinstate an employee who was excluded as specified under OAC 310:285-5-10(a)(1) if the employee:

(A) Is asymptomatic for at least 24 (twenty four) hours; or

(B) Provides to the person in charge written medical documentation from a health practitioner that states the symptom is from a noninfectious condition.

(2) If an employee was diagnosed with an infection from Norovirus and excluded as specified under OAC 310:285-5-10(a)

(2), restrict the employee, who is asymptomatic for at least 24 (twenty four) hours, until the conditions for reinstatement as specified under (d)(1) or (d)(2) of this section are met; or

(3) If an employee was diagnosed with an infection from *Shigella* spp. and excluded as specified under OAC 310:285-5-10(a)(2), adjusting exclusion for food employee who was symptomatic and is now asymptomatic. Restrict the food employee, who is asymptomatic for at least twenty four (24) hours and works in a food service establishment not serving a highly susceptible population, until the conditions for reinstatement as specified in (a)(5)(A) or (a)(5)(B) of this Section are met; or

(4) If an employee was diagnosed with an infection from Shiga Toxin-Producing *Escherichia Coli* and excluded as specified under OAC 310:285-5-10(a)(2), restrict the employee, who is asymptomatic for at least 24 (twenty four) hours, until the conditions for reinstatement as specified under (f)(1) or (f)(2) of this section are met; or

(5) If an employee was diagnosed with an infection from *Salmonella* (nontyphoidal) and excluded as specified under OAC 310:285-5-10(a)(2):

(A) Restrict the employee, who is asymptomatic for at least 30 (thirty) days until conditions for reinstatement as specified under (g)(1) or (g)(2) of this section are met; or

(B) Retain the exclusion for the employee who is symptomatic, until conditions for reinstatement as specified under Paragraphs (g)(1) or (g)(2) of this section are met.

(b) Reinstate an employee who was excluded as specified under OAC 310:285-5-10(b) if the person in charge obtains approval from the Department and one of the following conditions is met:

- (1) The employee has been jaundiced for more than 7 (seven) calendar days;
- (2) The employee has been symptomatic with symptoms other than jaundice for more than 14 (fourteen) calendar days; or
- (3) The employee provides to the person in charge written medical documentation from a health practitioner stating that the employee is free of a hepatitis A virus infection.

(c) Reinstate an employee who was excluded as specified under OAC 310:285-5-10(c) if:

- (1) The person in charge obtains approval from the Department; and
- (2) The employee provides to the person in charge written medical documentation from a health practitioner that states the employee is free from Typhoid fever.

(d) Reinstate an employee who was excluded as specified under OAC 310:285-5-10(a)(2), who was restricted under OAC 310:285-5-10(d) if the person in charge obtains approval from the Department and one of the following conditions is met:

- (1) The excluded or restricted employee provides to the person in charge written medical documentation from a health practitioner stating that the employee is free of a Norovirus infection;
- (2) The employee was excluded or restricted after symptoms of vomiting or diarrhea resolved, and more than 48 (forty eight) hours have passed since the employee became asymptomatic; or
- (3) The employee was excluded or restricted and did not develop symptoms and more than 48 (forty eight) hours have passed since the employee was diagnosed.

(e) Reinstate an employee who was excluded as specified under OAC 310:285-5-10(a)(2) or (e) or who was restricted under OAC 310:285-5-10(e) if the person in charge obtains approval from the Department and one of the following conditions is met:

- (1) The excluded or restricted employee provides to the person in charge written medical documentation from a health practitioner stating that the employee is free of a Shigella spp. infection based on test results showing 2 (two) consecutive negative stool specimen cultures that are taken:

(A) Not earlier than 48 (forty eight) hours after discontinuance of antibiotics, and

(B) At least 24 (twenty four) hours apart;

- (2) The employee was excluded or restricted after symptoms of vomiting or diarrhea resolved, and more than 7 (seven) calendar days have passed since the food employee became asymptomatic; or
- (3) The employee was excluded or restricted and did not develop symptoms and more than 7 (seven) calendar days have passed since the food employee was diagnosed.

(f) Reinstate an employee who was excluded or restricted as specified under OAC 310:285-5-10(a)(2) or who was restricted under OAC

310:285-5-10(f) if the person in charge obtains approval from the Department and one of the following conditions is met:

- (1) The excluded or restricted employee provides to the person in charge written medical documentation from a health practitioner stating that the employee is free of an infection from Shiga Toxin-Producing Escherichia Coli based on test results that show 2 (two) consecutive negative stool specimen cultures that are taken:
 - (A) Not earlier than 48 (forty eight) hours after discontinuance of antibiotics; and
 - (B) At least 24 (twenty four) hours apart;
- (2) The employee was excluded or restricted after symptoms of vomiting or diarrhea resolved and more than 7 (seven) calendar days have passed since the employee became asymptomatic; or
- (3) The employee was excluded or restricted and did not develop symptoms and more than 7 (seven) days have passed since the employee was diagnosed.

(g) Reinstate an employee who was excluded as specified under OAC 310:285-5-10(a)(2) or who was restricted as specified under OAC 310:285-5-10(g) if the person in charge obtains approval from the Department and one of the following conditions is met:

- (1) The excluded or restricted employee provides to the person in charge written medical documentation from a health practitioner stating that the employee is free of a Salmonella (nontyphoidal) infection based on test results showing 2 (two) consecutive negative stool specimen cultures that are taken;
 - (A) Not earlier than 48 (forty eight) hours after discontinuance of antibiotics, and
 - (B) At least 24 (twenty four) hours apart;
- (2) The employee was restricted after symptoms of vomiting or diarrhea resolved, and more than 30 (thirty) days have passed since the employee became asymptomatic; or
- (3) The employee was excluded or restricted and did not develop symptoms and more than 30 (thirty) days have passed since the employee was diagnosed.

(h) Reinstate an employee who was excluded or restricted as specified under OAC 310:285-5-10(h) if the employee provides to the person in charge written medical documentation from a health practitioner stating that the employee meets one of the following conditions:

- (1) Has received antibiotic therapy for Streptococcus pyogenes infection for more than 24 (twenty four) hours;
- (2) Has at least one negative throat specimen culture for Streptococcus pyogenes infection; or
- (3) Is otherwise determined by a health practitioner to be free of a Streptococcus pyogenes infection.

(4) Reinstate an employee who was restricted as specified under OAC 310:285-5-10(i) if the skin, infected wound, cut, or pustular boil is properly covered with one of the following:

- (A) An impermeable cover such as a finger cot or stall and a single-use glove over the impermeable cover if the infected wound or pustular boil is on the hand, finger, or wrist;

- (B) An impermeable cover on the arm if the infected wound or pustular boil is on the arm; or
- (C) A dry, durable, tight-fitting bandage if the infected wound or pustular boil is on another part of the body.

[Source: Added at 38 Ok Reg 1982, eff 9-11-21]

310:285-5-12. Cleaning procedure

(a) Employees shall clean their hands and exposed portions of their arms, including surrogate prosthetic devices for hands or arms for at least 20 (twenty) seconds, using a cleaning compound in a properly equipped handwashing sink.

(b) Employees shall use the following cleaning procedure in the order stated to clean their hands and exposed portions of their arms, including surrogate prosthetic devices for hands and arms:

- (1) Rinse under clean, running warm water;
- (2) Apply an amount of cleaning compound recommended by the cleaning compound manufacturer;
- (3) Rub together vigorously for at least 10 to 15 seconds while:
 - (A) Paying particular attention to removing soil from underneath the fingernails during the cleaning procedure, and
 - (B) Creating friction on the surfaces of the hands and arms or surrogate prosthetic devices for hands and arms, finger tips, and areas between the fingers;
- (4) Thoroughly rinse under clean, running warm water; and
- (5) Immediately follow the cleaning procedure with thorough drying using a disposable paper towel.

(c) To avoid recontamination of their hands or surrogate prosthetic devices, employees may use disposable paper towels or similar clean barriers when touching surfaces such as manually operated faucet handles on a handwashing sink or the handle of a restroom door.

[Source: Added at 38 Ok Reg 1982, eff 9-11-21]

310:285-5-13. When to wash

Employees shall clean their hands and exposed portions of their arms immediately before engaging in food preparation including working with exposed food, clean equipment and utensils, and unwrapped single-service and single use articles and:

- (1) After touching bare human body parts other than clean hands and clean, exposed portions of arms;
- (2) After using the toilet room;
- (3) After caring for or handling service animals or aquatic animals;
- (4) Except as specified in OAC 310:285-5-17(b), after coughing, sneezing, using a handkerchief or disposable tissue, using tobacco, eating, or drinking;
- (5) After handling soiled equipment and utensils;

- (6) During food preparation, as often as necessary to remove soil and contamination and to prevent cross contamination when changing tasks;
- (7) Before donning gloves to initiate a task that involves working with food; and
- (8) After engaging in other activities that contaminate the hands.

[Source: Added at 38 Ok Reg 1982, eff 9-11-21]

310:285-5-14. Where to wash

Employees shall clean their hands in a handwashing sink and shall not clean their hands in a sink used for food preparation or warewashing, or in a service sink or a curbed cleaning facility used for the disposal of mop water and similar liquid waste.

[Source: Added at 38 Ok Reg 1982, eff 9-11-21]

310:285-5-15. Maintenance

- (a) Food employees shall keep their fingernails trimmed, filed, and maintained so the edges and surfaces are cleanable and not rough.
- (b) Unless wearing intact gloves in good repair, an employee may not wear fingernail polish or artificial fingernails when working with exposed food.

[Source: Added at 38 Ok Reg 1982, eff 9-11-21]

310:285-5-16. Prohibition

Except for a plain ring such as a wedding band, while preparing food, an employee may not wear jewelry including medical information jewelry on their arms and hands.

[Source: Added at 38 Ok Reg 1982, eff 9-11-21]

310:285-5-17. Eating, drinking, or using tobacco

- (a) Except as specified in (b) of this section, an employee shall not eat, drink, or use any form of tobacco, vaping product, or Medical Marijuana in areas where the contamination of exposed food; clean equipment, utensils, and linens; unwrapped single-service and single-use articles; or other items needing protection may result.
- (b) An employee may drink from a closed beverage container if the container is handled to prevent contamination of:
 - (1) The employee's hands;
 - (2) The container; and
 - (3) Exposed food; clean equipment, utensils, and linens; and unwrapped single-service and single-use articles.

[Source: Added at 38 Ok Reg 1982, eff 9-11-21]

310:285-5-18. Discharges from the eyes, nose, and mouth

Employees experiencing persistent sneezing, coughing, or a runny nose that causes discharges from the eyes, nose, or mouth may not work with exposed food; clean equipment, utensils, and linens; or unwrapped single-service or single-use articles.

SUBCHAPTER 9. COMPLIANCE PROCEDURES

310:285-9-1. Licensure

No person shall operate a lodging establishment who does not have a valid license issued to such person by the Oklahoma State Department of Health pursuant to 63 O.S. Sections 1-1201 et seq. Only a person who is in substantial compliance with the requirements of this Chapter shall be entitled to receive or retain such a license. Licenses are not transferable. A valid license shall be posted in every lodging establishment.

[Source: Amended at 38 Ok Reg 1982, eff 9-11-21]

310:285-9-2. Issuance of license [REVOKED]

[Source: Amended at 8 Ok Reg 3107, eff 7-18-91 (emergency); Amended at 9 Ok Reg 1489, eff 5-1-92 ; Revoked at 38 Ok Reg 1982, eff 9-11-21]

310:285-9-2.1. Public health protection

(a) The regulatory authority shall apply this Chapter to promote its purpose of safeguarding public health.

(b) In enforcing the provisions of this Chapter, the regulatory authority shall assess existing facilities or equipment that were in use before the effective date of this Chapter based on the following considerations:

- (1) Whether the facilities or equipment are in good repair and capable of being maintained in a safe and sanitary condition; and

(2) The existence of a documented agreement, as described in OAC 310:285-9-4, with the license holder that the facilities or equipment will be replaced within an agreed upon timeframe.

[Source: Added at 38 Ok Reg 1982, eff 9-11-21]

310:285-9-3. Access [REVOKED]

[Source: Revoked at 38 Ok Reg 1982, eff 9-11-21]

310:285-9-3.1. Preventing health hazards, provision for conditions not addressed

(a) If necessary to protect against public health hazards or nuisances, the Department may impose specific requirements that are not listed in this Chapter as authorized by law.

(b) The regulatory authority shall document the conditions that necessitate the imposition of additional requirements and the underlying public health rationale. The documentation shall be provided to the license applicant or license holder and a copy shall be maintained in the Department file for the establishment.

310:285-9-4. Suspected infection [REVOKED]

[Source: Revoked at 38 Ok Reg 1982, eff 9-11-21]

310:285-9-4.1. Waiver

(a) Whenever the Department adopts new rules or amends existing language in this Chapter, the owner of a lodging establishment may request that a waiver be granted on any nonconforming use that may then exist, on or before the effective date of the rule change, at the license holder's place of operation.

(b) Waivers requested pursuant to this Subchapter are subject to approval by the Department. In order to have the waiver approved, a license holder must submit a written application on a form provided by the Department. Any waiver request shall be deemed denied unless the license holder subsequently receives notice of approval from the Department.

(c) Variances are not transferable.

310:285-9-5. Emergency occurrences [REVOKED]

[Source: Revoked at 38 Ok Reg 1982, eff 9-11-21]

310:285-9-5.1. Plans required

A license applicant or license holder shall submit to the regulatory authority plans and specifications for review and approval before:

- (1) The construction of a new establishment;
- (2) The conversion of an existing structure for use as a lodging establishment;
- (3) The extensive remodel of the food service area of the establishment.

[Source: Added at 38 Ok Reg 1982, eff 9-11-21]

310:285-9-6. Contents of the plans and specifications

The plans and specifications for a lodging establishment shall include the following items if applicable:

- (1) Intended food service menu;
- (2) Anticipated volume of food to be stored, prepared, and sold or served;
- (3) Proposed food preparation equipment types, manufacturer and model numbers;
- (4) Proposed floor plan to include:
 - (A) Food storage, preparation, and service areas;
 - (B) Laundry facilities;
 - (C) Public restrooms; and
 - (D) Ice Machines.
- (5) Other information that may be required by the regulatory authority for the proper review of the proposed construction, conversion or modification.

[Source: Added at 38 Ok Reg 1982, eff 9-11-21]

310:285-9-7. Preoperational inspections

The regulatory authority may conduct one or more preoperational inspections to verify the establishment is constructed and equipped in accordance with the approved plans and approved modifications of those plans, and is in compliance with law and this Chapter.

[Source: Added at 38 Ok Reg 1982, eff 9-11-21]

310:285-9-8. Qualifications and responsibilities of applicants

To qualify for a license, an applicant shall:

- (1) Be an owner of the lodging establishment or an officer of the legal ownership;
- (2) Comply with the requirements of this Chapter;
- (3) Agree to allow access to the lodging establishment and to provide required information; and
- (4) Pay any applicable license fees at the time the application is submitted.

[Source: Added at 38 Ok Reg 1982, eff 9-11-21]

310:285-9-9. License application

- (a) A person desiring to operate a lodging establishment shall submit to the Department a written application for a license on a form provided by the Department.
- (b) A lodging establishment license shall expire one year from the date of its issuance unless canceled or revoked prior to its expiration. For purposes of determining the expiration date of all licenses under this Chapter, the date of issuance shall be deemed to be the date that an approved application for licensure is first issued by a duly authorized representative of the Health Department.
- (c) The application shall include:
- (1) The name, mailing address, e-mail address, telephone number, and signature of the person applying for the license and the name, mailing address, e-mail address, and location of the lodging establishment;
 - (2) Information specifying whether the lodging establishment is owned by an association, corporation, individual, partnership, or other legal entity;
 - (3) The number of guest rooms available;
 - (4) Any other information required by the regulatory authority;
 - (5) The Department shall issue a license to the applicant after:
 - (A) A properly completed application is received;
 - (B) The required fees are received;
 - (C) The plans, specifications, and information, if applicable, are reviewed; and
 - (D) An inspection shows that the establishment is constructed in accordance with the approved plans and specifications and that the establishment is in compliance with this Chapter and meets the Department's criteria for a license; or
 - (E) Any other information required by the Department.

[Source: Added at 38 Ok Reg 1982, eff 9-11-21]

310:285-9-10. Existing establishments, license renewal, and change of ownership

The Department may renew a license for an existing lodging establishment or may issue a license to a new owner of an existing lodging establishment after a properly completed application is submitted, reviewed, and approved, the fees are paid, and an inspection shows that the establishment is in substantial compliance with this Chapter.

[Source: Added at 38 Ok Reg 1982, eff 9-11-21]

310:285-9-11. Denial of application for license, notice

If an application for a license to operate is denied, the regulatory authority shall provide the applicant with a notice that includes:

- (1) The specific reasons and Chapter citations for the license denial; and

(2) The actions, if any, that the applicant must take to qualify for a license.

[Source: Added at 38 Ok Reg 1982, eff 9-11-21]

310:285-9-12. Responsibilities of the license holder

Upon acceptance of the license issued by the Commissioner of Health, in order to retain the license, the license holder shall:

- (1) Post the license in a location of the establishment that is conspicuous to consumers;
- (2) Comply with the provisions of this Chapter including the conditions of any granted waiver;
- (3) Immediately discontinue or limit operations and notify the regulatory authority if an imminent health hazard may exist within the establishment;
- (4) Allow representatives of the Department access to the establishment for the purpose of inspection;
- (5) Comply with directives of the Department including time frames for corrective actions specified in inspection reports, notices, orders, warnings, and other directives issued by the Department in regard to the license holder's establishment or in response to community emergencies;
- (6) Accept notices issued and served by the Department according to law;
- (7) Be subject to the administrative, civil, injunctive, and criminal remedies authorized in law for failure to comply with this Chapter or a directive of the Department, including time frames for corrective actions specified in inspection reports, notices, orders, warnings, and other directives; and
- (8) Submit the annual renewal application and pay all renewal license and late fees.

[Source: Added at 38 Ok Reg 1982, eff 9-11-21]

310:285-9-13. Licenses not transferable

A license cannot be transferred from one person to another person, from one establishment to another, from one physical address to another, from one corporation to another, from one limited liability company or corporation to another, or from one partnership to another.

[Source: Added at 38 Ok Reg 1982, eff 9-11-21]

310:285-9-14. Competency of inspectors

An authorized representative of the Department who inspects an establishment or conducts plan review for compliance with this Chapter shall have the knowledge, skills, and ability to adequately perform the required duties, and be licensed pursuant to 59 O.S. §1150.1 et seq.

[Source: Added at 38 Ok Reg 1982, eff 9-11-21]

310:285-9-15. Allowed at reasonable times after due notice

After the regulatory authority presents official credentials and provides notice of the purpose of, and an intent to conduct, an inspection, the person in charge shall allow the regulatory authority to determine if the lodging establishment is in compliance with this Chapter by allowing access to the establishment, allowing inspection, and providing information and records specified in this chapter and to which the regulatory authority is entitled according to law, during the lodging establishment's hours of operation and other reasonable times.

[Source: Added at 38 Ok Reg 1982, eff 9-11-21]

310:285-9-16. Refusal, notification of right to access, and final request for access

If a person denies access to the regulatory authority, the Department shall:

- (1) Inform the person that:
 - (A) The license holder is required to allow access to the regulatory authority as specified under OAC 310:285-9-12,
 - (B) Access is a condition of the acceptance and retention of a lodging establishment license to operate as specified under OAC 310:285-9-12, and
 - (C) If access is denied, an inspection order issued by the appropriate authority allowing access may be obtained according to law; and
- (2) Make a final request for access.

[Source: Added at 38 Ok Reg 1982, eff 9-11-21]

310:285-9-17. Refusal, reporting

If after the regulatory authority presents credentials and provides notice as specified under OAC 310:285-9-15, explains the authority upon which access is requested, and makes a final request for access as specified in OAC 310:285-9-16, the person in charge continues to refuse access, the regulatory authority shall document the details of the denial of access on an inspection report form.

[Source: Added at 38 Ok Reg 1982, eff 9-11-21]

310:285-9-18. Inspection order to gain access

If denied access to a lodging establishment for an authorized purpose and after complying with OAC 310:285-9-16, the Department may issue, or apply for the issuance of, an order to gain access as provided in law.

[Source: Added at 38 Ok Reg 1982, eff 9-11-21]

310:285-9-19. Documenting information and observations

The regulatory authority shall document on an inspection report form:

- (1) Administrative information about the lodging establishment's legal identity, physical, mailing and e-mail addresses, inspection date, and other information that may be required; and
- (2) Specific factual observations of violative conditions or other deviations from this Chapter that require correction by the license holder. The use of photographs to document observations may be utilized.

[Source: Added at 38 Ok Reg 1982, eff 9-11-21]

310:285-9-20. Specifying time frame for corrections

The regulatory authority may specify on the inspection report form the time frame for correction of the documented violations.

[Source: Added at 38 Ok Reg 1982, eff 9-11-21]

310:285-9-21. Issuing report and obtaining acknowledgment of receipt

At the conclusion of the inspection the regulatory authority shall provide a copy of the completed inspection report and the notice to correct violations to the license holder or to the person in charge, and request a signed acknowledgment of receipt.

[Source: Added at 38 Ok Reg 1982, eff 9-11-21]

310:285-9-22. Refusal to sign acknowledgment

The regulatory authority shall inform a person who declines to sign an acknowledgment of receipt of inspectional findings as specified under OAC 310:285-9-21:

- (1) An acknowledgment of receipt is not an agreement with findings;
- (2) Refusal to sign an acknowledgment of receipt will not affect the license holder's obligation to correct the violations noted in the inspection report within the timeframes specified;
- (3) A refusal to sign an acknowledgment of receipt is noted in the inspection report and conveyed to the Department's historical record for the lodging establishment; and
- (4) Make a final request that the person in charge sign an acknowledgment receipt of inspectional findings.

[Source: Added at 38 Ok Reg 1982, eff 9-11-21]

310:285-9-23. Ceasing operations and reporting

(a) Except as specified in (b) of this Section, a license holder shall immediately discontinue or limit operations and notify the regulatory authority if an imminent health hazard exists because of an emergency such as a fire, flood, sewage backup, no water in the establishment, insufficient refrigeration and/or hot food storage facilities available,

substantial evidence or presence of a large number of insects or evidence of rodents, interruption of safe potable water supply to the establishment, misuse of poisonous or toxic materials, onset of an apparent foodborne illness outbreak, interruption of electrical service for more than 4 hours, severe structural damage in the establishment, an employee working with a Salmonella, Shigella, Shiga toxin producing E. coli or Hepatitis A infection, gross unsanitary occurrence or condition, or other circumstance as determined by the Commissioner of Health, or his designee, that may endanger public health.

(b) A license holder need not discontinue operations in an area of an establishment that is unaffected by the imminent health hazard.

[Source: Added at 38 Ok Reg 1982, eff 9-11-21]

310:285-9-24. Resumption of operations

If operations are discontinued as specified under OAC 310:285-9-23 or otherwise according to law, the license holder shall obtain approval from the regulatory authority before resuming operations.

[Source: Added at 38 Ok Reg 1982, eff 9-11-21]

310:285-9-25. Timely correction

(a) Except as specified in (b) of this Section, a license holder shall correct violations within a time frame, not to exceed 10 calendar days after the inspection.

(b) The license holder shall correct violations which are structural in nature and do not present a potential health hazard, by a date and time agreed to or specified by the regulatory authority but no later than 90 calendar days after the inspection.

(c) The Department may approve a compliance schedule that extends beyond the time limits specified under (a) of this Section if a written schedule of compliance is submitted by the license holder and no imminent health hazard exists or will result from allowing an extended schedule for compliance.

(d) If corrections are not made according to OAC 310:285-9-25(a), (b) and (c), then the establishment is subject to enforcement action.

[Source: Added at 38 Ok Reg 1982, eff 9-11-21]

310:285-9-26. Verification and documentation of correction

(a) After observing at the time of inspection a correction of a violation, the regulatory authority shall also record the corrective action on the inspection report.

(b) After receiving notification that the license holder has corrected a violation, or at the end of the specified period of time, the regulatory authority shall verify correction of the violation, document the information on an inspection report, and enter the report in the Department's records.

CHAPTER 295. MILK AND MILK PRODUCT REGULATIONS [REVOKED]

Editor's Note: *Effective 9-1-94, the regulatory authority for this program was transferred from the Oklahoma State Board of Health to the State Board of Agriculture. The legislation stipulated that "[t]he rules promulgated by the State Board of Health for the powers and duties specified in the Oklahoma Milk and Milk Products Act which were in effect June 30, 1994, shall remain effective until the promulgation of new rules by the Board [of Agriculture]."* [Laws 1994, c. 140, § 7(C)] The Board of Agriculture enacted new rules by emergency action on 7-11-95 and by permanent action on 6-14-96 [see OAC 35:35], and the Board of Health revoked the rules in this Chapter on 6-11-98.

CHAPTER 315. PUBLIC BATHING PLACE FACILITY STANDARDS

[Authority: 63 O.S., §§ 1-1013 et seq.]
[Source: Codified 12-31-91]

SUBCHAPTER 1. GENERAL PROVISIONS

310:315-1-1. Purpose

This chapter known as the Public Bathing Place Facility Standards is to be used by engineers and other interested persons in the design and submission of plans to a public bathing place.

[Source: Amended at 39 Ok Reg 1263, eff 9-11-22]

310:315-1-2. Definitions

When used in this Chapter, the following words or terms shall have the following meaning unless the context of the sentence requires another meaning:

"Adjustable inlet" means a fitting mounted in the pool wall and connected to the return piping from the recirculation system that is directionally adjustable or a fitting mounted in the pool floor and connected to the return piping from the recirculation system that has a means of flow adjustment.

"Air induction system" means a system whereby a volume of air (only) is induced into hollow ducting built into a spa floor, bench, or other location. The air induction system is activated by a separate air power unit (blower).

"Attendant" means any person capable of providing rescue who is responsible to the management.

"Backwash" means the process of thoroughly cleansing the filter media and/or elements by reverse flow.

"Backwash cycle" means the time required to thoroughly backwash the filter media and/or elements and the contents of the filter vessel.

"Backwash rate" means the rate of application of water through a filter during the cleaning cycle normally expressed in U. S. gallons per minute per square foot of effective filter area.

"Bathing load" means the maximum number of persons allowed in the pool enclosure at one time.

"Cartridge filter" means a filter that utilizes a porous cartridge as its filter medium.

"Collector tank" means a tank receiving the gravity flow from the perimeter overflow gutter and main drain(s) from which the recirculation pump takes suction. It may be referred to as a balance tank.

"Cover/Grate" means a fitting, device or assembly that separates the bather from the suction sump or piping that has been design and specified by the manufacturer to control flow through the open area.

"Department" means the Oklahoma State Department of Health and authorized representatives.

"Diatomaceous earth filter" means a filter that utilizes a layer of filter aid as its filter medium that periodically must be replaced.

"Filter" means a device that separates solid particles from water by recirculating it through a porous substance (a filter medium or element).

"Filter aid" means a type of finely divided medium used to coat a septum type filter, usually diatomaceous earth, processed perlite, or similar material.

"Filter cycle" means the operating time between cleaning and/or backwash cycles.

"Filter element" means a device within a filter tank designed to entrap solids and conduct water to a manifold, collection header, pipe, or similar conduit. Filter elements usually consist of a septum and septum support.

"Filter media" means a finely graded material (such as sand which removes filterable particles from the water.

"Filter septum" means that part of the filter element consisting of cloth, wire screen, or other porous material on which the filter medium or aid is deposited.

"Filtration flow" means the rate of flow, in volume per time (GPM, GPH), through the filter system installed per manufacturer's instructions with new clean media.

"Filtration rate" means the rate of filtration of water through a filter during the filter cycle expressed in U.S. gallons per minute per square foot of effective filter area.

"Hydrotherapy, whirlpool, or spa pool" means a public pool used exclusively in conjunction with high velocity air and/or high velocity water recirculation systems, utilizing hot, cold, or ambient temperature water. These pools will be referred to as spas.

"Individual therapy units" means tanks which are designed for the therapeutic treatment of one individual at one time and are drained and cleaned after each individual use. Individual therapy units are not considered public bathing places.

"Ladders" means a series of vertically separated treads or rungs either connected by vertical rail members or independently fastened to an adjacent vertical spa/pool wall.

"Lower distribution system (underdrain)" means those devices used in the bottom of a permanent media filter to collect the water uniformly during the filtering and to distribute the backwash uniformly during the backwashing.

"Not open to the general public" means access is limited to people who are living or staying on the property associated with the public bathing place or their guests.

"Open to the general public" means not restricted to tenants or guests.

"Overflow system" means perimeter type overflows, surface skimmers, and surface water collection systems of various design and manufacture. The water line shall be established by the height of the overflow rim.

"Perimeter overflow gutter" means a trough or gutter around the inside perimeter of the pool walls with the overflow lip effecting a skimming action to clean the pool water surface.

"Permanent media filter" means a filter that utilizes a medium that can be regenerated and will not have to be replaced.

"Plunge pool" means the receiving body of water located at the terminus of a recreation water slide.

"Pool deck" means the unobstructed area around the outside of the pool curb, diving boards, diving towers, and/or pool slides.

"Pool floor" means the interior bottom pool/spa surface and consists of that surface from a horizontal plane up to a maximum of a 45° slope.

"Public bathing place or public pool" means *all entirely artificially constructed wading pools, swimming pools, bathhouses used collectively by a number of persons for wading, swimming, recreative, or therapeutic bathing, together with all sanitary facilities, bathing suits, buildings, equipment, and appurtenances pertaining to such bathing places; provided, that such term shall not apply to those public or semipublic baths where the main object is the external cleansing of the body, to bathing places maintained by an individual for the use of family and friends, or to bathing places owned or managed by a group or association of the owners of thirty or fewer homes, the use of which is limited to the homeowner group and their nonpaying guests. The term "public bathing place" does not include spray pads or spray grounds. As used in this section, "spray pads or spray grounds" mean interactive recreation areas intended for use by children in which the water is supplied by a system of sprays and is not allowed to accumulate above ground* [63 O.S. § 1-1013].

"Recessed steps" means a riser/tread or series of risers/treads extending down from the deck with the bottom riser/tread terminating at the spa/pool wall, thus creating a "stairwell."

"Recessed treads" means a series of vertically spaced cavities in the spa/pool wall to be used as steps for the ladder.

"Recirculation system" means the system traversed by the recirculated water from the pool until it is returned to the pool.

"Scope of work" means a document outlining proposed changes to a public bathing place, including but not limited to the existing configuration and work to bring the facility into compliance with the provisions of this chapter.

"Skimmer" means a device installed in the pool wall whose purpose is to remove floating debris and surface water to the filter.

"Special purpose pool" means a public bathing place used exclusively for a particular purpose, including but not limited to springboard or platform diving training, scuba diving instruction, and aquatic programs for handicapped individuals and kindergarten children.

"Steps" means a riser/tread or series of risers/treads extending down from the deck into the spa/pool area.

"Submerged suction outlet" means a fitting assembly, cover/grate, and related components below the water level that provides a localized low pressure area for the transfer of water from a swimming

pool, wading pool, spa or hot tub.

"Toxic" means the adverse physiological effect on man.

"Tread contact surface" means the foot contact surfaces of ladder, step, stair, or ramp.

"Turnover rate" means the period of time (usually in hours) required to circulate a volume of water equal to the pool capacity.

"Upper distribution system" means those devices designed to distribute the water entering a permanent media filter in a manner such as to prevent movement or migration of the filter medium. This system shall also properly collect water during filter backwashing unless other means are provided.

"Unblockable suction outlet" means a suction outlet constructed, designed, or fitted with an approved cover, of a minimum size such that an 18 inches by 23 inches body blocking element will not cause a differential pressure that could cause body entrapment.

"Vacuum (or suction) filter" means a filter which operates under a reduced pressure from the suction of a pump.

"Wading pool" means a pool intended for use by children and having a maximum depth not exceeding 18 inches.

"Water line" means the line along the pool that was designed for maximum efficiency and sanitation. For skimmers it is about mid-tile and for gutters they should be overflowing

"Water recreation attraction" means a public bathing or swimming facility with design and operational features that provide patrons recreational activity which is different from that associated with a conventional swimming pool and purposefully involves total or partial immersion in the water. Water recreation attractions include but are not limited to water slides, water amusement lagoons, and wave pools.

[Source: Amended at 26 Ok Reg 2003, eff 6-25-09 ; Amended at 39 Ok Reg 1263, eff 9-11-22]

SUBCHAPTER 3. PLAN DOCUMENTS

310:315-3-1. Plans and specifications

(a) **Plans and specifications required.** Plans and specifications on new or major remodeling of existing public bathing places shall be prepared by and bear the seal of a professional engineer licensed in the State of Oklahoma and submitted to the Department for approval and an approval permit issued prior to construction.

(1) Permits for construction of public bathing place facilities are not transferable.

(2) No permit to construct a public bathing place facility will be granted unless sufficient information has been presented to the Department to indicate a finding that such facility will be constructed and can be operated in accordance with this chapter and in accordance with good practices of public health and safety.

(3) It is unlawful for any person or persons to begin construction, alteration, or modification of any public pool without first having received written approval from the Department.

(4) Any changes or additions to the recirculation system, treatment equipment, physical structure, or appurtenances that, in the opinion of the Department, are not equivalent in operating characteristics to those installed in accordance with the plans and related documents approved by the Department will be considered as an alteration or modification of an existing pool.

(5) Upon completion of all new construction, approved alterations or modification of an existing pool, the owner shall provide written notification to the Department that the construction and/or equipment installation is ready for final inspection.

(6) If construction of a pool (installation of the pool shell) has not commenced within one (1) year from the date of plan approval by the Department, the approval will expire. However, upon request by the owner, the project approval may be extended for a period of six (6) months provided significant changes have not been made in the project plans or have not occurred in local conditions affecting the pool or site, and the plans comply with the standards.

(7) Five (5) or more complete sets of plans and specifications, together with an application for permit on forms provided by the Department, signed by the owner, shall be submitted to the Department for review. If approved, all plans and specifications will be stamped, indicating the approval of the Department. One (1) set will be retained in the files of the Department; one (1) set forwarded to the local health department; one (1) set will be sent to the consult engineer; and two (2) sets returned to the owner, (one (1) for the owner's file and the other to be provided the successful bidder for the pool construction).

(8) If not approved, one (1) complete set will be retained for record and the remainder will be returned to the applicant with recommendations for necessary changes or modifications for compliance.

(9) Plans should be submitted for review at least thirty (30) days prior to advertising for bids or letting a contract for construction of the pool.

(b) **Minor changes.** An owner must submit a scope of work to the Department for proposed changes or additions to existing public bathing places of a minor nature that are not of a sufficient magnitude or scope to involve engineering and the preparation and submission of plans. The scope of work will be reviewed informally by the Department to verify that the proposed changes or additions are in compliance with applicable statutes and rules, and do not necessitate a formal plan review.

(c) **Structural design not reviewed by the Department.** The review of plans and specifications by the Department does not include structural design or structural stability of any section or part of a public bathing place. Certification of adequacy is the responsibility of the design engineer.

(d) **Information needed.** The engineer's report, specifications, or plans shall include all of the minimum design requirements outlined in this chapter; the pool capacity in gallons; estimated bathing load (male and female); capacity of all mechanical equipment; information of water

supplies, pressure, etc., together with such other information as is requested throughout this chapter. When mechanical equipment, devices, plumbing fixtures, etc., are specified by use or trade name, catalog numbers, etc., then individual leaflets, catalogs, or other descriptive material shall be furnished. A plot plan is required showing the location of the pool and adjacent buildings, parking areas, sewers, water lines, fences, and contours. The finding location (legal description or street address) shall be shown on the plot plan.

(e) **New equipment and methods.** The policy of the Department with reference to new types of equipment, new design features, etc., will not be to discourage or obstruct progress in design. However, any newly developed equipment, materials, etc., proposed for use in connection with a public bathing place shall have been qualified by trial elsewhere to the satisfaction of the Department before plans and specifications will be approved or a permit issued. This requirement would not necessarily prohibit any occasional experimental or test installation with adequate impartial supervision, wherein a satisfactory written agreement with reference to replacement of equipment, materials, or changes in design is incorporated in the specifications in the event of failure. In the event public funds are involved, then any such agreement shall be backed by a satisfactory guarantee bond, sufficient in amount to provide for the replacement of unsatisfactory materials or equipment plus any and all additional costs occasioned by changes in design or construction, etc., arising from such replacement.

(f) **Special conditions.** Should special conditions exist, or circumstances be such that in the opinion of the engineer certain items listed as minimum design requirements would not be applicable, then such items shall be submitted in writing to the Department and approved prior to preparation of the final plans and specifications, and shall be explained in detail in the engineer's report.

(g) **Deviations.** Deviations from this chapter may be allowed by the Department upon a finding by the Department that the operation, maintenance, safety, and sanitation of the pool will not be adversely affected by the deviation. No deviation will be allowed unless it is noted on the construction permit. No deviation from approved plans and specifications is permissible unless and until an amended permit has been granted.

[Source: Amended at 26 Ok Reg 2003, eff 6-25-09 ; Amended at 39 Ok Reg 1263, eff 9-11-22]

SUBCHAPTER 5. WATER AND SEWER FACILITIES

310:315-5-1. Water supply

(a) **Potable water supply.** The water supply serving the bathhouse and all plumbing fixtures, including drinking fountains, lavatories, and showers, shall be approved by the appropriate regulatory authority.

(b) **Pool water supply.** The water supply for artificially constructed bathing places shall meet the requirements as set forth in this Section.

(c) **Backflow preventers.** All portions of a public water distribution system serving the pool and ancillary facilities shall be protected against backflow. Water introduced into the pool either directly or through the recirculation system shall be introduced into the pool through an air gap providing two pipe diameters or six (6) inches vertical distance between the maximum flood level of the pool and the lowest point of the inlet pipe. The coping or deck constitutes the flood level, not a drain. The supply shall be protected by an air gap whenever possible. When such connections are not installed, the supply shall be protected by a suitable backflow preventer installed on the discharge side of the last control valve to the fixture, device, or appurtenance. All hose bibs in the bathing facility area shall be so equipped. For a pool autofill system without an air gap, a RPZ backflow preventer is required. The requirements of the American National Standards Institute (ANSI) A40.6-1943; the American Society of Sanitary Engineering (ASSE) 1001-1970; ASSE 1011-1970, ASSE 1012-1972, ASSE 1013-1971, ASSE 1015-1972; or the American Water Works Association (AWWA) C506-69, or latest revisions thereof, will be used in determining substantial compliance with this requirement.

(d) **Pool water quality.** Unless pool water is to be supplied from an approved and properly operated public water supply system, an analysis of the proposed pool water supply shall be submitted with the plans and specifications or as part of a preliminary engineering report. The analysis shall include, as a minimum, the following parameters: pH, total alkalinity, dissolved solids, hardness both carbonate and non-carbonate, copper, iron, manganese and turbidity. Should any of the above parameters exceed the maximum limit set forth in OAC 310: Chapter 320, design and specifications of necessary treatment units required to reduce the contaminant to an acceptable level must be made a part of the swimming pool plans.

(e) **Drinking fountains.** Approved type angle-jet fountains with approved water supply under adequate and regulated pressure must be provided in locations available to pool patrons. In the case of non-municipal pools, this requirement will be considered met by compliance with 310:315-7-7, "Bathing places not open to the general public."

[Source: Amended at 39 Ok Reg 1263, eff 9-11-22]

310:315-5-2. Sewer

(a) **Adequate sanitary and storm sewer system required.** The sewer systems shall be adequate to serve the facility, include bathhouse, locker room, and related accommodations, and to provide for liquid waste disposal and surface drainage.

(b) **Pool wastewater.** Pool wastewater shall be discharged through an air gap to a sanitary sewer, used for pool makeup water after sedimentation and filtration, or used for irrigation after sedimentation. Proposals for a point discharge of the wastewater to a storm drain or receiving stream will be evaluated on a case-by-case basis and will require obtaining a National Pollutant Discharge Elimination System (NPDES) permit and compliance with all permit conditions. Disposal of

wastewater from diatomaceous earth type filters shall be accomplished through adequately sized separation tanks acceptable to the Department, equipped with air bleed valves, bottom drain lines, and isolation valves, or through systems of a settling tank or tanks with final disposal being acceptable to local authorities. Waste lines shall be sized to handle the expected flow. There shall be an indirect connection between any drain from a pool or recirculation system and a sewer line.

(c) **Disposal of sanitary wastewater.** The sanitary sewer serving the bathhouse and ancillary facilities shall connect to the public sewer wherever possible. Where no such sewer is available, the sewer shall connect to a suitable treatment plant designed, constructed, and operated in accordance with the minimum requirements of the Oklahoma Department of Environmental Quality.

[Source: Amended at 39 Ok Reg 1263, eff 9-11-22]

SUBCHAPTER 7. CONSTRUCTION AND OPERATION

310:315-7-1. Pool construction, materials, and finish

Materials and finish.

(1) Pools shall be constructed of concrete or other materials which are smooth, non-absorbent, durable, non-toxic to humans and which can withstand design stresses. All side walls and bottom surfaces shall have a smooth, easily cleanable, and slip-resistant finish. Floors and walls shall be white or light (pastel) in color and shall have the characteristic of reflecting rather than absorbing any natural or artificial light.

(2) Fiberglass panels or other approved panels shall not be installed so that a ledge is created at the junction with other materials except as permitted under 10:315-7-4, "Safety ledges."

(3) Wooden pools, spas, or hot tubs are prohibited.

(4) Plastic liners are prohibited.

(5) Sand or earth bottoms are not permitted in artificially constructed public bathing places.

[Source: Amended at 39 Ok Reg 1263, eff 9-11-22]

310:315-7-2. Pool layout

(a) **Location.** In selecting the site for a proposed public bathing place, the water supply, sanitary sewer, and other drainage facilities shall be given due consideration. Outside pools cannot be located near unpaved highways where road dust and dirt would be carried into the pool by prevailing winds. The site of outdoor pools shall be elevated or otherwise protected by drainage ditches, curbs or retaining walls so that surface water will not flow into and contaminate the pool water.

(b) **Trees, shrubbery.** Trees and shrubbery overhanging or adjacent to the pool or walkway, or in the immediate vicinity on the windward side, are objectionable in that they are the source of dirt, leaves, and other contaminants which may fall into the water.

(c) **Exclusion of unauthorized persons.**

(1) All bathing facilities must be surrounded by an effective barrier that meets the descriptions below:

(A) Outdoor pools open to general public such as municipal pools and pools used by organizations (YWCA, YMCA, etc.), shall be enclosed by a suitable barrier equal to a six (6) foot high woven wire fence.

(B) Indoor pools must either be located in a room with doors that can be locked at all times when the pool is not in use (regardless of whether a fee is charged) or have a barrier that is in compliance with 7-2(c)(1)(C).

(C) Outdoor pools not open to the general public shall be enclosed with a suitable effective barrier to prevent unattended small children from entering the pool. The barrier may be any fence, wall or structure which prevents entry except through self-closing, self-latching gates and does not prevent visual observation of the pool and is not less than four (4) feet in height. Decorative type barriers shall not have open spaces greater than four (4) inches. Where existing construction prohibits compliance with this rule, the owner shall file with the county or state health department, an operation procedure which will serve to ensure the exclusion of animals and unattended small children from the pool area.

(2) A suitable effective barrier shall be accomplished in one of the following manners:

(A) **Wood.**

(i) Wood posts shall be at least four (4) inches in diameter or four (4) inches x four (4) inches, pressure-treated, spaced not more than ten (10) feet apart, and embedded at least eighteen (18) inches into the ground.

(ii) Wood railings, when used, shall be at least two (2) inches x four (4) inches in nominal dimension. There shall be at least two (2) railings. Railings shall provide no horizontal projections or recessions unless at four (4) feet. Railings shall not be used in such a way as to form a ladder.

(B) **Wire.**

(i) Wire posts shall be galvanized pipe at least two (2) inches in diameter and shall be spaced not more than ten (10) feet apart. Such posts shall be embedded to a depth of twelve (12) inches in a concrete jacket at least eighteen (18) inches deep and six (6) inches in diameter.

(ii) Chain link shall be at least eleven (11) gauge galvanized metal.

(iii) Wire supports shall be galvanized metal at least one and one-quarter (1-1/4) inches thick and shall provide no footholds.

(C) **Wrought iron.**

- (i) Wrought iron posts shall consist of at least one-half (1/2) inch thick steel bars spaced not more than four (4) inches apart.
- (ii) Wrought iron fence sections shall consist of at least one-half (1/2) inch thick steel bars spaced not more than four (4) inches apart.
- (iii) Wrought iron horizontal rails shall not form a ladder.

(D) **Masonry.** Walls of brick, concrete or stone shall be constructed so as to provide no projections or recessions within four (4) feet of the ground's surface. Such walls shall meet the visual observation requirement of 310:315-7-2. Construction shall not be such as to form a ladder. There shall not be more than four (4) inches of space between the bottom of the enclosure and the ground's surface or the pool deck. Indoor bathing facilities not open to general public shall be enclosed so that access is only through self-closing, self-latching gates or doors, to control access by unattended small children. Enclosures shall have maximum openings of four (4) inches, and the enclosure design shall not form a ladder.

(E) **Alternate enclosure materials.** The Department may approve alternative enclosure materials and methods where the Department finds such materials and methods equivalent to those described.

(d) **Sand or grass plots.** The area within the pool enclosure of outdoor municipal and other pools open to the general public, and school pools, shall be free of all sand or grass plots used for sun-bathing or play areas. Sand and grass areas provided for sun-tanning or sun-bathing purposes in connection with swimming pools open to the general public shall be separated from the pool and walk area by a fence or other barrier. The exits from the sand or grass sun-bathing area to the pool area shall be provided with continuous or automatic showers, with volume and pressure of water sufficient to remove gross particles of sand, grass, etc., from the bathers. In lieu of the above shower arrangement, sun-bathers may be routed from the sand or grass sun-bathing areas through the regular shower rooms.

(e) **Layout of filter plant and chemical storage facilities.**

- (1) The filter plant and chemical storage areas shall either be enclosed or limit access by the general public through other means.
- (2) The filter area shall be large enough to provide easy access to all equipment and appurtenances with sufficient room for adequate pipe run for the flow meter and for system maintenance.
- (3) There must be at least eighteen (18) inches clearance about freestanding equipment.

(f) **Hose connections.** Ample hose connections shall be provided and suitably arranged in interior shower rooms, toilet rooms, and exterior walks, so that all floors, walks and drains may be flushed with water, using a fifty (50) foot section of flexible hose. Approved vacuum breakers shall be included at all hose bib connections (including any in equipment

rooms).

(g) **Wall, floor, and ceiling material.** Walls, floors, and ceilings of new pool rooms and new filter rooms shall be of non-sorbent, smooth, cleanable material.

[Source: Amended at 22 Ok Reg 231, eff 10-14-04 (emergency); Amended at 22 Ok Reg 1131, eff 5-26-05 ; Amended at 39 Ok Reg 1263, eff 9-11-22]

310:315-7-3. Pool size and bathing load

(a) **Pool size.** Generally, the size of the swimming pool shall be such as to accommodate the anticipated maximum swimming load that will frequently use the pool during the swimming season.

(b) **Diving and swimming areas.** Those portions of the pool from the breakpoint to the shallow end shall be designated as "swimming" area and the portion of the pool from the breakpoint to the deep end shall be designated as "diving" area.

(c) **Computing capacity requirements.** The formula for computing capacity requirements is in Appendix D. (See also OAC 310:320 Public Bathing Place Regulations.)

(d) **Allowance for deck area.** The Department may make additional allowance in cases of pools with extensive deck areas used by patrons for lounging or sun-bathing.

[Source: Amended at 39 Ok Reg 1263, eff 9-11-22]

310:315-7-4. Pool features

(a) Structural.

(1) All pools shall be designed and constructed to withstand all anticipated structural loading, under both filled and empty conditions. A hydrostatic relief valve is required on all new below-grade pools.

(2) Facilities for the Handicapped. All pools open to the general public constructed after May 1, 1981 shall provide for the use of the entire facility by the handicapped as follows:

(A) Raised or cut out depth markings used in the pool and on the deck.

(B) A ramp or lift provided into the pool proper.

(C) Bathhouse construction such that all facilities are readily available to wheelchair and ambulatory handicapped.

(b) **Pool shape.** The shape of any pool shall be such that the circulation of pool water and control of swimmers' safety are not impaired. For all free form, non-diving pools containing any swimming area where the pool perimeter is curved at a radius of less than six (6) feet and the sidewall depth is five (5) feet or less, the design engineer shall separately certify the design of the pool as to its safety.

(c) **Shallow depth.** The pools sixty (60) feet or more in length, such as school pools, municipal pools, institutional pools, and other pools where competitive use is a consideration, the minimum depth of three and one-half (3-1/2) feet at the shallow end.

(d) **Therapeutic pools.** In the case of special pools for water therapy where a design depth less than three (3) feet or other special features are used, the engineer must include in his report a description of the intended use.

(e) **Slope of bottom.**

(1) The slope of the bottom of any portion of the pool having a water depth of less than five (5) feet shall not be more than one (1) foot in twelve (12) feet and said slope shall be uniform. An exception to this requirement will be made permitting a breakpoint to occur at a minimum water depth of four and one-half (4-1/2) feet for pools less than sixty (60) feet in length or special indoor pools used for instructional or therapeutic purposes.

(2) For pools without uniform bottom slope, without diving facilities, and with maximum depths of five (5) feet or more, the slope in the shallower section shall not exceed one (1) in twelve (12) and there shall be a life line at the change in slope. The slope of the transition section shall not exceed one (1) in three (3).

(f) **Side walls.**

(1) Walls of a pool shall be vertical for a water depth of at least five (5) feet below the water level, below which the wall shall be curved to the bottom with a radius equal to the difference between the depth and five (5) feet, except that for water depths under four (4) feet, a radius of one (1) foot shall be permitted; for water depths between four (4) and five (5) feet, a radius of two (2) feet may be used.

(2) Walls of pools without diving areas shall be vertical (constructed not more than eleven (11) degrees from plumb) for a water depth of at least three (3) feet in all areas where the side wall depth is five (5) feet or greater. The walls shall be vertical for a depth of at least two and one-half (2-1/2) feet in areas with less than five (5) feet side wall depth. The wall shall then be curved to the bottom with a radius equal to or less than the difference between the minimum vertical wall depth and the side wall depth. Side wall depth shall be defined as the distance between the water surface and the point at which the side wall curvature intersects the constant slope of the bottom.

(g) **Diving area requirements.** Wherever diving facilities are provided in connection with public bathing places, the design shall be such as to provide adequate, clear head room and diving depths to assure the safety of the bathers. It is recommended that pools with diving facilities be designed in accordance with standards promulgated by FINA, NCAA, or U.S. Diving, Inc. The following are minimum requirements.

(1) There shall be a completely unobstructed clear vertical distance of sixteen (16) feet above any spring board measured from a point at the center of the end of the board over the water, and the clear area extends horizontally at least eight (8) feet behind, eight (8) feet to each side, and sixteen (16) feet ahead of that point.

(2) A schedule of depths and their locations is given in Appendix A and B . These depths are to be interpreted as minimum

requirements compatible with safety of design, and greater clearances are recommended.

(3) The area of deep water provided shall comply with the following requirements: For pools utilizing deck level boards which will be not more than eighteen (18) inches above the normal operating level of the pool, and other small pools used for diving, the diving area shall have a minimum depth of eight (8) feet. The area where this minimum depth shall prevail shall be described as follows: at a point on the center line of the axis of the diving board eight (8) feet from the deep end wall, a circle shall be circumscribed with a six (6) foot radius; from a point eleven (11) feet from the deep end wall or three (3) feet in front of the first center, also on the diving board center line axis, a second circle shall be circumscribed with a five (5) foot radius extending from where the arc of the second circle intersects the arc of the first circle on one side to the point of intersection on the other side; all of that area within these two (2) circles shall have a normal operating depth of not less than eight (8) feet; all of this combined area shall be sloped to a point or points where main drains are located and where the depth is not less than eight (8) feet six (6) inches.

(4) In free form pool design (such as kidney-shaped), a deck level diving board may be accommodated in Appendix C design using a pool width of sixteen (16) feet at the tip of the diving board. The deck shall not encroach on the pool water surface inside a triangle whose base is sixteen (16) feet long and is centered at the tip of and is perpendicular to the center line of the diving board and whose apex is three (3) to four (4) feet back from the tip of the diving board. (This places the apex at the wall below the diving board.)

(A) **Slides, swings, and recreational equipment.** It is recommended that where slides, swings, climbing walls, and similar recreational equipment are installed at pools, a lifeguard be on duty at the pool when it is in use.

(B) **Diving boards or platforms.**

(i) Because of the hazards involved, diving boards or platforms exceeding three (3) meters in height must not be available to the general public and will be approved only for instructional or competitive pools, supervised by capable instructors or coaches. Water depths below such platforms shall conform to NCAA, AAU, or FINA Standards. Preliminary plans for the pool construction shall be submitted for appraisal and concurrence prior to the submission of final construction plans. Preliminary plans shall provide sufficient information on the operation of the pool to allow determination as to whether or not the high diving platforms can be used without hazard.

(ii) These design requirements are for recreational swimming and diving. Where it is anticipated that

pools with diving boards will be used for competitive diving events or training for such events, greater water depths will be required. In such instances the water depths given in the listed standards shall be used in order to avoid safety hazards for this type of activity.

(h) Safety ledges.

(1) Safety ledges are acceptable for instructional pools where full-time lifeguards are on duty, provided the ledges are located not less than four (4) feet nor more than five (5) feet below the water surface. The corners shall be rounded.

(2) Ledges shall be painted or constructed with a material of contrasting color to be easily visible. Ledge surfaces shall have slip-resistant textures.

(3) Off-sets or protrusions from the pool wall resulting from design or construction variations shall fall within the area defined by an eleven (11) degree line from plumb and a plumb line starting at the junction of the pool wall and water surface.

(i) Depth markings.

(1) The depth of water shall be plainly marked at or above the water surface on the vertical wall of the swimming pool and on the edge of the deck or walk next to the swimming pool, at maximum and minimum points; at the points of break between the deep and shallow portions; and at intermediate one (1) foot increments of depth in the shallow end up to the breakpoint; and at two (2) foot increments of depth from the breakpoint to the deep end wall, spaced at not more than twenty-five (25) feet intervals measured peripherally; and at two (2) foot increments of depth (with at least three (3) markers per pool) throughout the length of non-diving pools with uniform bottom slope.

(2) Depth markers shall be in numerals of four (4) inches minimum height and a color contrasting with the background. Where depth markers cannot be placed on the vertical walls above the water level, other means shall be used, and be plainly visible to persons in the pool area.

(3) It is strongly recommended that a six (6) inch black stripe be painted on the bottom of the pool at the breakpoint between the swimming and non-swimming areas, and that lengthwise stripes be painted on the pool bottom for better delineation of the bottom contour.

(j) Coping. Bullnosed or rounded coping is recommended. Other coping will be approved on a case-by-case basis. None shall extend more than three (3) inches inside the pool wall nor have sharp corners, and the top surface shall not be more than nine (9) inches above the normal water level.

(k) Isolation panels. Where movable panels are used to separate pools, such as in a water channel connecting an indoor and outdoor pool, the design shall include a system of counterweights or springs, or other device, to prevent "guillotine" action. Also, a minimum of one (1) additional inlet shall be positioned on each side of the panel to assure disinfectant distribution in the connecting water channel.

310:315-7-5. Ladders, recessed treads, stairs, and decorative fountains

(a) Steps, ladders, stairs.

(1) A minimum of one (1) ladder shall be provided for each seventy-five (75) feet of perimeter and not less than two (2) ladders shall be provided at any pool. Where stairs are provided in a pool, one (1) ladder may be deleted for each set of stairs provided. A side handrail extending up above and returning to the horizontal surface of the pool deck curve or coping shall be provided at each side of each ladder.

(2) All stairs entering a pool shall be recessed. An exception to this will permit the construction of steps extending completely across the shallow end of the pool, which will be construed as not projecting into the pool proper.

(3) Steps leading into the pool shall have a minimum tread length of twenty-four (24) inches, a minimum tread width of twelve (12) inches, and a maximum rise, or height, of ten (10) inches. Intermediate treads and risers between the top and bottom treads and risers shall be uniform in width and in height, respectively. The front edge (intersection of the tread and riser) of all steps shall have colored stripes contrasting with the interior color of the pool. These stripes shall be a minimum of two (2) inches in width on the tread and on the riser and shall extend the full length of the steps. Step treads shall be slip resistant.

(b) **Decorative fountains.** No fountains may be constructed within the swimming pool. They may be recessed around the periphery of a pool and may be equipped with benches and hand rails. Where water from a fountain is returned to the pool, the water supply to the fountain must be withdrawn from the pool recirculation system downstream from the filter and from the point of disinfectant injection. Fountains adjacent to the pool shall not include any structures which will invite patrons to climb and dive from them into the pool.

(c) **Recessed seats.** Underwater seats recessed from the pool wall may be approved provided they are surrounded by barriers to discourage pool entry by way of the seats. The barriers shall not form a ladder, nor provide a platform for diving.

310:315-7-6. Walkways or decks

(a) **Width.** A walkway shall entirely surround the pool. It shall not be less than four (4) feet wide at indoor pools. The walk area about outdoor pools and within the fence shall be equivalent to that provided by a walk at least eight (8) feet wide around the pool. In no case shall the minimum width of the walk be less than four (4) feet at outdoor pools. Where an outdoor pool is covered for cold weather use, the walkway requirements for indoor pools shall govern the size of cover.

(b) **Slope.** All walks, decks and terraces shall have a minimum slope of one-fourth (1/4) inch per foot to drains or points at which the water will

have a free, unobstructed flow to points of disposal at all times. Drainage connections to the recirculation system, scum gutter or suitable waste are acceptable. Drainage into the pool is prohibited.

(c) **Finish.**

(1) It is recommended that decks adjoining the pool at public bathing places be constructed of concrete or other impervious material, have a slip-resistant finish, be easily cleanable, not allow standing water, and not cause discomfort to bare feet. Epoxied gravel should not be used as deck material unless the interstices are filled with a stable, inert material.

(2) Wooden decks or walkways are prohibited adjoining the pool at public bathing places open to the general public but may be approved at public bathing places not open to the general public, indoors where such decks are sealed by a resin or other waterproof material, and outdoors where the design provides for adequate cleaning, sanitation, safety, and exposure to the drying action of the sun and wind.

(3) Indoor/outdoor carpets, absorbent or adsorbent coverings or similar deck materials are not recommended for use on the deck or walkways around outdoor public bathing places and prohibited at all indoor public bathing places. If carpeting or other porous materials are used as deck covering at outdoor pools, the substrate supporting the covering, and all ancillary features, shall comply with the recommendations of paragraph one of this chapter and with 310:315-7-6.

[Source: Amended at 39 Ok Reg 1263, eff 9-11-22]

310:315-7-7. Bathhouse

(a) **General bathhouse requirements for all pools.**

(1) **Separate facilities.** Bathhouses to be used simultaneously by both sexes shall be divided into two parts, each appropriately designated for men and women and separated by a tight partition. The entrances and exits shall be screened to break the line of sight. If pools are to be used by one sex only, then all of the required plumbing facilities shall be provided for that sex.

(2) **Wash water temperature.** An adequate supply of warm water within the temperature range of 95 to 100 degrees Fahrenheit is required for all showers and lavatories. On all new construction or the remodeling of present public bathing places, all shower heads shall be provided with fully automatic control valves to prevent scalding of persons under the shower. Control of shower water temperature by hand-operated mixing valves will not be considered as being in compliance with this safety requirement.

(3) **Bathhouse construction details.**

(A) **Walls and ceilings.** All interior walls and partitions shall be smooth, impervious, and of non-corrosive material, free of open cracks, kept in good repair, and painted a light color, with painted surfaces refinished

when necessary. Walls and ceilings of showers shall be constructed of materials which are not adversely affected by water or heat.

(B) **Floors.** All floors of showers, toilets, and dressing rooms of public bathing shall be constructed with a proper slope of one-fourth (1/4) inch per foot so that they can be readily flushed with a hose. Floors shall be of a smooth, non-slip finish, impervious to moisture, and without open cracks or joints. Walkways shall be so constructed that they will readily drain. Junctions between walls and floors shall be of coved, or equivalent sanitary construction.

(C) **Shower stalls.** The floor drains in shower rooms or stalls shall be so arranged, and of sufficient number, and with floors constructed and graded, so that wastewater from individual shower heads will not flow over the floor of another shower stall. Floors of the shower stalls shall be slightly depressed below surrounding floor areas. Raised curbs between shower stalls and walks are, however, not acceptable.

(D) **Baskets, lockers, furniture.** Baskets, lockers, and all furniture used in the bathhouse and the pool area shall be constructed of non-absorbent, easily cleanable material. Lockers shall be set either on solid masonry bases at least four (4) inches high or on legs with bottom of locker at least ten (10) inches above the floor. Lockers shall be properly ventilated.

(E) **Soap.** Liquid soap with suitable dispensers shall be provided and be easily available to all persons using the showers and lavatories. Glass-type dispensers are not allowed.

(F) **Emergency fire exit.** An emergency fire exit, other than the entrance, shall be provided in the bathhouse and in the fencing or structure enclosing the pool area, and such exit shall be plainly marked. No fire traps shall be established in the meaning of adequate exits as provided for in the current edition of the National Fire Prevention Association, National Fire Codes, Vol. 9, Section 101, Life Safety Code for Assembly Occupancies. Exits shall be plainly marked.

(G) **Fire extinguishers.** A fire extinguisher of a type suited to the structures, wiring, and equipment to be protected shall be provided and located where readily available. Carbon tetrachloride extinguishers are not acceptable.

(b) Bathhouse requirements for facilities open to the general public.

(1) **Facilities and fixtures.** All public bathing places open to the general public shall be provided with adequate toilet facilities, hot water showers, lavatories, drinking fountains, and other required appurtenances. Since the number of each type of plumbing fixture required is based on the maximum number of persons likely to be

in the pool area at one time, based on the formulas in 310:315-7-3, or otherwise approved, the engineer, in designing new public pools intended for swimming, should determine the number of such fixtures based on design load.

(2) **Facilities and fixtures accessibility.** Shower controls, toilet facilities, and lavatories shall be provided at all bathing places open to the general public such that they can be easily reached by small children and the handicapped.

(3) **Minimum toilet facilities.**

(A) **Men.** A minimum of one (1) water-flush toilet and two (2) water-flush urinals shall be provided in the men's division of all bathing places open to the general public. This minimum number of toilet fixtures is considered sufficient for the first one hundred (100) males. In addition to the above, one (1) water closet and one (1) urinal shall be provided for each additional one hundred (100) males or major fraction thereof. A number less than twenty-five (25) will necessitate only one (1) additional urinal. For pools of less than sixteen hundred (1600) square feet surface area in size, used simultaneously by both sexes, this requirement may be reduced by one (1) urinal.

(B) **Women.** A minimum of three (3) water-flush toilets shall be provided in the women's division of all bathing places open to the general public. This minimum number of toilet fixtures is considered sufficient for the first one hundred (100) females. In addition to the above, one (1) water closet shall be provided for each additional fifty (50) females or major fraction thereof. For pools of less than sixteen hundred (1600) square feet surface area in size, used simultaneously by both sexes, this requirement may be reduced by one (1) flush closet.

(4) **Showers and lavatories.** The minimum number of shower and lavatory fixtures shall be as follows:

(A) **Men.**

(i) One (1) lavatory for each one hundred (100) men

(ii) One (1) shower head for each forty (40) men

(B) **Women.**

(i) One (1) lavatory for each one hundred (100) men

(ii) One (1) shower head for each forty (40) women.

(5) At least three (3) shower heads for men and two (2) shower heads for women shall be provided. It is recommended that all shower stalls and dressing booths in the women's shower room be arranged so that privacy may be obtained while dressing and undressing and while under the shower, a minimum design recommendation being that one (1) such shower stall and dressing booth be provided.

(c) **Bathhouse requirements for institutional pools.** The number of toilet facilities necessary for indoor pools at schools, colleges, and similar institutions where it is intended that the swimmers be in groups or

classes at regular intervals shall be based on institutional needs, and methods of operation, the number of persons permitted in each swimming class, and time allowed for bather's preparation. As a general guide, it is recommended that one (1) water closet be provided for each ten (10) females and one (1) toilet and two (2) urinals for each twenty-five (25) males.

(d) Bathhouse requirements for facilities not open to the general public.

(1) For motels, hotels, apartment complexes constructed after November 1, 2022 where all units are less than 300 ft away from the pool or spa, and similar establishments, pool side bath or sanitary facilities are not required, providing the following conditions are met:

(A) All lodging units include bath and toilet facilities.

(B) Use of bathing facilities is restricted to tenants and their guests.

(C) Nothing in this section shall be construed to allow openings directly into the pool enclosure without a suitable effective barrier as per 310:315-7-2.

(2) Bathing places not open to the general public, such as Home Owner Associations and apartments, constructed after November 1, 2022 where units are more than 300 ft away from the pool or spa, shall have a bathhouse located adjacent to the pool walkway with the following items separately provided for each sex: one (1) water-flush toilet, one (1) lavatory, and one (1) shower. At least one (1) drinking fountain located so that it is available to both sexes, shall be provided.

[Source: Amended at 39 Ok Reg 1263, eff 9-11-22]

310:315-7-8. Ventilation

(a) **Indoor areas.** Indoor pools, shower rooms, dressing rooms, and toilets of all public bathing places shall be properly ventilated, with the further provision that the ventilating system for indoor pools be so designed as to prevent direct drafts on the bathers.

(b) **Interior rooms.** All interior rooms shall be ventilated so that they do not remain excessively damp.

(c) **Toilet rooms.** Toilet rooms shall be ventilated to the outside so that no odor nuisance may develop.

310:315-7-9. Wading pools

(a) **Wading pools used by children.** Since wading pools will be used by children, who are more susceptible to disease than adults, the standards of sanitation shall be equal, or superior, to those for swimming pools. The maximum depth of all wading pools cannot exceed eighteen (18) inches. A reasonably non-slip surface shall be provided. Bottom slopes shall not exceed one (1) foot in twelve (12) feet. Bathing water shall meet all of the water quality requirements as specified for all artificially constructed bathing places.

(b) **Recirculation.** Wading pools shall have a minimum of one (1) turnover every four (4) hours (two (2) hours is strongly recommended). Unless a separate recirculation system is provided for the wading pool, the main pool recirculation system shall be designed for the additional flow. All recirculation piping to and from the wading pool shall be valved utilizing valves designed for proportioning flows. Rate of flow indicators shall be installed to indicate the flow rate to the wading pool. The piping, fittings, and hydraulic requirements shall be in accordance with OAC 310:315-7-14.

(1) **Inlets, outlets.** Adjustable inlets shall be provided for wading pools based on a minimum of one (1) inlet for each twenty (20) feet, or fraction thereof, of pool perimeter except that wading pools with twenty (20) feet or less of perimeter shall have a minimum of two (2) equally spaced adjustable inlets. Submerged suction outlets shall meet the requirements of OAC 310:315-7-14(h).

(2) **Surface skimmers.** One (1) surface skimmer shall be provided for each four hundred (400) square feet of surface area or fraction thereof. Multiple skimmers shall be equally spaced and shall meet all the requirements of OAC 310:315-7-14.

(3) **Emergency drainage.** All wading pools shall have drainage to waste (with indirect connection) through a quick opening valve to facilitate emptying the wading pools should accidental bowel or other discharge occur.

(b) **Wading pool integral with a swimming pool.** Where a wading pool is built integral with a swimming pool, the pool design must prevent children from falling into the deeper water. The two pools shall be separated by a wall extending to the surface of the water, topped by a barrier complying with OAC 310:315-7-2.

(c) **Wading pool rules sign.** At all wading pools, a sign shall be displayed prominently using the following or equivalent language:

- (1) Wading Pool
- (2) Children are required to be supervised
- (3) Children over 12 Years of Age Prohibited.

310:315-7-10. Spray pools [REVOKED]

[Source: Amended at 26 Ok Reg 2003, eff 6-25-09 ; Revoked at 39 Ok Reg 1263, eff 9-11-22]

310:315-7-11. Public spas

(a) **Spas.** Spas shall be made of concrete or other impervious materials with a finish adapted to the needs of the facility. Spas shall be of such shape and size as to be operated and maintained in a safe and sanitary manner. In addition to the requirements of this section, compliance is required with all other applicable sections of this chapter.

(b) **Water depths and floor slopes.** The maximum water depth of a spa is four (4) feet. The spa floor shall slope uniformly to a main drain and cannot exceed one (1) foot in twelve (12) feet (1:12).

(c) **Steps.** Steps shall be provided for adequate entrance to and exit from the spa. The number of sets of steps required equals one (1) for each fifty (50) feet, or major fraction thereof, of spa perimeter. They shall be constructed of an easily cleaned impervious materials having a slip resistant finish. Step sets for spas with more than two hundred (200) square feet of spa water surface area shall comply with OAC 310:315-7-5(a). Step sets for spas with two hundred (200) square feet or less of spa water surface area shall comply with the following:

(1) Step treads have a minimum continuous tread length of twelve (12) inches and a minimum tread width of ten (10) inches.

(2) Step riser heights do not exceed twelve (12) inches, except that when the bottom step is used for a bench or seat, the bottom riser may be a maximum of fourteen (14) inches.

(3) Intermediate treads and risers between the top and bottom treads and risers are uniform in width and height, respectively.

(d) **Handrails.** Handrails that are anchored in the bottom and extend over the coping and anchor in the deck shall be provided for all sets of steps. Where "figure 4" handrails are used, they shall be anchored in the deck and shall extend laterally to a point vertically above the bottom step.

(e) **Decks.** A spa deck shall comply with all of the following requirements in addition to the applicable parts of OAC 310:315-7-6:

(1) Slope a minimum of one-fourth (1/4) inch per foot away from the spa to drainage or to deck drains.

(2) Have a minimum four (4) foot unobstructed width around the entire spa perimeter except that small indoor spas of less than one hundred twenty (120) square feet of spa water surface area shall have a minimum four (4) foot unobstructed deck around a minimum of fifty (50) percent of the spa perimeter.

(3) Provide adequate access for cleaning and maintenance of the spa, and for assisting persons in distress.

(4) Decks cannot be more than ten (10) inches below the top of the curb.

(f) **Surface skimmers.** Surface skimmers or overflow gutters shall be provided. The minimum number of surface skimmers required is one (1) skimmer for each fifty (50) square feet or fraction thereof of spa water surface area. Multiple surface skimmers shall be equally spaced. The system shall be designed for thirty (30) gallons per minute per skimmer.

(g) **Air or water jet systems.** Therapy or jet systems shall be independent of the recirculation-filtration and heating systems. In particular, therapy suction outlets shall be separated from filter system outlets sufficiently to ensure no interference with required filter system flow.

(h) **Filtration system inlets.** Adjustable filtration system inlets shall be provided for spas based on a minimum of one (1) for each twenty (20) feet or fraction thereof of spa perimeter. Additional inlets shall be installed if needed to meet flow requirements. Spas with less than twenty (20) feet of perimeter shall have a minimum of two (2) equally spaced adjustable inlets.

(i) **Filtration recirculation.** Spas shall have a minimum of one (1) turnover every thirty (30) minutes. Strainers shall be sized at least twice

the area required in OAC 310:315-7-14. Spa water shall not be allowed to overflow or be piped into another bathing facility unless it is first disinfected and filtered.

(j) **Temperature.** The maximum water temperature for spas cannot exceed 105oF (40.6oC) and this maximum temperature shall be posted pool side. A thermostatic control for the water shall be provided.

(k) **Capacity.** The maximum capacity for public spas is one (1) person per three (3) feet of spa perimeter, or one (1) person per two hundred (200) gallons of water, whichever is less. For spas four hundred fifty (450) gallons or smaller, the maximum capacity is one (1) person per one hundred fifty (150) gallons. The design capacity shall be posted prominently in the area adjacent to the spa.

(l) **Spa contiguous with pool.** Where a spa and a swimming pool share a wall in common, a barrier shall be mounted atop the common wall to discourage patrons from walking on the wall. The barrier shall not form a ladder nor a diving platform nor include any impalement hazard.

[Source: Amended at 26 Ok Reg 2003, eff 6-25-09 ; Amended at 39 Ok Reg 1263, eff 9-11-22]

310:315-7-12. Water recreation attractions

(a) **General.** Water recreation attraction projects require special consultation with the Department in order that consideration can be given to concepts of design variations and to areas where potential problems may exist. In addition to the requirements of this section, compliance is required with all other applicable sections of this chapter. Plans for supervision, attendants, and lifeguards will be an important feature to be considered for water recreation attractions, and shall be presented in the engineering report accompanying plans and specifications.

(b) **Water slides.**

(1) **Recreational water slide.** A recreational water slide facility shall consist of one (1) or more flumes, plunge pool, a pump reservoir, filtration, disinfection, and chemical treatment facilities.

(2) **Water slide plunge pool.** Plunge pools are located at the base of slide flumes. They shall be constructed of concrete or other impervious materials with a smooth slip-resistant finish. The plunge pool design shall be built according to the slide manufacturer's requirements/recommendations and the design engineer of the project or in compliance with the following standards:

(A) The minimum plunge pool operating water depth at the slide flume terminus is three (3) feet. This depth shall be maintained for a minimum distance of ten (10) feet in front of the slide terminus from which point the plunge pool floor may have constant upward slope to allow a minimum water depth of two (2) feet at the base of the steps. The floor slope cannot exceed one (1) foot in ten (10) feet. The plunge pool water depth shall be commensurate with safety and the ease of exit from the plunge pool.

(B) The plunge pool dimension between any slide flume exit or terminus and the opposite side of the plunge pool is a minimum of twenty (20) feet excluding steps.

(C) The slide flume terminus shall be at a minimum depth of six (6) inches below the plunge pool operating water surface level or it may be at the water surface level or up to a maximum of two (2) inches above the water surface level provided the terminal portion of the slide flume is parallel to the water surface for a minimum distance of ten (10) feet. The minimum distance between any plunge pool side wall and the outer edge of any slide flume terminus is four (4) feet. A minimum length of ten (10) feet of slide flume shall be perpendicular to the plunge pool wall at the exit end of the flume(s).

(D) The main drain piping shall be sized to handle one hundred (100) percent of the design flow rate of the filtration system in accordance with 310:315-7-14.

(E) The plunge pool floor shall slope to the main drain(s) and the slope cannot exceed one (1) foot in ten (10) feet.

(F) Plunge pool decks shall meet the following requirements:

(i) have a minimum 10 foot width along the exit side;

(ii) have a minimum six (6) inch high curb; and

(iii) slope (drain) away from the plunge pool unless the curb is located at the outside perimeter of the deck. If the curb is located at the outside perimeter of the deck, the plunge pool deck shall slope to the plunge pool and/or pump reservoir or to deck drains which discharge to the same. All slopes shall be a minimum of three (3) inches in ten (10) feet.

(3) **Pump reservoirs.** Pump reservoirs shall be made of concrete or other impervious material with a smooth slip-resistant finish and shall be connected to the plunge pool by a weir. Pump reservoirs shall be for the slide pump intakes.

(A) The minimum reservoir volume shall be equal to two (2) minutes of the combined flow rate in gpm of all filter and slide pumps.

(B) Pump reservoirs shall be isolated by a locking cover or enclosure and accessible only to authorized individuals.

(C) Access decks shall be provided for the reservoir such that all areas are accessible for vacuuming, skimming, and maintenance. The decks shall have a minimum width of three (3) feet and a minimum slope of three (3) inches in ten (10) feet away from the reservoir. A minimum six (6) inch high curb shall protect the reservoir.

(D) Pump reservoir slide pump intake(s) shall be located in the pump reservoir and designed to allow cleaning without danger of operator entrapment.

(E) The pump reservoir shall have a main drain, complying with OAC 310:315-7-14.

(4) **Slide pump check valves.** Slide pumps shall have check valves on all discharge lines.

(5) **Perimeter overflow gutters or skimmers.** Plunge pools and pump reservoirs shall have perimeter overflow gutter systems and/or skimmers which shall be an integral part of the filtration system.

(A) Perimeter overflow gutter systems shall meet the requirements of OAC 310:315-7-14 except the gutters are not required directly under slide flumes or along the weirs which separate plunge pools and pump reservoirs.

(B) Surface skimmers may be used in lieu of perimeter overflow gutters and shall be appropriately spaced and located according to the structural design. Unless an overflow gutter system is used, a minimum of two (2) surface skimmers each shall be provided in the plunge pool. Skimmers are subject to OAC 310:315-7-14.

(6) **Water slide recirculation-filtration equipment.**

(A) The recirculation-filtration system of water slides shall recirculate and filter a water volume equal to the total water volume of the facility in a period of one (1) hour or less.

(B) Minimum filter area requirements shall be twice the filter areas specified for the recirculation rate stipulated in OAC 310:315-7-15.

(C) Any filtration system pump which takes suction directly from the plunge pool and reservoir shall have a minimum eight (8) inch diameter hair and lint strainer, meeting the requirements of OAC 310:315-7-14 on the suction side of the pump.

(7) **Water slide chemical feed equipment.** Feeders for pH adjustment complying with OAC 310:315-7-16 and capable of meeting the feed rate for the specific installation shall be provided.

(c) **Water amusements, wave pools, and tube rides.** The recirculation-filtration system of water amusements, wave pools, and tube rides shall be capable of a minimum of one (1) turnover every six (6) hours.

[Source: Amended at 26 Ok Reg 2003, eff 6-25-09 ; Amended at 39 Ok Reg 1263, eff 9-11-22]

310:315-7-13. Chemicals and chemical storage

(a) **Chemical storage and equipment.** For chemicals necessary in water treatment, disinfection, and pH control, provision shall be made for dry storage of at least a two (2) weeks supply. Equipment shall be provided for batch preparation of chemicals sufficient for twenty-four (24) hours feeding.

(b) **Storage room marking.** All rooms or areas used for storage of pool chemicals shall be plainly marked on the outside door. This may be done as follows:

(1) A sign stating "POOL CHEMICALS".

- (2) A sign approved by the local fire officials which indicates that the contents are potentially dangerous.

[Source: Amended at 39 Ok Reg 1263, eff 9-11-22]

310:315-7-14. Recirculation system

(a) General considerations.

- (1) A circulation system shall be provided which will include pumps, hair-catcher, and filters, together with all necessary piping connections to the inlets and outlets of the pool, including features, such as the water heater, chlorinator, and suction cleaner, etc. The entire system and all component parts of swimming pools shall be designed to provide a minimum of three (3) replacements of the bathing water volume every twenty-four (24) hours (four (4) turnovers are recommended), with maximum frictional resistance. At pools and spas with skimmers, the required skimmer flow, rather than turnover, may determine the minimum flow. Design is based on main drain flow at thirty (30) percent of the total recirculation, and thirty (30) gpm through each skimmer. This is represented as $0.3Q + 30n = Q = \text{total recirculation flow rate}$ and $n = \text{number of skimmers}$. (Main drain flow is $0.3Q$.) These criteria, plus the maximum allowable filter flux (15 gpm/ft² for rapid sand filters) and the maximum total dynamic head loss calculated assuming a "dirty" filter ready for backwash, comprise the basic design requirements for pools and spas.
- (2) A collector tank or other means for accommodating surge capacity shall be provided for all pools using overflow gutters connected to the recirculation system.

(b) Pumps.

- (1) A pump which will develop good vacuum must be used. The pump and piping at swimming pools shall be of such capacity as to provide for a turnover of pool water in at least eight (8) hours. When pressure filters are used, pumps must be designed to pass the required volume under the maximum head which may develop in the filters.
- (2) The pump shall have adequate capacity to provide the design recirculation flow rate at maximum calculated head loss, and 15 gpm/ft² of sand filter area during backwash; the pump should be located below the water level of the pool when feasible, to avoid air-lock. Should it be necessary to locate the pump above the water level of the pool, a check valve shall be provided on the suction side of the pump unless a self-priming pump is furnished.
- (3) If the filter is located above the water level of the pool, then valves shall be provided in the inlet and discharge lines which can be closed when the filter is not in use.
- (4) A filtration pump equipped with a device that disables the pump operation shall be equipped with both an audible and visual alarm to alert the operator to the condition.

(c) **Strainers.** The recirculation system shall include a strainer to prevent hair, lint, and other solids from reaching the pump and filters. Strainers shall be corrosion-resistant with openings not more than one-eighth (1/8) inch in size and shall be readily accessible for frequent cleaning. Larger openings for strainers will be considered only on a trial basis. At least two (2) baskets, or screens, must be provided. The area of strainer openings shall be at least four (4) times the cross-sectional area of the connecting pipe. A compound pressure gauge shall be installed to measure the pressure between the pump and the hair and lint strainer. Where filter systems are located above the pool water level, a standard vacuum gauge is acceptable.

(d) **Vacuum cleaner.** Vacuum cleaner facilities, either portable or installed integrally in the pool piping system for the operation of a vacuum cleaner, shall be provided. Piping and hose shall be required to produce not more than fifteen (15) feet total head loss at the pump, while moving four (4) gallons per minute per linear inch of cleaner head. All pools shall be designed with pipes for vacuum cleaning facilities integrally with the pool piping or portable facilities will be provided. The mixture of water and sediment from a suction cleaner may, in the case of outdoor pools subjected to heavy dust loads, be discharged to an approved waste treatment system. The discharge from suction cleaners used in cleaning indoor pools, which are not subjected to heavy dust loads or in which sedimentation is slight, may be returned to the pool through the filter system. Any point source discharge must comply with the requirements of OAC 310:315-5-2.

(e) **Water heater.** Indoor pools operated during the colder months shall be provided with a heater for the pool water. Introduction of steam directly into the pool or the use of heating coils placed directly in the pool is prohibited. Such a heater may be designed for use with steam or hot water and ample surface for heat interchange must be provided. Automatic thermal control is desirable. The heater parts must be easily removable for cleaning. A check valve shall be installed between the filter and the inlet side of the heater. On all heated pools, a fixed thermometer shall be placed on the recirculation line immediately downstream from the heater after blending and another on the return line from the pool. Thermometers shall be accessible and have a Fahrenheit scale.

(f) **Piping system.** The determination of sizes of pipe, fittings, and valves on the complete main pump suction line from the swimming pool shall be based upon a rate of friction losses for piping of not more than six (6) feet per one hundred (100) feet of pipe based upon the Hazen-Williams formula for fifteen (15) year old piping. All piping on the discharge side of the pump for filtration and to the point for discharge of backwash water from the filter plant shall have pipe sizes determined on a basis of friction losses which shall be not more than twelve (12) feet per one hundred (100) feet and the velocity in any pipe shall not exceed ten (10) feet per second. Pipe selection shall be made based upon the Hazen-Williams formula for fifteen (15) year old pipe. In the determination of pipe sizes required, the criterion which would call for the largest pipe size shall govern. All pool piping shall be supported by piers or other substantial means to preclude possible settlement which will either

provide dirt traps or air pockets and a condition which might result in rupture of the lines. All plastic pipe used shall bear the approval seal of the National Sanitation Foundation. All piping shall be labeled or color coded and all valves shall be labeled.

(g) **Rate-of-flow indicator.** Every public swimming pool distribution system including those for wading pools shall be provided with an accurate and durable rate-of-flow indicator, installed in accordance with the manufacturer's recommendations and with the required uniform distance upstream and downstream for accurate response. In pressure sand filter installations, a rate indicator shall be provided and located on the filter inlet line so as to record both filtration and backwashing rates. It shall be calibrated for and provided with an easily readable scale reading in gallons per minute, and shall have a range at least ten (10) percent below the required filtration rate and ten (10) percent above the required backwash rate. It shall be accurate within ten (10) percent of true flow. In a diatomite type filter installation, a rate-of-flow indicator can be located wherever convenient to visibly indicate the flow rate, preferably in the filter effluent line.

(h) **Outlets.**

(1) All pools must be provided with an outlet at the deepest point to permit the pool to be completely and easily drained. Each public bathing place subject to licensure by the Department permitted after September 1, 2009 that does not utilize indirect suction shall be provided with an unblockable suction outlet as defined in American National Standards Institute (ANSI) A112.19.8-2007, or have multiple outlets, placed a minimum of 3 feet apart measured from center point of the drain cover/grate. Outlet openings of the grating in the floor of the pool shall be at least four (4) times the area of the discharge pipe. Each submerged suction outlet shall be fitted with a cover/grate that conforms to the entrapment protection standards of the ANSI A112.19.8-2007 performance standard. Submerged suction outlet cover/grate shall be installed according to the manufacturer's installation instructions. Field fabricated sumps shall be constructed according to ANSI A112.19.8-2007. Openings in the drain cover(s) shall be designed for a maximum velocity of one and one-half (1-1/2) feet per second. The outlet shall be marked by a dark colored stripe outlining the main drain, disk, or circle unless the plate or grating is of a contrasting color. Multiple outlets to meet this requirement shall be provided where the width of the pool is more than thirty (30) feet. In such cases, outlets shall be spaced not more than twenty (20) feet apart and not more than fifteen (15) feet from the side walls. A line shall run from the main drain(s) to a manifold connected to the inlet of the hair and lint strainer. A separate line shall run from each skimmer to the manifold. A valve that will permit adjustment of flow shall be installed in each line carrying water from the pool. Where provided, the vacuum line shall connect to the manifold through a suitable valve. Vacuum lines shall have a cover in place when not in use.

(2) After September 1, 2009 any existing pool licensed by the Department that plans modifications relative to the replacement or modification of submerged suction outlet cover/grates, or the addition of systems or devices intended to minimize the risk of physical or suction entrapment, shall submit a scope of work. Although a permit is not required, the Department will inspect the replacement or modification before the pool is refilled with water. At a minimum the scope of work proposal shall include the make and model of all equipment to be installed. Documentation shall be provided that all cover/grates conform to the entrapment protection standards of the American Society of Mechanical Engineers/American National Standards Institute (ASME/ANSI) A112.19.8-2007. Additionally, the modification shall incorporate at least one of the following devices or systems relative to prevention of suction entrapment:

- (A) A safety vacuum release system which ceases operation of the pump, reverses the circulation flow, or otherwise provides a vacuum release at a suction outlet when a blockage is detected, that has been tested by an independent third party and found to conform to American Society of Mechanical Engineers/American National Standards Institute (ASME/ANSI) A112.19.17 or American Society for Testing Materials (ASTM) standard F2387;
- (B) A suction-limiting vent system with a tamper-resistant atmospheric opening;
- (C) A gravity drainage system that utilizes a collector tank;
- (D) An automatic pump shut-off system;
- (E) A device or system that disables the drain; or
- (F) An unblockable suction outlet as defined in American National Standards Institute (ANSI) A112.19.8-2007, multiple outlets placed a minimum of 3 feet apart measured from center point of the drain cover/grate, or any other system determined by the department to be equally effective as, or better than, the systems described in (1) through (5), at preventing or eliminating the risk of injury or death associated with pool drainage systems.

(i) **Inlets.** Multiple inlets shall be provided and shall be so spaced that each inlet will serve a linear distance of not more than fifteen (15) feet, provided that the distance from side wall or corner to adjacent inlet in an end wall shall not exceed five (5) feet. At least four (4) inlets are required at pools of any size, and more may be required at recessed features (stairs, seats, etc.) or in pools with irregular shapes, to achieve satisfactory disinfectant distribution. On pools less than sixteen hundred (1600) square feet in area, only directional (eye-ball type) inlets are permitted. In pools with surface area greater than sixteen hundred (1600) square feet or length in excess of sixty (60) feet, inlets shall be placed at fifteen (15) feet intervals around the entire perimeter. In any case, an adequate number of inlets shall be provided, properly spaced, and located to accomplish complete and uniform recirculation and maintenance of uniform disinfectant residual at all times. Inlets shall be a minimum of eighteen (18) inches below the water surface. Each inlet

shall be designed as an orifice subject to adjustment or at least must be provided with an individual gate valve to permit adjustment of water volume and/or velocity to obtain a balanced circulation. In the event recessed stairs are used, an inlet at the stairs must be provided to assure adequate circulation.

(j) **Overflow gutters.** Overflow gutters are required on all pools having a surface area or more than twenty-four hundred (2400) square feet. Pools having a surface area of twenty-four hundred (2400) square feet or less shall be provided either with overflow gutters or skimmers. Overflow gutters shall extend completely around the pool except at steps or recessed ladders, and shall be designed to assure that water does not wash back into the pool from the gutter. Guttered pools shall be designed for at least some water to be overflowing into the gutters or into surge weirs at all times, not just when the pool is at full bather capacity, for continuous removal of surface oils and debris. The gutter, drains, and piping shall be designed to rapidly remove overflow water caused by recirculation displacement, wave action, or other causes produced from the maximum pool bathing load. The opening into the gutter beneath the coping shall be not less than four (4) inches, and the interior of the gutter shall be not less than four (4) inches wide with a depth of at least three (3) inches. Where large gutters are used, they shall be designed to prevent entrance or entrapment of bathers' arms or legs. The overflow edge shall be rounded and shall not be thicker than two and one-half (2-1/2) inches for the top two (2) inches. Prefabricated gutter and return systems will be evaluated on a case-by-case basis.

(k) **Gutter outlets.** Drainage outlets shall be provided at least every fifteen (15) feet and the gutter bottom may be level, or preferably pitched slightly, to these outlets. Outlet pipes shall have a minimum inside diameter of two (2) inches. Outlets shall be covered by gratings. Angle gutter drains, which are not as subject to stoppage, are recommended. Drainage from overflow gutters may be discharged to sewers (without direct connection), or connected to the recirculation system through a properly designed surge tank or through other approved surge capacity designs, such as deep gutter channels. The gutter, drains, and return piping to the surge tank shall be designed to rapidly remove overflowing water caused by recirculation displacement, wave action, or other causes produced from the maximum pool bathing load. The outlet fittings shall have a clear opening in the grating at least equal to one and one-half (1-1/2) times the cross-sectional area of the outlet pipe. Open, roll-over, semi-recessed, or overflow gutters recessed in the side wall of the pool may be used, provided the design is such as to minimize accidents and to enable the gutter to be easily cleaned.

(l) **Skimmers.** Skimming devices are permitted in lieu of gutters on swimming pools with not more than twenty-four hundred (2400) square feet of surface area, providing approved handholds are installed. At least one (1) skimming device shall be provided for each six hundred (600) square feet or fraction thereof. The required surface skimmers shall be located at least thirty (30) feet apart, measured horizontally. Where used, skimming devices shall be built into the pool wall, shall develop sufficient velocity on the pool water surface to induce floating oils and wastes into the skimmers from the entire pool area, and shall meet the following

general specifications:

- (1) The piping and other pertinent components of the skimmers shall be designed for a total capacity of at least fifty (50) percent of the required filter flow of the recirculation system, and no skimmer shall be designed for a flow-through rate of less than thirty (30) gallons per minute.
- (2) The skimmer weir shall be automatically adjustable and shall operate freely with continuous reaction action to variations in water level over a range of at least four (4) inches. The weir shall operate at all flow variations as described in the above paragraphs. The weir shall be of such buoyancy and design as to develop an effective velocity.
- (3) An easily removable and cleanable basket or screen through which all overflow water must pass shall be provided to trap large solids.
- (4) The skimmer shall be provided with a device to prevent air-lock in the suction line. If an equalizer pipe is used, it shall provide an adequate amount of water for pump suction should the water of the pool drop below the weir level. If any other device or arrangement is used, a sufficient amount of water for pump suction shall be assured. When the equalizer pipe is used, it shall be sized to meet the capacity requirements of the filter and pump and shall in no case be less than two (2) inches in diameter. This pipe shall be located at least one (1) foot below the lowest overflow level of the skimmer. It shall be provided with a valve or equivalent device that will remain tightly shut under normal operating conditions but will automatically open when the skimmer becomes starved. Equalizer openings shall comply with the drain cover provisions of OAC 310:315-7-14(h).
- (5) The skimmer shall be of sturdy corrosion-resistant materials.
- (6) In addition to the above requirements, the skimmers must be listed as currently approved by the National Sanitation Foundation (NSF) Standard 50 - Circulation System Components and Related Materials for Swimming Pools, Spas/Hot Tubs.

[Source: Amended at 26 Ok Reg 2003, eff 6-25-09 ; Amended at 39 Ok Reg 1263, eff 9-11-22]

310:315-7-15. Filters

(a) **General.** The filter plant shall be provided with influent and effluent pressure gauges for each tank, backwash sight glass, air relief valves, and rate-of-flow indicator, as provided in this chapter. All filters must be approved and listed by the National Sanitation Foundation. In vacuum filter installations where the circulating pump has a rating of two (2) horsepower or higher, an adjustable high vacuum automatic shutoff shall be provided to prevent damage to the pump by cavitation. A compound gauge shall be installed in the pump suction line, between the pump and hair catcher (see 310:315-7-14 for exception). The sight glass may be omitted if the backwash discharge can be clearly viewed from the backwash control valves. The filter plant shall be provided with fixed piping and valving to permit the functions of filtering to pool or

backwashing to approved waste disposal with the battery as a whole or any unit operated singly. The filter plant shall be provided with means for draining all filter units and piping, so that all parts of the system may be completely drained to prevent damage from freezing. Pressure tanks should be supported by jack legs or other supports to give a free movement of air under each tank and to permit access for painting. Where dissimilar metals are used in the filters which may set up galvanic electric currents, the filter plant design must resist electrolytic corrosion. The filters shall be designed in such a manner that they may be easily disassembled with allowances made for adequate working space above and around the filter to allow the removal and replacement of any part and for other maintenance.

(b) **Filters, sand, conventional low-rate.** This chapter shall apply where applicable to either gravity or pressure sand filters, designed for a filtration rate not to exceed three (3) gallons per square foot per minute. Filter tanks shall be designed with a factor of safety of four (4) in relation of working pressure to ultimate strength. The filter bed shall consist of suitable grades of filter sand and supporting bed of graded gravel or other porous material which shall serve to support the filter bed and distribute both filtered and backwash water uniformly. The supporting bed shall consist of graded gravel or other material and shall support not less than twenty (20) inches of filter media. The filter media shall consist of silica sand or other durable, inert material. The filter media shall be free of clay and limestone, with effective size between 0.35 and 0.65 millimeter and uniformity coefficient not exceeding 1.75. The minimum freeboard to the draw-off point of backwash water shall be not less than twelve (12) inches above the normal level the top of the filter bed. The minimum backwash rate shall be not less than twelve (12) gallons per square foot of filter bed per minute. Where anthracite coal or other filter media are employed, the freeboard shall be adequate to prevent the media being carried off to waste when the filter bed is backwashed at a rate adequate to carry off foreign material filtered from the water. The freeboard and the rate of backwash shall be the subject of individual design, based upon specific gravity of the media. The under-drain system shall be constructed of material which is corrosion resistant and enduring and the design of the system shall be such that uniform collection of the filtered water and distribution of the backwash water is effected over the entire filter bed area. Unless other effective means are provided of distributing the water entering the unit above the filtering media, the filter shall be equipped with a baffle plate for this purpose. Each conventional sand and gravel filter unit shall be provided with an access opening of not less than a standard eleven (11) x fifteen (15) inch manhole and cover.

(c) **Filters, sand, pressure high-rate.** High rate pressure sand filters are acceptable provided the filter-pump combination is designed and sized to limit the filtration rate to a maximum of fifteen (15) gallons per square foot per minute. The filter media shall consist of silica sand or other durable, inert material, free from clay and limestone and with an effective size between 0.40 and 0.55 millimeters and a uniformity coefficient not exceeding 1.75. The minimum depth for filter sand shall be twenty (20) inches for rapid rate filters and twelve (12) inches for

high-rate filters.

(d) **Filters, diatomite.** These may be of either pressure or vacuum type. The design filter rate shall not exceed two and one-half (2-1/2) gallons per minute per square foot of effective filter area. If an approved body feed is not used, the rate shall be reduced to two (2) gallons per minute per square foot of effective filter area. For pools with surface area of sixteen hundred (1600) square feet or more, an approved body feed is required. The determination of the filter area shall be made on the basis of a true and effective supported septum surface. In the case of fabric septums, the area computation will be made on the basis of measurements of the septum support in a reasonably constant plane. Area allowances shall not be granted for folds in the septum fabric or deviations in the septum surface which would easily bridge. The filter cycle of the diatomite filter shall not be less than seventy-two (72) hours of continuous operation before cleaning. This shall not apply to the initial operation of a pool, but only the operation where the pool water at least meets the conditions of water quality given in OAC 310: Chapter 320. A precoat of filter aid that evenly covers the filter elements must be used before placing the equipment into initial operation and after each cleaning. The amount of filter aid shall be selected to provide at least the same protection to the filter septum as that given by 0.1 pound of diatomaceous earth filter aid per square foot of filter area where body feed is employed, or 0.15 pound per square foot where no body feed is used. The equipment shall be so arranged that during the precoating the effluent shall be refiltered or discharged to an approved waste facility without passing into the pool until the effluent is clear of suspended matter. Slurry feeders shall include an agitator and positive feed pump. Where provided, the body feeding equipment designed for feed of filter aid to the filter influent shall have a rate capacity to feed at a reasonably constant rate within a calibrated range. The equipment will have capacity to operate at the maximum feed rate of ten (10) parts per million at the design filter rate for a period of twenty-four (24) hours without refilling. The tank containing the filter elements shall be constructed of steel, plastic, or other suitable material which will satisfactorily provide resistance to corrosion, with or without coating. Pressure filters shall be designed for a working pressure equal to the shutoff head of the pump, with a factor of safety of four (4). Vacuum filters shall be designed to withstand the pressure developed by the weight of the water contained therein and closed vacuum filters shall, in addition, be designed to withstand the crushing pressure developed under a vacuum of twenty-five (25) inches of mercury, both with a safety factor of three and one-half (3-1/2). The septa or elements which support the filter aid shall be of corrosion resistant material and shall be provided with openings the minimum dimensions of which shall not be greater than 0.005 inches, or as specified in the National Sanitation Foundation Standards for Diatomite Filters. The septa shall be constructed to be adequately resistant to rupture with the maximum differential pressure between influent and effluent of not less than the maximum pressure which can be developed by the circulating pump and of adequate strength to resist any additional stresses developed by the cleaning operation.

(e) **Surface skimmer filters.** Skimmer filters are acceptable on pools less than sixteen hundred (1600) square feet surface area, and on wading pools. The unit shall be designed to filter at a rate of two (2) gallons per minute per square foot and shall be equal to the design capacity of the skimmer. All requirements in 310:315-7-15 are applicable to skimmer filters.

(f) **Cartridge filters.** Cartridge filters are acceptable if they conform to the following criteria:

(1) The maximum flow through the filter is not greater than 0.375 gpm/square foot.

(2) A sump or other means of collecting water and wastes drained from the filter, or from the filter elements during cleaning, is provided, and discharges into an approved wastewater collection system.

(g) **Filter operating instructions.** At the time of final inspection of the swimming pool construction, there shall be provided to the operator two (2) sets of filter operation instructions, for the operator and owner, which refers to valve operation by number. Each valve shall be equipped with a numbered metal, plastic, or other durable tag permanently attached by a chain or otherwise permanently secured.

[Source: Amended at 39 Ok Reg 1263, eff 9-11-22]

310:315-7-16. Disinfection and pH control

(a) **Chlorinator or other disinfection feeder.** The pool shall be equipped with a chlorinator or other residual disinfectant feeder which meets the following requirements:

(1) **Feeders.** All chemicals and chemical solutions shall be added to the pool water recirculation flow using a feeder that is acceptable to the Department.

(2) **Construction and materials.** It shall be of sturdy construction and materials which will withstand wear, corrosion, or attack by disinfectant solutions or vapors and which are not adversely affected by repeated regular adjustments or other conditions anticipated in the use of the device. Feeders requiring field maintenance or cleaning are required to be easily disassembled. The design and construction shall be such as to preclude stoppage from chemicals used or foreign material. The feeder shall incorporate failure-proof features so that the disinfectant cannot feed directly into the pool, the pool piping or pool enclosure following any type of failure of the equipment or its maintenance. Super-chlorination shall be accomplished by the addition of calcium hypochlorite, sodium hypochlorite, or other approved chlorine compounds. Solution chemical feeders and flow through chemical feeders need to be listed as meeting the appropriate National Sanitation Foundation Standard and bear the NSF seal of approval.

(3) **Sizing of disinfection equipment.** Solution and gas feeders shall be capable of supplying the equivalent of 1.5 pounds of available chlorine in eight (8) hours, for each ten thousand

(10,000) gallons of pool capacity. Feeders used with organic chlorine compounds or other stabilized chlorine shall be capable of supplying the equivalent of 0.5 pounds of available chlorine in eight (8) hours, for each ten thousand (10,000) gallons of pool capacity and the cyanurate concentration in the pool shall be at least thirty (30) mg/1 and does not exceed one hundred (100) mg/1.

(4) **Erosion type feeders.** Erosion type chlorinators using stabilized chlorine compounds shall have a flow meter, calibrated valve, or other device acceptable to the regulatory authority to determine the rate of flow of water through the chlorinator. The device can be either calibrated in pounds chlorine feed per unit of time or calibrated in gallons of flow per unit of time with an attached chart to convert the water flow rate to pounds of chlorine feed. The feeder shall be capable of continuous delivery within ten (10) percent of the dosage setting.

(5) **Solution type feed pumps.** The pump shall have a calibrated rate control and be adjustable from zero (0) to full range. The feeder shall have the capability of feeding the required dosage using a two and one-half (2-1/2) percent solution.

(6) **Chlorination for normal operation.** Chlorinators shall be installed per the manufacturer's recommendation. Where super-chlorination is accomplished by chemical feeders, the solution shall be introduced before the sand filter. When the disinfectant is introduced at the suction side of the pump, a device or method shall be provided to prevent air-locking of the pump or recirculation system.

(7) **Chlorination to prevent backflow.** The chlorinators shall be designed to prevent the backflow of water into the chlorine container.

(8) **Compressed chlorine gas.** When compressed chlorine gas is used, the following additional features are required:

(A) The chlorine and chlorinating equipment are located either out-of-doors or in a separate well-ventilated room. Such rooms should preferably be above ground and provided with vents near the floor which terminate outdoors. The door of the room shall have a viewport, not open to the pool enclosure, and open outward. When located out-of-doors, the cylinders shall be securely anchored to prevent them from falling over and surrounded by a six (6) foot high, woven wire fence, or equivalent, and a locked gate.

(B) Where gaseous chlorine equipment is provided below grade in a filter room, or in any part of a building which provides housing, the mechanical proportioning device and cylinders of chlorine shall be housed in a reasonably gas-tight, corrosion-resistant, and mechanically vented enclosure. Air-tight duct work from the bottom of the enclosure to atmosphere in an unrestricted area and a motor-driven exhaust fan capable of producing at least one (1) air change per minute is required. Automatic louvers of

good design near the top of the enclosure for admitting fresh air are required. An opening at least eighteen (18) inches square, glazed with clear glass, and artificial illumination shall be provided in an amount such that the essential performance of the equipment may be observed at all times without opening the enclosure. The floor area of the enclosure shall be of adequate size to house the chlorinator, fan, scales, and one (1) extra chlorine cylinder. (C) Electrical switches for the control of artificial lighting and ventilation shall be on the outside of the enclosure adjacent to the door.

(D) The chlorine equipment shall be of rugged design capable of withstanding wear without developing leaks.

(E) Chlorine cylinders shall be on platform scales and anchored to prevent their falling over. An approved and accessible chlorine cylinder valve stem wrench is required.

(F) The chlorine feeding device shall be designed so that during accidents or interruptions of the water or electric power supply, the chlorine feed will shut off automatically and leaking chlorine gas will be vented outdoors. The device shall be capable of delivering chlorine at its maximum rate without releasing chlorine gas to the atmosphere.

(G) A gas mask and fresh replacement canister designed for use in a chlorine atmosphere and of a type approved by the U.S. Bureau of Mines is required.

(H) The gas mask and canister shall be kept in a closed cabinet accessible without a key and located well away from the gas chlorinator or the room where the gas chlorinator is installed, such that it may easily and safely be reached and be put on out of range of possible gas fumes.

(I) Canister-type gas masks are suitable only with low concentrations of chlorine gas. In the event of a serious leak, the fire department shall be called.

(b) **Brominators or other disinfectant devices.** Where brominators or other disinfectant devices are proposed, the design with respect to equipment, maintenance, and safety shall be in accordance with the applicable provisions of 310:315-7-16.

(c) **Prohibitions and exceptions.** Hand feeding. Hand feeding of disinfectants to maintain normal disinfectant residuals is not acceptable; however, the addition of chlorine solution by hand may be used periodically to super-chlorinate for algal control. Super-chlorination shall be accomplished at times when the pool is closed and a safe range of chlorine disinfection shall be attained before patrons are permitted to return to the pool.

(d) **Electrolytic chlorine generators.** The electrolytic chlorine generator shall be of sturdy construction and of materials which will withstand continual usage typical of public pools and the feed rate shall be adjustable from zero (0) to full range. The generator shall be capable

of feeding a chlorine dosage of one and one-half (1-1/2) pounds of available chlorine in eight (8) hours for each ten thousand (10,000) gallons of pool capacity. The generator unit shall be UL approved or NSF listed, and a failure-proof electrical interlock with the recirculation pump shall be incorporated into the system such that the generator operates only during recirculation pump operation. The generator units shall be installed according to the manufacturer's instructions and the saline content of the pool water shall be maintained in the required range specified by the manufacturer. Ventilation and housing shall meet the requirements of 310:315-7-16 for compressed chlorine gas.

(e) **Feeders for pH adjustment.** Feeders for pH adjustment shall be provided on all pools using gaseous chlorine for disinfection. They shall be adjustable from zero (0) to full range, and shall meet the requirements of 310:315-7-16. When soda ash is used for pH adjustment, the maximum concentration of soda ash solution to be fed shall not exceed one-half (1/2) pound soda ash per gallon of water. Feeders for soda ash shall be capable of feeding a minimum of three (3) gallons of the above soda ash solution per pound of gas chlorination capacity. The minimum size of the solution reservoir(s) shall not be less than fifty (50) percent of the maximum daily capacity of the feeder. The solution reservoir(s) shall be marked to indicate contents.

[Source: Amended at 39 Ok Reg 1263, eff 9-11-22]

310:315-7-17. Testing equipment

(a) **Test kits.** Test kits are required at all pools to determine free active chlorine and total or combined available chlorine (using DP.D. reagents), or bromine, total alkalinity, calcium hardness, and pH.

(b) **Cyanuric acid test kits.** Cyanuric acid test kits are required at all pools in which cyanurates or cyanuric acid stabilized chlorine products are used. The concentration of cyanuric acid in the pool water shall not exceed one hundred (100) ppm.

(c) **Sodium chloride test kits.** Sodium chloride test kits are required at all pools which utilize accepted electrolytic chlorine generators which require sodium chloride concentrations in the pool water. The concentration of sodium chloride in the pool water shall be maintained in the range specified by the electrolytic chlorine generator manufacturer.

(d) **Thermometers.** All facilities heating the water to temperatures over 90 °F shall maintain on the premises, in the pool or pool enclosure, a thermometer to take the temperature of the water. Those facilities requiring the ambient air temperature to be monitored shall maintain a suitable thermometer with a Fahrenheit scale at deck level in the pool room to monitor air temperature.

(e) **Test kits, spas.** In addition to fulfilling the foregoing requirements of this section, spa facilities shall be equipped to test for concentrations of total dissolved solids, copper, and iron.

310:315-7-18. Lighting

(a) **Artificial lighting.** A complete system of artificial lighting shall be provided for all pools, rest rooms, toilet rooms, shower rooms, store

rooms, and other areas of public bathing places.

(b) **Arrangement.** The arrangement and design of the lighting shall be such that attendants may clearly observe every part of the pool, spring boards, towers, floats, or other appurtenances. The lighting system of outdoor pools shall be designed with sources of illumination located so as to prevent insects attracted by the lights from falling into the water.

(c) **Underwater lights.** Where underwater lighting is used, it is recommended that the minimum illumination be eight (8) foot-candles at any point in the pool. Such lights shall be spaced to provide illumination so that all portions of the pool and pool bottom may be seen without glare.

(d) **Area lighting.** Area lighting shall provide a minimum of ten (10) foot-candles at all points on the deck.

(e) **Interior rooms.** All rooms shall be provided with sufficient light so that all sections may be observed and are easily visible for cleaning purposes. A minimum of ten (10) foot-candles shall be provided in all interior rooms.

(f) **Emergency lighting.** Emergency lighting shall be provided at all indoor bathing facilities, in accordance with the requirements of the current edition of the NFPA 101 Life Safety Code, unless assurance can be provided that the facility will always be locked and not used at night.

[Source: Amended at 39 Ok Reg 1263, eff 9-11-22]

310:315-7-19. Electrical requirements

(a) **Wiring standards.** All wiring in connection with requirements for a swimming pool for lighting or power shall conform with the National Electrical Code of the National Underwriters Laboratories.

(b) **Grounding.** In addition to the grounding requirements for electrical equipment and circuits by the National Electrical Code, all metal water and other metal piping to and from the public bathing place, including inlet and outlet pipes, shall be metallically bonded together and adequately connected to the same grounding electrode used to ground the neutral conductor of the electrical system. Where metal fence is used, it shall be grounded at both sides of the entrance gate.

(c) **Electrical devices.** All electrical devices such as portable announcing systems, radios, and soft drink dispensers that might be used around the pool deck and immediate environment shall be prohibited within reach of bathers. Further special grounding of such fixtures must be provided.

(d) **Overhead conductors.** No electrical wiring shall pass overhead within twenty (20) feet of the pool enclosure.

(e) **Ground fault interrupter type circuit breakers.** Ground fault interrupter type circuit breakers shall be provided for all outlets within fifteen (15) feet of the pool and those located in the bathhouse and pump room.

(f) **Underwater light assemblies.** All underwater light assemblies shall comply with 310:315-7-19 and shall be connected in one of the following manners.

- (1) Using a low-voltage twelve (12) volt system with three hundred (300) watt or less underwater light(s).
- (2) New one hundred-ten (110) volt systems will have an approved junction box (deck box) in excess of eight (8) inches above the deck level and must have a ground fault interrupter installed at the main panel.
- (3) All existing underwater lighting systems using one hundred-ten (110) volts shall have a ground fault interrupter installed at the main panel.
- (4) Low water cutoffs are strongly recommended.

APPENDIX A. DIVING AREA

Figure 1

Figure 1

[Source: Added at 39 Ok Reg 1263, eff 9-11-22]

[Source: Added at 39 Ok Reg 1263, eff 9-11-22]

APPENDIX C. POOL DESIGN

Figure 1

Figure II - A

[Source: Added at 39 Ok Reg 1263, eff 9-11-22]

APPENDIX D. COMPUTING CAPACITY REQUIREMENTS FOR INDOOR PUBLIC SWIMMING POOLS AND OUTDOOR SWIMMING POOLS

Figure 1

(1) Indoor public swimming pools and outdoor swimming pools with average required walk area, sun-bathing area, etc.:

$$\text{Number of persons} = \frac{\text{Swimming Area}}{15} + \frac{\text{Diving Area}}{24}$$

(2) Deduct three hundred (300) square feet for each installed diving board from the diving area.

(3) The entire surface area shall be considered "Swimming Area" for non-diving pools having a uniform bottom slope (maximum slope: one (1) foot vertical to twelve (12) feet horizontal) from the Shallow end to the deepest part of the pool.

CHAPTER 320. PUBLIC BATHING PLACE OPERATIONS

[Authority: 63 O.S., §§ 1-1013 et seq.]

[Source: Codified 12-31-91]

SUBCHAPTER 1. GENERAL PROVISIONS

310:320-1-1. Purpose

The Public Bathing Place Operational Regulations are minimum design criteria and will be used as such by the State Department of Health. Nothing in these operational regulations should be construed as preventing the consulting engineer from recommending, or the reviewing authority from approving, more effective treatment where local conditions dictate such action.

310:320-1-2. Definitions

"Adjustable inlet" means a fitting mounted in the pool wall and connected to the return piping from the recirculation system that is directionally adjustable or a fitting mounted in the pool floor and connected to the return piping from the recirculation system that has a means of flow adjustment.

"Air induction system" means a system whereby a volume of air (only) is induced into hollow ducting built into a spa floor, bench, or other location. The air induction system is activated by a separate air power unit (blower).

"Attendant" means any person capable of providing rescue who is responsible to the management.

"Backwash" means the process of thoroughly cleansing the filter media and/or elements by reverse flow.

"Backwash cycle" means the time required to thoroughly backwash the filter media and/or elements and the contents of the filter vessel.

"Bathing load" means the maximum number of persons allowed in the pool enclosure at one time.

"Department" means the Oklahoma State Department of Health and authorized representatives.

"Diatomaceous earth (DE) filter" means a filter that utilizes a layer of filter aid as its filter medium that periodically must be replaced.

"Filter" means a device that separates solid particles from water by recirculating it through a porous substance (a filter medium or element).

"Filter aid" means a type of finely divided medium used to coat a septum type filter, usually DE, perlite, or similar material.

"Filter media" means a finely graded material (such as sand) which removes filterable particles from the water.

"Hydrotherapy, whirlpool, or spa pool" means a public pool used exclusively in conjunction with high velocity air and/or high velocity water recirculation systems, utilizing hot, cold, or ambient temperature water. These pools will be referred to as spas.

"Individual therapy units" means tanks which are designed for the therapeutic treatment of one individual at one time and are drained and cleaned after each individual use. Individual therapy units are not considered public bathing places.

"Ladders" means a series of vertically separated treads or rungs either connected by vertical rail members or independently fastened to an adjacent vertical spa/pool wall.

"Open to the general public" means not restricted to tenants or guests.

"Overflow system" means the term overflow system encompasses perimeter type overflows, surface skimmers, and surface water collection systems of various design and manufacture. The water line shall be established by the height of the overflow rim or the midpoint of the skimmer channel.

"Perimeter overflow gutter" means a trough or gutter around the pool walls with the overflow lip effecting a skimming action to clean the pool water surface.

"Pool deck" means the unobstructed area around the outside of the pool curb, diving boards, diving towers, and/or pool slides.

"Pool floor" means the interior bottom pool/spa surface and consists of that surface from a horizontal plan up to a maximum of a 45° slope.

"Pool turnover" means the circulation of a quantity of water equal to the pool volume through the filtration system.

"Portable pool" means a shallow pool, with depth not exceeding 4.5 feet, intended only for swimming instruction, which can be quickly erected, used for an instruction period then dismantled and moved to another location.

"Private pool" means a pool maintained by an individual for the use of their family and friends, with no other formal admission requirement.

"Public bathing place" or "public pool" means *all entirely artificially constructed wading pools, swimming pools, bathhouses used collectively by a number of persons for wading, swimming, recreative, or therapeutic bathing, together with all sanitary facilities, bathing suits, buildings, equipment, and appurtenances pertaining to such bathing places; provided, that such term shall not apply to those public or semipublic baths where the main object is the external cleansing of the body, to bathing places maintained by an individual for the use of family and friends, or to bathing places owned or managed by a group or association of the owners of thirty or fewer homes, the use of which is limited to the homeowner group and their nonpaying guests. The term "public bathing place" does not include spray pads or spray grounds, As used in this section, "spray pads or spray grounds" mean interactive recreation areas intended for use by children in which the water is supplied by a system of sprays and is not allowed to accumulate above ground* [63 O.S. § 1-1013].

"Recessed" means open areas that may or may not include steps, benches, or fountains that extend down from the deck and terminating at the pool wall

"Recessed steps" means a riser/tread or series of risers/treads extending down from the deck with the bottom riser/tread terminating at the spa/pool wall, thus creating a "stairwell."

"Recessed treads" means a series of vertically spaced cavities in the spa/pool wall created treat areas for stepholes.

"Recirculation system" means the system traversed by the recirculated water from the pool until it is returned to the pool (from the outlets, through the pump, filter, chemical treatment, and heater, to the return inlets).

"Special purpose pool" means a public pool used exclusively for a particular purpose, including but not limited to springboard or platform diving training, scuba diving instruction, and aquatic programs for handicapped individuals and kindergarten children.

"Turnover rate" means the period of time (usually in hours) required to circulate a volume of water equal to the pool capacity.

"Wading pool" means a pool intended for use by children and having a maximum depth not exceeding 18 inches.

"Water line" means the line along the pool that was designed for maximum efficiency and sanitation. For skimmers it is about mid-tile and for gutters they should be overflowing:

"Water recreation attraction" means a public bathing or swimming facility with design and operational features that provide patrons recreational activity which is different from that associated with a conventional pool and purposefully involves total or partial immersion in the water. Water recreation attractions include but are not limited to water slides, water amusement lagoons, and wave pools.

[Source: Amended at 39 Ok Reg 1290, eff 9-11-22]

310:320-1-3. Operational license

(a) No person, municipality, or entity shall operate a public bathing place without obtaining a license from the Commissioner of Health pursuant to 63 § 1-1013.1.

(b) A license to operate a public bathing place is not required for *those public or semipublic baths where the main object is the external cleansing of the body, "Private Pools", or to bathing places owned or managed by a group or association of the owners of thirty or fewer homes, the use of which is limited to the homeowner group and their nonpaying guests.*

(c) A public bathing place may be inspected by representatives of the Department at any reasonable time to determine if the public bathing place complies with applicable statutes and rules administered by the Department [63 O.S. § 1-1018].

[Source: Added at 26 Ok Reg 1491, eff 6-11-09 ; Amended at 39 Ok Reg 1290, eff 9-11-22]

SUBCHAPTER 3. OPERATIONAL PROVISIONS

310:320-3-1. Life saving equipment

(a) **Adequate life saving equipment.** Adequate life saving equipment shall be provided at all public bathing places where the water is sufficiently deep for swimming and diving, to minimize the danger of drowning and of injuries to bathers from falls or collisions.

(b) **Lifeguard chairs.** Each public bathing place open to the general public shall have at least one (1) elevated lifeguard chair. This shall be presumed to be adequate for two thousand (2000) square feet of pool surface area with an additional lifeguard chair being provided for each additional area of two thousand (2000) square feet or fraction thereof. Lifeguard chairs shall be located so that a lifeguard is not required to protect a segment in excess of one hundred-eighty (180) degrees. Where a pool is provided with more than one (1) lifeguard chair and the pool width is forty (40) feet or more, chairs shall be located on each side of the pool. See OAC 310:315-7-3 and OAC 310:320-3-2.

(c) **Small pools.** Every public pool having a horizontal dimension that is thirty (30) feet or less or a surface area less than sixteen hundred (1600) square feet shall provide:

(1) One (1) or more poles each at least sixteen (16) feet in length. These shall end in a shepherd's crook with an opening of at least eighteen (18) inches and shall be constructed of light sturdy material such as aluminum or bamboo and used according to the manufacturer's instructions.

(2) Two (2) or more ring-buoys fifteen (15) to eighteen (18) inches in diameter, constructed of light material, with at least one-quarter (1/4) inch rope attached to reach the length of the pool, not to exceed forty (40) feet.

(d) **Large pools.** Every public pool having a horizontal dimension that is more than thirty (30) feet or a surface area more than sixteen hundred (1600) square feet, the unit requirements listed under (c) of this section shall be doubled, and a backboard provided. The maximum length of pole required will be sixteen (16) feet. For large pools requiring more than two (2) lifeguard chairs, the requirements of OAC 310:320-3-1(c) shall be provided for each additional two (2) chairs.

(e) **Life line.** A life line shall be at or near the break in grade between the shallow and deep portions of a public bathing place, with its position marked with colored floats spread on five (5) foot centers. Life lines shall be three-quarters (3/4) of an inch minimum diameter. Terminals shall be securely anchored to a receptacle of corrosion-resistant material and recessed into the pool wall.

(f) **Location of life saving equipment.** Life saving equipment shall be mounted in conspicuous places, distributed around the pool edge at lifeguard chairs, or elsewhere, readily accessible.

(g) **First aid kit.** A stocked first aid kit shall be conveniently available at each bathing place. Contents shall be suitable for the type facility.

(h) **Telephone.** An accessible telephone to reach emergency assistance without the use of coinage shall be accessible to the pool during all hours of operation.

310:320-3-2. Personnel

(a) **Transfer of ownership.** Each license holder of a public bathing facility shall notify the Department upon sale, lease, or other transfer of responsibility for the premises and shall supply the Department with the name and address of the new operator and/or owner.

(b) **Operation and management.** The bathing place shall be maintained under the supervision and direction of a properly trained operator with duties and responsibilities outlined in (d) below. Proper training can be obtained through attendance at short courses for swimming pool operators sponsored by the state, county, and municipal health departments; state colleges and universities, and organizations such as the YMCA, YWCA, and Red Cross.

(c) **Lifeguard.**

(1) One (1) or more lifeguards shall be on duty at the pool side of all bathing places open to the general public, and all pools with diving boards or platforms higher than one (1) meter at all times when the pool is open and in use. These individuals have authority to enforce all rules and regulations pertaining to sanitation and safety.

(2) Lifeguards of public bathing places in Oklahoma shall have satisfactorily completed an advanced course of instruction in life saving and water safety equivalent to that offered by the American Red Cross or YMCA. Except for situations that satisfy (6) of this subsection, lifeguards shall be not less than sixteen (16) years of age. Lifeguards shall have a current life saving certificate, be capable swimmers, shall be competent in life saving methods, and be able to perform artificial respiration, and shall be in good physical condition. At least one (1) lifeguard holding a current certificate in cardiopulmonary resuscitation (CPR) and trained in multi-media or equivalent first aid shall be on duty at all times the pool is in use. The CPR and current advanced life saving certificate for each lifeguard employed shall be prominently displayed or posted at the checking stand or other convenient point so as to be easily read by the patrons. Bathing places open to the general public with water depths of four (4) feet or less may substitute persons passing an American Red Cross Basic Water Safety Course or its equivalent, rather than the Advanced Life Saving Course.

(3) Lifeguards assigned to the pool side shall not be subject to duties that would distract their attention from proper observation and supervision of persons in the pool area, or that would prevent immediate assistance for persons in distress in the water.

(4) The number of lifeguards on duty shall be such as to provide reasonable general supervision of the activities of all persons in the pool area, with detailed supervision and close observation of those persons in the pool water. The number shall also be sufficient to enable periodic relief or rest periods so that they will be alert while on duty. As a general approximation, it is recommended that the pool management provide at least one (1) lifeguard at the pool side for each seventy-five (75) persons in the

swimming pool, with the determining factors being the type of pool, size of pool, ratio of surface area of deep water to the area of pool, temperature of the water, and quality of the water. Lifeguards shall wear distinguishing suits or emblems so that they may be easily identified by persons using the swimming facilities. (5) In the case of pools not open to the general public, that limit the use of the pool to their tenants or guests, it is recommended that a lifeguard or attendant who is responsible to pool management be in attendance when the bathing place is in use. Pools not open to the general public which do not have lifeguards or attendants present during all hours of operation must post a sign at the entrance to the pool area stating "NO LIFEGUARD OR ATTENDANT ON DUTY."

(6) If there is a shortage of certified lifeguards (age 16 or older) due to an uncontrollable event, including but not limited to a public health emergency, war, severe acts of nature, or a labor shortage, adversely impacting a licensed public bathing place (establishment), the Department may approve an establishment's request to lower the age restriction stated in (2) of this subsection to individuals who have reached the age of 15. Each exemption is limited to the establishment making the request and to only one physical location operated by the establishment. An approved exemption is valid for one year from the date of approval and may be rescinded by the Commissioner of Health at any time. A letter submitted to the Department and requesting this exemption, must be signed by an individual with authority to bind the establishment, notarized, and include the following statements:

- (A) the establishment states the nature of the uncontrollable event prompting the request;
- (B) the establishment states how the uncontrollable event adversely impact ability to hire certified lifeguards;
- (C) the establishment attests that the 15-year-old is in compliance with all other lifeguard regulations;
- (D) the establishment attests that the responsibilities for 15-year-old lifeguards will be in compliance with 29 CFR 570.34(l); and
- (E) an estimate of the percentage of 15-year-old lifeguard staff.

(d) Duties and responsibilities of pool personnel. All owners, managers, operators, and other attendants in charge of any public bathing place shall be responsible for the safety and sanitation of public bathing places. Pool personnel are responsible for the following:

- (1) Duties and responsibilities pertaining to bathers and general pool operation.
 - (A) See that all rules and regulations affecting the patrons are properly enforced.
 - (B) Report all drownings and accidents requiring hospitalization immediately to the local health authorities by telephone and in writing within seven (7) days. If there is no local health department, contact Consumer Health Services at the State Health Department.

(C) Report to the operator or management any condition of the bathing place or equipment which may be detrimental to its safe operation.

(D) See that showers are used and are operating properly.

(E) See that all persons known to be infected with a communicable disease are excluded from the pool.

(F) See that all persons who are under the influence of an intoxicating liquor or drugs, are excluded from the shower rooms and the pool area.

(G) See that all doors and gates to the bathing place are locked when the bathing place is not in use or when the facility is closed for health or safety reasons. Signs stating "POOL CLOSED" shall be placed at all entrances to the pool when not open for use.

(H)

Submit required records of the pool operations to the Department upon request.

(I) See that animals are not allowed inside the pool enclosure.

(J) See that safety equipment is not used for anything other than its intended use.

(2) Duties and responsibilities pertaining to the bathhouse and appurtenances.

(A) See that walk areas, overflow gutters, counters, lockers, equipment, furniture, interior partitions, and walls are in good repair and are clean. Where porous deck coverings are used, they shall be disinfected with a one hundred (100) ppm solution of chlorine at least once each day the facility is in use.

(B) See that floors of dressing rooms, shower stalls, and other interior rooms are scrubbed, using hot water with a suitable detergent, rinsed thoroughly, and disinfected daily or more often as needed. The floors should be scrubbed with soap or a suitable detergent, using hot water, then disinfected with a 3000 ppm to 6000 ppm solution of available chlorine, or a suitable commercial cleaner and disinfecting agent.

(C) See that toilet rooms and fixtures are kept clean, sanitary, and in good repair.

(D) See that liquid soap dispensers, paper towel dispensers, and toilet paper holders are kept adequately supplied.

(E) See that no food, drinks, debris, or foreign substances are thrown or carried into the pool. No glass containers of any type may be used in or near the pool. Beverages should be dispensed in disposable or shatterproof containers. Waste containers shall be conveniently located within the walk areas.

(F) Exclude unauthorized persons from the bathing place area.

(3) Duties and responsibilities pertaining to mechanical equipment.

(A) See that the pool finish is free from dirt and discoloration, and that the overflow gutters and skimmers are clean and flushing properly. See that the pool finish is brushed or suction cleaned as often as necessary to keep the pool free of sediment, hair, debris, algae, and slime.

(B) See that the level of the water is maintained at such a height as to ensure a constant slight overflow into the gutter when no bathers are in the pool.

(C) Operate the pool equipment to maintain clear and safe water, and be responsible for maintaining the chemical parameters as outlined under OAC 310:320-3-7 and 310:320-3-8.

(D) Keep on hand at all times at least a two (2) weeks supply of chemicals for disinfection and pH control of bathing water.

(E) Keep on hand diatomite filter aid sufficient for two (2) weeks operation for filtration with diatomite filters, including diatomite skimming filters.

(F) Adjustable inlets should provide approximately ten (10) PSI pressure on the effluent gauge when the filter is clean. Approximately seventy (70) percent of the water should return to the pool through the inlets in shallow portion of the pool.

(G) Provide for filtration plant operation.

(i) All bathing place operators shall know how to properly operate the filtration system and its appurtenances. These include hair catchers, filters, pumps, chemicals, and vacuum cleaners.

(ii) Where surface skimmers are provided as a means of control of floatage, bathing place personnel shall regularly ensure that the flow of makeup water is adequate to assure proper skimming operation. Baskets or screens provided to trap large solids shall be cleaned regularly.

(iii) An adequate supply of septa and diatomite filter aid shall be available at all times where skimmer filters are provided. When two (2) or more skimmer filters are in operation, they shall be inspected periodically to ensure balanced operation.

(iv) Pool volume and turnover rate shall be posted in the equipment area.

(H) Post a sign indicating the presence of chemicals on the door to any room used for pool chemical storage.

(4) Duties and responsibilities pertaining to water chemistry.

(A) Be responsible for taking all tests as per OAC 310:320-3-8.

(B) No pool is allowed to remain open for use if the free active chlorine, pH, or turbidity are not within the limits

required by these regulations as per OAC 310:320-3-7. It is the responsibility of the pool personnel to close the pool if any one (1) of these three (3) are not within the required limits.

(C) Store all chemicals in a safe manner and in an area not accessible to unauthorized persons. No chemical shall be stored in a container that does not have a complete label on it for that product.

(D) See that the proper chemicals are on hand for the type disinfection feeder in use. Hand feeding of chlorine is permitted only for super-chlorination or cleaning the pool. Only chemicals recommended by the manufacturer of solution or flow-through feeders shall be used.

(E) Chlorine and pH readings from an electrode type automatic controller may be substituted, with approval of the Department for three (3) of the four (4) required daily readings in OAC 310:320-3-8.

[Source: Amended at 38 Ok Reg 771, eff 6-28-21 (emergency); Amended at 39 Ok Reg 1290, eff 9-11-22]

310:320-3-3. Rules and precautions for patrons

(a) **Rules for pools.** Rules governing the use of pools, spas, and other public bathing places shall be displayed on signs large enough for easy reading which are posted at the entrance to the pool, dressing rooms, or other appropriate places. Sign shall provide, in similar language, that:

(1) A cleansing shower bath, using warm water and soap, must be taken before entering the pool.

(2) Persons with open wounds, bandages, or any symptom of communicable disease shall be prevented from entering the pool.

(3) Swimming alone is prohibited.

(4) At pools which do not have attendants or lifeguards on duty, children under twelve (12) years of age must be accompanied by an adult responsible for that individual child at the pool side.

(5) Running and rough play are prohibited in and around the pool.

(6) "Cut-offs" should be hemmed.

(7) Excess body lotions should be removed prior to entering the water.

(8) Bathing load limits shall be posted and enforced. See Standards Section 310:315-7-3.

(9) "NO LIFEGUARD OR ATTENDANT ON DUTY" where appropriate. See OAC 310:320-3-2.

(b) **Precautions for spas.** Precautions for spa patrons shall be posted on a sign which provides, in similar language, that "Persons who are pregnant, taking medication, or have any history of cardiovascular disease should consult a physician before entering hot water. Drugs and alcohol are prohibited."

[Source: Amended at 39 Ok Reg 1290, eff 9-11-22]

310:320-3-4. Safety provisions

(a) **Emergency telephone numbers.** Every bathing place shall provide, immediately adjacent to its telephone, a notice to dial 911 in the event of an emergency.

(b) **Bathing load.** The bathing load must be observed and enforced by pool personnel and shall not exceed design standards as per OAC 310:315-7-3. The bathing load limit shall be posted in plain sight at all pools.

[Source: Amended at 39 Ok Reg 1290, eff 9-11-22]

310:320-3-5. Swimming suits and towels furnished by management

(a) **Suits and towels.** All swimming suits and towels used by and maintained for public use shall be thoroughly washed with hot water and soap or detergent, rinsed, and thoroughly dried and sterilized by heat each time they are used, or an equivalent approved process shall be used.

(b) **Clean suits and towels.** Clean swimming suits and towels cannot come in contact with unwashed suits and towels or be stored on shelves or in baskets which have been used for storing dirty swimming suits and towels. The issuing of clean suits and towels at the same counters where dirty towels and suits are turned in shall be prevented.

[Source: Amended at 39 Ok Reg 1290, eff 9-11-22]

310:320-3-6. Wading pool operation

(a) **Operation.** All artificially constructed bathing places, including wading pools using recirculation systems, shall be free of turbidity, algae, and slime or floating matter, and the water quality shall comply with the same standards as all other artificially constructed bathing places.

(b) **Supervision.** A supervisor shall be present at all times when a wading pool is in use. The supervisor's main duties consist of maintaining proper conduct and guarding against accidents. Children over twelve (12) years of age should be permitted to enter the enclosure but not the pool. Children with open sores or cuts, bruises, etc., or any contagious disease should not be admitted to the pool. The pool should be operated on definite hours on prescribed days. This supervisor replaces lifeguards and other safety requirements.

(c) **Drains.** Wading pool drains shall have grates or covers complying with OAC 310:315-7-14. This stipulation shall apply to all existing wading pools with recirculation systems, as well as those to be constructed.

[Source: Amended at 39 Ok Reg 1290, eff 9-11-22]

310:320-3-7. Quality of Bathing Water

The pool water of all artificially constructed public bathing places shall undergo treatment necessary to comply with the standards set forth in OAC 310:320-3-8.

[Source: Amended at 39 Ok Reg 1290, eff 9-11-22]

310:320-3-8. Table

MINIMUM IDEAL MAXIMUM COMMENTS				
A.				
DISINFECTANT LEVELS				
1. Free chlorine, mg/l (ppm)	1.0	1.0-1.5	5.0	Note: Chlorine should be maintained at this level continually. Super-chlorinate regularly. See B-1 below. If combined chlorine* is too high you may have: Sharp chlorinous odors Eye burn Algal growth Bacteria growth (*combined chlorine is eliminated by super-chlorination)
2. Combined chlorine, mg/l (ppm)	None	None	0.2	Note: Health department officials should be consulted before use.
3. Bromine, mg/l (ppm)	2.0	3.0	4.0	
B. CHEMICAL VALUES				
1. pH	7.2	7.5	7.8	If pH is: TOO HIGH: Low chlorine efficiency Scale formation Cloudy water Increased chemical demand Eye discomfort TOO LOW: Rapid dissipation of chlorine Plaster/concrete etching Eye discomfort Corrosion of metals
2. Total alkalinity as CaCO ₂ , mg/l (ppm)	80	100	200	If total alkalinity is: TOO HIGH: Cloudy water

Increased scaling potential
pH maintained too high

TOO LOW:
pH bounce
Corrosion tendency

MINIMUM IDEAL MAXIMUM COMMENTS

3. Undissolved solids, mg/l (ppm) (Turbidity)	None	None	None	If undissolved solids are: TOO HIGH: If dissolved solids are: TOO LOW: Total alkalinity may be too low Aggressive water
4. Dissolved solids, mg/l (ppm)	300	...	1500	TOO HIGH: Chlorine may be less effective Scaling may occur Fresh water should be added to reduce solids Salty taste Dull water Chemical balance difficult to maintain If hardness is: TOO LOW: Plaster or concrete etching may occur
5. Hardness, as CaCO ₂ mg/l	50	125	500	TOO HIGH: Scaling may occur Water has bad "feel" Corrosion Short filter runs
6. Copper, mg/l (ppm)	None	None	0.3	If copper content is: TOO HIGH: Staining may occur

					Water may discolor Chlorine dissipates rapidly Filter may plug May indicate pH too low, corrosion, etc. If iron content is: TOO HIGH: Staining may occur Water may discolor Chlorine dissipates rapidly Filter may plug
7. Iron, mg/l (ppm)	None	None	/0.2	0.3	

MINIMUM IDEAL MAXIMUM COMMENTS

8. Manganese, mg/l (ppm)	None	None	0.05		If manganese content is: TOO HIGH: Staining may occur
--------------------------------	------	------	------	--	---

C. BIOLOGICAL VALUES

					If algae are observed: Super- chlorine or shock treat pool Supplement with brushing and vacuuming Maintain adequate free chlorine residual Use approved algacide according to label
1. Algae	None	None	None		

				direction If bacteria count exceeds health department requirements: Super chlorinate pool and follow proper maintenance procedures Maintain proper free chlorine residual
2. Bacteria	None	None	Refer to local health code	

**D.
STABILIZER**

				If stabilizer is: TOO LOW: Chlorine residual rapidly destroyed by sunlight TOO HIGH: May exceed health department regulation NOTE: Stabilizer is not needed for indoor pools and should not be used in hot water facilities. Cyanuric acid
1. Cyanuric acid, mg/l (ppm)	30	...	100	

may titrate as alkalinity. See Appendix.

**E.
ALGACIDES**

1. Quaternary algacides, mg/l (ppm)
2. Copper based algacides, (nonchelated), mg/l (ppm)	0.1	0.2	0.3

NOTE: Not permitted in public pools.

NOTE: Ineffective against some algae. Health department officials should be consulted before using. May contribute to staining.

	MINIMUM	IDEAL	MAXIMUM	COMMENTS
3. Copper based (chelated), mg/l (ppm)	0.1	1.0	3.0	NOTE: See note above.
4. Silver based, mg/l (ppm)	0.5	1.5	3.0	NOTE: Precipitates with cyanuric acid. Ineffective against some algae. Health department officials should be consulted before use.

F. REMEDIAL

PRACTICES

		When combined chlorine is 0.2 mg/l (ppm) or more	Weekly	NOTE: See design sections.
1. Super- chlorination frequency	Monthly			
2. Required super- chlorination chlorine, mg/l (ppm)	5	10	...	
3. Required shock treatment chlorine, mg/l (ppm)	10	
4. Floccing frequency	Not recommended			NOTE: Health department officials should be consulted before using. Change water and clean monthly as a minimum, more frequently when heavy use and chemical treatment difficulties are experienced.
5. Water replacement Hot water facilities	

G. TEMPERATURE

1. Water	90°	...	105 °	If
----------	-----	-----	-------	----

temperature ° F					temperature is: TOO LOW: Bather discomfort
Hot water facilities					TOO HIGH: Threat to health of certain persons with high blood pressure Excessive fuel requirement Increased evaporation Bather discomfort

MINIMUM IDEAL MAXIMUM COMMENTS

2. Swimming pools (Artificially heated water)	75 °	...	90 °	
3. Indoor pools (air)				Water temperature plus 8 ° max.
Excluding hot water facilities				Water temperature minus 2 ° min.
H. WATER CLARITY				
1. Water turbidity				Must be able to see main drain

or six inch
black disk on
bottom of
deepest part of
pool from pool
sidewalk.

TOO HIGH:
Chlorine level
may be too low
Filtration
system may
be inoperative
Too turbid
water may lead
to drowning
because of
reduced
visibility

310:320-3-9. Sampling and testing procedures

(a) **Bathing place operators.** All bathing place operators shall know how to perform the following:

- (1) Collect a sample for bacterial analysis.
- (2) Collect at proper places, a representative sample for determination of applicable chemical and operational parameters required by OAC 310:320-3-9.
- (3) Be able to perform all applicable chemical analyses and operational determinations required by OAC 310:320-3-9. The D.P.D. method should be used for free and combined chlorine determination. Orthotolidine (OTO) is not an acceptable method for determination of free chlorine.
- (4) Observe the proper procedure of turbidity determination. Close pool any time the main drain cannot be seen from the sidewalk. Determine cause and reduce turbidity to acceptable level before reopening pool.
- (5) Observe the water temperature in hot water pools and spas.
- (6) Balance the pool water in relation to pH, total alkalinity, and calcium hardness as per OAC 310:320-3-7 (see OAC 310:320-5-2 for Tables).

(b) **Sampling and testing required.** All bathing place operators shall comply with the testing and sampling procedures set forth in Appendix A.

310:320-3-10. Satisfactory compliance of records

(a) The management of a facility is responsible for maintaining records only on those line items of the report that apply to their bathing place. All bathing places must maintain information on turbidity, pH, and chlorine residual; and for pools using stabilized chlorine compounds, cyanuric acid

(b) Records shall be submitted to the county health department, or for those counties without a county health department, to the appropriate sanitarian upon request.

(c) **Records forms.** Public bathing place operation record forms may be obtained from the Department. The information must be filled in completely for each day the public bathing place is open. Forms tailored to suit the needs of the management may be substituted for Department forms provided that all information required by these standards is included and the forms are submitted to the Department for approval prior to use.

(d) **Laboratory reports.** The laboratory reports covering any chemical or bacteriological examination of the water in a public bathing place must be kept on the premises and made accessible to authorized representatives of the Department.

(e) **Operation report form.** The public bathing place operation record forms are designed to cover one (1) full week of operation. A copy shall be forwarded to the appropriate health department upon request.

[Source: Amended at 39 Ok Reg 1290, eff 9-11-22]

310:320-3-11. Winterizing and securing outdoor pools

When the pool is closed, all gates shall be locked. All outdoor pools shall be secured in one of the following approved methods:

(1) **Draining.** Drained and kept drained until put back into service; or

(2) **Pools not drained or covered.** Turbidity shall be controlled so that the main drain is visible from the pool deck. Maintaining disinfectant concentrations will suppress algae growth and maintaining water balance will protect concrete and metal surfaces.

(3) **Covering.** Provide a pool cover of a type that is securely anchored to the deck area with bolts or similar hardware and capable of supporting a minimum of one thousand (1000) pounds. Water must not be allowed to accumulate on the top. Swimming in the pool with a partial cover is prohibited. If water is left in the pool, it should be drained below the tile and skimmers (eighteen (18) to twenty-four (24) inches) and kept chlorinated. The air should be blown out of the skimmer and fill lines. Lights should be stored on the deck or in the bottom of the pool and with switches taped in the off position.

[Source: Amended at 39 Ok Reg 1290, eff 9-11-22]

310:320-3-12. Special conditions

Should special conditions exist or circumstances be such that in the opinion of the manager or operator, certain items listed as requirements would not be applicable, then alternate items shall be submitted in writing to the Department for appraisal as an acceptable substitute for the requirement, and upon approval may be used.

310:320-3-13. Subsequent examination, investigation, and inspection

Subsequent to examination, investigation, and inspection by the State Commissioner of Health or his representative, any public bathing place found to be in non-compliance with the requirements of this chapter and therefore constituting a public nuisance, shall be reinspected within a reasonable time to determine if the public bathing place has been brought into compliance with the requirements of this chapter. A \$125.00 reinspection fee may apply in cases when the applicant fails an initial licensure inspection due to items not found to be on site or operational as reported by the applicant during the pre-inspection assessment.

[Source: Added at 22 Ok Reg 2393, eff 7-11-05 ; Amended at 39 Ok Reg 1290, eff 9-11-22]

SUBCHAPTER 5. FORMS AND TABLES

310:320-5-1. Portable pools

(a) **Conditions governing operation.** The following conditions govern operation of portable pools:

- (1) To be used for instructional purposes.
- (2) For installation only at public buildings where adequate toilet and other sanitary facilities are conveniently available.
- (3) The pool(s) to have continuous supervision by instructors or supervisors certified as lifeguards per OAC 310:320-3-2.
- (4) Instruction classes to be sized on the basis of one (1) pupil for each four hundred (400) gallons of pool volume.
- (5) Use of the pool(s) to be limited to daylight hours unless the lighting requirements of these standards are met.
- (6) The pool(s) to be covered and locked whenever unattended or out of use.
- (7) The pool(s) installation at each location to be authorized by a permit issued by the Department for a scheduled period, preferably about two (2) weeks, extendable at the option of the Department, upon receipt of a written request giving justification for the time extension.
- (8) The operations of the pool(s) to be coordinated with the county health department for the purposes of inspections and supervision.
- (9) Pool(s) to be located on paved surface with paved area and walkway from shower and toilet facilities to the pool.

(b) **Application data required.** Application data required for portable pools is as follows:

- (1) Location(s) to be used.
- (2) List of sanitary facilities available and the distance from the pool at each location. The number of showers, toilets, and lavatories for boys and girls.
- (3) Square feet of paved ground available for each installation.
- (4) The name of the owner of the installation.
- (5) The name and mailing address of the responsible individual and phone number.
- (6) The duration of the term of instruction for which classes are to be scheduled for each location.
- (7) Each installation will require an application for permit with the above information.

[Source: Amended at 39 Ok Reg 1290, eff 9-11-22]

310:320-5-2. Water balance and water balance tables

Water balance recommended values are:

- (1) pH 7.2 to 7.8
- (2) Total alkalinity 80-120 ppm (pools) 100-150 ppm (spas)
- (3) Calcium hardness 100-150 ppm (pools) 150-300 ppm (spas)
- (4) Temperature: 75-90 °F for pools and 90-105° F for spas. See Appendix B.

310:320-5-4. Operation record form and instructions [REVOKED]

[Source: Revoked at 39 Ok Reg 1290, eff 9-11-22]

310:320-5-5. Application for license [REVOKED]

[Source: Amended at 26 Ok Reg 1491, eff 6-11-09 ; Amended at 39 Ok Reg 1290, eff 9-11-22]

310:320-5-5.1. Application for license

(a) The applicant shall file an application for a license to operate a public bathing place on the forms provided by the Department, as set forth in this Chapter with the filing fee payable to the Oklahoma State Department of Health, prior to operating a public bathing place. The filing fee is established by rule in Chapter 310:250 of the Oklahoma Administrative Code, Fee Schedule For Consumer Health Services.

(b) The application for a license to operate a public bathing place must include a copy of the permit to construct the public bathing place for which the applicant seeks a license, or reference the construction permit in the application, in order to be eligible for a license to operate a public bathing place.

[Source: Added at 39 Ok Reg 1290, eff 9-11-22]

310:320-5-6. Application guidelines for permits to construct and licenses to operate public bathing places [REVOKED]

[Source: Amended at 22 Ok Reg 2393, eff 7-11-05 ; Revoked at 39 Ok Reg 1290, eff 9-11-22]

310:320-5-6.1. Application guidelines for licenses to operate public bathing places

(a) **Applicant requirements.** An applicant shall be an owner/operator of the public bathing place, as defined in 63 O.S. Section 1-1013 et. Seq. complying with the requirements of this chapter, agree to permit access to the public bathing places, provide required information, and pay the applicable license fee and submit application on a form provided by the Department.

(b) **Application contents.** The application shall include:

- (1) The name, mailing address, telephone number, approximate number of employees, and signature of the person applying for the license and the name, mailing address and location of the public bathing places;
- (2) Information about the legal entity for the public bathing places; and
- (3) Information about the type of public bathing places.

(c) **Fee.** The fee shall be made payable to the Oklahoma State Department of Health.

(d) **Facility definition.**

- (1) A public bathing facility, for permitting purposes, will be a single swimming pool, spa, water slide, or other bathing unit.
- (2) A new permit and fee will apply for a new bathing unit added later to an existing facility, and for a major modification of an existing unit.

(e) **Applicant identification.**

- (1) The application may take these forms:
 - (A) Applicant is the owner and signs as such.
 - (B) Applicant is an authorizing officer of the organization which is the owner; the full name of the organization and the signer's title must be supplied.

(C) Application includes a letter from the owner (or from an officer as in part (B), or from an authorized agent of the owner) authorizing the applicant to act on his behalf for the purpose of obtaining the permit.

(D) Application is signed "XXX, agent for YYY, owner." If there is any question whether "expediency" may have resulted in misrepresentation, the Department may require an authorizing letter as in part (C) above.

(2) If the application does not show whether the owner and/or agent is an individual, a partnership, or a corporation, processing of the permit will be delayed until this information is supplied.

(3) The application form also requires that information is to be provided on who will be responsible for the facility following completion of construction. In the case of joint ownership, such as a condominium or housing development, the applicant may state on the application that, for example, a homeowners association will own and operate the bathing facility. In such cases, a provision in the permit will assign this future responsibility accordingly, if no Affidavit of Responsibility is supplied with the application. In other cases there must be submitted with the application, a notarized Affidavit of Responsibility signed appropriately. The purpose of this is to remove any doubt that the responsible party is aware of its responsibility.

[Source: Revoked at 39 Ok Reg 1290, eff 9-11-22]

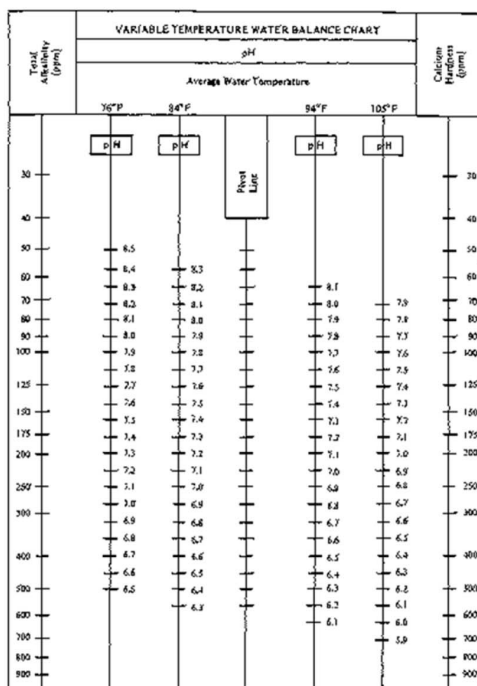

APPENDIX A. POOL WATER SAMPLING AND TESTING

Figure 1

- (1) Tests shall be made of the pool water as follows:
- | | |
|-------------------------|------------------------|
| Free chlorine | Four (4) times per day |
| Bromine (if applicable) | Four (4) times per day |
| pH | Four (4) times per day |
| Turbidity | Four (4) times per day |
| Combined chlorine | Daily |
| Turnover | Daily |
| Total alkalinity | Weekly |
| Calcium hardness | Weekly |
| Cyanuric acid | Weekly |
- (2) Hot water facilities (above 90°F). In addition to the above tests, the following shall be determined:
- | | |
|------------------------|------------------------|
| Temperature | Four (4) times per day |
| Copper | Weekly |
| Iron | Weekly |
| Total dissolved solids | Weekly |
- (3) Bacteriological samples. Hot water facilities and pools open to the general public may be required to submit a sample weekly to the local or the state health department.

CHAPTER 345. REGISTRATION OF SANITARIANS AND ENVIRONMENTAL SPECIALISTS

[**Authority:** 59 O.S., §§ 1150.1 et seq.]

[**Source:** Codified 12-31-91]

SUBCHAPTER 1. GENERAL PROVISIONS

310:345-1-1. Purpose

The rules in this Chapter implement the Oklahoma Sanitarian and Environmental Specialist Registration Act, 59 O.S., Section 1150.1 et seq.

[**Source:** Amended at 11 Ok Reg 897, eff 12-17-93 (emergency); Amended at 11 Ok Reg 2631, eff 6-25-94 ; Amended at 20 Ok Reg 1655, eff 6-12-03]

310:345-1-1.1. Definitions

The following words or terms, when used in this Chapter, have the following meaning unless the context clearly indicates otherwise:

"Certificate of course completion" means a document acceptable to the Council which signifies satisfactory completion of course work and reflects the hours of credit earned.

"Classroom hour" is equal to fifty (50) minutes out of each sixty (60) minute segment.

"Continuing education" means education that is approved by the Council to satisfy education requirements in order to renew a certificate of registration.

"Continuing education verification form" means a form or document acceptable to the Council and completed by the course provider that documents compliance with the continuing education requirements.

"Council" means the Sanitarian Registration Advisory Council established in 59 O.S. Sections 1150.2 and 1150.6.

"Department" means the State Department of Health.

"Person" means an individual for the purposes of the issuance of a certificate of registration in this chapter.

"Provider" means a person, corporation, professional association, governmental agency, tribal agency, or any other entity, which provides or verifies completion of approved continuing education to Registered Professional Sanitarians and Registered Professional Environmental Specialists.

"Sanitarian/Environmental Specialist Duty/Task List" means the document adopted by the Council that includes the various environmental and public health program areas that a Registered Professional Sanitarian or Registered Professional Environmental Specialist may be involved with, in the performance of their professional duties.

[**Source:** Added at 11 Ok Reg 897, eff 12-17-93 (emergency); Added at 11 Ok Reg 2631, eff 6-25-94 ; Amended at 20 Ok Reg 1655, eff 6-12-03 ; Amended at 24 Ok Reg 1955, eff 6-25-07 ; Amended at 38 Ok Reg 2001, eff 9-11-21]

310:345-1-2. Sanitarian and Environmental Specialist Registration Advisory Council [REVOKED]

[Source: Amended at 11 Ok Reg 897, eff 12-17-93 (emergency); Amended at 11 Ok Reg 2631, eff 6-25-94 ; Amended at 20 Ok Reg 1655, eff 6-12-03 ; Revoked at 38 Ok Reg 2001, eff 9-11-21]

SUBCHAPTER 3. APPLICATIONS

310:345-3-1. Life registration

Life Registration Sanitarian or Life Registration Environmental Specialist is available to those individuals who are 62 years of age or older before January 1, in the application year, hold a valid current registration and have been registered for not less than 25 years at the time of application.

[Source: Amended at 11 Ok Reg 897, eff 12-17-93 (emergency); Amended at 11 Ok Reg 2631, eff 6-25-94 ; Amended at 20 Ok Reg 1655, eff 6-12-03 ; Amended at 26 Ok Reg 2014, eff 6-25-09 ; Amended at 38 Ok Reg 2001, eff 9-11-21]

310:345-3-2. Form

An applicant must submit the following:

- (1) Name, mailing address, name and address of employers, official transcripts showing degree, date of conferral and the 30 semester hours of acceptable science, details of appropriate experience, and such other information and material as the Department may reasonably require.
- (2) All applications shall be made on printed form furnished by the Department.
- (3) All application forms and information furnished thereon and all examinations and answers thereto shall be entirely in the English language.

[Source: Amended at 38 Ok Reg 2001, eff 9-11-21]

310:345-3-3. Fees

- (a) **Payable when.** Fees shall be payable upon review by the Department and approval of an application.
- (b) **RPS or RPES.** The fee for registration as a Registered Professional Sanitarian (RPS) or Registered Professional Environmental Specialist (RPES) is Twenty-Five Dollars (\$25.00).
- (c) **SIT or ESIT.** The fee for registration as a Sanitarian-In Training (SIT) or Environmental Specialist-In-Training (ESIT) is Ten Dollars (\$10.00).
- (d) **SIT or ESIT approved as RPS or RPES.** An applicant that has been a SIT or ESIT for two years, and is in good standing pays a registration fee of Twenty-Five Dollars (\$25.00) on application for RPS or RPES.
- (e) **Life Registered Sanitarian or Environmental Specialist.** The one time fee for registration as a Life Registered Sanitarian or Environmental Specialist is Sixty Dollars (\$60.00).

(f) **Examination Fee.** The fee for the Oklahoma registration examination is determined by the facility that administers it.

[Source: Amended at 11 Ok Reg 897, eff 12-17-93 (emergency); Amended at 11 Ok Reg 2631, eff 6-25-94 ; Amended at 20 Ok Reg 1655, eff 6-12-03 ; Amended at 25 Ok Reg 2410, eff 7-11-08 ; Amended at 38 Ok Reg 2001, eff 9-11-21]

310:345-3-4. Examinations

The Council shall conduct examinations for registration as RPS, RPES, SII, or ESII. Where the education and experience of an applicant has been in a specialized field, the Council reserves the right to narrow or extend the limits of the examination in a reasonable manner.

[Source: Amended at 11 Ok Reg 897, eff 12-17-93 (emergency); Amended at 11 Ok Reg 2631, eff 6-25-94 ; Amended at 20 Ok Reg 1655, eff 6-12-03 ; Amended at 38 Ok Reg 2001, eff 9-11-21]

310:345-3-5. Action on application

- (a) When the Council, after due consideration of an applicant and of information pertaining thereto, is satisfied that the applicant is eligible for registration, the applicant shall be approved for registration.
- (b) The Council will notify the applicant of its approval.
- (c) The applicant will be considered registered upon payment of fees.

310:345-3-6. Reciprocity [REVOKED]

[Source: Amended at 11 Ok Reg 897, eff 12-17-93 (emergency); Amended at 11 Ok Reg 2631, eff 6-25-94 ; Amended at 20 Ok Reg 1655, eff 6-12-03 ; Amended at 25 Ok Reg 2410, eff 7-11-08 ; Revoked at 38 Ok Reg 2001, eff 9-11-21]

SUBCHAPTER 5. REGISTRATION

310:345-5-1. Number

At the time an applicant is approved for registration by the Council, the applicant is assigned a registration number. The number for Sanitarian In Training or Environmental Specialist-In-Training is preceded by the letters "S.I.T." or "E.S.I.T.". The applicant shall be advised of this registration number in the notice sent to the applicant by the Department. A registration number which has once been issued to a registrant shall become obsolete in event of revocation, death, or nonpayment of dues. If a former registrant is reinstated, he shall be re-issued his original number. Registration numbers, which have become obsolete will not be re-issued to any registrant other than the original holder thereof.

[Source: Amended at 11 Ok Reg 897, eff 12-17-93 (emergency); Amended at 11 Ok Reg 2631, eff 6-25-94 ; Amended at 20 Ok Reg 1655, eff 6-12-03 ; Amended at 38 Ok Reg 2001, eff 9-11-21]

310:345-5-2. Certificate

(a) As soon as possible after the approval of an application and payment of fees, a certificate of registration shall be issued to the applicant, signed by the Commissioner with the registration number of the applicant on the face of the certificate.

(b) After approval and payment of fees, the applicant is issued a wallet card certificate, which shall be designated by the Commissioner identifying the holder as a RPS, RPES, ESIT or SIT.

[Source: Amended at 11 Ok Reg 897, eff 12-17-93 (emergency); Amended at 11 Ok Reg 2631, eff 6-25-94 ; Amended at 20 Ok Reg 1655, eff 6-12-03 ; Amended at 38 Ok Reg 2001, eff 9-11-21]

310:345-5-3. Expiration and renewal

(a) **Expiration.** Each certificate of registration as a RPS or RPES expires on the last day of December following its issuance or renewal, and becomes invalid on that date unless renewed.

(b) **Renewal by December 31.** Each RPS or RPES desiring to continue the practice of the profession shall renew the certificate prior to the last day of December by paying to the Department a fee of Twenty-Five Dollars (\$25.00); in return the Department shall issue a renewal certificate for the ensuing year.

(c) **Renewal after February 1.** Expired certificates may be renewed prior to February 1 of the year following their expiration without penalty. Beginning February 1 of the year following its expiration, expired certificates shall only be renewed by submitting a renewal fee of Twenty-Five Dollars (\$25.00) plus a penalty of Ten Dollars (\$10.00) for a total of Thirty-Five Dollars (\$35.00).

(d) **Renewal ineligibility.** Except for extraordinary circumstances to be determined by the Council, all certificates which have not been renewed by March 1 of the year following its expiration are ineligible for renewal unless the registrant has successfully passed the sanitarian or environmental specialist examination, and the names of such registrants shall not appear in the roster issued annually during the month of September.

(e) **Department to notify.** As of February 1 of each year, the Department shall mail a notice to each registrant who has failed to renew his certificate prior to February 1 and has not successfully completed the sanitarian or environmental specialist examination that his certificate shall be ineligible for renewal as of March 1 of the year following its expiration.

[Source: Amended at 11 Ok Reg 897, eff 12-17-93 (emergency); Amended at 11 Ok Reg 2631, eff 6-25-94 ; Amended at 12 Ok Reg 515, eff 12-12-94 (emergency); Amended at 12 Ok Reg 3047, eff 7-27-95 ; Amended at 20 Ok Reg 1655, eff 6-12-03 ; Amended at 25 Ok Reg 2410, eff 7-11-08 ; Amended at 38 Ok Reg 2001, eff 9-11-21]

SUBCHAPTER 7. REVOCATION AND REINSTATEMENT

310:345-7-1. Cause for revocation

Certificates may be revoked by the Commissioner for cause after proper hearing, pursuant to the Oklahoma Sanitarian and Environmental Specialist Registration Act. Separate rules and regulations are issued by the Department covering the preference of charges and the hearing of same and the revocation of certificates resulting therefrom.

[Source: Amended at 11 Ok Reg 897, eff 12-17-93 (emergency); Amended at 11 Ok Reg 2631, eff 6-25-94 ; Amended at 12 Ok Reg 515, eff 12-12-94 (emergency); Amended at 12 Ok Reg 3047, eff 7-27-95 ; Amended at 20 Ok Reg 1655, eff 6-12-03]

310:345-7-2. Reinstatement

- (a) Former registrants who have successfully completed the sanitarian or environmental specialist examination may make application for reinstatement on the basis prescribed in subsection (b) of this Section.
- (b) The certificate of an applicant shall be reinstated on simple application therefore on a form prescribed by the Department and accompanied by remittance equal to the total amount of money which would have been paid to the Department in late renewal fees up to the time of application, had the original certificate not been permitted to expire, plus an additional fee of Ten Dollars (\$10.00) to reimburse the Department for expense of special handling required by this procedure.
- (c) However, if the amount of the remittance computed as described in subsection (b) of this Section exceeds Thirty-Five Dollars (\$35.00), the applicant may file for registration as though he had not previously been registered.
- (d) A former registrant whose certificate was originally issued without examination shall not be eligible for reinstatement, but may be issued a new registration after successful completion of the sanitarian or environmental specialist registration examination.
- (e) SIT or ESIT who are unable to maintain their employment to complete their two (2) years of postgraduate work experience may request the Department to change their registration status to inactive in order to preserve the thirty (30) month limitation for an individual to register as a SIT or ESIT. Such inactive status shall not be granted if the individual's employment was terminated for acts or omissions which constitute a violation of this Chapter or the Oklahoma Sanitarian and Environmental Specialist Registration Act. An individual may only be granted inactive status as a SIT or ESIT one time for no more than one (1) year. A certification of registration in training shall not be eligible for reinstatement.

SUBCHAPTER 9. CONTINUED EDUCATION

310:345-9-1. Course approval requirements

(a) The Council shall only approve continuing education that is directly related to program areas outlined in the "Sanitarian/Environmental Specialist Duty/Task List" approved by the Council. Upon hearing the appeal, the Council has the authority to approve the course, to approve a modified version of the course, or deny the course. Topic areas such as communication skills and report writing are considered for approval if they are relevant to a program area listed in the "Sanitarian/Environmental Specialist Duty/Task List".

(b) Any provider seeking course approval for continuing education credit shall make application and submit documents, statements and forms as may reasonably be required by the Council. All providers shall submit to the Department:

- (1) Name and address of the provider;
- (2) The method of presentation (on-line course, classroom instruction, seminar, instructional video, college course, etc.);
- (3) A contact person with contact information;
- (4) The location of the courses or programs;
- (5) The number of education credit hours requested for each course and/or topic;
- (6) Topic outlines, which summarize the topics covered in each course and upon request a copy of any course materials; and,
- (7) Course objectives.

(c) If a prior approved course has substantially changed, a summarization of the changes shall be provided to the Department.

(d) At the completion of each course, the provider shall furnish the Department a list of the names and registration numbers for all participants who completed the course.

(e) In addition to accepting courses approved as described in this section, continuing education credits may be granted to an individual if said individual supplies acceptable documentation to the Council showing the course meets applicable requirements, including proof the individual successfully completed the course. This provision shall apply when considering education courses completed, for which the provider did not receive approval from the Council.

[Source: Amended at 24 Ok Reg 1955, eff 6-25-07 ; Amended at 38 Ok Reg 2001, eff 9-11-21]

310:345-9-2. Continuing education requirement

(a) **Continuing education requirement.** Verification of fourteen (14) hours of continuing education is required every two years to renew a RPS and/or RPES registration. An applicant for reinstatement of registration shall not be reinstated without submitting evidence of completing fourteen (14) hours of continuing education within the twenty-four months preceding reinstatement. A person shall not apply for a new registration in an attempt to circumvent the requirement for continuing education.

(b) **Continuing education reciprocity.** The Council shall exempt a non-resident registrant from the continuing education requirement, if the individual lives in and is registered in another state with a continuing education requirement and provides the Department with evidence of

current registration in that state when renewing an Oklahoma registration.

(c) **Exemptions from the continuing education requirement.** An individual who holds a "Life Registration" is not required to complete continuing education. Any individual who is registered as a SIT and/or ESIT is encouraged but is not required to complete continuing education. Continuing education is not required for the first year of registration as a RPS and/or RPES.

(d) **Hardship waiver of continuing education.** An individual may submit a hardship waiver application to the Council for the continuing education requirement. The Council has the authority to deny or approve the waiver for medical hardships, military reasons, or other reasons deemed appropriate by the Council.

CHAPTER 355. SMOKING IN PUBLIC PLACES AND INDOOR WORKPLACES

[**Authority:** 63 O.S.Supp.1987, §§ 1-1521 et seq.]
[**Source:** Codified 12-31-91]

SUBCHAPTER 1. GENERAL PROVISIONS

310:355-1-1. Purpose and scope

This Chapter implements:

- (1) the Smoking in Public Places and Indoor Workplaces Act Title 63 O.S. §§ 1-1521, et seq.;
- (2) Smoking in Certain Public Places Prohibited - Punishment, Title 21 O.S. § 1247; and
- (3) Statutory provisions of the Oklahoma Medical Marijuana and Patient Protection Act: *All smokable, vaporized, vapable and e-cigarette medical marijuana product inhaled through vaporization or smoked by a medical marijuana licensee are subject to the same restrictions for tobacco under Section 1-1521 of Title 63 of the Oklahoma Statutes, commonly referred to as the "Smoking in Public Places and Indoor Workplaces Act".* [Title 63 O.S. § 427.8(L)]

[**Source:** Amended at 18 Ok Reg 2031, eff 6-11-01 ; Amended at 23 Ok Reg 2363, eff 6-25-06 ; Amended at 28 Ok Reg 2290, eff 9-1-11 ; Amended at 39 Ok Reg 1328, eff 9-11-22]

310:355-1-2. Policy development [REVOKED]

[**Source:** Amended at 18 Ok Reg 2031, eff 6-11-01 ; Revoked at 23 Ok Reg 2363, eff 6-25-06]

[**Source:** Added at 18 Ok Reg 2031, eff 6-11-01 ; Revoked at 23 Ok Reg 2363, eff 6-25-06]

310:355-1-4. Implementation [REVOKED]

[**Source:** Codified 12-31-91 ; Revoked at 23 Ok Reg 2363, eff 6-25-06]

310:355-1-5. Administrative penalties [REVOKED]

[**Source:** Added at 18 Ok Reg 2031, eff 6-11-01 ; Revoked at 23 Ok Reg 2363, eff 6-25-06]

310:355-1-6. Definitions

The following words and terms, when used herein, shall have the following meaning, unless the context clearly indicates otherwise:

"Act" means the Oklahoma Smoking in Public Places and Indoor Workplaces Act [63:1-1521 et seq].

"Building" means an entire free standing structure enclosed or predominantly enclosed by exterior walls.

"Department" means the Oklahoma State Department of Health.

"Eating establishment" means an establishment licensed by the Department under Chapter 256 or any Chapter adopted to replace Chapter 256 that is primarily engaged in preparing and selling food, exclusive of low-point beer and alcoholic beverages, for immediate consumption on or off the premises, based upon gross receipts of the establishment.

"Indoor workplace" means *any indoor place of employment or employment-type service for or at the request of another individual or individuals, or any public or private entity, whether part-time or full-time and whether for compensation or not. Such services shall include, without limitation, any service performed by an owner, employee, independent contractor, agent, partner, proprietor, manager, officer, director, apprentice, trainee, associate, servant or volunteer. An indoor workplace includes work areas, employee lounges, restrooms, conference rooms, classrooms, employee cafeterias, hallways, any other spaces used or visited by employees and all space between a floor and ceiling that is predominantly or totally enclosed by walls or windows, regardless of doors, doorways, open or closed windows, stairways or the like. The provisions of this section shall apply to such indoor workplace at any given time, whether or not work is being performed.* [21 O.S. § 1247(A)]

"Nonsmoking area" or "nonsmoking space" means a smoke-free area or space.

"Recirculate" means movement of air or smoke from one area to another either mechanically by way of the heating, air conditioning and ventilation system or by other means of circulation, drifting, transfer or migration.

"Secondhand smoke" means the aerosol produced from vapor devices or combustion of marijuana or tobacco products---consisting of a combination of many different gases, types of particulate matter, and semi-volatile organic compounds, visible and invisible, odorless and with odors---including smoke or vapor exhaled by smokers, smoke from the burning tip of a cigarette or other marijuana or tobacco product, and materials escaping through cigarette paper.

"Smoke-free location" means *a location where the use of tobacco, nicotine, marijuana or other lawful products consumed in a smoke or vaporized manner are prohibited.* [21 O.S. § 1247]

"Smoke" means smoke from combustion of marijuana or tobacco products, including secondhand smoke.

"Smoke-free area" or "smoke-free space" means an area or space within or outside a building where smoking is prohibited. Within a building that is not entirely exempt from the Act, if smoking is permitted anywhere in the building, the air in the smoke-free areas inside the building is protected from secondhand tobacco smoke from the smoking spaces by a combination of direct exhaust from the smoking spaces to the outside, full enclosure surrounding the smoking spaces, and sufficient negative air pressure in the smoking spaces relative to the smoke-free areas to prevent the escape of smoke from the smoking spaces to any smoke-free areas.

SUBCHAPTER 3. SMOKING PROHIBITIONS AND EXEMPTIONS [REVOKED]

310:355-3-1. Indoor prohibition and exemptions [REVOKED]

[Source: Added at 23 Ok Reg 2363, eff 6-25-06 ; Revoked at 39 Ok Reg 1328, eff 9-11-22]

310:355-3-2. Public transportation prohibition [REVOKED]

310:355-3-3. Outdoor prohibitions at restaurants [REVOKED]

[Source: Added at 23 Ok Reg 2363, eff 6-25-06 ; Revoked at 39 Ok Reg 1328, eff 9-11-22]

310:355-3-4. Outdoor prohibitions at educational facilities [REVOKED]

[Source: Added at 23 Ok Reg 2363, eff 6-25-06 ; Revoked at 39 Ok Reg 1328, eff 9-11-22]

SUBCHAPTER 5. SITUATIONS IN WHICH SMOKING MAY BE PERMITTED

310:355-5-1. Smoking spaces

Smoking spaces are those spaces where smoking is permitted as provided in 63 O.S. § 1-1523.

[Source: Added at 23 Ok Reg 2363, eff 6-25-06 ; Amended at 39 Ok Reg 1328, eff 9-11-22]

310:355-5-2. Requirements for smoking spaces

Smoking rooms, as well as other smoking spaces, must meet the conditions in subchapters 7, 9, 11, 13 and 15 of this Chapter.

[Source: Added at 23 Ok Reg 2363, eff 6-25-06]

310:355-5-3. No required smoking

No public place or indoor workplace is required to permit smoking. Any such place may prohibit all smoking.

[Source: Added at 23 Ok Reg 2363, eff 6-25-06]

310:355-5-4. Exempted spaces occupying an entire building

Exempted places as listed in 63 O.S. § 1-1523(H) that occupy an entire building so that smoke cannot escape to adjacent indoor nonsmoking spaces are exempt from the rules in this Chapter.

[Source: Added at 23 Ok Reg 2363, eff 6-25-06 ; Amended at 39 Ok Reg 1328, eff 9-11-22]

SUBCHAPTER 7. PLANS REVIEW AND INSPECTIONS

310:355-7-1. Plans review by the Department

The Department may review plans for smoking rooms to assist the proprietor, if requested. This review may assist in identifying obvious design deficiencies, but it cannot assure that the installed and operating smoking rooms will comply with these rules.

[Source: Added at 23 Ok Reg 2363, eff 6-25-06]

310:355-7-2. Inspections

Personnel of the Department, including employees and others designated by the Commissioner of Health, shall have access to the premises for inspections, announced or unannounced, including examination and testing for compliance and including access to smoke-free areas and smoking spaces.

[Source: Added at 23 Ok Reg 2363, eff 6-25-06 ; Amended at 39 Ok Reg 1328, eff 9-11-22]

SUBCHAPTER 9. SMOKING ROOM ENCLOSURE

310:355-9-1. Fully enclosed

The enclosure for a smoking room shall be continuous including floor, ceiling and all sides so that smoke is contained within the smoking room and away from smoke-free areas.

[Source: Added at 23 Ok Reg 2363, eff 6-25-06 ; Amended at 39 Ok Reg 1328, eff 9-11-22]

310:355-9-2. Door opening and closure

Any tendency for air to escape from the smoking room because of doors opening or closing shall be counterbalanced by increased exhaust ventilation or other means to assure that air containing smoke is kept within the smoking room and prevented from recirculating to nonsmoking areas.

[Source: Added at 23 Ok Reg 2363, eff 6-25-06 ; Amended at 39 Ok Reg 1328, eff 9-11-22]

310:355-9-3. Transfer air vents

Transfer air vents may be part of the enclosure to allow flow of air from the adjacent nonsmoking areas into the smoking room as a result of the negative air pressure in the smoking room. Such vents shall automatically close when airflow into the smoking room stops, to prevent recirculation of air from the smoking room to nonsmoking areas.

[Source: Added at 23 Ok Reg 2363, eff 6-25-06]

SUBCHAPTER 11. SMOKING ROOM NEGATIVE AIR PRESSURE AND SMOKE CONTAINMENT

310:355-11-1. Negative pressure and full enclosure relationship

Negative air pressure shall be provided continuously while a smoking room is in use and until it has been cleared as specified in section 3 of this subchapter, to assure that the flow of air is from smoke-free spaces into the smoking room. The more that normal leakage occurs, such as through cracks and under doors, the greater will be the direct exhaust required to provide adequate negative air pressure to meet the conditions in OAC 310:355-13-1.

[Source: Added at 23 Ok Reg 2363, eff 6-25-06 ; Amended at 39 Ok Reg 1328, eff 9-11-22]

310:355-11-2. Negative air pressure requirements with changing occupancy and activity

(a) Exhaust from and ventilation to a smoking room can be reduced with reduced occupancy, as permitted by local mechanical codes, providing that sufficient negative air pressure is maintained to satisfy OAC 310:355-13-1.

(b) As activity in a smoking room increases, causing more frequent opening and closing of the doors, greater negative air pressure shall be utilized, if needed, to contain smoke within the smoking room and prevent its recirculation to nonsmoking areas.

[Source: Added at 23 Ok Reg 2363, eff 6-25-06]

310:355-11-3. Negative air pressure after smoking ends

After smoking ends, negative air pressure must be maintained at levels required to satisfy the requirements of OAC 310:355-13-1 until smoke components are cleared from the air.

[Source: Added at 23 Ok Reg 2363, eff 6-25-06 ; Amended at 39 Ok Reg 1328, eff 9-11-22]

310:355-11-4. Successive smoking and nonsmoking uses of a smoking space

If a space used at one time as a smoking room or other smoking space is to be used as a smoke-free area at a subsequent time, the space must first be cleared of smoke components.

[Source: Added at 23 Ok Reg 2363, eff 6-25-06 ; Amended at 39 Ok Reg 1328, eff 9-11-22]

SUBCHAPTER 13. SMOKING ROOM EVALUATION FOR COMPLIANCE

310:355-13-1. Compliance

For a public place or indoor workplace with a smoking room or other smoking space to be in compliance with the Act, no smoke shall escape or be recirculated to any nonsmoking areas.

[Source: Added at 23 Ok Reg 2363, eff 6-25-06]

310:355-13-2. Testing

Smoking rooms and spaces may be examined and tested for compliance by Department personnel, including employees and others designated by the Commissioner of Health, as part of normal inspection processes or in response to complaints, as provided in OAC 310:355-7-2.

[Source: Added at 23 Ok Reg 2363, eff 6-25-06]

SUBCHAPTER 15. PRESENCE OF SMOKE AND NEGATIVE AIR PRESSURE

310:355-15-1. Visual indications and odors

Observations of smoke or odors of smoke in nonsmoking areas may be an indicator of smoke in these areas and a basis for air quality testing pursuant to 310:355-15-2.

[Source: Added at 23 Ok Reg 2363, eff 6-25-06 ; Amended at 39 Ok Reg 1328, eff 9-11-22]

310:355-15-2. Airflow into the smoking room or other smoking space

The direction of airflow through an open doorway to a smoking room can be observed, with airflow into the room indicating negative air pressure with respect to the nonsmoking areas. The rate of airflow required into a smoking room or other smoking space shall comply with sections 9-2, 11-1, 11-2, 11-3, and 13-1 of this Chapter.

[Source: Added at 23 Ok Reg 2363, eff 6-25-06]

310:355-15-3. Detecting smoke by instrument [REVOKED]

[Source: Added at 23 Ok Reg 2363, eff 6-25-06 ; Revoked at 39 Ok Reg 1328, eff 9-11-22]

SUBCHAPTER 17. SIGNAGE

310:355-17-1. Entrances to buildings where smoking is prohibited

All buildings that are public places and where smoking is prohibited inside the entrance pursuant to the Act shall have posted at each such entrance a conspicuous sign or decal at least 4" x 2" in size clearly stating that smoking is prohibited or that a smoke-free environment is provided. Signs provided by the Department for this purpose shall meet this requirement.

[Source: Added at 23 Ok Reg 2363, eff 6-25-06 ; Amended at 39 Ok Reg 1328, eff 9-11-22]

310:355-17-2. Entrances to smoking rooms

The owner or operator of a place with a smoking room shall post outside each entrance to a smoking room a sign at least two inches by four inches identifying the space inside as a smoking room.

[Source: Added at 23 Ok Reg 2363, eff 6-25-06 ; Amended at 39 Ok Reg 1328, eff 9-11-22]

310:355-17-3. Sign contents for entrances to smoking rooms

Signs outside smoking rooms shall be white text on red or other highly visible contrasting colors including at least the words "SMOKING ROOM" in letters at least 1/2 inch high.

[Source: Added at 23 Ok Reg 2363, eff 6-25-06]

310:355-17-4. Entrances to other smoking spaces within shared buildings

(a) The owner or operator of a place exempted from the Act, which shares a building with nonsmoking spaces and which elects to permit smoking within its exempted space, shall post outside each interior entrance from a nonsmoking space to its smoking space a sign at least two inches by four inches identifying the space inside as a space in which smoking is permitted.

(b) Commencing 30 days after these rules become effective, as exempted places establish new smoking spaces inside buildings shared with nonsmoking spaces, this signage shall be in place prior to occupancy.

SUBCHAPTER 19. DUTIES OF OWNER OR OPERATOR

310:355-19-1. Signage [REVOKED]

[Source: Added at 23 Ok Reg 2363, eff 6-25-06 ; Revoked at 39 Ok Reg 1328, eff 9-11-22]

310:355-19-2. Required intervention in public places

(a) When the owner or operator or an employee in a public place observes smoking in an area where smoking is prohibited, the owner, operator or operator's designee shall ask the smoker to refrain from

smoking.

(b) When anyone reports smoking in violation of the Act to the owner, operator or an employee of an establishment, the owner, operator or operator's designee shall ask the smoker to refrain from smoking.

[Source: Added at 23 Ok Reg 2363, eff 6-25-06]

310:355-19-3. Compliance by employees

Employers shall be responsible for compliance by their employees with these rules.

[Source: Added at 23 Ok Reg 2363, eff 6-25-06]

SUBCHAPTER 21. COMPLIANCE

310:355-21-1. Enforcement by political subdivisions

Any provision of these rules may, pursuant to 63 O.S.' 1-215, be enforced in the manner provided herein by any City/County Health Department. Cities and incorporated towns of the State of Oklahoma may, pursuant to the provisions of 63 O.S. § 1-209, incorporate these rules in their respective ordinances by reference.

[Source: Added at 23 Ok Reg 2363, eff 6-25-06]

310:355-21-2. Complaint resolution

(a) Any person who observes a violation of this Chapter may report the violation to the owner, operator or employee of the place where the smoking has occurred and/or may report the condition to the Department or local law enforcement.

(b) Complaints received by the Department may result in the issuance of a letter stating the nature and description of the complaint lodged and providing information regarding Oklahoma's laws on smoking and the health hazards related to secondhand smoke. The letter shall request that the responsible person respond to the Department within ten (10) calendar days with information as to how the condition causing or creating the complaint will be resolved.

(c) Based upon the complaint, the response received and any other evidence that may be available to the Department, the Department may determine whether a violation of this Chapter has occurred.

(d) If the Department determines that a violation has occurred, the Department may issue a warning letter to the responsible person and seek other remedial measures authorized by law.

[Source: Added at 23 Ok Reg 2363, eff 6-25-06]

310:355-21-3. Enforcement proceedings

The Department may initiate enforcement proceedings against any responsible party whom the Department has reason to believe is

presently in violation of this Chapter, the Act, 21 O.S. § 1247, or 63 O.S. § 427.8(L) by imposing administrative penalties including fines, seeking injunctive relief in the district court, and/or by referring the complaint to the district attorney for criminal prosecution.

[Source: Added at 23 Ok Reg 2363, eff 6-25-06 ; Amended at 39 Ok Reg 1328, eff 9-11-22]

310:355-21-4. Administrative hearings, appeals, and fines

(a) Any hearing and appeal requested under this Chapter shall be conducted in accord with the Oklahoma Administrative Procedures Act ("Oklahoma APA") and Chapter 2 of this title.

(b) Administrative fines for violations will be in accordance with 63 O.S. § 1-1526.1.

CHAPTER 390. WATER VENDING MACHINE REGULATIONS

[**Authority:** 63 O.S.1981, §§ 1-1101 et seq.]

[**Source:** Codified 5-1-92]

SUBCHAPTER 1. GENERAL PROVISIONS

310:390-1-1. Purpose

The purpose of this chapter is to set forth requirements and controls for vending machines designed to dispense water intended for human consumption to assure:

- (1) consumers using such machines are given appropriate information as to the nature of the vended water;
- (2) the quality of the water vended meets acceptable standards for potability; and
- (3) the vending equipment is installed, operated, and maintained to protect the health, safety, and welfare of the consuming public.

[**Source:** Added at 8 Ok Reg 3103, eff 7-18-91 (emergency); Added at 9 Ok Reg 1457, eff 5-1-92]

310:390-1-2. Definitions

The following words or terms, when used in this chapter, shall have the following meaning unless the context clearly indicates otherwise:

"Approved" means approved in writing by the Department.

"Approved laboratory" means a laboratory approved by the Commissioner of Health or certified by the U.S. Environmental Protection Agency (EPA), or certified (accredited) by a third-party organization acceptable to the Commissioner of Health.

"Approved materials" means materials approved by the Department as being free of substances which may render the water injurious to health or which may adversely affect the flavor, color, odor, or microbiological quality of the water.

"Competent staff" means a person or persons with demonstrated experience or knowledge and training concerning the proper operation of water vending machines.

"Department" means the Oklahoma State Department of Health and its duly designated representatives.

"License" means a license issued under and pursuant to the provisions of these rules and regulations.

"Operator" means any person who operates water vending machines.

"Person" means any individual, public or private corporation, company, association, partnership, municipality, or any other legal entity or its legal representative, agent, or assigns.

"Potable water" means water which shall be from an approved source and shall not exceed any maximum contaminant level ("MCL") established by EPA under the Safe Drinking Water Act if adopted by the FDA or by the State Board of Health.

"Purified water" means water produced by distillation, deionization, reverse osmosis, or other method as defined in the 20th edition of the "United States Pharmacopeia."

"Vended water" means water dispensed by a water vending machine.

"Water vending machine" means any self-service device which, upon insertion of a coin, coins, token, or by other means, dispenses unit servings of water into a container without the necessity of refilling the machine between each operation.

[Source: Added at 8 Ok Reg 3103, eff 7-18-91 (emergency); Added at 9 Ok Reg 1457, eff 5-1-92]

SUBCHAPTER 3. TECHNICAL REQUIREMENTS

310:390-3-1. Operator requirements

Each water vending machine operator shall:

- (1) Operate and maintain all water vending machines in a sanitary manner assuring that the product being dispensed into the container meets all finished product quality standards applicable to drinking water.
- (2) Maintain frequent and adequate water quality, monitoring to insure adherence to drinking water quality standards.
- (3) Take whatever investigative or corrective action is necessary to assure a potable water is supplied to consumers.

[Source: Added at 8 Ok Reg 3103, eff 7-18-91 (emergency); Added at 9 Ok Reg 1457, eff 5-1-92]

310:390-3-2. Dispensing machine requirements

Machines used to dispense vended water shall:

- (1) Comply with the construction and performance standards of the National Sanitation Foundation or any other group deemed acceptable to the Department or meet equivalent standards demonstrated to the satisfaction of The Department.
- (2) Be designed and constructed to permit easy cleaning and maintenance of all exterior and interior surfaces and component parts.
- (3) Have all parts and surfaces which come into contact with the water constructed of non-toxic, corrosion-resistant, and nonabsorbent material approved by the department or other approved standards and capable of withstanding repeated cleaning and sanitizing treatment.
- (4) Have a recessed or guarded corrosion-resistant dispensing spout.
- (5) Be designed so all treatment of the vended water by distillation, ion-exchange, filtration, ultraviolet light, reverse osmosis, mineral addition, or any other acceptable process is done in a consistent and effective manner.
- (6) Have an effective system of collection and handling of drip, spillage, and overflow of water.

- (7) Have a back-flow prevention device for all connections with the water supply according to the Oklahoma Plumbing License Act and the BOCA Plumbing Code or standards demonstrated to the satisfaction of The Department to be equivalent.
- (8) Disinfect vended water by ultraviolet light or other method approved by the Department prior to delivery into the customer's container.
- (9) Be equipped with monitoring devices designed to shut down operation of the machine when the disinfection unit or any other treatment process which the water vending is designed to perform fails to function.
- (10) Be equipped with a self-closing, tight-fitting door on the vending compartment if the machine is not located in an enclosed building.
- (11) Comply with the American Water Works Association (AWWA) specifications for granular activated carbon if used in the treatment of potable water (AWWA B604-74).
- (12) Be maintained in a clean and sanitary condition, free from dirt and vermin or any outside material which could serve as a harborage for bacterial growth.
- (13) Be located in an area that can be maintained in clean condition and in a manner that avoids insect and rodent harborage.
- (14) display, in a position clearly visible to customers, the following information: the name, license number, and address of the operator; the fact the water is obtained from an approved public or private water supply; a statement describing the treatment process including the chemical names of any preservatives or additives; if no treatment process is utilized a statement to that effect; and a local or toll free telephone number that may be called for further information, service, or complaints.

[Source: Added at 8 Ok Reg 3103, eff 7-18-91 (emergency); Added at 9 Ok Reg 1457, eff 5-1-92]

SUBCHAPTER 5. SERVICE, SAMPLING, AND RECORDS

310:390-5-1. Service and records

- (a) **Service.** All parts and surfaces of the water vending machine shall be maintained in clean condition by the water vending machine operator. The vending chamber and vending nozzle shall be cleaned and sanitized each time the machine is serviced; whereas, all surfaces in contact with the vended water shall be maintained as a deposit free, visibly clean system.
- (b) **Records.** A record of location, source of water supply, cleaning, sampling and maintenance operations shall be kept by the operator for each water vending machine and be available for inspection upon request.

[Source: Added at 8 Ok Reg 3103, eff 7-18-91 (emergency); Added at 9 Ok Reg 1457, eff 5-1-92]

310:390-5-2. Sampling

The vended water from each water vending machine shall be analyzed at least once every three months for total coliform and, if required by applicable regulations, other physical, chemical, or microbiological parameters. The analysis shall be performed by an approved laboratory and a copy of the analysis shall be available for inspection.

[Source: Added at 8 Ok Reg 3103, eff 7-18-91 (emergency); Added at 9 Ok Reg 1457, eff 5-1-92]

310:390-5-3. Carbon filters

The vended water from each water vending machine utilizing silver-impregnated carbon filters in the treatment process shall be analyzed at least once every three months for silver. The analysis shall be performed by an approved laboratory and a copy of the analysis shall be available for inspection.

[Source: Added at 8 Ok Reg 3103, eff 7-18-91 (emergency); Added at 9 Ok Reg 1457, eff 5-1-92]

310:390-5-4. Frequency of analysis

A more frequent analysis of the parameters may be required by the Department if there is evidence of unfitness of the vended water because of the presence of undesirable elements, compounds, or materials caused by the passage of water through the machines or device.

[Source: Added at 8 Ok Reg 3103, eff 7-18-91 (emergency); Added at 9 Ok Reg 1457, eff 5-1-92]

SUBCHAPTER 7. LICENSE REQUIRED AND APPLICATION FOR LICENSE

310:390-7-1. License application

(a) Any person operating water vending machine or device shall have a valid license issued to such person by the Oklahoma State Commissioner of Health pursuant to Title 63 O.S.1981, Sections 1-1101 and following. Only a person who is in virtual compliance with the requirements of these rules and regulations shall be entitled to receive or retain such a license. Licenses are not transferable.

(b) Notwithstanding subsection (a), of this section, a water vending machine operator who is also a license holder under Title 63 O.S. Section 1-1118 (retail food license) and who operates water vending machines only within his licensed food establishment(s) shall not be required to obtain a separate license under these regulations, but shall otherwise comply with the applicable requirements of these regulations.

[Source: Added at 8 Ok Reg 3103, eff 7-18-91 (emergency); Added at 9 Ok Reg 1457, eff 5-1-92]

310:390-7-2. Issuance of license

(a) Any person desiring to operate a water vending machine or device in Oklahoma shall make written application for a license on a form provided by the State Department of Health. The application shall contain such information as the Department deems necessary to determine that the operation of the water vending machine or device will not be injurious or hazardous to the health or safety of the public.

(b) A License shall be issued upon receipt of the following:

(1) Satisfactory evidence each model of machine intended to be used meets all requirements of Section 310:390-3-2 of these regulations.

(2) Satisfactory evidence or affidavit the sources of water supply used will be from a public water system certified as safe by the Department or a private system certified as safe and tested by the Department or by an approved laboratory.

(3) Satisfactory evidence the person applying for the license has:

(A) A competent staff for the local supervision of the operation of the machines;

(B) An acceptable maintenance program for the routine servicing of water vending machines to include written servicing instructions for the operator; technical manuals for the machine and water treatment appurtenances involved; and regularly scheduled service visits; and

(C) A signed application along with the appropriate fee.

[Source: Added at 8 Ok Reg 3103, eff 7-18-91 (emergency); Added at 9 Ok Reg 1457, eff 5-1-92]

310:390-7-3. Expiration of license

A license shall expire one year from the date of its issuance unless canceled or revoked prior to its expiration. For purposes of determining the expiration date of a vending license, the date of issuance shall be deemed to be the date that an approved application for licensure is first issued by a duly authorized representative of the Health Department.

[Source: Added at 8 Ok Reg 3103, eff 7-18-91 (emergency); Added at 9 Ok Reg 1457, eff 5-1-92]

310:390-7-4. Expired license

A license not renewed within ninety (90) days after the date of its expiration shall require payment of an amount equivalent to the initial license fee.

[Source: Added at 8 Ok Reg 3103, eff 7-18-91 (emergency); Added at 9 Ok Reg 1457, eff 5-1-92]

310:390-7-5. License revocation or suspension

Procedures for revocation or suspension of a license to sell or vend potable water are stated in the Oklahoma Administrative Procedures Act. Failure to comply with any of the applicable requirements of Article 11 of the Oklahoma Public Health Code or these Regulations shall constitute grounds for revocation or suspension of a license.

[Source: Added at 8 Ok Reg 3103, eff 7-18-91 (emergency); Added at 9 Ok Reg 1457, eff 5-1-92]

SUBCHAPTER 9. INSPECTION, EMBARGO AND CONDEMNATION

310:390-9-1. Access

Representatives of the Oklahoma State Department of Health, after proper identification, shall be permitted to inspect any water vending machine or operation at any reasonable time for the purpose of determining compliance with this Chapter. The representative shall be permitted to examine the records of the operation to obtain information pertaining to the proper operation of the water vending machine and the quality of the vended water.

[Source: Added at 8 Ok Reg 3103, eff 7-18-91 (emergency); Added at 9 Ok Reg 1457, eff 5-1-92]

310:390-9-2. Inspection

As a condition of receiving a license and annually thereafter, the operator shall receive an inspection which must demonstrate compliance with the operational requirements of these regulations. Said inspection shall be conducted by the Department, by the FDA, or by a third party inspection organization (such as NSF) acceptable to the Department and on a form approved by the Commissioner.

[Source: Added at 8 Ok Reg 3103, eff 7-18-91 (emergency); Added at 9 Ok Reg 1457, eff 5-1-92]

310:390-9-3. Embargo and condemnation

Vended water and associated equipment may be examined or sampled by the Oklahoma State Department of Health as often as necessary for enforcement of this Chapter. The Oklahoma State Department of Health may place an embargo on a water vending machine or machines in accordance with the provisions of Title 63 O.S. 1981, Section 1-1105.

[Source: Added at 8 Ok Reg 3103, eff 7-18-91 (emergency); Added at 9 Ok Reg 1457, eff 5-1-92]

CHAPTER 395. LICENSED MIDWIVES

[**Authority:** 59 O.S. § 3040.1 et seq.; 63 O.S. § 1-104]

[**Source:** Codified 9-11-21]

SUBCHAPTER 1. GENERAL PROVISIONS

310:395-1-1. Purpose

The rules in this Chapter implement Shepherd's Law, as codified in Title 59 O.S. §§ 3040.1 *et seq.*

[**Source:** Added at 38 Ok Reg 2005, eff 9-11-21]

310:395-1-2. Definitions

When used in this Chapter, the following words or terms shall have the following meaning unless the context of the sentence requires another meaning:

"**ACOG**" means American College of Obstetricians and Gynecologists.

"**Act**" means 59 O.S. §§ 3040.1 *et seq.*

"**Active first stage**" means the first stage of labor where the cervix is dilated to at least 6 centimeters.

"**AMCB**" means American Midwifery Certification Board, the national certifying body for candidates in nurse-midwifery and midwifery who have received their graduate level education in programs accredited by the Accreditation Commission for Midwifery Education.

"**Apgar**" means an index used to evaluate the condition of a Newborn infant based on a rating of 0, 1, or 2 for each of the five characteristics of color, heart rate, response to stimulation of the sole of the foot, muscle tone, and respiration with 10 being a perfect score.

"**APRN**" means advanced practice registered nurse.

"**Birth center**" means any facility, place or institution, which is maintained or established primarily for the purpose of providing services of a Licensed Midwife, Certified Nurse-Midwife or licensed medical doctor to assist or attend a woman in delivery and birth, and where a woman is scheduled in advance to give birth following a Normal pregnancy.

"**CCHD**" means critical congenital heart disease.

"**Certified Nurse-Midwife**", "**CNM**" or "**Nurse-Midwife**" means the same definition provided in 59 O.S. § 567.3a.

"**Client**" means a recipient of midwife services who is a pregnant woman, a postpartum woman for a minimum of thirty (30) days after giving birth, or her healthy Newborn for the first six weeks of life.

"**Clinician**" means a licensed physician or other licensed healthcare professional having direct contact with and responsibility for patients, including observation, diagnosis, treatment, and care.

"**CM**" means Certified Midwife, an individual certified by the American Midwifery Certification Board who is not a Nurse-Midwife.

"Commissioner" *means the State Commissioner of Health.* [59 O.S. § 3040.2].

"Committee" *means the Advisory Committee on Midwifery .* [59 O.S. § 3040.2].

"CPM" means Certified Professional Midwife, an individual certified by the North American Registry of Midwives (NARM).

"Department" *means the State Department of Health.* [59 O.S. § 3040.2].

"GBS" means group B streptococcus bacteria.

"Licensed midwife" means a person who practices Midwifery and is licensed under 59 O.S. § 3040.1 and this Chapter.

"Medical consultation" means conferring with and seeking assistance from a medically relevant physician or other licensed healthcare professional for assessment and diagnostic conclusions, therapeutic interventions, or other services that will benefit the Client.

"Midwifery" *means the practice of:*

(A) *Providing the necessary supervision, care and advice to a woman during Normal pregnancy, labor and the Postpartum Period;*

(B) *Conducting a Normal delivery of a child;*

(C) *Providing Normal Newborn care; and*

(D) *Providing routine well-woman care and screenings.* [59 O.S. § 3040.2].

"NARM" means the North American Registry of Midwives, the national certification body for Certified Professional Midwives.

"Newborn" *means an infant from birth through the first six weeks of life.* [59 O.S. § 3040.2]

"Normal" *means, as applied to pregnancy, labor, delivery, the Postpartum Period and the Newborn period, and as defined by rules of the State Commissioner of Health, circumstances under which a Licensed Midwife has determined that a Client does not have a condition that requires medical intervention.* [59 O.S. § 3040.2].

"Normal fetal heart tones" means between 110 and 160 beats per minute and reassuring fetal status.

"NRP" means Neonatal Resuscitation Program. An education program in neonatal resuscitation developed and maintained by the American Academy of Pediatrics.

"OAC" means the Oklahoma Administrative Code.

"Postpartum period" *means the first six weeks after a woman has given birth.* [59 O.S. § 3040.2].

"Referral" means the process by which the Client is transferred to a medically relevant physician or Certified Nurse-Midwife for management of a particular problem or aspect of the Client's care, after informing the Client of the risks to the health of the Client or Newborn.

"Rules" means the rules set forth in OAC 310:395.

"Second stage" means the second stage of labor where there is complete cervical dilation to 10 centimeters and ends with the delivery of the Newborn.

"Shepherd's Law" means 59 O.S. §§ 3040.1 *et seq.*

"Student midwife" means a person who is providing Midwifery care under the direct or indirect supervision of a qualified, Licensed Midwife preceptor based on their level of training.

"Unlicensed midwife" means a person who offers Midwifery services or holds himself or herself out to be a midwife who is not licensed under this Act. [59 O.S. § 3040.8].

"VBAC" means vaginal birth after cesarean.

[Source: Added at 38 Ok Reg 2005, eff 9-11-21]

310:395-1-3. Applicability

This chapter does not apply to:

- (1) *A Certified Nurse-Midwife (CNM), a physician or other health care professional licensed by the state and operating within the scope of the person's license;*
- (2) *A Student Midwife who is providing Midwifery care under the direct supervision of a qualified, Licensed Midwife preceptor;*
- (3) *A natural childbirth educator or doula; and*
- (4) *A person other than a Licensed Midwife who assists childbirth in an emergency.* [59 O.S. § 3040.3].

[Source: Added at 38 Ok Reg 2005, eff 9-11-21]

310:395-1-4. License required to practice

(a) No person who is certified as, or holds himself or herself out to be, a Certified Professional Midwife (CPM) or a Certified Midwife (CM) shall practice Midwifery in this state without first applying for and obtaining a license from the Commissioner.

(b) No person shall use in connection with their name or place of business the words "Licensed Midwife," or any other words, letters, or insignia indicating or implying that he or she is a Licensed Midwife or representing himself or herself as such in any way orally, in writing, in print, or by sign directly or by implication unless he or she has been licensed as such under the provisions of these regulations.

[Source: Added at 38 Ok Reg 2005, eff 9-11-21]

310:395-1-5. [RESERVED]

[Source: Reserved at 38 Ok Reg 2005, eff 9-11-21]

310:395-1-6. Providing care

A Licensed Midwife who has agreed to provide care to a Client is held accountable to act according to the standards of care set out in 59 O.S. §§ 3040.1 *et seq.* and these Rules until such a time as that care is terminated or transferred by the Client or the Licensed Midwife in accordance with these Rules.

[Source: Added at 38 Ok Reg 2005, eff 9-11-21]

310:395-1-7. Registration list

The Department shall maintain a list of all Licensed Midwives in the state, and provide this list to the county clerk with a name of each Licensed Midwife practicing in a county.

[Source: Added at 38 Ok Reg 2005, eff 9-11-21]

310:395-1-8. Advertising

(a) A Licensed or Unlicensed Midwife shall not:

(1) Advertise or represent that the midwife is a physician unless the midwife is licensed to practice medicine by the State Board of Medical Licensure and Supervision or the State Board of Osteopathic Examiners;

(2) Advertise or represent that the midwife is a graduate of a medical school unless the midwife can show proof of graduation from a medical school;

(3) *Use advertising or an identification statement that is false, misleading or deceptive; or*

(4) *Except as authorized by rules adopted by the Oklahoma Board of Nursing, use in combination with the term "midwife" the term "nurse" or another title, initial or designation that implies that the midwife is licensed as a Registered Nurse or vocational nurse.*

(b) *An unlicensed midwife shall not use a title in an identification statement or advertisement that would lead a reasonable person to believe that the midwife is certified or licensed.*

(c) *All midwives licensed pursuant to Shepherd's Law shall include in any title, identification statement or advertisement that the midwife is licensed in this state and the credential the midwife possesses.* [59 O.S. § 3040.8].

310:395-1-9. [RESERVED]

[Source: Reserved at 38 Ok Reg 2005, eff 9-11-21]

310:395-1-10. Maintaining national certification

(a) A Licensed Midwife shall maintain a current certification with NARM or AMCB. If the national certification expires for more than 90 days or is revoked, the license issued by the Department will be subject to revocation and the midwife would have to reapply for licensure.

(b) Upon renewal of the NARM or AMCB certification, the Licensed Midwife shall submit a copy of the new certificate to the Department.

SUBCHAPTER 3. ADVISORY COMMITTEE ON MIDWIFERY

310:395-3-1. Purpose

The purpose of this subchapter is to ensure the Advisory Committee on Midwifery meets the requirements of Shepherd's Law.

[Source: Added at 38 Ok Reg 2005, eff 9-11-21]

310:395-3-2. [RESERVED]

[Source: Reserved at 38 Ok Reg 2005, eff 9-11-21]

310:395-3-3. Advisory Committee on Midwifery membership

(a) Appointments to the advisory board shall be made without regard to the race, color, disability, sex, religion, age, sexual orientation, or national origin of the appointee.

(b) For individuals to be considered for the Advisory Committee on Midwifery, a resume providing relevant qualifications shall be sent to the OSDH division that licenses midwives which can be found at <http://chs.health.ok.gov>.

(c) If a vacancy occurs during a member's term, the Commissioner may appoint a replacement after the candidate submits a resume as directed in (b) of this section. The replacement member will serve out the vacated member's remaining term. The replacement member will then be eligible to serve the two (2) term limit as described in 59 O.S. § 3040.5(B).

[Source: Added at 38 Ok Reg 2005, eff 9-11-21]

310:395-3-4. Officers of the Advisory Committee on Midwifery

Officers in addition to the Chair and the Vice-chair may be elected.

[Source: Added at 38 Ok Reg 2005, eff 9-11-21]

310:395-3-5. Rules of order

(a) The Advisory Committee on Midwifery shall meet a minimum of four (4) times per year, and at other times as deemed necessary by the Committee. Meetings will be held in accordance with the Oklahoma Open Meeting Act, 25 O.S. §§ 301 *et seq.*

(b) Applications, complaints, appeals and other considerations for the Committee shall be submitted to the Department at least two (2) weeks before a scheduled meeting.

[Source: Added at 38 Ok Reg 2005, eff 9-11-21]

310:395-3-6. Review of applicants

(a) The Committee will review all applicants for licensure and make recommendations for licensure to the Commissioner.

(b) The Committee may refuse to consider any application that is not complete in every detail, including submission of every document required by the application form. The Committee may, in its discretion, require a more detailed or complete response to any request for

information set forth in the application form as a condition to consideration of an application.

SUBCHAPTER 5. MIDWIFE PRACTICE

310:395-5-1. Scope of work

- (a) Licensed Midwives may provide care only to Clients determined by examination to be Normal for pregnancy and childbirth. Such care includes prenatal supervision and counseling; preparation for childbirth; and supervision and care during labor and delivery and care of the mother and the Newborn in the Postpartum Period.
- (b) Licensed Midwives shall refer or consult with a medically relevant physician when a Client's medical condition deviates from Normal. Licensed Midwives shall have written Standard Operating Procedures that detail the process for Referrals and Medical Consultations. This may include contact information for the referring physician or facility that the Licensed Midwife will use.
- (c) Licensed Midwives may provide care in hospitals with appropriate hospital privileges, Birth Centers, clinics, offices and home birth settings.
- (d) Licensed Midwives may obtain diagnostic tests, order testing, and receive reports that are necessary to the practice of Midwifery.
- (e) If possible, the Licensed Midwife may accompany the mother or infant to the hospital if hospitalization is necessary. If possible, the Licensed Midwife may remain with the mother or infant until a care plan is established to provide continuity of care. Licensed Midwives should not be considered as a visitor in the healthcare setting and should be allowed into the hospital consistent with hospital policy even when there may be visitor restrictions, such as those imposed due to COVID-19.

[Source: Added at 38 Ok Reg 2005, eff 9-11-21]

310:395-5-2. Client welfare

- (a) **Discrimination.** Licensed Midwives shall not, in the rendering of professional services, participate in, condone, or promote discrimination on the basis of race, color, age, gender, religion or national origin.
- (b) **Confidentiality.** Licensed Midwives and any persons engaged by a Licensed Midwife who provide any related or administrative work and have access to Client information, shall maintain the confidentiality of any information received from any person or source about a Client, unless authorized in writing by the Client or otherwise authorized or required by law or court order.

[Source: Added at 38 Ok Reg 2005, eff 9-11-21]

310:395-5-3. Professional standards

- (a) **Violations of other laws.** It shall be unprofessional conduct for a Licensed Midwife to violate a state or federal statute if the violation

directly relates to the duties and responsibilities of the Licensed Midwife.
(b) **Drug and alcohol use.** Licensed Midwives shall not render professional services while under the influence of alcohol, illicit drugs, or any substance that can cause a person to lose control of his or her faculties or behavior.

(c) **Updating.** Licensed Midwives shall notify the Department of any change in contact information within thirty (30) days of such change.

(d) **Candor to the Department.** A Licensed or Unlicensed Midwife or a Licensed Midwife candidate, in connection with a license application or an investigation conducted by the Department pursuant to OAC 310:395-19-3, shall not:

- (1) Knowingly make a false statement of material fact;
- (2) Fail to disclose a fact necessary to correct a misapprehension known by the Licensed or Unlicensed Midwife or Licensed Midwife candidate to have arisen in the application or the matter under investigation; or
- (3) Fail to respond to a request for information made by the Department or any designated representative thereof within fifteen (15) days of the request.

[Source: Added at 38 Ok Reg 2005, eff 9-11-21]

310:395-5-4. Disclosure forms

(a) A Licensed or Unlicensed Midwife shall disclose verbally and in written form to a prospective Client at the outset of the professional relationship items 1 through 14 of this section. This discussion must be documented by use of a disclosure form. It must be signed and dated by the Client at the same time the Licensed or Unlicensed Midwife and Client enter into an agreement for services. This form must be filed in the Client's medical record. The disclosure shall include:

- (1) The Midwife's name, and the license number and expiration date if applicable;
- (2) The Client's name, contact information, and the name of the Client's primary care provider if the Client has one;
- (3) A statement that the Midwife is not an advanced practice registered nurse-midwife;
- (4) Credentials of the Midwife;
- (5) Documentation of compliance with continuing education requirements if the Midwife is licensed;
- (6) Disclosure of years of service as a Midwife;
- (7) A description of the plan or protocol for transfer to a hospital;
- (8) The limitations of the skills and practices of the Midwife;
- (9) Whether the Midwife carries malpractice insurance;
- (10) Emergency Plan - As part of the disclosure form, an individual emergency plan must be established by the Licensed Midwife and Client. The plan must include:
 - (A) The Client's name, address, and phone number;
 - (B) The arrangements for transport from the delivery site to a nearby hospital;

- (C) The name, address and phone number of the hospital with obstetric services that will be used for emergency transfer;
 - (D) The name, address, and phone number of the hospital with obstetric services that will be used for non-emergency transfer; and
 - (E) The name and phone number of any Clinician providing backup care or co-care to the Client;
 - (11) Direction on where to find scope of practice standards of a Licensed Midwife, as provided by rules of the Commissioner;
 - (12) Notification that state law requires a Newborn to be tested for certain heritable disorders, hearing screening and hypothyroidism, in the absence of a signed parental waiver;
 - (13) Procedures for reporting a complaint to the Department; and
 - (14) Any additional information or requirement that the Department deems necessary to protect the health, safety, or welfare of the Client.
- (b) The Department will provide a template Disclosure Statement providing this information on its website.
- (c) Before the onset of labor, the midwife's agreement can be terminated at any time that the midwife deems it necessary for maintenance of the Client's mental and physical safety or for compliance with these rules. When termination occurs, the reasons for termination will be given in writing and an alternative source of care recommended; and
- (d) The Client may terminate the agreement at any time.

[Source: Added at 38 Ok Reg 2005, eff 9-11-21]

310:395-5-5. Informed consent

- (a) The Licensed Midwife shall provide the Client with an informed consent process which shall include all of the following:
- (1) Explanation of possible risks and benefits associated with out-of-hospital birth;
 - (2) Provide information on other childbirth options available;
 - (3) A specific written consent for out-of-hospital birth with the Licensed Midwife must be obtained prior to the onset of labor;
 - (4) Explanation of the available treatments and procedures;
 - (5) Explanation of both the risks and expected benefits of the available treatments and procedures;
 - (6) Discussion of alternative procedures, including delaying or declining of testing or treatment, and the risks and benefits associated with each choice; and
 - (7) Documentation of any initial refusal by the patient of any action, procedure, test, or screening that is recommended by the Licensed Midwife.
- (b) A Licensed Midwife shall obtain the Client's signature acknowledging that the patient has been informed, verbally and in writing, of the disclosures.
- (c) A Licensed Midwife shall provide an abbreviated informed consent appropriate to the emergency situation with documentation to follow

once the situation has stabilized.

(d) If the Licensed Midwife is to perform an External Cephalic Version (ECV) an informed consent statement shall be provided explaining the risks and benefits. The Department will provide a template informed consent for ECV on its website.

[Source: Added at 38 Ok Reg 2005, eff 9-11-21]

310:395-5-6. Conditions precluding Midwifery care

(a) The following conditions preclude Midwifery care and the Client must be transferred to a physician, CNM, or Clinician upon diagnosis:

- (1) Severe asthma;
- (2) Cyanotic heart disease or presence of a prosthetic valve;
- (3) New York Heart Association class two heart failure;
- (4) History of cardiac surgery with an abnormal echocardiogram;
- (5) Pulmonary Hypertension;
- (6) Hemoglobinopathies; sickle cell disease, thalassemia;
- (7) Chronic hypertension on medication or with renal or heart disease;
- (8) Severe obstructive pulmonary disease;
- (9) Chronic renal disease with a creatinine of greater than 1.5;
- (10) Lupus;
- (11) Marfan syndrome;
- (12) History of intracranial injury (stroke, AV malformation, or aneurisms);
- (13) Prolonged anti-coagulation;
- (14) Type 1 diabetes;
- (15) Severe Polyhydramnios less than 34 weeks;
- (16) Triplets or greater;
- (17) Monoamniotic twins;
- (18) Conjoined twins;
- (19) Placenta accrete;
- (20) Documented placenta previa in the third trimester; the placenta shall not be previa. To determine this, in the case of documented placenta previa or marginal placenta previa in the second trimester, a third trimester ultrasound must show resolution by 36 weeks or the Client must be referred. The Client must obtain an official ultrasound report with images performed by a Registered Diagnostic Medical Sonographer (RDMS) to determine that the location of the placenta is not previa or marginal placenta previa no later 34 weeks.
- (21) Uncontrolled seizure disorder;
- (22) Evidence of placenta abruption;
- (23) Evidence of preeclampsia/eclampsia;
- (24) Active tuberculosis or other serious pulmonary pathology;
- (25) Inadequately treated syphilis;
- (26) Hepatic disorders (cholestasis);
- (27) Uncontrolled endocrine disorders;
- (28) Significant hematological disorders;
- (29) Active cancer;

- (30) Active alcoholism or abuse;
 - (31) Active drug addiction or abuse; and
 - (32) Positive for HIV antibody.
- (b) The following conditions preclude Midwifery care and the Client must be transferred to a physician, CNM, or Clinician upon diagnosis unless the Client obtains a signed consult note from a medically relevant physician and all recommended treatments can be completed in an out of hospital setting.
- (1) History of seizure disorder;
 - (2) History of preterm labor or cervical insufficiency;
 - (3) Evidence of shortened cervix;
 - (4) Positive for Hepatitis B;
 - (5) History of chronic hypertension;
 - (6) Isoimmunization;
 - (7) History of post-partum hemorrhage with concurrent anemia;
 - (8) History of unexplained, recurrent stillbirths or neonatal death;
 - (9) Severe psychiatric illness within the last six (6) months as defined by the Diagnostic and Statistical Manual of Mental Disorders (DSM);
 - (10) Pregnancy that extends beyond 42 weeks 0/7 days gestational age;
 - (11) Two or more previous cesarean deliveries unless the Client has also had a successful vaginal delivery since the last cesarean delivery;
 - (12) BMI over 50 at onset of pregnancy;
 - (13) Type 2 diabetes; and
 - (14) History of cardiac surgery with a normal echocardiogram within the last 12 months.

[Source: Added at 38 Ok Reg 2005, eff 9-11-21]

310:395-5-6.1. Provisions for VBAC, multiple, and breech births

- (a) A Licensed Midwife shall not provide prenatal care and/or birth attendance for a woman who is having a VBAC, vaginal multiple birth, or vaginal breech birth unless the following requirements are met:
- (1) Informed Consent specific to VBAC, vaginal multiple birth, or vaginal breech birth is provided to and signed by the client as required by OAC 310:395-5-5 of this Chapter;
 - (2) In event of transport, the Licensed Midwife implements and acts in accordance with the hospital transportation plan established pursuant to these rules; and
 - (3) The Licensed Midwife performs fetal auscultation at least every fifteen (15) minutes during Active first stage of labor and at least every five (5) minutes during Second Stage of labor.
- (b) For vaginal birth after cesarean deliveries, the following additional requirements must be met:
- (1) There must be at least eighteen (18) months from the Client's previous cesarean to the due date of the current pregnancy;
 - (2) There must not be a previous classical uterine/vertical incision or any other uterine scars through the myometrium;

(3) The Licensed Midwife must obtain, retain, and analyze prior physician and hospital cesarean records, in writing, prior to acceptance of the Client. Records showing that requirements of this section cannot be met shall require immediate referral of care of the Client. If the Licensed Midwife is unable to obtain the written records, the Licensed Midwife shall not retain the Client; and

(4) The placenta shall not be previa or marginal placenta previa in accordance with OAC 310:395-5-6(a)(20).

(5) The Licensed Midwife is required to disclose the following item verbally and written, which is listed on the VBAC informed consent form: The place of birth is/is not within twenty (20) minutes of transport to the nearest hospital with twenty-four (24) hour obstetrical and anesthesia services available. If transport is over 20 minutes, increased distance to surgical interventions, NICU, and pediatric services may increase risk of infant and maternal death.

(c) For planned breech deliveries, the baby shall be in a frank or complete breech position. If baby is in an incomplete or footling breech position, the Licensed Midwife shall transfer care of the Client to a physician when it is possible to do so without endangering the health of the mother or baby.

(d) The requirement to refer listed in subsection (c) of this section is exempted in the event of an imminent breech delivery.

(e) For planned multiple deliveries, the following additional requirements must be met:

(1) Multiples shall be no more than two fetuses;

(2) Determination of chorionicity by the late first trimester or early second trimester by ultrasound with images performed by a Registered Diagnostic Medical Sonographer (RDMS). If the chorionicity is not di/di, the Licensed Midwife should transfer care to a physician upon diagnosis;

(3) A Maternal Fetal Medicine (MFM) consultation is required when twin pregnancy is identified. If the consultation is not obtained, the Licensed Midwife shall refer the Client to a physician;

(4) Discordance of greater than 20% of fetal difference should be referred to a physician at time of recognition;

(5) The presenting twin (baby A) must be head down at term; and

(6) At least three Licensed Midwives should attend the birth.

[Source: Added at 38 Ok Reg 2005, eff 9-11-21]

310:395-5-7. Assessments and care antepartum and intrapartum

(a) **Antepartum.** The responsibilities of the Licensed Midwife shall include, but are not limited to:

(1) Initial Prenatal Visit:

(A) A Licensed Midwife shall perform a history, physical exam, and laboratory studies for risk evaluation including:

- (i) Complete history (medical, surgical, family, psychosocial, obstetrical, gynecological);
- (ii) Evaluation of medications: including prescriptions, over the counter, including homeopathic treatments or supplements, and illegal drugs;
- (iii) Evaluation of allergies including medications, foods, or environmental factors; and
- (iv) A physical exam:
 - (I) Height;
 - (II) Weight;
 - (III) Blood pressure;
 - (IV) Pulse;
 - (V) Temperature;
 - (VI) Breasts, including teaching on self-exam;
 - (VII) Abdomen, including fundal height, fetal heart tones;
 - (VIII) Estimation of gestational age by physical findings; and
 - (IX) Assessment of varicosities, edema, and reflexes;
- (v) Laboratory tests and screenings: The following laboratory tests/screens shall be required:
 - (I) Blood group type, Rhesus (Rh) type, Antibody Screen;
 - (II) Complete Blood Count (CBC);
 - (III) Rubella Titer;
 - (IV) Hepatitis B Surface Antigen;
 - (V) Syphilis serology;
 - (VI) Human Immunodeficiency Screening; and
 - (VII) Urinalysis (culture if indicated);
- (vi) Recommended laboratory tests and screenings: The following laboratory tests/screens shall be recommended:
 - (I) Genetic Screening;
 - (II) Chlamydia Trachomatis;
 - (III) Neisseria gonorrhoeae;
 - (IV) Trichomonas; and
 - (V) Drug screen with testing if indicated.

(B) A Client has the option to refuse any test or screening offered by the Licensed Midwife. Any refusal should be documented by the Licensed Midwife and placed in the Client's file. Client refusal of any test or screening that is necessary to determine any condition precluding midwifery care shall require transfer of care.

(2) Ongoing Prenatal Care:

- (A) Maternal assessments to be completed at each visit shall include:
 - (i) General well-being;

- (ii) Psychosocial health status;
- (iii) Maternal vital signs;
- (iv) Nutrition and Hydration status;
- (v) Weight gain or loss;
- (vi) Presence of edema;
- (vii) Fundal height measurement;
- (viii) Fetal assessment of position and presentation;
and
- (ix) Fetal assessment of heart tones.

(B) Prenatal visits may include, but are not limited to:

- (i) Discussions and offers of tests and screenings at appropriate times, including but not limited to: Ultrasound, Gestational Diabetes Screening, Genetic Screening, HIV, HBsAg, GBS culture, Anemia Screening, STI Screening, Pap Smear, need for Rhogam prophylaxis;
- (ii) Signatures for any test or screening the Client consents to or refuses;
- (iii) Assessments of the pelvic cavity for cervical dilation, effacement, fetal station, or evaluation for abnormality; and
- (iv) Review of plans for medical Referral and transfer of mother or infant, prior to onset of labor.

(C) Laboratory tests and screenings: The following laboratory tests/screens shall be required:

- (i) Gestational diabetes screening at 24-28 weeks;
and
- (ii) Group B strep screening at 35-37 weeks of pregnancy.

(D) A physical or virtual home visit to assess the home environment is mandatory, if the birth is to occur at the Client's house.

(3) Recommended prenatal schedule:

- (A) Monthly until 28 weeks;
- (B) Every two weeks from 28 - 36 weeks;
- (C) Weekly from 36 weeks until delivery; and
- (D) Major deviations from this schedule should be documented in the Client's file.

(b) **Intrapartum.** During active labor, the Licensed Midwife shall monitor and support the natural process of labor and birth, assessing mother and baby throughout the birthing process. Responsibilities of the Licensed Midwife shall include, but are not limited to:

(1) Assessments:

- (A) The Licensed Midwife shall make an initial exam during labor, which consists of an assessment of maternal blood pressure, pulse, temperature, edema, fetal position and presentation, noting membranes status, presence or absence of meconium, and fetal heart tones (FHT); and strongly recommend an internal vaginal examination to determine cervical dilation, effacement and station;

(B) The Licensed Midwife shall monitor fetal heart tones upon arrival. Intermittent monitoring may include assessing FHT every:

(i) At least every 15- 30 minutes in Active First Stage; and

(ii) 5-15 minutes in Second Stage.

(C) When present with the mother, the Licensed Midwife will check FHT immediately after the following: Rupture of membranes, sudden pain, excessive bleeding, sudden or marked change in labor pattern, mother reports concern in fetal movement;

(D) The Licensed Midwife shall perform an internal vaginal examination to determine cervical dilation, effacement and station immediately after the following: Abnormal FHT, suspected malpresentation, sudden pain, excessive bleeding, sudden or marked change in labor pattern, mother reports concern in fetal movement;

(E) The Licensed Midwife shall remain with the Client at all times once contractions are well-established at a regular frequency of four to five (4-5) minutes with dilation of six (6) centimeters, or the Client requests need for the Licensed Midwife to be present; and

(F) The Licensed Midwife shall monitor maternal vital signs every 4 hours after onset of active labor.

(G) Placenta Exam.

(i) The Licensed Midwife shall examine the placenta and membranes for completeness, unusual coloration, or odor; and

(ii) The Licensed Midwife shall examine the umbilical cord for the appropriate number of vessels.

(2) A Licensed Midwife shall not use forceps, a vacuum extractor or any prescription drug to advance or retard labor or delivery [59 O.S. § 3040.7].

[Source: Added at 38 Ok Reg 2005, eff 9-11-21]

310:395-5-8. Required medical consultation or referral, antepartum and intrapartum periods

(a) The Licensed Midwife shall make an immediate Referral for any woman who during the antepartum period:

(1) Develops edema of the face and hands, severe, persistent headaches, epigastric pain, or visual disturbances concerning for preeclampsia;

(2) Develops eclampsia;

(3) Develops a systolic blood pressure of 140 or greater or diastolic blood pressure of 90 or greater on two separate occasions 4 hours apart, or develops a systolic blood pressure over 150 or greater or a diastolic blood pressure of 100 or greater on a single reading;

- (4) Has persistent, frank vaginal bleeding before onset of labor;
- (5) Has rupture of membranes prior to 37 weeks gestation;
- (6) Has marked decrease in or cessation of fetal movement;
- (7) Has polyhydramnios or oligohydramnios;
- (8) Develops gestational diabetes by history or testing, unresponsive to dietary and exercise changes per American Diabetes Association (ADA) guidelines within two (2) weeks of implementing dietary and lifestyle changes;
- (9) Has sexually transmitted infection including but not limited to, HIV, Syphilis, and HSV-1 or HSV-2 with an active infection or prodromal symptoms in the last trimester or at time of delivery;
- or
- (10) Identifies twins other than di/di.

(b) The Licensed Midwife shall obtain Medical Consultation for a woman who during the antepartum period:

- (1) Develops marked glucosuria or proteinuria on two consecutive separate visits;
- (2) Has abnormal vaginal discharge with no signs of improvement with medication;
- (3) Has symptoms of urinary tract infection that does not improve with treatment;
- (4) Has inappropriate gestational size, through physical evaluation or diagnostic examination;
- (5) Has demonstrated anemia by blood test (hematocrit less than 30 percent, hemoglobin under 10) that does not improve with treatment;
- (6) Has demonstrated Thrombocytopenia by blood test (platelets under 150) that does not improve with treatment;
- (7) Has an unexplained fever of equal or greater than 101⁰ F or 38⁰ C;
- (8) Has hyperemesis;
- (9) Has severe, protruding varicose veins of extremities or vulva with no signs of improvement after treatment;
- (10) Has known structural abnormalities of the reproductive tract which are incompatible with vaginal birth;
- (11) Has an abnormal Pap smear;
- (12) Has sexually transmitted infection including but not limited to, Chlamydia, Gonorrhea, Trichomoniasis, Bacterial Vaginosis, HSV-1, HSV-2, HPV, Condylomata Acuminata;
- (13) Reaches a gestation of 41 weeks, 3 days by dates and examination;
- (14) Hepatitis C; and
- (15) Any other infection requiring treatment or monitoring.

(c) The Licensed Midwife shall make an immediate Referral for any woman who during the intrapartum period:

- (1) Goes into labor prior to 37 weeks 0/7 days gestation;
- (2) Develops a systolic blood pressure of 140 or greater or diastolic blood pressure of 90 or greater on two separate occasions 4 hours apart, or develops a systolic blood pressure over 150 or greater or a diastolic blood pressure of 100 or greater

- on a single reading;
- (3) Develops severe headache, epigastric pain, or visual disturbance concerning for eclampsia;
 - (4) Develops a fever over 100.4 °F or 38 °C;
 - (5) Develops respiratory distress;
 - (6) Has persistent baseline or recurrent fetal heart tones below 110 or above 160 beats per minute, or a fetal heart rate that is abnormal and does not improve with attempts to correct;
 - (7) Has ruptured membranes and birth has not reached active labor after 18 hours;
 - (8) Has unresolving, frank bleeding prior to delivery (other than bloody show);
 - (9) Has thick meconium or blood-stained amniotic fluid with non-reassuring fetal heart tones;
 - (10) Has a malpresentation incompatible with vaginal delivery;
 - (11) Does not progress in effacement, dilation, or station after 4 hours of adequate uterine activity in active labor;
 - (12) Does not show continued progress to deliver in second stage labor after adequate pushing effort for 4 hours;
 - (13) Does not deliver the placenta within one hour if there is no bleeding and the fundus is firm;
 - (14) Has a partially separated placenta during the third stage of labor with bleeding;
 - (15) Exhibits signs or symptoms of hypovolemia (low blood volume) and has a blood pressure below 100 systolic if the sustained pulse rate exceeds 100 beats per minute or who is symptomatic;
 - (16) Estimated blood loss greater than 500 ml with or after the delivery of the placenta and the mother is symptomatic;
 - (17) Has placental fragment or membranes (pieces of the placenta or amniotic sac) retained in the uterus; or
 - (18) Desires transfer.

[Source: Added at 38 Ok Reg 2005, eff 9-11-21]

310:395-5-9. Required Newborn care

(a) The Licensed Midwife shall be responsible for Newborn care immediately following the delivery and care of the healthy Newborn for the first six (6) weeks unless care is transferred to a physician or APRN specializing in the care of infants and children before that. The midwife should provide a recommendation to a physician or APRN specializing in the care of infants and children and encourage the Client to schedule a Newborn appointment within fourteen (14) days. This does not preclude the Licensed Midwife from providing counseling regarding routine Newborn care and breastfeeding.

(b) The following services may be provided by the Licensed Midwife as part of immediate Newborn care:

- (1) Prevent heat loss by the Newborn;
- (2) Assess presence of meconium;
- (3) Assess Newborn's status at birth as vigorous or non-vigorous;

- (4) Immediately after delivering the entire body, suction mouth, then nose, if needed;
- (5) Clamp and cut the cord;
- (6) Determine Apgar scores at one (1) and five (5) minutes after delivery;
- (7) The Licensed Midwife shall ensure that Vitamin K is available at the time of delivery. If refused, the Licensed Midwife shall document the refusal;
- (8) The Licensed Midwife shall ensure that erythromycin is available at the time of delivery. If refused, the Licensed Midwife shall document the refusal;
- (9) The Licensed Midwife shall observe and record:
 - (A) Skin color and tone;
 - (B) Heart rate;
 - (C) Respiration rate and character;
 - (D) Estimated gestational age; indicate average, small, or large for gestational age;
 - (E) Axillary temperature; and
 - (F) Weight, length, and head circumference.
- (10) Obtain cord blood for Rh and antibody screen if mother is Rh negative; and
- (11) Administer a pediatric Hepatitis B vaccine within 12 hours of birth unless refused in accordance with OAC 310:395-5-14 of this Chapter.

[Source: Added at 38 Ok Reg 2005, eff 9-11-21]

310:395-5-10. Required medical consultation or referral during newborn care

(a) The Licensed Midwife will make an immediate Referral to a physician of an infant with:

- (1) Apgar score of less than seven (7) at five (5) minutes or less than seven (7) at ten (10) minutes;
- (2) Abnormal cry;
- (3) Medically significant anomaly;
- (4) Respiratory distress;
- (5) Cardiac irregularities;
- (6) Cardio Pulmonary Resuscitation efforts initiated;
- (7) Signs of hypoglycemia such as but not limited to tremors, apnea, lethargy, poor feeding, poor muscle tone, weak or high-pitched cry, hypothermia, cyanosis, seizures;
- (8) Persistent Newborn temperature below 97 or above 100.4 degrees;
- (9) Heart rate > 160 bpm or <100 bpm;
- (10) Birth weight less than 2500 grams and with any of the following:
 - (A) Lethargy;
 - (B) Low temperature;
 - (C) Poor suck; or
 - (D) Jitteriness.

- (11) SpO2 (pulse oxygenation) outside of NRP (Neonatal Resuscitation Program) guidelines or failed CCHD (critical congenital heart disease) pulse oximetry screening; or
- (12) Cyanosis, pallor or abnormal color that does not resolve within the expected time frame.

(b) The Licensed Midwife will initiate a Medical Consultation for treatment of infants exhibiting signs and/or symptoms of any of the following:

- (1) Jaundice within twenty-four (24) hours of birth or jaundice above physiological jaundice in the Postpartum Period;
- (2) Birth weight greater than nine (9) pounds with a maternal history of diabetes;
- (3) Prematurity, dysmaturity, or post maturity as determined by the Newborn exam;
- (4) Failure to urinate within twenty-four (24) hours or pass meconium within forty-eight (48) hours;
- (5) Poor feeding, poor or no suck reflex, lethargy;
- (6) Inability to maintain Normal body temperature;
- (7) Suspected or confirmed injuries or abnormalities; or
- (8) Otherwise healthy infant with a birth weight below 2500 grams.

(c) If possible, the Licensed Midwife may accompany the mother or infant to the hospital if hospitalization is necessary. If possible, the Licensed Midwife may remain with the mother or infant until a care plan is established to provide continuity of care. Licensed Midwives should not be considered as a visitor in the healthcare setting and should be allowed into the hospital consistent with hospital policy even when there may be visitor restrictions, such as those imposed due to COVID-19.

(d) The Licensed Midwife shall inform parents of recommended guidelines for Newborn eye prophylaxis and Vitamin K prophylaxis.

(e) The Licensed Midwife shall inform parents of recommended guidelines for GBS prophylaxis. If the prophylaxis is not administered, the Licensed Midwife shall recommend physician evaluation within 24 hours of birth.

(f) Licensed Midwives are required to arrange administration of Hep B immunoglobulin to infants born to mothers with Hep B within 12 hours of birth.

[Source: Added at 38 Ok Reg 2005, eff 9-11-21]

310:395-5-11. Postpartum care

(a) Licensed Midwife responsibilities shall include, but are not limited to:

- (1) The Licensed Midwife shall remain with the mother and infant for a minimum of two (2) hours postpartum, or until the mother's fundus is firm, lochia normal, mother has voided, mother and infant vitals are within Normal range and the Newborn has fed, whichever is longest;
- (2) The Licensed Midwife shall conduct a thorough genital exam for laceration and make necessary repairs unless it is outside his or her training or skill level;

- (3) In case of an unsensitized Rh negative mother, the Licensed Midwife shall obtain a sample of cord blood from the placenta and arrange for testing within twenty-four (24) hours of the birth and recommend the mother receive Rh immunoglobulin (Rhlg) as indicated within seventy-two (72) hours of delivery; and
- (4) Recommended post-partum schedule:
 - (A) At least one (1) postpartum visit within twenty-four (24) to forty-eight (48) hours after the birth;
 - (B) A second visit at day five (5) or six (6) from birth;
 - (C) Provide a subsequent visit by two (2) and six (6) weeks postpartum to evaluate the condition of the mother and Newborn; and
 - (D) Major deviations from this schedule should be documented in the Client's file.
- (b) The Licensed Midwife shall make an immediate Referral for any woman who during the Postpartum Period:
 - (1) Has signs and symptoms of postpartum Endometritis;
 - (2) Has signs and symptoms of postpartum pre-eclampsia;
 - (3) Has 3rd or 4th degree lacerations requiring medical attention;or
 - (4) Uterine atony or bleeding more than normal lochia flow;
- (c) The Licensed Midwife shall obtain Medical Consultation for a woman who during the Postpartum Period:
 - (1) Has signs and symptoms of postpartum infection, which include but are not limited to:
 - (A) Mastitis; or
 - (B) Urinary tract infection.
 - (2) Has signs and symptoms of sub-involution;
 - (3) Has signs and symptoms of persistent postpartum depression by evaluation with a validated instrument to diagnose postpartum depression conducted as necessary and no later than the six (6) week visit;
 - (4) Abnormal vital signs;
 - (5) Foul-smelling lochia;
 - (6) No voiding within four (4) to six (6) hours of birth;
 - (7) Excessive pain or discomfort;
 - (8) Continuing urinary incontinence;
 - (9) Continuing fecal incontinence;
 - (10) Symptoms of hypovolemia; or
 - (11) The Client desires consultation.

[Source: Added at 38 Ok Reg 2005, eff 9-11-21]

310:395-5-12. Emergency measures

- (a) When an emergency transfer is required, the Licensed Midwife shall:
 - (1) Alert Emergency Medical Service (EMS) to arrange for immediate transport or arrange transport by private vehicle as the situation indicates;
 - (2) Make a reasonable effort to contact the health care professional or institution to whom the Client will be transferred;

and

(3) Continue to provide emergency care, as indicated by the situation, before and during transport to the appropriate facility.

(b) If, during labor, delivery, or six (6) hours immediately following placental delivery, the Licensed Midwife determines that transfer is necessary and the Client refuses transfer, the Licensed Midwife shall call 911 and provide further care as indicated by the situation until emergency services arrive. The Licensed Midwife shall not be required to provide any further care after the arrival of EMS personnel but may do so if requested by EMS personnel.

[Source: Added at 38 Ok Reg 2005, eff 9-11-21]

310:395-5-13. Formulary

(a) A Licensed Midwife shall not administer a prescription drug to a Client other than as provided in this section or as ordered by a licensed prescriber for the benefit of the mother or Newborn:

- (1) Oxygen for fetal or maternal distress and infant resuscitation;
- (2) Local anesthetic (topical, intramuscular, or subcutaneous) for the purpose of postpartum repair of tears, lacerations, or episiotomy (no controlled substances);
- (3) Rh immunoglobulin;
- (4) Antibiotics for GBS prophylaxis per CDC guidelines;
- (5) Vitamin K, for control of bleeding in the Newborn;
- (6) Ophthalmic preparations for Newborn eye care;
- (7) Epipen (0.3 mg) or generic equivalent for allergic reactions;
- (8) Antihemorrhagic medications only permitted for postpartum control of maternal hemorrhage limited to oxytocin, hemabate, misoprostol, and methergine;
- (9) Resuscitation supplies and equipment (this does not include the use of intubation equipment);
- (10) Any supplies or equipment necessary to administer the above;
- (11) Pediatric dose of the Hepatitis B vaccine; and
- (12) IV fluids for medication administration, dehydration, or treatment of hypovolemia while awaiting EMS.

(b) As specified in 59 O.S § 3040.4, a Licensed Midwife may lawfully obtain, transport, administer, and have possession of adequate quantities of the above-named medications and the equipment normally required for administration. Each use of medication, lot number, and expiration date shall be recorded by the Licensed Midwife in the Client's chart.

(c) Medication listed in this section shall be stored as directed by the manufacturer and shall not be administered to any person after the expiration date listed.

[Source: Added at 38 Ok Reg 2005, eff 9-11-21]

310:395-5-14. Universal birth dose hepatitis B vaccination

(a) Licensed Midwives shall implement a procedure to ensure that the hepatitis B vaccination is administered to all live infants within twelve

(12) hours of birth and recorded in the Oklahoma State Immunization Information System. A parent or legal guardian may refuse hepatitis B vaccination of their Newborn on the grounds of medical reasons or that such vaccination conflicts with their religious tenets or personal beliefs. A refusal based on the parent's or legal guardian's religious tenets or personal beliefs shall be documented in the Newborn's medical record and provided to the parent or legal guardian.

(b) Prior to the administration of the hepatitis B vaccine, the Licensed Midwife shall provide a copy to keep of the current Vaccine Information Statement (VIS) produced by the CDC to the parent or legal guardian of the Newborn as required under the National Childhood Vaccine Injury Act (42 U.S.C. § 300aa-26).

[Source: Added at 38 Ok Reg 2005, eff 9-11-21]

310:395-5-15. Record keeping

(a) All Licensed Midwives shall keep accurate and complete physical or electronic records of all care provided and data gathered for each Client.

(b) The Licensed Midwife shall maintain an individual Client chart for each woman under his or her care. The chart shall include results of laboratory tests, observations from each prenatal visit, records of consultations with physicians or other health care providers, and a postpartum report concerning labor, delivery, and condition of the Newborn child. The chart shall be made available to the Client upon request, and with the Client's consent, to any physician or health care provider who is called in as a consultant or to assist in the Client's care. Inactive records shall be maintained no less than twenty-five (25) years (age of majority + 7). All records are subject to review by the Department and shall be provided to the Department upon request.

(c) Licensed Midwives shall be responsible for complying with the applicable state and federal regulations in regard to the security, safety and confidentiality of any medical record they create, maintain, transfer, or destroy whether the record is written, taped, computerized, or stored in any other medium.

(d) Licensed Midwives shall provide the Client with a copy of the Client's record in accordance with state law. In situations involving multiple Clients, access to records is limited to those parts of records that do not include confidential information related to another Client.

[Source: Added at 38 Ok Reg 2005, eff 9-11-21]

310:395-5-16. Reporting to the Department

(a) Licensed Midwives shall follow the reporting provisions set forth in Title 63 O.S. § 1-311 Birth Certificates-filing-contents, 63 O.S. § 1-317 Death Certificate-Filing-Contents, 63 O.S. § 1-318 Fetal Death Certificate-Filing-contents, 63 O.S. § 324.1 Birth, Death or Stillbirth Certificates-Unlawful Acts-Penalties, and the rules and regulations set forth in OAC 310:105.

(b) Licensed Midwives shall file a certificate of birth with the State Registrar for each live birth they have facilitated in the State of

Oklahoma within seven (7) days after the birth. When a birth occurs outside an institution, the certificate shall be prepared and filed by the Licensed Midwife via the electronic system used by the Department.

(c) Licensed Midwives shall report to the Department any criminal convictions that happen while holding an active license. The Department will provide this information to the Advisory Committee on Midwifery.

(d) Licensed Midwives shall file a report of any maternal or fetal death within seven (7) days to the OSDH division that licenses midwives which can be found at <http://chs.health.ok.gov>.

(e) Licensed Midwives shall file a report of any severe maternal or neonatal morbidity events per CDC guidelines within 30 days to the OSDH division that licenses midwives from their initial license until their first renewal. After their first renewal these items may be reported on the yearly report referenced in section (f).

(f) Licensed Midwives shall file a report with the Department by the last day of January for the previous calendar year that states:

- (1) The number of women for whom care was provided;
- (2) The number deliveries performed;
- (3) The number of prenatal transfers;
- (4) The number of transfers during labor, delivery and immediately following birth;
- (5) The number of perinatal deaths, including cause of death, and description of circumstance;
- (6) The number and outcome of VBAC, multiple, and breech births; and
- (7) The number of fetal loss after 20 weeks gestation.

[Source: Added at 38 Ok Reg 2005, eff 9-11-21]

310:395-5-17. [RESERVED]

[Source: Reserved at 38 Ok Reg 2005, eff 9-11-21]

310:395-5-18. Newborn screening

(a) The Licensed Midwife shall ensure screening and testing of Newborns in accordance with 63 O.S. §§ 1-543 to 1-545; OAC 310:550; and these Rules.

(1) Blood Spot Screening:

(A) For all Newborns who are not born in a hospital, the Licensed Midwife shall collect and submit a satisfactory Newborn screening blood specimen as early as possible after twenty-four (24) hours of age;

(B) If the initial specimen is collected at or less than twenty-four (24) hours of age, the Licensed Midwife is responsible for ensuring a repeat screen is collected as soon as possible after twenty-four (24) hours of age. If a sample is not collected, the Licensed Midwife shall immediately notify the infant's physician, if available, parents, and the Newborn Screening Program at the Department;

(C) Specimens shall be obtained with a Newborn Screening Form Kit and be collected in accordance with the standard for Blood Collection on Filter Paper for Newborn Screening Programs, NBS01-A6, Sixth Edition, as adopted and published by the Clinical and Laboratory Standards Institute on July 31, 2013. Failure to follow these methods of blood collection may cause inaccurate results, or unsatisfactory specimen results, that require repeat collection;

(D) The Licensed Midwife shall implement a procedure to ensure that the Newborn screening blood specimen has been collected on every Newborn and transported to the Oklahoma State Department of Health Newborn Screening Laboratory within twenty-four (24) to forty-eight (48) hours of collection. Specimens should be transported in the manner designated by the Department and Newborn Screening Laboratory;

(E) The Licensed Midwife is responsible for ensuring that employees who collect, and/or handle Newborn screening blood specimens are informed of their responsibilities with respect to screening procedures; and

(F) Unless the Licensed Midwife has indicated another health care provider is providing follow up care for the Newborn on the Newborn Screening Form Kit, upon written notification by the Newborn Screening Program of follow up requirements for a Newborn screen result of abnormal, unsatisfactory, or for specimens collected from a Newborn at or less than twenty-four (24) hours of age, the Licensed Midwife or designee will ensure that required repeat screening, confirmatory testing, or diagnostic studies are performed in the timeframe specified so that therapy, when indicated, can be initiated expediently.

(2) Pulse Oximetry Screening for CCHD:

(A) All Newborns who are not born in a hospital should have a pulse oximetry screening performed between twenty-four (24) hours and forty-eight (48) hours of life utilizing an established protocol. A recommended protocol is provided by the Department;

(B) If the Newborn is screened between twelve (12) and twenty-four (24) hours of life, the Licensed Midwife shall notify the infant's physician, if available, of early screening. The pulse oximetry should not be done before twelve (12) hours of age;

(C) If pulse oximetry screening is not performed, the Licensed Midwife will notify the infant's physician, if available;

(D) A qualified and properly trained individual shall perform the pulse oximetry screening and the results shall be provided to the physician, if available, or other health care provider;

(E) The pulse oximetry screening result shall be recorded on the Newborn Screening Form Kit, along with the infant's name, date of birth, submitting facility or provider, mother's name, and the infant's physician, if available;

(F) If the Newborn is not screened for CCHD prior to the Newborn Screening Form Kit being forwarded to the Newborn Screening Laboratory for testing, the pulse oximetry screen result shall be communicated to the Newborn Screening Program Coordinator utilizing the Pulse Oximetry Screening Result Form provided by the Department;

(G) The Licensed Midwife is responsible for ensuring that employees who perform pulse oximetry screening are informed of their responsibilities with respect to screen procedures; and

(H) For abnormal pulse oximetry screen results, it is the responsibility of the Licensed Midwife or authorized health care provider who conducted the pulse oximetry screening to either contact a pediatric cardiologist for clinical recommendations including identification of a Referral facility or, if the Newborn is symptomatic, immediately refer infant to the closest emergency room for evaluation. CCHD Referral protocol is provided by the Department.

(3) Newborn Hearing Screening:

(A) All Newborns who are not born in a hospital should have a physiologic hearing screening utilizing either Automated Auditory Brainstem Response Testing (AABR), Otoacoustic Emissions Testing (OAE) within the first month of life or any new or improved techniques deemed appropriate for use in hearing screening procedures by the Commissioner;

(B) If a physiologic hearing screening is not performed, the Licensed Midwife is responsible for completing the risk factor screening portion on the Newborn Screening Form Kit and notifying the Newborn's physician, if available, that a physiologic hearing screening was not completed;

(C) A qualified and properly trained individual will perform the Newborn hearing screening and ensure that hearing screening results are made available to the physician, if available, or other health care provider;

(D) The Licensed Midwife or designee involved in the hearing screening procedure of a Newborn will forward results to the Department via the Newborn Screening Form Kit, fax, or secure email within one (1) week of performing the hearing screen;

(E) The Newborn hearing screening results shall be recorded on the Newborn Screening Form Kit, along with the infant's name, date of birth, submitting facility/provider, mother's name, and the infant's physician, if available, or provider;

(F) If the Newborn does not receive a Newborn hearing screening prior to the Newborn Screening Form Kit being forwarded to the Newborn Screening Laboratory for testing, hearing screening results shall be communicated to the Newborn Hearing Screening Program utilizing the Newborn Hearing Screening Reporting Form provided by the Department;

(G) The Licensed Midwife is responsible for ensuring that employees who perform Newborn hearing screening are informed of their responsibilities with respect to screening procedures; and

(H) The Licensed Midwife or designee involved in the screening of a Newborn will provide the parents with appropriate resource information to allow the Newborn to receive the medical, audiologic, and other follow-up services for the following reasons:

- (i) Did not receive a physiologic hearing screening;
- (ii) Referred on physiologic hearing screening; or
- (iii) Considered as "at risk" for hearing loss.

(b) Refusal of screening: A parent or legal guardian may refuse the Newborn blood spot screening, hearing screening, and/or pulse oximetry screening of their Newborn on the grounds that such examination conflicts with their religious tenets and/or practices as described in OAC 310:550-3-1. Refusal of screening shall be indicated in writing utilizing the Newborn Screening Program Refusal Form provided by the Department. This signed refusal form shall be placed in the Newborn's medical record with a copy sent to the Newborn Screening Program.

(c) Maintaining records:

(1) Any Licensed Midwife who collects, handles, or forwards Newborn screening blood specimens shall keep a log containing the name and date of birth of the infant, name of the infant's provider, medical record number, serial number of the Newborn Screening Form Kit, date of specimen collection, date specimen was sent to the certified laboratory, date that the test results were received and the test results;

(2) If Newborn blood spot screening test results are not received by the Licensed Midwife within fifteen (15) days after the date of collection, the Licensed Midwife shall contact the Newborn Screening Laboratory to verify that a specimen was received. If a specimen was not received, the Licensed Midwife shall notify the infant's physician, if available;

(3) The chart copy of each Newborn screening kit, pulse oximetry screening results, and hearing screening should be placed in the Newborn's medical record and reported to the parent or legal guardian; and

(4) The Licensed Midwife should document in the Newborn's medical record if a sample is not collected.

(d) Parent, Legal Guardian and Employee Education:

(1) The Licensed Midwife or designee is responsible for ensuring that a parent or legal guardian of each Newborn is educated and provided written materials about Newborn blood spot screening,

pulse oximetry screening, and Newborn hearing screening, and provide information about the disorders and how to obtain screen results from the planned health care provider or Newborn Screening Program; and

(2) The Licensed Midwife shall provide or arrange ongoing training for their employees involved with Newborn blood spot screening, pulse oximetry screening and Newborn hearing screening. Training should include methods of collecting a satisfactory Newborn screening blood spot specimen, information on the proper pulse oximetry screening method, and information on the proper Newborn hearing screening method.

[Source: Added at 38 Ok Reg 2005, eff 9-11-21]

310:395-5-19. Completion and filing of forms and records

(a) All certificates and records filed with the Department under the Act and this Chapter shall be submitted electronically or in legible non-fading black ink.

(b) All blanks and forms shall be prepared in accordance with instructions of the Commissioner. No form or blank shall be considered complete and correct or acceptable for filing that:

- (1) Does not supply all of the items of information called for thereon, or satisfactorily account for their omission;
- (2) Contains alterations or erasures;
- (3) Does not contain genuine signatures;
- (4) Is marked "copy" or "duplicate";
- (5) Is a carbon copy;
- (6) Is prepared on an improper form; or
- (7) Contains any data relative to the putative father of a child born out of wedlock without his written consent, or unless determined by a court of competent jurisdiction.

[Source: Added at 38 Ok Reg 2005, eff 9-11-21]

SUBCHAPTER 7. APPLICATION FOR LICENSURE, FEES, AND CONTINUING EDUCATION

310:395-7-1. Purpose

(a) This Subchapter ensures that all applicants meet the requirements specified in the Act.

(b) Unless otherwise indicated, an applicant shall submit all required information and documentation of credentials on official Department forms and in the manner prescribed by the Department.

[Source: Added at 38 Ok Reg 2005, eff 9-11-21]

310:395-7-2. Qualifications of licensure

To be eligible for licensure as a Licensed Midwife, an applicant shall:

- (1) Be at least 18 years of age and have graduated from high school or possess a graduate education diploma (GED);
- (2) Be a citizen or lawfully authorized to reside and be employed in the United States;
- (3) Be currently certified in cardiopulmonary resuscitation (CPR) for health care providers by the American Heart Association or equivalent;
- (4) Be currently certified in neonatal resuscitation by the American Academy of Pediatrics or equivalent;
- (5) Be currently certified from the North American Registry of Midwives, American Midwife Certification Board, or successor organization approved by the Commissioner;
- (6) Be currently certified in blood borne pathogen training from the American Red Cross or equivalent;
- (7) Have a successful completion of a background check; and
- (8) Provide proof of completion of coursework or a training certificate within the last three (3) years in administration of medicine that includes injections and IV administration.

[Source: Added at 38 Ok Reg 2005, eff 9-11-21]

310:395-7-3. Application materials and forms

- (a) Each application shall include the following documents:
 - (1) Application form;
 - (2) Official documentation showing the applicant meets the requirements listed in OAC 310:395-7-2; and
 - (3) Fee(s).
- (b) The application form requires the following:
 - (1) Identifying information;
 - (2) Resume with relevant work history;
 - (3) Possession of other credentials;
 - (4) Previous misconduct or disciplinary actions;
 - (5) Declaration of previous court judgements against the applicant related to midwifery care; and
 - (6) Other information that may be required by the Department.

[Source: Added at 38 Ok Reg 2005, eff 9-11-21]

310:395-7-4. Issuance of license

- (a) If the qualifications and requirements are complete, and they have been reviewed and approved by the Committee, the Department will notify the applicant and issue a license to engage in the practice of Midwifery.
- (b) The Commissioner will issue a license certificate, which contains the licensee's name, license number, and expiration date.
- (c) All licenses issued by the Commissioner shall remain the property of the Department and be surrendered on demand.

[Source: Added at 38 Ok Reg 2005, eff 9-11-21]

310:395-7-5. Denial of license

If the Commissioner denies any application or request for licensure, the applicant or requestor shall be notified of the Commissioner's decision within thirty (30) days.

[Source: Added at 38 Ok Reg 2005, eff 9-11-21]

310:395-7-6. Responsibility

Each Licensed Midwife is responsible for renewing the license before the expiration date.

[Source: Added at 38 Ok Reg 2005, eff 9-11-21]

310:395-7-7. Licensing period

The initial license and any renewal will expire three (3) years from the date of issuance unless renewed.

[Source: Added at 38 Ok Reg 2005, eff 9-11-21]

310:395-7-8. Requirements for renewal

Requirements for renewal include the following:

- (1) Compliance with the Act and this Chapter;
- (2) Documentation of current certifications listed in OAC 310:395-7-2 of this Chapter with the exceptions of (1) and (7); and
- (3) Payment of the renewal fee(s).

[Source: Added at 38 Ok Reg 2005, eff 9-11-21]

310:395-7-9. Renewal notification

The Department shall provide a notice of expiration to the licensee at least forty-five (45) days prior to the expiration date of the Licensed Midwife's license.

[Source: Added at 38 Ok Reg 2005, eff 9-11-21]

310:395-7-10. Failure to renew

(a) If the licensee fails to renew the license by the expiration date, the Department shall send a notification that shall include the following:

- (1) Suspension of the license and forfeiture of rights and any privilege granted pursuant to the license; and
- (2) The Licensed Midwife has the right to reinstate the license by payment of the renewal fee and the late renewal fee and fulfillment of all other renewal requirements for up to one (1) year following the suspension of the license.

(b) Performance of Licensed Midwife duties with an expired license is a violation of Shepard's law and this Chapter, and may be subject to

administrative penalties and review of eligibility for licensure.

[Source: Added at 38 Ok Reg 2005, eff 9-11-21]

310:395-7-11. Return of license

(a) Licenses not renewed within the one (1) year re-instatement period must reapply as an initial applicant.

(b) A licensee may voluntarily surrender his or her license to the Department. Once voluntarily surrendered, a midwife must reapply as an initial applicant.

[Source: Added at 38 Ok Reg 2005, eff 9-11-21]

310:395-7-12. Misrepresentation

A Licensed Midwife whose license has been inactivated, suspended, or revoked and continues to represent themselves as a Licensed Midwife, is in violation of the Act and shall be reported for prosecution.

[Source: Added at 38 Ok Reg 2005, eff 9-11-21]

310:395-7-13. Schedule of fees

(a) **Application and renewal fee.** One thousand dollars (\$1000.00) shall be submitted with the application form for the initial license or upon renewal of a license. Renewal payments shall be submitted before the license expires.

(b) **Late renewal fee.** An additional one hundred dollars (\$100.00) shall be submitted to the Department if the license is 30 days past the expiration date. If the license is expired by ninety (90) days or more, the late fee will increase to two hundred and fifty dollars (\$250.00).

[Source: Added at 38 Ok Reg 2005, eff 9-11-21]

310:395-7-14. Method of payment

All fees shall be paid to the Department. Payment of fees may be made by credit card or other electronic means, if acceptable by the Department. Any check returned to the Department for non-payment and any credit card payment that is cancelled or retracted will void the license.

[Source: Added at 38 Ok Reg 2005, eff 9-11-21]

310:395-7-15. Continuing education requirement

A Licensed Midwife shall complete the required continuing education to maintain continuous certification as a midwife by the North American Registry of Midwives, the American Midwifery Certification Board or a successor organization approved by the Commissioner.

[Source: Added at 38 Ok Reg 2005, eff 9-11-21]

SUBCHAPTER 9. ENFORCEMENT

310:395-9-1. Purpose

This Subchapter specifies the administration of complaints and the filing of disciplinary actions against Licensed Midwives or against persons who practice Midwifery without a license or exemption.

[Source: Added at 38 Ok Reg 2005, eff 9-11-21]

310:395-9-2. Complaints

(a) Any person may file a complaint against a midwife. A person wishing to report a complaint or alleged violation against a licensee or person practicing Midwifery may notify the Department. The Department will bring all complaints to the Committee for review.

(b) The complaint and the identity of the complainant shall be confidential and shall not be available for public inspection.

[Source: Added at 38 Ok Reg 2005, eff 9-11-21]

310:395-9-3. Investigation

If the Department has reason to believe that a possible violation of the Act or this Chapter has occurred, the Department may commence an investigation.

[Source: Added at 38 Ok Reg 2005, eff 9-11-21]

310:395-9-4. Filing of an action

(a) The Department, in consultation with the Advisory Committee on Midwifery, may begin a disciplinary action against a Licensed Midwife or a person practicing Midwifery who is not exempt from licensure by following the procedures in OAC 310:2 and 75 O.S. §§ 250 *et seq.* The Department shall specifically state the violation(s) and shall state the remedy sought by the Department. Remedies include revocation of a license, suspension of a license, probation of a licensee and/or administrative penalty.

(b) If, in the course of an investigation, the Department determines that a licensee or candidate for licensure has engaged in conduct of a nature that is detrimental to the health, safety, or welfare of the public, and which conduct necessitates immediate action to prevent further harm, the Commissioner may order a summary suspension of the Licensed Midwife's license or authorization to conduct Midwifery.

(c) Examples of items that would qualify for disciplinary action include but are not limited to:

- (1) Practicing outside the scope of practice and protocols listed in these rules;
- (2) Make on a birth certificate a false or misleading statement;
- (3) Failure to submit records in connection with an investigation;
- (4) Revocation of certification by NARM or AMCB;

- (5) Incompetence as determined by standards of care for Midwifery providers;
- (6) Obtaining any fee by fraud or misrepresentation;
- (7) Practicing while knowingly suffering from a contagious or infectious disease that may be transmitted through the practice of Midwifery;
- (8) Practicing Midwifery under the influence of alcohol, an illegal drug, or any substance that can cause a person to lose control of his or her faculties or behavior;
- (9) Conviction of a felony;
- (10) Failure to comply with an order from the Department;
- (11) Failure to file a birth certificate, death certificate, stillbirth certificate, or any other necessary permit as required by law in a timely manner;
- (12) Leaving a Client after active first stage of labor begins without arranging an adequate backup health care provider;
- (13) Manipulating or affecting a Client by withholding or misrepresenting information in violation of the Client's right to make informed choices in health care;
- (14) Consistently failing to accurately document a Client's condition, responses, progress, or other information obtained during care;
- (15) Inability to practice Midwifery with reasonable skill and safety because of illness, disability, or psychological impairment;
- (16) Disciplinary action taken by another licensing or credentialing body due to negligence, willful disregard for patient safety, or other inability to provide safe patient care;
- (17) Failure to obtain required signed informed consent form;
- (18) Providing services to a Client who is required by this Chapter to be transferred to a physician.

[Source: Added at 38 Ok Reg 2005, eff 9-11-21]

310:395-9-5. Hearing

Hearings shall be conducted by the Commissioner or the Commissioner's designee as specified in OAC 310:2. The Advisory Committee on Midwifery shall be consulted on all hearings and make recommendations. The Department shall recommend the most appropriate penalty at the conclusion of the evidence.

[Source: Added at 38 Ok Reg 2005, eff 9-11-21]

310:395-9-6. Final order

The Department, either by order of the Commissioner or his designee, shall issue a final order on all disciplinary matters. Final orders are appealable under the Administrative Procedures Act, 75 O.S. §§ 250 *et seq.*, to the district courts.

[Source: Added at 38 Ok Reg 2005, eff 9-11-21]

310:395-9-7. Unauthorized practice

Any person claiming to be a CPM or CM found to be practicing Midwifery without being either properly licensed or exempt shall be ordered to cease practicing and may be subject to an administrative penalty. The Department may seek the assistance of the courts if the unauthorized practice of Midwifery continues.

[Source: Added at 38 Ok Reg 2005, eff 9-11-21]

310:395-9-8. Administrative penalties

(a) The Department may assess an administrative penalty against an individual if the order includes a finding that the individual violated any of the following:

- (1) Any provision of the Act, including practicing Midwifery without licensure or exemption;
- (2) Any rule within this Chapter; or
- (3) Any order issued pursuant to this Chapter.

(b) The total amount of the administrative penalty assessed shall not exceed five thousand dollars (\$5,000.00) for each violation.

(c) Administrative penalties issued shall be in accordance with Appendix A of this Chapter.

APPENDIX A. ADMINISTRATIVE PENALTY SCHEDULE

Figure 1

Violation	Administrative Penalty
CPM or CM practicing Midwifery with an invalid or expired license, without a license, or without an exemption after July 1, 2021 (OAC 310:395-1-4, 1-5, 7-2, 7-6, 7-10, 7-12, and 7-13)	\$5,000
Refusal to provide care without termination of services by Licensed Midwife or Client (OAC 310:395-1-6 and 9-4)	\$1,000
Improper Advertising by a License or Unlicensed Midwife (OAC 310:395-1-8)	\$500
Licensed Midwife's practice exceeding scope of work (OAC 310:395-5-1, 5-6, 5-6.1, 5-8, 5-10, 5-11, 5-12, and 9-4)	\$1,000
Licensed midwife not referring to or consulting physicians, CNM, and Clinicians as prescribed by rules (OAC 310:395-5-1, 5-6, 5-8, 5-10, 5-11, and 5-12)	\$1,000
Discrimination as described in OAC 310:395-5-2	\$500
Not maintaining confidential records (OAC 310:395-5-2 and 5-15)	\$500
Violation of other laws (OAC 310:395-5-3 and 9-4)	\$500
Use of Alcohol, illicit drugs, or any substance that can cause a person to lose control of his or her faculties or behavior while rendering services (OAC 310:395-5-3 and 9-4)	\$5,000
Not reporting to the Department when required (OAC 310:395-5-3, 5-15, 5-16, 5-17, and 9-4)	\$500
Not cooperating with, or making a false statement in regards to an investigation or order by the Department (OAC 310:395-5-3, 9-3, and 9-4)	\$5,000
Failure to provide disclosure form to the Client (OAC 310:395-5-4 and 9-4)	\$1,000
Missing or incorrect items on a disclosure form (OAC 310:395-5-4)	\$500
Failure to obtain written Informed Consent before services (OAC 310:395-5-5, 5-6.1, and 9-4)	\$1,000
Not providing care as prescribed by these rules (OAC 310:395-5-7, 5-9, 5-11, and 5-12)	\$1,000
Possession, transport, or administration of prescription drug(s) not listed in the formulary or ordered by a physician (OAC 310:395-5-13)	\$1,000
Improper or missing documentation of records (OAC 310:395-5-1, 5-4, 5-5, 5-7, 5-9, 5-12, 5-14, 5-15, 5-18, 5-19, and 9-4)	\$500

Figure 2

Failure to provide records/information to Clients, physicians, or other entities as provided for in these rules (OAC 310:395-5-15 and 5-18)	\$500
Failure to provide or refer Newborn screening without a refusal (OAC 310:395-5-18)	\$500
Lack of employee training (OAC 310:395-5-18)	\$500
Licensed Midwife practicing with a revoked or expired NARM or AMCB certificate (OAC 310:395-1-10, 7-2,7-8, and 9-4)	\$1,000
Incompetence as determined by standards of care of midwifery providers (OAC 310:395-9-4)	\$5,000
Fraud or misrepresentation (OAC 310:395-9-4)	\$5,000
Practicing while knowingly infected with a contagious disease that may be transmitted through Midwifery care (OAC 310:395-9-4)	\$1000
Disciplinary action taken by another licensing or credentialing agency due to negligence, willful disregard for patient safety, or other inability to provide safe patient care (OAC 310:395-9-4)	\$5,000

CHAPTER 400. LICENSED MARITAL AND FAMILY THERAPISTS [TRANSFERRED]

Editor's Note: *Effective 11-1-13, as set forth in House Bill 1467 (2013), "[a]ll powers, duties, responsibilities . . . of the State Board of Health, the State Department of Health, and the State Commissioner of Health relating exclusively to the regulation of Licensed Marital and Family Therapists. . . are hereby transferred and shall be placed under the authority of the State Board of Behavioral Health Licensure" [HB 1467 (2013), § 3(A)]. The following provisions in HB 1467 address the disposition of related rules: • Section 3 (not to be codified in the Oklahoma Statutes) provides that "[u]pon the effective date of this act, all administrative rules promulgated by the State Board of Health relating to the Marital and Family Therapist Licensure Act. . . shall be transferred to and become a part of the administrative rules of the State Board of Behavioral Health Licensure" [HB 1467 (2013), § 3(F)]. HB 1467 also directed the Office of Administrative Rules to place the transferred rules under the Administrative Code section of the State Board of Behavioral Health Licensure [see Editor's Notice published at 32 Ok Reg 108]. Therefore, on 11-1-13, the rules in this Chapter 400 of the Department of Health's Title 310 [OAC 310:400] were transferred to a new Chapter 16 of the State Board of Behavioral Health Licensure's Title 86 [OAC 86:16]. For rules related to Marital and Family Therapist Licensure that were editorially transferred from this Chapter 400 on 11-1-13 pursuant to HB 1467 (2013), § 3, see Chapter 16 of OAC Title 86. • Section 19 (amending 59 O.S., § 1925.5) directs the State Board of Behavioral Health Licensure to "[p]rescribe, adopt and promulgate rules to implement and enforce the provisions of the Marital and Family Therapist Licensure Act, including the adoption of the State Department of Health rules by reference; [a]dopt and establish rules of professional conduct; and [s]et license and examination fees as required by the Licensed Professional Counselors Act" [HB 1467 (2013), § 6(A)]. Although the State Board of Behavioral Health Licensure did not "adopt the State Department of Health rules by reference," the Board did adopt rules in a new Chapter 15 of Title 86, first by emergency action effective 4-23-14 and later by permanent action effective 9-11-15. For emergency rules related to Marital and Family Therapist that were promulgated by the State Board of Behavioral Licensure pursuant to HB 1467 (2013), § 19, and were effective from 4-23-15 through 9-10-15, see 32 Ok Reg 159. For permanent rules related to Marital and Family Therapist that were promulgated by the State Board of Behavioral Licensure to supersede the emergency rules, effective 9-11-15, see Chapter 15 of OAC Title 86.*

SUBCHAPTER 17. ENFORCEMENT [TRANSFERRED]

310:400-17-1. Reporting a complaint [REVOKED]

[Source: Added at 8 Ok Reg 2983, eff 6-12-91 (emergency); Added at 9 Ok Reg 1461, eff 5-1-92 ; Revoked at 17 Ok Reg 3436, eff 8-29-00 (emergency); Revoked at 18 Ok Reg 1688, eff 5-25-01]

310:400-17-1.1. Purpose [TRANSFERRED]

[Source: Added at 17 Ok Reg 3436, eff 8-29-00 (emergency); Added at 18 Ok Reg 1688, eff 5-25-01 ; Transferred to 86:16-17-1 by Laws 2013, c. 229, § 3(F), eff 11-1-13 (see Editor's Note at beginning of this Chapter)]

310:400-17-2. Complaint form [REVOKED]

[Source: Added at 8 Ok Reg 2983, eff 6-12-91 (emergency); Added at 9 Ok Reg 1461, eff 5-1-92 ; Revoked at 17 Ok Reg 3436, eff 8-29-00 (emergency); Revoked at 18 Ok Reg 1688, eff 5-25-01]

310:400-17-2.1. Complaints [TRANSFERRED]

[Source: Added at 17 Ok Reg 3436, eff 8-29-00 (emergency); Added at 18 Ok Reg 1688, eff 5-25-01 ; Amended at 20 Ok Reg 518, eff 1-6-03 (emergency); Amended at 20 Ok Reg 2362, eff 7-11-03 ; Transferred to 86:16-17-2 by Laws 2013, c. 229, § 3(F), eff 11-1-13 (see Editor's Note at beginning of this Chapter)]

310:400-17-3. Committee action [REVOKED]

[Source: Added at 8 Ok Reg 2983, eff 6-12-91 (emergency); Added at 9 Ok Reg 1461, eff 5-1-92 ; Revoked at 17 Ok Reg 3436, eff 8-29-00 (emergency); Revoked at 18 Ok Reg 1688, eff 5-25-01]

310:400-17-3.1. Investigation [TRANSFERRED]

[Source: Added at 17 Ok Reg 3436, eff 8-29-00 (emergency); Added at 18 Ok Reg 1688, eff 5-25-01 ; Transferred to 86:16-17-3 by Laws 2013, c. 229, § 3(F), eff 11-1-13 (see Editor's Note at beginning of this Chapter)]

310:400-17-4. Investigation and committee action [REVOKED]

[Source: Added at 8 Ok Reg 2983, eff 6-12-91 (emergency); Added at 9 Ok Reg 1461, eff 5-1-92 ; Revoked at 17 Ok Reg 3436, eff 8-29-00 (emergency); Revoked at 18 Ok Reg 1688, eff 5-25-01]

310:400-17-4.1. Filing of an action [TRANSFERRED]

[Source: Added at 17 Ok Reg 3436, eff 8-29-00 (emergency); Added at 18 Ok Reg 1688, eff 5-25-01 ; Amended at 21 Ok Reg 2745, eff 7-12-04 ; Transferred to 86:16-17-4 by Laws 2013, c. 229, § 3(F), eff 11-1-13 (see Editor's Note at beginning of this Chapter)]

310:400-17-5. Hearing [TRANSFERRED]

[**Source:** Added at 17 Ok Reg 3436, eff 8-29-00 (emergency); Added at 18 Ok Reg 1688, eff 5-25-01 ; Transferred to 86:16-17-5 by Laws 2013, c. 229, § 3(F), eff 11-1-13 (see Editor's Note at beginning of this Chapter)]

310:400-17-6. Final order [TRANSFERRED]

[**Source:** Added at 17 Ok Reg 3436, eff 8-29-00 (emergency); Added at 18 Ok Reg 1688, eff 5-25-01 ; Transferred to 86:16-17-6 by Laws 2013, c. 229, § 3(F), eff 11-1-13 (see Editor's Note at beginning of this Chapter)]

310:400-17-7. Unauthorized practice [TRANSFERRED]

[**Source:** Added at 17 Ok Reg 3436, eff 8-29-00 (emergency); Added at 18 Ok Reg 1688, eff 5-25-01 ; Transferred to 86:16-17-7 by Laws 2013, c. 229, § 3(F), eff 11-1-13 (see Editor's Note at beginning of this Chapter)]

310:400-17-8. Administrative penalties [TRANSFERRED]

[**Source:** Added at 17 Ok Reg 3436, eff 8-29-00 (emergency); Added at 18 Ok Reg 1688, eff 5-25-01 ; Transferred to 86:16-17-8 by Laws 2013, c. 229, § 3(F), eff 11-1-13 (see Editor's Note at beginning of this Chapter)]

CHAPTER 403. LICENSED BEHAVIORAL PRACTITIONERS [TRANSFERRED]

Editor's Note: *Effective 11-1-13, as set forth in House Bill 1467 (2013), "[a]ll powers, duties, responsibilities . . . of the State Board of Health, the State Department of Health, and the State Commissioner of Health relating exclusively to the regulation of Licensed Behavioral Practitioners . . . are hereby transferred and shall be placed under the authority of the State Board of Behavioral Health Licensure" [HB 1467 (2013), § 3(A)]. The following provisions in HB 1467 address the disposition of related rules: • Section 3 (not to be codified in the Oklahoma Statutes) provides that "[u]pon the effective date of this act, all administrative rules promulgated by the State Board of Health relating to the Licensed Behavioral Practitioners Act . . . shall be transferred to and become a part of the administrative rules of the State Board of Behavioral Health Licensure" [HB 1467 (2013), § 3(F)]. HB 1467 also directed the Office of Administrative Rules to place the transferred rules under the Administrative Code section of the State Board of Behavioral Health Licensure [see Editor's Notice published at 32 Ok Reg 108]. Therefore, on 11-1-13, the rules in this Chapter 403 of the Department of Health's Title 310 [OAC 310:403] were transferred to a new Chapter 21 of the State Board of Behavioral Health Licensure's Title 86 [OAC 86:21]. For text of rules that were effective prior to the transfer of these rules to OAC 86:21 on 11-1-13, see Chapter 403 of the Department of Health's Title 310 [OAC 310:403], as published in the 2011 Edition of the OAC and updated in the 2013 OAC Supplement. • Section 28 (amending 59 O.S., § 1934) directs the State Board of Behavioral Health Licensure to "[p]rescribe, adopt and promulgate rules to implement and enforce the provisions of the Licensed Behavioral Practitioner Act, including the adoption of the State Department of Health rules by reference; [a]dopt and establish rules of professional conduct; and [s]et license and examination fees as required by the Licensed Behavioral Practitioner Act" [HB 1467 (2013), § 28(A)]. Although the State Board of Behavioral Health Licensure did not "adopt the State Department of Health rules by reference," the Board did adopt rules in a new Chapter 20 of Title 86, first by emergency action effective 4-23-14 and later by permanent action effective 9-11-15. For emergency rules related to Licensed Behavioral Practitioners that were promulgated by the State Board of Behavioral Licensure pursuant to HB 1467 (2013), § 28, and were effective from 4-23-15 through 9-10-15, see 32 Ok Reg 175. For permanent rules related to Licensed Behavioral Practitioners that were promulgated by the State Board of Behavioral Licensure to supersede the emergency rules, effective 9-11-15, see Chapter 20 of OAC Title 86.*

[**Authority:** 59 O.S., §§ 1930 et seq.]

SUBCHAPTER 17. FEES [TRANSFERRED]

310:403-17-1. Schedule of fees [TRANSFERRED]

[Source: Added at 18 Ok Reg 651, eff 1-10-01 (emergency); Added at 18 Ok Reg 1699, eff 5-25-01 ; Transferred to 86:21-17-1 by Laws 2013, c. 229, § 3(F), eff 11-1-13 (see Editor's Note at beginning of this Chapter)]

310:403-17-2. Method of payment [TRANSFERRED]

[Source: Added at 18 Ok Reg 651, eff 1-10-01 (emergency); Added at 18 Ok Reg 1699, eff 5-25-01 ; Amended at 27 Ok Reg 2516, eff 7-25-10 ; Transferred to 86:21-17-2 by Laws 2013, c. 229, § 3(F), eff 11-

1-13 (see Editor's Note at beginning of this Chapter)]

SUBCHAPTER 19. LICENSURE EXAMINATION [TRANSFERRED]

310:403-19-1. Examination required [TRANSFERRED]

[Source: Added at 18 Ok Reg 651, eff 1-10-01 (emergency); Added at 18 Ok Reg 1699, eff 5-25-01 ; Transferred to 86:21-19-1 by Laws 2013, c. 229, § 3(F), eff 11-1-13 (see Editor's Note at beginning of this Chapter)]

310:403-19-1.1. Eligibility [TRANSFERRED]

[Source: Added at 23 Ok Reg 2374, eff 6-25-06 ; Transferred to 86:21-19-2 by Laws 2013, c. 229, § 3(F), eff 11-1-13 (see Editor's Note at beginning of this Chapter)]

310:403-19-2. Frequency [TRANSFERRED]

[Source: Added at 18 Ok Reg 651, eff 1-10-01 (emergency); Added at 18 Ok Reg 1699, eff 5-25-01 ; Transferred to 86:21-19-3 by Laws 2013, c. 229, § 3(F), eff 11-1-13 (see Editor's Note at beginning of this Chapter)]

310:403-19-3. Registration [TRANSFERRED]

[Source: Added at 18 Ok Reg 651, eff 1-10-01 (emergency); Added at 18 Ok Reg 1699, eff 5-25-01 ; Transferred to 86:21-19-4 by Laws 2013, c. 229, § 3(F), eff 11-1-13 (see Editor's Note at beginning of this Chapter)]

310:403-19-4. Grading [TRANSFERRED]

[Source: Added at 18 Ok Reg 2308, eff 5-9-01 (emergency); Reserved at 18 Ok Reg 1699, eff 5-25-01 ; Added at 18 Ok Reg 2478, eff 6-25-01 ; Transferred to 86:21-19-5 by Laws 2013, c. 229, § 3(F), eff 11-1-13 (see Editor's Note at beginning of this Chapter)]

310:403-19-5. Notice of results [TRANSFERRED]

[Source: Added at 18 Ok Reg 651, eff 1-10-01 (emergency); Added at 18 Ok Reg 1699, eff 5-25-01 ; Transferred to 86:21-19-6 by Laws 2013, c. 229, § 3(F), eff 11-1-13 (see Editor's Note at beginning of this Chapter)]

310:403-19-6. Failure to appear [TRANSFERRED]

[Source: Added at 18 Ok Reg 651, eff 1-10-01 (emergency); Added at 18 Ok Reg 1699, eff 5-25-01 ; Transferred to 86:21-19-7 by Laws 2013, c. 229, § 3(F), eff 11-1-13 (see Editor's Note at beginning of this Chapter)]

310:403-19-6.1. Failure to apply [TRANSFERRED]

[Source: Added at 23 Ok Reg 2374, eff 6-25-06 ; Transferred to 86:21-19-8 by Laws 2013, c. 229, § 3(F), eff 11-1-13 (see Editor's Note at beginning of this Chapter)]

310:403-19-7. Licensure prior to January 1, 2002 [TRANSFERRED]

[Source: Added at 18 Ok Reg 2308, eff 5-9-01 (emergency); Added at 18 Ok Reg 2478, eff 6-25-01 ; Transferred to 86:21-19-9 by Laws 2013, c. 229, § 3(F), eff 11-1-13 (see Editor's Note at beginning of this Chapter)]

SUBCHAPTER 21. CONTINUING EDUCATION REQUIREMENTS [TRANSFERRED]

310:403-21-1. Purpose [TRANSFERRED]

[Source: Added at 18 Ok Reg 651, eff 1-10-01 (emergency); Added at 18 Ok Reg 1699, eff 5-25-01 ; Transferred to 86:21-21-1 by Laws 2013, c. 229, § 3(F), eff 11-1-13 (see Editor's Note at beginning of this Chapter)]

310:403-21-1.1. Documentation of attendance [TRANSFERRED]

[Source: Added at 26 Ok Reg 2023, eff 6-25-09 ; Transferred to 86:21-21-2 by Laws 2013, c. 229, § 3(F), eff 11-1-13 (see Editor's Note at beginning of this Chapter)]

310:403-21-2. Submission of continuing education roster [TRANSFERRED]

[Source: Added at 18 Ok Reg 651, eff 1-10-01 (emergency); Added at 18 Ok Reg 1699, eff 5-25-01 ; Amended at 25 Ok Reg 2418, eff 7-11-08 ; Transferred to 86:21-21-3 by Laws 2013, c. 229, § 3(F), eff 11-1-13 (see Editor's Note at beginning of this Chapter)]

310:403-21-3. Acceptable continuing education [TRANSFERRED]

[Source: Added at 18 Ok Reg 651, eff 1-10-01 (emergency); Added at 18 Ok Reg 1699, eff 5-25-01 ; Amended at 26 Ok Reg 2023, eff 6-25-09 ; Transferred to 86:21-21-4 by Laws 2013, c. 229, § 3(F), eff 11-1-13 (see Editor's Note at beginning of this Chapter)]

310:403-21-3.1. Continuing education accrual from teaching [TRANSFERRED]

[Source: Added at 23 Ok Reg 2374, eff 6-25-06 ; Transferred to 86:21-21-5 by Laws 2013, c. 229, § 3(F), eff 11-1-13 (see Editor's Note at beginning of this Chapter)]

310:403-21-4. Audit of continuing education submissions [TRANSFERRED]

[Source: Added at 18 Ok Reg 651, eff 1-10-01 (emergency); Added at 18 Ok Reg 1699, eff 5-25-01 ; Amended at 23 Ok Reg 2374, eff 6-25-06 ; Transferred to 86:21-21-6 by Laws 2013, c. 229, § 3(F), eff 11-1-13 (see Editor's Note at beginning of this Chapter)]

310:403-21-5. Penalty for failure to submit continuing education [TRANSFERRED]

[Source: Added at 18 Ok Reg 651, eff 1-10-01 (emergency); Added at 18 Ok Reg 1699, eff 5-25-01 ; Transferred to 86:21-21-7 by Laws 2013, c. 229, § 3(F), eff 11-1-13 (see Editor's Note at beginning of this Chapter)]

Chapter)]

310:403-21-6. Submission of fraudulent continuing education [TRANSFERRED]

[Source: Added at 18 Ok Reg 651, eff 1-10-01 (emergency); Added at 18 Ok Reg 1699, eff 5-25-01 ; Transferred to 86:21-21-8 by Laws 2013, c. 229, § 3(F), eff 11-1-13 (see Editor's Note at beginning of this Chapter)]

310:403-21-7. Responsibility [TRANSFERRED]

[Source: Added at 18 Ok Reg 651, eff 1-10-01 (emergency); Added at 18 Ok Reg 1699, eff 5-25-01 ; Transferred to 86:21-21-9 by Laws 2013, c. 229, § 3(F), eff 11-1-13 (see Editor's Note at beginning of this Chapter)]

310:403-21-8. Failure to complete continuing education [TRANSFERRED]

[Source: Added at 18 Ok Reg 651, eff 1-10-01 (emergency); Added at 18 Ok Reg 1699, eff 5-25-01 ; Transferred to 86:21-21-10 by Laws 2013, c. 229, § 3(F), eff 11-1-13 (see Editor's Note at beginning of this Chapter)]

SUBCHAPTER 23. ISSUANCE OF LICENSE [TRANSFERRED]

310:403-23-1. License [TRANSFERRED]

[Source: Added at 18 Ok Reg 651, eff 1-10-01 (emergency); Added at 18 Ok Reg 1699, eff 5-25-01 ; Transferred to 86:21-23-1 by Laws 2013, c. 229, § 3(F), eff 11-1-13 (see Editor's Note at beginning of this Chapter)]

310:403-23-2. Statement of Professional Disclosure [TRANSFERRED]

[Source: Added at 18 Ok Reg 651, eff 1-10-01 (emergency); Added at 18 Ok Reg 1699, eff 5-25-01 ; Transferred to 86:21-23-2 by Laws 2013, c. 229, § 3(F), eff 11-1-13 (see Editor's Note at beginning of this Chapter)]

310:403-23-3. Property of department [TRANSFERRED]

[Source: Added at 18 Ok Reg 651, eff 1-10-01 (emergency); Added at 18 Ok Reg 1699, eff 5-25-01 ; Transferred to 86:21-23-3 by Laws 2013, c. 229, § 3(F), eff 11-1-13 (see Editor's Note at beginning of this Chapter)]

310:403-23-4. Replacement [TRANSFERRED]

[Source: Added at 18 Ok Reg 651, eff 1-10-01 (emergency); Added at 18 Ok Reg 1699, eff 5-25-01 ; Transferred to 86:21-23-4 by Laws 2013, c. 229, § 3(F), eff 11-1-13 (see Editor's Note at beginning of this Chapter)]

SUBCHAPTER 25. LICENSE AND SPECIALTY RENEWAL [TRANSFERRED]

310:403-25-1. Responsibility [TRANSFERRED]

[Source: Added at 18 Ok Reg 651, eff 1-10-01 (emergency); Added at 18 Ok Reg 1699, eff 5-25-01 ; Transferred to 86:21-25-1 by Laws 2013, c. 229, § 3(F), eff 11-1-13 (see Editor's Note at beginning of this Chapter)]

310:403-25-2. Requirements for renewal [TRANSFERRED]

[Source: Added at 18 Ok Reg 651, eff 1-10-01 (emergency); Added at 18 Ok Reg 1699, eff 5-25-01 ; Transferred to 86:21-25-2 by Laws 2013, c. 229, § 3(F), eff 11-1-13 (see Editor's Note at beginning of this Chapter)]

310:403-25-3. Renewal notification [TRANSFERRED]

[Source: Added at 18 Ok Reg 651, eff 1-10-01 (emergency); Added at 18 Ok Reg 1699, eff 5-25-01 ; Transferred to 86:21-25-3 by Laws 2013, c. 229, § 3(F), eff 11-1-13 (see Editor's Note at beginning of this Chapter)]

310:403-25-4. Initial licensing period [TRANSFERRED]

[Source: Added at 18 Ok Reg 651, eff 1-10-01 (emergency); Added at 18 Ok Reg 1699, eff 5-25-01 ; Transferred to 86:21-25-4 by Laws 2013, c. 229, § 3(F), eff 11-1-13 (see Editor's Note at beginning of this Chapter)]

310:403-25-5. Interim renewal [TRANSFERRED]

[Source: Added at 18 Ok Reg 651, eff 1-10-01 (emergency); Added at 18 Ok Reg 1699, eff 5-25-01 ; Transferred to 86:21-25-5 by Laws 2013, c. 229, § 3(F), eff 11-1-13 (see Editor's Note at beginning of this Chapter)]

310:403-25-6. Annual renewal [TRANSFERRED]

[Source: Added at 18 Ok Reg 651, eff 1-10-01 (emergency); Added at 18 Ok Reg 1699, eff 5-25-01 ; Transferred to 86:21-25-6 by Laws 2013, c. 229, § 3(F), eff 11-1-13 (see Editor's Note at beginning of this Chapter)]

310:403-25-7. Specialty renewal [TRANSFERRED]

[Source: Added at 18 Ok Reg 651, eff 1-10-01 (emergency); Added at 18 Ok Reg 1699, eff 5-25-01 ; Transferred to 86:21-25-7 by Laws 2013, c. 229, § 3(F), eff 11-1-13 (see Editor's Note at beginning of this Chapter)]

310:403-25-8. Display of verification card [TRANSFERRED]

[Source: Added at 18 Ok Reg 651, eff 1-10-01 (emergency); Added at 18 Ok Reg 1699, eff 5-25-01 ; Amended at 26 Ok Reg 2023, eff 6-25-09 ; Transferred to 86:21-25-8 by Laws 2013, c. 229, § 3(F), eff 11-1-13 (see Editor's Note at beginning of this Chapter)]

310:403-25-9. Inactive status [TRANSFERRED]

[Source: Added at 18 Ok Reg 651, eff 1-10-01 (emergency); Added at 18 Ok Reg 1699, eff 5-25-01 ; Transferred to 86:21-25-9 by Laws 2013, c. 229, § 3(F), eff 11-1-13 (see Editor's Note at beginning of this Chapter)]

310:403-25-10. Failure to renew [TRANSFERRED]

[Source: Added at 18 Ok Reg 651, eff 1-10-01 (emergency); Added at 18 Ok Reg 1699, eff 5-25-01 ; Transferred to 86:21-25-10 by Laws 2013, c. 229, § 3(F), eff 11-1-13 (see Editor's Note at beginning of this Chapter)]

310:403-25-11. Return of license [TRANSFERRED]

[Source: Added at 18 Ok Reg 651, eff 1-10-01 (emergency); Added at 18 Ok Reg 1699, eff 5-25-01 ; Amended at 23 Ok Reg 2374, eff 6-25-06 ; Transferred to 86:21-25-11 by Laws 2013, c. 229, § 3(F), eff 11-1-13 (see Editor's Note at beginning of this Chapter)]

310:403-25-12. Misrepresentation [TRANSFERRED]

310:403-31-8. Administrative penalties [TRANSFERRED]

[**Source:** Added at 18 Ok Reg 651, eff 1-10-01 (emergency); Added at 18 Ok Reg 1699, eff 5-25-01 ; Transferred to 86:21-31-8 by Laws 2013, c. 229, § 3(F), eff 11-1-13 (see Editor's Note at beginning of this Chapter)]

CHAPTER 405. LICENSED PROFESSIONAL COUNSELORS [TRANSFERRED]

Editor's Note: *Effective 11-1-13, as set forth in House Bill 1467 (2013), "[a]ll powers, duties, responsibilities . . . of the State Board of Health, the State Department of Health, and the State Commissioner of Health relating exclusively to the regulation of Licensed Professional Counselors. . . are hereby transferred and shall be placed under the authority of the State Board of Behavioral Health Licensure" [HB 1467 (2013), § 3(A)]. The following provisions in HB 1467 address the disposition of related rules: • Section 3 (not to be codified in the Oklahoma Statutes) provides that "[u]pon the effective date of this act, all administrative rules promulgated by the State Board of Health relating to the Licensed Professional Counselors Act . . . shall be transferred to and become a part of the administrative rules of the State Board of Behavioral Health Licensure" [HB 1467 (2013), § 3(F)]. HB 1467 also directed the Office of Administrative Rules to place the transferred rules under the Administrative Code section of the State Board of Behavioral Health Licensure [see Editor's Notice published at 32 Ok Reg 109]. Therefore, on 11-1-13, the rules in this Chapter 405 of the Department of Health's Title 310 [OAC 310:405] were transferred to a new Chapter 11 of the State Board of Behavioral Health Licensure's Title 86 [OAC 86:11]. For rules related to Licensed Professional Counselors that were editorially transferred from this Chapter 405 on 11-1-13 pursuant to HB 1467 (2013), § 3, see Chapter 11 of OAC Title 86. • Section 6 (amending 59 O.S., § 1905) directs the State Board of Behavioral Health Licensure to "[p]rescribe, adopt and promulgate rules to implement and enforce the provisions of the Licensed Professional Counselors Act, including the adoption of the State Department of Health rules by reference; [a]dopt and establish rules of professional conduct; and [s]et license and examination fees as required by the Licensed Professional Counselors Act" [HB 1467 (2013), § 6(A)]. Although the State Board of Behavioral Health Licensure did not "adopt the State Department of Health rules by reference," the Board did adopt rules in a new Chapter 10 of Title 86, first by emergency action effective 4-23-14 and later by permanent action effective 9-11-15. For emergency rules related to Licensed Professional Counselors that were promulgated by the State Board of Behavioral Licensure pursuant to HB 1467 (2013), § 6, and were effective from 4-23-15 through 9-10-15, see 32 Ok Reg 139. For permanent rules related to Licensed Professional Counselors that were promulgated by the State Board of Behavioral Licensure to supersede the emergency rules, effective 9-11-15, see Chapter 10 of OAC Title 86.*

CHAPTER 406. LICENSED GENETIC COUNSELORS

[**Authority:** 2006 O.S.L. 174; 63 O.S., § 1-561]
[**Source:** Codified 6-25-07]

SUBCHAPTER 1. GENERAL PROVISIONS

310:406-1-1. Purpose

The rules in this Chapter implement the Oklahoma Genetic Counseling Licensure Act, (2006 O.S.L 174.)

[**Source:** Added at 24 Ok Reg 197, eff 11-1-06 (emergency); Added at 24 Ok Reg 1971, eff 6-25-07]

310:406-1-2. Definitions

When used in this Chapter, the following words or terms have the following meaning unless the context of the sentence requires another meaning:

"**ABGC**" means the American Board of Genetic Counseling [63:1-562(1)].

"**ABMG**" means the American Board of Medical Genetics [63:1-562(2)].

"**Act**" means Title 63, Sections 1-561 et seq., of the Oklahoma Statutes.

"**Active candidate status**" means an individual who has been approved by the American Board of Genetic Counseling (ABGC) to sit for the certification exam in genetic counseling.

"**Board**" means the State Board of Health.

"**Patient**" means a person receiving genetic counseling from a genetic counselor.

"**Commissioner**" means the State Commissioner of Health.

"**Department**" means the State Department of Health.

"**Dual relationships**" means a familial, social, financial, business, professional, close personal, sexual or other non-counseling relationship with a patient, or engaging in any activity with another person that interferes or conflicts with the LGC's professional obligation to a patient.

"**Licensed genetic counselor**" or "**LGC**" means any person who is licensed pursuant to the provisions of the Genetic Counseling Licensure Act or offers to or engages in genetic counseling. The term does not include those professions exempted by Section 1-566 of the Act.

SUBCHAPTER 5. RULES OF PROFESSIONAL CONDUCT

310:406-5-1. Responsibility

(a) LGCs shall accept responsibility for the consequences of their work and ensure that their services are used appropriately.

(b) LGCs shall not:

- (1) participate in, condone, or be associated with dishonesty, fraud, deceit or misrepresentation; or
- (2) use their relationships with patients for personal advantage, profit, satisfaction, or interest.

[Source: Added at 24 Ok Reg 197, eff 11-1-06 (emergency); Added at 24 Ok Reg 1971, eff 6-25-07 ; Amended at 38 Ok Reg 2024, eff 9-11-21]

310:406-5-2. Competence

(a) **Genetic counseling.** LGCs shall practice only within the boundaries of their competence and within professional standards, based on their education, training, and appropriate professional experience.

(b) **Impairment.** LGCs shall not offer or render professional services when such services may be impaired by a personal physical, mental or emotional condition(s). LGCs shall seek assistance for any such personal problem(s) with their physical, mental or emotional condition, and, if necessary, limit, suspend, or terminate their professional activities. If an LGC possesses a bias, disposition, attitude, moral persuasion or other similar condition that limits his or her ability to recommend a course of treatment or decision-making that is indicated, and under such

circumstances where all other treatment and decision options are contraindicated, then in that event the LGC shall not undertake to provide genetic counseling and shall terminate the genetic counseling relationship in accordance with these rules.

(c) **Opinion Testimony.** LGCs shall not offer or accept an offer to engage in rendering opinion testimony relating to work performed for their patient and shall limit their role to fact witness in any matter involving that patient, unless otherwise required by law or court order.

[Source: Added at 24 Ok Reg 197, eff 11-1-06 (emergency); Added at 24 Ok Reg 1971, eff 6-25-07 ; Amended at 38 Ok Reg 2024, eff 9-11-21]

310:406-5-3. Patient welfare

(a) **Discrimination.** LGCs shall not, in the rendering of professional services, participate in, condone, or promote discrimination on the basis of race, color, age, gender, religion or national origin.

(b) **Confidentiality.** LGCs shall maintain the confidentiality of any information received from any person or source about a patient, unless authorized in writing by the patient or otherwise authorized or required by law or court order.

(c) **Confidentiality of records.** LGCs are responsible for complying with the applicable state and federal regulations in regard to the security, safety and confidentiality of any genetic counseling record they create, maintain, transfer, or destroy whether the record is written, taped, computerized, or stored in any other medium.

(d) **Requirement of records.** LGCs shall maintain verifiable records necessary for rendering professional services to their patients for at least 3 (three) years beyond discontinuation of services. LGCs employed at an institution or facility that has a published records retention policy that is equal to the retention required by this subsection is considered to be in compliance with this subsection.

(e) **Patient access to records.** LGCs shall provide the patient with a copy of the patient's record in accordance with state law. In situations involving multiple patients, access to records is limited to those parts of records that do not include confidential information related to another patient.

(f) **Dual relationships.** LGCs shall not knowingly enter into a dual relationship(s) and shall take any necessary precautions to prevent a dual relationship from occurring. When the LGC reasonably suspects that he or she has inadvertently entered into a dual relationship the LGC shall record that fact in the records of the affected patient(s) and take reasonable steps to eliminate the source or agent creating or causing the dual relationship. If the dual relationship cannot be prevented or eliminated and the LGC cannot readily refer the patient to another genetic counselor or other professional, the LGC shall complete one or more of the following measures as necessary to prevent the exploitation of the patient and/or the impairment of the LGC's professional judgment:

- (1) Fully disclose the circumstances of the dual relationship to the patient and secure the patient's written consent to continue providing genetic counseling; or

- (2) Consult with other professional(s) to understand the potential impairment to the LGC's professional judgment and the risk of harm to the patient of continuing the dual relationship;
- (g) **Invasion of privacy.** LGCs are not to make inquiry into persons or situations not directly associated with the patient's situation.
- (h) **Referral.**
 - (1) LGCs shall not abandon or neglect current patients without making reasonable arrangements for the continuation of necessary counseling services by another professional; and
 - (2) When an LGC becomes cognizant of a disability or other condition that may impede, undermine or otherwise interfere with the LGC's competence or duty of responsibility to current patients, including a suspension of the LGC's license or any other situation or condition described in this Subchapter, the LGC shall promptly notify the patient in writing of the presence or existence of the disability or condition and take reasonable steps to timely terminate the genetic counseling relationship.
- (i) **Providing counseling to persons of prior association.** LGCs cannot provide genetic counseling to any person with whom the LGC has had any prior sexual contact or close personal relationship within the previous five (5) years.
- (j) **Interaction with former patients.** LGCs shall not:
 - (1) knowingly enter into a close personal relationship, or engage in any business or financial dealings with a former patient for two (2) years after the termination of the genetic counseling relationship;
 - (2) engage in any activity that is or may be sexual in nature with a former patient for at least five (5) years after the termination of the genetic counseling relationship; and
 - (3) exploit or obtain an advantage over a former patient by the use of information or trust gained during the genetic counseling relationship.

[Source: Added at 24 Ok Reg 197, eff 11-1-06 (emergency); Added at 24 Ok Reg 1971, eff 6-25-07 ; Amended at 38 Ok Reg 2024, eff 9-11-21]

310:406-5-4. Professional standards

- (a) **Violations of other laws.** It is unprofessional conduct for an LGC to violate a state or federal statute if the violation directly relates to the duties and responsibilities of the genetic counselor or if the violation involves moral turpitude.
- (b) **Drug and alcohol use.** LGCs shall not render professional services while under the influence of alcohol or other mind or mood altering drugs.
- (c) **Updating.** LGCs shall notify the Department of any change in address, telephone number or employment within thirty (30) days of such change.
- (d) **Candor to the Department.** An LGC or an LGC candidate, in connection with a license application or an investigation conducted by the Department pursuant to OAC 310:406-23-3, shall not:
 - (1) knowingly make a false statement of material fact;

- (2) fail to disclose a fact necessary to correct a misapprehension known by the LGC or LGC candidate to have arisen in the application or the matter under investigation; or,
- (3) fail to respond to a demand for information made by the Department or any designated representative thereof within twenty (20) days of the demand, unless a request for a protective order has been first made pursuant to Chapter 2 of this Title, in which case the LGC or LGC candidate may await the decision concerning the issuance or denial of a protective order before making any response.

[Source: Added at 24 Ok Reg 197, eff 11-1-06 (emergency); Added at 24 Ok Reg 1971, eff 6-25-07 ; Amended at 38 Ok Reg 2024, eff 9-11-21]

SUBCHAPTER 7. APPLICATION FOR LICENSURE

310:406-7-1. General

- (a) This Subchapter ensures that all applicants meet those requirements specified in the Act.
- (b) Unless otherwise indicated, an applicant shall submit all required information and documentation of credentials on official Department forms.

[Source: Added at 24 Ok Reg 197, eff 11-1-06 (emergency); Added at 24 Ok Reg 1971, eff 6-25-07]

310:406-7-2. Application materials and forms

- (a) Each application shall include the following documents:
 - (1) Application form;
 - (2) Official transcript, mailed from a genetic counseling training program accredited by the ABGC or ABMG;
 - (3) Verification of certification by the ABGC or ABMG, or verification of active candidate status conferred by the ABGC, ABMG, or an equivalent acceptable entity; and
 - (4) Fees.
- (b) The application form requires the following:
 - (1) Identifying information;
 - (2) Possession of other credentials;
 - (3) Previous misconduct (if applicable);
 - (4) Education;
 - (5) References; and
 - (6) Proposed professional practice.

[Source: Added at 24 Ok Reg 197, eff 11-1-06 (emergency); Added at 24 Ok Reg 1971, eff 6-25-07 ; Amended at 27 Ok Reg 2520, eff 7-25-10 ; Amended at 38 Ok Reg 2024, eff 9-11-21]

310:406-7-3. Denial of license

If the Department denies any application or request for licensure the applicant or requestor shall be notified of the Department's decision within thirty (30) days thereof and the applicant has fifteen (15) days to

request a hearing to review the Department's decision. The notice shall advise the applicant or requestor of his or her right to a hearing and the time within which a request to review the Department's decision must be submitted.

[Source: Added at 24 Ok Reg 197, eff 11-1-06 (emergency); Added at 24 Ok Reg 1971, eff 6-25-07 ; Amended at 38 Ok Reg 2024, eff 9-11-21]

SUBCHAPTER 9. ACADEMIC REQUIREMENTS

310:406-9-1. Degrees required

- (a) Each applicant shall possess at least a master's degree from a genetic counseling training program that is accredited by the ABGC or an equivalent entity as determined by the ABGC, or
- (b) An applicant may possess a doctoral degree from a medical genetics training program accredited by the ABMG or an equivalent as determined by the ABMG.

[Source: Added at 24 Ok Reg 197, eff 11-1-06 (emergency); Added at 24 Ok Reg 1971, eff 6-25-07]

SUBCHAPTER 11. LICENSURE EXAMINATIONS

310:406-11-1. Examination required

All applicants shall take and pass the ABGC Genetics Counseling Certification Examination or have passed the ABMG General Genetics and Genetic Counseling Specialty examinations.

[Source: Added at 24 Ok Reg 197, eff 11-1-06 (emergency); Added at 24 Ok Reg 1971, eff 6-25-07]

SUBCHAPTER 13. SUPERVISION REQUIREMENTS [REVOKED]

310:406-13-1. Purpose [REVOKED]

[Source: Added at 24 Ok Reg 197, eff 11-1-06 (emergency); Added at 24 Ok Reg 1971, eff 6-25-07 ; Revoked at 38 Ok Reg 2024, eff 9-11-21]

310:406-13-2. General supervision [REVOKED]

[Source: Added at 24 Ok Reg 197, eff 11-1-06 (emergency); Added at 24 Ok Reg 1971, eff 6-25-07 ; Revoked at 38 Ok Reg 2024, eff 9-11-21]

310:406-13-3. Frequency of supervision contact [REVOKED]

[Source: Added at 24 Ok Reg 197, eff 11-1-06 (emergency); Added at 24 Ok Reg 1971, eff 6-25-07 ; Revoked at 38 Ok Reg 2024, eff 9-11-21]

310:406-13-4. Supervisor qualification [REVOKED]

[Source: Added at 24 Ok Reg 197, eff 11-1-06 (emergency); Added at 24 Ok Reg 1971, eff 6-25-07 ; Revoked at 38 Ok Reg 2024, eff 9-11-21]

310:406-13-5. Documentation of supervision [REVOKED]

[Source: Added at 24 Ok Reg 197, eff 11-1-06 (emergency); Added at 24 Ok Reg 1971, eff 6-25-07 ; Revoked at 38 Ok Reg 2024, eff 9-11-21]

SUBCHAPTER 15. FEES

310:406-15-1. Schedule of fees

(a) **Application fee.** The application fee of three hundred dollars (\$300) is due with the submission of the application form.

(b) **License renewal fee.** The renewal fee is two hundred dollars (\$200). It is due no later than every 2 years from the last day of the month the original license was issued.

(c) **Late renewal fee.** A twenty-five dollar (\$25) late fee is added to the renewal fee if it is not submitted within the time frame provided in (b) of this section.

(d) **Reactivation fee.** When an inactive license is reactivated, the biennial renewal fee must be paid in accordance with OAC 310:406-21-6 and shall be submitted at the time of reactivation.

[Source: Added at 24 Ok Reg 197, eff 11-1-06 (emergency); Added at 24 Ok Reg 1971, eff 6-25-07 ; Amended at 38 Ok Reg 2024, eff 9-11-21]

310:406-15-2. Method of payment [REVOKED]

[Source: Added at 24 Ok Reg 197, eff 11-1-06 (emergency); Added at 24 Ok Reg 1971, eff 6-25-07 ; Amended at 27 Ok Reg 2520, eff 7-25-10 ; Revoked at 38 Ok Reg 2024, eff 9-11-21]

310:406-15-3. Fees non-refundable

Fees paid by applicants are not refundable.

[Source: Added at 24 Ok Reg 197, eff 11-1-06 (emergency); Added at 24 Ok Reg 1971, eff 6-25-07]

310:406-15-4. Review of fees

The Department will periodically review the fee schedule and recommend any adjustments necessary to provide funds to meet its expenses without creating an unnecessary surplus.

[Source: Added at 24 Ok Reg 197, eff 11-1-06 (emergency); Added at 24 Ok Reg 1971, eff 6-25-07 ; Amended at 38 Ok Reg 2024, eff 9-11-21]

SUBCHAPTER 17. CONTINUING EDUCATION REQUIREMENTS

310:406-17-1. Purpose

This Subchapter establishes the continuing education requirements necessary for license renewal.

[Source: Added at 24 Ok Reg 197, eff 11-1-06 (emergency); Added at 24 Ok Reg 1971, eff 6-25-07]

310:406-17-2. Number of hours required

LGCs shall complete and furnish documentation to the Department of thirty (30) clock hours of continuing education in each preceding two-year licensing cycle.

[Source: Added at 24 Ok Reg 197, eff 11-1-06 (emergency); Added at 24 Ok Reg 1971, eff 6-25-07]

310:406-17-3. Acceptable continuing education

Continuing education must be appropriate for maintenance of certification for at least 10 of the 30 clock hours. The remaining twenty hours may consist of professional continuing education.

[Source: Added at 24 Ok Reg 197, eff 11-1-06 (emergency); Added at 24 Ok Reg 1971, eff 6-25-07 ; Amended at 27 Ok Reg 2520, eff 7-25-10]

310:406-17-4. Submission of continuing education roster

LGCs shall submit a continuing education roster with the license renewal fee. Rosters must include the identity and license number of the LGC receiving continuing education, the date name, and location of the conference, the number of hours awarded, and the entity or organization sponsoring the conference. Only continuing education accrued in the preceding license renewal period may be used to satisfy the continuing education requirement for renewal.

[Source: Added at 24 Ok Reg 197, eff 11-1-06 (emergency); Added at 24 Ok Reg 1971, eff 6-25-07 ; Amended at 27 Ok Reg 2520, eff 7-25-10 ; Amended at 38 Ok Reg 2024, eff 9-11-21]

310:406-17-5. Penalty for failure to submit continuing education

Failure to fulfill the continuing education requirements by the renewal date may result in the license being suspended and all rights granted by the license may be null and void, unless the LGC can show that he or she was subjected to circumstances which prevent the LGC from meeting the continuing education requirements.

[Source: Added at 24 Ok Reg 197, eff 11-1-06 (emergency); Added at 24 Ok Reg 1971, eff 6-25-07]

310:406-17-6. Submission of fraudulent continuing education

The submission of fraudulent continuing education hours will result in disciplinary action against any person who knowingly participates in

the submission.

[Source: Added at 24 Ok Reg 197, eff 11-1-06 (emergency); Added at 24 Ok Reg 1971, eff 6-25-07 ; Amended at 38 Ok Reg 2024, eff 9-11-21]

SUBCHAPTER 19. ISSUANCE OF LICENSE

310:406-19-1. License

A license certificate issued by the Commissioner contains the following information: the licensee's name, license number, highest accredited genetic counseling academic degree, and date of issue.

[Source: Added at 24 Ok Reg 197, eff 11-1-06 (emergency); Added at 24 Ok Reg 1971, eff 6-25-07 ; Amended at 38 Ok Reg 2024, eff 9-11-21]

310:406-19-2. Property of the Department

All licenses issued by the Commissioner are the property of the Department and shall be surrendered on demand.

[Source: Added at 24 Ok Reg 197, eff 11-1-06 (emergency); Added at 24 Ok Reg 1971, eff 6-25-07 ; Amended at 38 Ok Reg 2024, eff 9-11-21]

310:406-19-3. Notification

After the applicant fulfills all requirements for licensure the Department shall notify the licensee of qualification.

[Source: Added at 24 Ok Reg 197, eff 11-1-06 (emergency); Added at 24 Ok Reg 1971, eff 6-25-07 ; Amended at 38 Ok Reg 2024, eff 9-11-21]

310:406-19-4. Replacement [REVOKED]

[Source: Added at 24 Ok Reg 197, eff 11-1-06 (emergency); Added at 24 Ok Reg 1971, eff 6-25-07 ; Revoked at 38 Ok Reg 2024, eff 9-11-21]

310:406-19-5. Temporary license [REVOKED]

[Source: Added at 24 Ok Reg 197, eff 11-1-06 (emergency); Added at 24 Ok Reg 1971, eff 6-25-07 ; Revoked at 38 Ok Reg 2024, eff 9-11-21]

310:406-19-6. Temporary licensure [REVOKED]

[Source: Added at 24 Ok Reg 197, eff 11-1-06 (emergency); Added at 24 Ok Reg 1971, eff 6-25-07 ; Revoked at 38 Ok Reg 2024, eff 9-11-21]

SUBCHAPTER 21. LICENSE RENEWAL AND EXPIRATION

310:406-21-1. Responsibility

Each LGC is responsible for renewing the license before the expiration date.

[Source: Added at 24 Ok Reg 197, eff 11-1-06 (emergency); Added at 24 Ok Reg 1971, eff 6-25-07]

310:406-21-2. Initial licensing period [REVOKED]

[Source: Added at 24 Ok Reg 197, eff 11-1-06 (emergency); Added at 24 Ok Reg 1971, eff 6-25-07 ; Revoked at 38 Ok Reg 2024, eff 9-11-21]

310:406-21-3. Renewal of license

The initial license expires two (2) years from the date of issuance unless renewed. License renewals expire every two years. Prior to submitting a request for license renewal the licensee must complete at least thirty (30) hours of continuing education.

[Source: Added at 24 Ok Reg 197, eff 11-1-06 (emergency); Added at 24 Ok Reg 1971, eff 6-25-07 ; Amended at 38 Ok Reg 2024, eff 9-11-21]

310:406-21-4. Requirements for renewal

Requirements for renewal include the following:

- (1) Compliance with the Act and this Chapter;
- (2) Documentation of the required continuing education; and,
- (3) Payment of the renewal fee(s).

[Source: Added at 24 Ok Reg 197, eff 11-1-06 (emergency); Added at 24 Ok Reg 1971, eff 6-25-07]

310:406-21-5. Display of verification card

A current license verification card shall be displayed on the original or replaced license.

[Source: Added at 24 Ok Reg 197, eff 11-1-06 (emergency); Added at 24 Ok Reg 1971, eff 6-25-07]

310:406-21-6. Inactive status [REVOKED]

[Source: Added at 24 Ok Reg 197, eff 11-1-06 (emergency); Added at 24 Ok Reg 1971, eff 6-25-07 ; Revoked at 38 Ok Reg 2024, eff 9-11-21]

310:406-21-7. Renewal notification

The Department shall notify licensee, at least forty-five (45) days prior to the expiration date of the LGC's license, a notice of expiration.

[Source: Added at 24 Ok Reg 197, eff 11-1-06 (emergency); Added at 24 Ok Reg 1971, eff 6-25-07 ; Amended at 38 Ok Reg 2024, eff 9-11-21]

310:406-21-8. Failure to renew

If the licensee fails to renew the license by the expiration date, the Department shall mail to the licensee's last known address a notification that includes the following:

- (1) Suspension of the license and forfeiture of rights and any privilege granted pursuant to the license; and
- (2) The LGC has the right to reinstate the license by payment of the renewal fee and the late renewal fee and fulfillment of all other renewal requirements for up to one (1) year following the suspension of the license.

[Source: Added at 24 Ok Reg 197, eff 11-1-06 (emergency); Added at 24 Ok Reg 1971, eff 6-25-07 ; Amended at 38 Ok Reg 2024, eff 9-11-21]

310:406-21-9. Return of license

Licenses not renewed within the one (1) year re-instatement period cannot be reinstated and the license shall be returned to the Department.

[Source: Added at 24 Ok Reg 197, eff 11-1-06 (emergency); Added at 24 Ok Reg 1971, eff 6-25-07 ; Amended at 38 Ok Reg 2024, eff 9-11-21]

310:406-21-10. Misrepresentation

A LGC whose license has been inactivated, suspended, or revoked and continues to represent himself as an LGC, is in violation of the Act and shall be reported to the appropriate District Attorney for prosecution.

[Source: Added at 24 Ok Reg 197, eff 11-1-06 (emergency); Added at 24 Ok Reg 1971, eff 6-25-07]

SUBCHAPTER 23. ENFORCEMENT

310:406-23-1. Purpose

This Subchapter specifies the administration of complaints and the filing of disciplinary actions against LGCs or against persons who practice genetic counseling without a license or exemption.

[Source: Added at 24 Ok Reg 197, eff 11-1-06 (emergency); Added at 24 Ok Reg 1971, eff 6-25-07]

310:406-23-2. Complaints

(a) Any person may file a complaint against a LGC or a person practicing genetic counseling who is not otherwise exempt from the LGC Act. A person wishing to report a complaint or alleged violation against a licensee or person practicing genetic counseling may notify the Department. The Department shall determine whether the complaint alleges a possible violation of the Act or this Chapter.

(b) The complaint and the identity of the complainant is confidential and cannot be available for public inspection.

[Source: Added at 24 Ok Reg 197, eff 11-1-06 (emergency); Added at 24 Ok Reg 1971, eff 6-25-07 ; Amended at 32 Ok Reg 1788, eff 9-11-15 ; Amended at 38 Ok Reg 2024, eff 9-11-21]

310:406-23-3. Investigation

If the Department has reason to believe that a possible violation of the Act or this Chapter has occurred, the Department may commence an investigation of the complaint.

[Source: Added at 24 Ok Reg 197, eff 11-1-06 (emergency); Added at 24 Ok Reg 1971, eff 6-25-07]

310:406-23-4. Filing of an action

(a) The Department may begin a disciplinary action against an LGC or a person practicing genetic counseling who is not exempt from licensure by following the procedures in Chapter 2 of this Title. The Department shall specifically state each violation and remedy sought by the Department. A remedy may include any or all of the following: revocation of a license, suspension of a license, probation of a licensee or administrative penalty.

(b) If in the course of an investigation the Department determines that a licensee or candidate for licensure has engaged in conduct of a nature that is detrimental to the health, safety, or welfare of the public, and which conduct necessitates immediate action to prevent further harm, the Commissioner may order a summary suspension of the genetic counselor's license or authorization to conduct genetic counseling. A presumption of imminent harm to the public shall exist if the Department determines that probable cause exists that a licensee or candidate has violated 310:406-5-3(f) or 310:406-5-4(a, b, c or e).

[Source: Added at 24 Ok Reg 197, eff 11-1-06 (emergency); Added at 24 Ok Reg 1971, eff 6-25-07 ; Amended at 38 Ok Reg 2024, eff 9-11-21]

310:406-23-5. Hearing

Hearings shall be conducted by the Commissioner or the Commissioner's designee as specified in Chapter 2 of this Title. At the conclusion of the evidence, the Department recommends the most appropriate penalty.

[Source: Added at 24 Ok Reg 197, eff 11-1-06 (emergency); Added at 24 Ok Reg 1971, eff 6-25-07 ; Amended at 32 Ok Reg 1788, eff 9-11-15 ; Amended at 38 Ok Reg 2024, eff 9-11-21]

310:406-23-6. Final order

The Department, either by order of the Commissioner or his designee, shall issue a final order on all disciplinary matters. Final orders are appealable under the Administrative Procedures Act to the district courts.

[Source: Added at 24 Ok Reg 197, eff 11-1-06 (emergency); Added at 24 Ok Reg 1971, eff 6-25-07]

310:406-23-7. Unauthorized practice

Any person found to be practicing genetic counseling without being either properly licensed or exempt will be ordered to cease practicing and may be subject to an administrative penalty. The Department may seek the assistance of the courts if the unauthorized practice of genetic counseling continues.

[Source: Added at 24 Ok Reg 197, eff 11-1-06 (emergency); Added at 24 Ok Reg 1971, eff 6-25-07 ; Amended at 38 Ok Reg 2024, eff 9-11-21]

310:406-23-8. Administrative penalties

(a) The Department may assess an administrative penalty against an individual if the order includes a finding that the individual violated any of the following:

- (1) Any provision of the Act, including practicing counseling without licensure or exemption; or
- (2) Any rule within this Chapter; or
- (3) Any order issued pursuant to this Chapter.

(b) The total amount of the administrative penalty assessed cannot exceed ten thousand dollars (\$10,000.00) for any related series of violations.

[Source: Added at 24 Ok Reg 197, eff 11-1-06 (emergency); Added at 24 Ok Reg 1971, eff 6-25-07 ; Amended at 38 Ok Reg 2024, eff 9-11-21]

CHAPTER 410. WIC

[**Authority:** 62 O.S., § 34.76; 63 O.S., § 1-104]

[**Source:** Codified 6-1-93]

SUBCHAPTER 1. GENERAL PROVISIONS

310:410-1-1. Purpose

This Chapter establishes rules for the Special Supplemental Food Program for Women, Infants and Children (WIC). These rules are authorized in the Oklahoma State Finance Act at 62 O.S. 34.76, which authorize the Department to enter into contracts with third party administrators to establish a system for processing claims, to promulgate rules and develop procedures necessary for implementation and administration of the system; and to develop procedures for payment of vouchers.

[**Source:** Added at 10 Ok Reg 635, eff 1-1-93 (emergency); Added at 10 Ok Reg 1715, eff 6-1-93 ; Amended at 16 Ok Reg 2505, eff 6-25-99 ; Amended at 36 Ok Reg 1676, eff 9-13-19]

310:410-1-2. Third party administration of WIC

(a) The Oklahoma State Department of Health is authorized to enter into contracts with third party administrators to establish a system for processing claims for payment pursuant to the United States Department of Agriculture's Supplemental Food Program for Women, Infants, and Children (WIC).

(b) The Oklahoma State Department of Health reserves the right to reject any or all contract proposals, to award in whole or in part, and to waive minor defects. An individual proposal may be rejected if it fails to meet any requirement. The Oklahoma State Department of Health may seek clarification from a bidder at any time, and failure to respond is cause for rejection. Any alternate proposal that meets the Oklahoma State Department of Health's needs may also be considered. Contract negotiations may be necessary after award in order to formalize understanding.

(c) Submission of a contract proposal confers no rights on the bidder to an award or to a subsequent contract. All decisions on compliance, evaluation, terms, and conditions shall be solely at the discretion of the Oklahoma State Department of Health, and made to favor the Oklahoma State Department of Health.

(d) The Oklahoma State Department of Health reserves the right to modify requirements during the course of this contract by changing the scope of work, deliverables, and timeframes, as well as addition or deletion of tasks to be performed or equipment to be provided and/or any other modification deemed necessary. Any changes in pricing proposed by the contractor resulting from the proposed changes will be subject to the acceptance by the Oklahoma State Department of Health. In the event prices are not acceptable to the Oklahoma State Department of Health, the contract may be subject to reprocurement based upon the new specification(s).

SUBCHAPTER 3. VENDOR MANAGEMENT

PART 1. GENERAL PROVISIONS

310:410-3-1. Purpose

The purpose of this Subchapter is to provide for the qualifications, approval process, education and compliance review of vendors who participate in the Oklahoma WIC Program. This Subchapter further provides for the sanctions of vendors who violate this Subchapter and to enable the department to carry out its responsibilities for fiscal management and accountability for the food delivery system under its jurisdiction.

[Source: Added at 10 Ok Reg 4203, eff 8-1-93 (emergency); Added at 11 Ok Reg 3823, eff 7-11-94]

310:410-3-2. Definitions

The following words and terms, when used in this Subchapter, shall have the following meaning, unless the context clearly indicates otherwise:

"Above 50% WIC Vendor" means a WIC retail vendor who expects to derive more than 50% of their annual food sales revenue from the redemption of WIC food benefits from all of the WIC Programs for which they are authorized.

"Administrative warning" means a written notice which describes the nature of a violation to the WIC Program and a request for correction of the violation.

"APL" means the Approved Products List.

"Applicant" means the individual, partnership, limited partnership, unincorporated association, or corporation applying to be a WIC retail vendor, includes both Above 50% and Regular WIC Vendors.

"Application" means the application forms and other required materials submitted by a business entity to notify the department that the business entity desires to become a WIC retail vendor.

"Authorization" means the approval of an applicant who has met the WIC vendor criteria and has accepted a WIC vendor agreement as a WIC retail vendor.

"Business entity" means the retail business which an applicant or authorized WIC vendor operates at a particular vendor site.

"Commissioner" means the Commissioner of the Oklahoma State Department of Health or his designee.

"Corporate officer" means the identity of the officer of a corporation as set forth in its articles of incorporation as filed with the secretary of state wherein such entity is incorporated.

"Department" means the Oklahoma State Department of Health.

"Department representative" or "Representative of the Department" means an employee or authorized agent of the department.

"Food Benefits" means an electronic benefits transfer card (EBT) that document the specified supplemental WIC approved foods and the quantities of these foods for a specified period of time that have been prescribed for a WIC participant and is used to obtain supplemental WIC approved foods.

"Grocery store" means a fixed and permanent retail store whose primary business is the sale of food.

"Local agency" means a public or private, non-profit health or human services agency which provides health services, either directly or through an agreement, in accordance with the USDA WIC Regulations, or this Subchapter.

"MAR" means the Maximum Allowable Reimbursement amount for WIC approved foods.

"OAPA" means the Oklahoma Administrative Procedure Act.

"Oklahoma WIC retail food delivery system" means the system in which participants obtain WIC approved foods by processing a food benefit at a WIC retail vendor.

"Participant" means authorized pregnant women, breast-feeding women, postpartum women, infants or children who are receiving

supplemental WIC approved foods or food benefits under the WIC Program.

"Participant requested delivery" means a participant requested delivery of WIC approved foods from a vendor to an address specified by the WIC participant or proxy.

"Participant/vendor ratio" means the total number of WIC participants in a given region divided by the total number of WIC retail vendors in the same region.

"Peer Group" means the classification of WIC retail vendors with regards to competitive pricing.

"Pharmacy" means any store, shop, department, or other place at a fixed and permanent location, where drugs, medicines, or liquid foods prescribed by a physician licensed to practice medicine in all its branches, for an individual are dispensed, or sold or offered for sale at retail value.

"Proxy" means a person who is authorized by the local agency and the WIC participant to accept and/or redeem food benefits on a participant's behalf.

"Regular WIC Vendor" means any WIC retail vendor who has not been determined to be an Above 50% WIC Vendor.

"Retail vendor price survey" means the current prices, reported to the department, by a vendor or a department representative as charges for WIC Approved Foods.

"Store type" means the classification of WIC retail vendors by their gross retail sales per year. Up to 1.5 million dollars in sales is a type 1 vendor site; 1.5 million to 5 million dollars in sales is a type 2 vendor site; over 5 million dollars in sales is a type 3 vendor site. A commissary is a type 4 vendor site and a pharmacy is a type 5 vendor site. An Above 50% vendor is a type 6 vendor site.

"SNAP" means the Supplemental Nutrition Assistance Program, formerly "Food Stamp."

"USDA" means the United States Department of Agriculture.

"USDA WIC regulations" means the regulations of the United States Department of Agriculture, Food and Nutrition Service, Special Supplemental Food Program for Women, Infants, and Children. 7 CFR 246 (1990).

"Vendor" or **"WIC retail vendor"** means the individual, partnership, limited partnership, unincorporated association, or corporation authorized by the department to accept food benefits and to provide supplemental food to WIC participants or proxies of WIC participants, includes both Above 50% and Regular Vendors.

"Vendor number" means the number assigned to a vendor by the department for tracking food benefit redemptions.

"Vendor site" means a fixed and permanent location, operating as a business entity, listed in the WIC vendor application, which has been authorized by the department for purposes of delivery of WIC approved foods to WIC participants or the proxy of a WIC participant.

"WIC food list" means the published list of State of Oklahoma authorized WIC approved foods.

"WIC approved foods" means those competitively priced foods which have been placed on the WIC food list, which have been

determined by the department to be nutritionally qualified for the WIC Program in the state of Oklahoma.

"WIC service director" means the person responsible for the implementation and administration of the WIC Program.

"WIC vendor agreement" means an agreement signed by the WIC retail vendor and the department for the provision of WIC approved foods to participants.

"Women, Infants and Children Nutrition Program" or **"WIC"** means the federal special supplemental food program for women, infants and children authorized by Section 17 of the Child Nutrition Act of 1966, as amended (42 U.S.C. 1786).

[Source: Added at 16 Ok Reg 2505, eff 6-25-99 ; Amended at 17 Ok Reg 1600, eff 5-25-00 ; Amended at 22 Ok Reg 741, eff 5-12-05 ; Amended at 25 Ok Reg 870, eff 5-11-08 ; Amended at 36 Ok Reg 1676, eff 9-13-19 ; Amended at 40 Ok Reg 1559, eff 9-11-23]

310:410-3-3. Application of vendor management

The procedures in this Subchapter apply to all Applicants for participation as vendors in the WIC Program and all vendors under agreement with the department. Any authorization issued prior to the effective date of the Act or this Subchapter, shall remain valid and subject to the Act and this Subchapter.

[Source: Added at 10 Ok Reg 4203, eff 8-1-93 (emergency); Added at 11 Ok Reg 3823, eff 7-11-94 ; Amended at 25 Ok Reg 870, eff 5-11-08]

PART 3. WIC VENDOR APPLICATION AND AUTHORIZATION PROCESS

310:410-3-10. Participant distribution and number of vendors

(a) Upon receipt of the application, the department shall utilize participant/vendor ratios and shall consider participant needs within geographical locations to determine if the applicant meets the county participant/vendor ratio to be eligible for selection.

(b) The participant/vendor ratio shall be calculated for the counties within the state of Oklahoma to determine the need for WIC retail vendors within such counties.

(1) The counties will be divided into two classifications:

(A) Urban Counties - Counties that have towns/cities located within their boundaries with a population of 20,000 or greater (per current Census Population).

(B) Rural Counties - Counties that have towns/cities located within their boundaries with a population of less than 20,000 or consist of sparsely populated areas.

(2) Participant/vendor ratios for the counties within Oklahoma shall be:

(A) Urban Counties - Greater than 200:1

(B) Rural Counties - Greater than 150:1

(3) If an applicant applies for WIC authorization in a county which exceeds the maximum participant/vendor ratio, the application

shall be denied. An exception shall be granted when the applicant's charges to the department or shelf price, whichever is lower, for WIC approved foods are at least five percent (5%) below the department's statewide average cost, and the applicant agrees to maintain these charges to the department at such level during the period of authorization or until the distance is such participant's access is restricted or the county becomes unsaturated.

310:410-3-11. Application procedures

The department shall provide an application for applying to become a WIC retail vendor. Submission of a completed application shall not constitute authorization to an applicant to accept or receive payment for food benefits. Any application submitted improperly or incompletely shall be returned to the applicant. Any application not completed and returned to the department within sixty (60) calendar days from receipt by the applicant shall not be processed. An applicant can apply for authorization to become a WIC retail vendor by submitting the following to the department:

- (1) An application for WIC vendor authorization as a sole proprietorship shall include the following:
 - (A) identity and addresses of owner;
 - (B) owner's Social Security number;
 - (C) the Federal Employer Identification Number (FEIN) of the business entity;
 - (D) identification of any ownership interest of thirty percent (30%) or more in any other entity applying for WIC vendor authorization or WIC vendor, if requested by the department;
 - (E) identification of the business entity, the store type, location of the vendor site and an employee contact for WIC purposes;
 - (F) proof of the owner's Social Security number, if requested by the department;
 - (G) proof of the business entity's FEIN, if requested; and
 - (H) proof of USDA Supplemental Nutrition Assistance Program (SNAP) authorization, if requested by the department.
- (2) An application for WIC vendor authorization as a corporation shall include the following:
 - (A) identity and location of the corporation's principle place of business;
 - (B) identity and address of the corporation's registered agent;
 - (C) FEIN of the corporation;
 - (D) identification of an ownership interest of thirty percent (30%) or more by the stockholders and such an ownership

interest by these stockholders in any other entity applying for WIC vendor authorization or WIC vendor, if requested by the department;

(E) identity of the business entity, store type and location of the proposed vendor site and an employee contact for WIC purposes;

(F) Certification of Incorporation from the state in which the applicant is incorporated, if requested by the state; and

(G) proof of USDA SNAP authorization, if requested by the department.

(3) An application for WIC vendor authorization as a partnership or limited partnership shall include the following:

(A) identity and address of each limited and general partner and the registered agent;

(B) ownership percentages of each limited and general partner;

(C) Social Security number of each limited and general partner;

(D) FEIN of the partnership or limited partnership;

(E) information concerning any ownership interest of thirty percent (30%) or more by any limited or general partner;

(F) information concerning the business entity, store type and the location of proposed vendor site and an employee contact for WIC purposes;

(G) proof of Social Security numbers of each limited and general partner;

(H) proof of the partnership or limited partnership FEIN; and

(I) proof of USDA SNAP authorization, if requested.

[Source: Added at 10 Ok Reg 4203, eff 8-1-93 (emergency); Added at 11 Ok Reg 3823, eff 7-11-94 ; Amended at 16 Ok Reg 2505, eff 6-25-99 ; Amended at 36 Ok Reg 1676, eff 9-13-19]

310:410-3-12. Authorization criteria and procedures

(a) Only WIC retail vendors authorized by the department shall be eligible to accept food benefits or otherwise provide supplemental foods to WIC participants. Any applicant seeking authorization to become a WIC retail vendor has an obligation to meet the following criteria before authorization. In addition, any approved vendor has a continuing obligation to meet the below listed criteria during the period of authorization:

(1) The vendor site shall be located within the boundary lines of the state of Oklahoma.

(2) The vendor site shall have a fixed and permanent location. This site shall be the address indicated on the WIC vendor application and shall be the location where a WIC participant or proxy shall select WIC foods during business hours.

(A) This site shall not be at an address or within any building where food benefits are distributed to WIC

participants without written agreement from the State, i.e., extenuating circumstances, outreach, participant access, and/or rural areas. Provided, however, the Department retains the right to place a service location within the same building where food benefits are redeemed.

(B) The price charged to the WIC Program for WIC foods provided through participant requested delivery shall not exceed those prices charged to cash paying customers nor the prices posted at the vendor site. The vendor shall not charge for delivery of WIC foods.

(3) Each vendor site listed in the application shall have seventy percent (70%) or more gross receipts from the sale of products other than beer, hot foods and motor fuel.

(4) Authorization to participate in the USDA SNAP or any other federal food program is not a prerequisite for authorization as a WIC retail vendor. If, however, an applicant or vendor has been authorized to participate in the USDA SNAP or other federal food program, he shall not have been denied, suspended, disqualified, terminated, or assessed a civil money penalty during the two (2) years preceding application for authorization as a WIC retail vendor.

(5) Neither the applicant, vendor, nor any officers or officials shall have been involved in bribery as prohibited under Oklahoma Purchasing Act.

(6) Neither the applicant, vendor, its officers, directors, individual partners, nor their spouses or minor children who own more than seven and one-half percent (7 1/2%) ownership or beneficial interest in the business entity seeking authorization to participate in the WIC Program shall be employed by the state or county health departments directly or indirectly involved in the delivery or administration of WIC services.

(7) Neither the applicant, nor the vendor shall have been convicted of a misdemeanor involving fraud, misuse or theft of state or federal funds or of any felony. A certified copy of conviction may be offered and admitted into evidence as proof of such conviction.

(8) Neither the applicant, vendor, nor any owner of thirty percent (30%) or more ownership shall have been terminated from the WIC Program in the previous two (2) years.

(9) The applicant or vendor shall adhere to the provisions of the USDA WIC Regulations and this part.

(b) Applicants shall be authorized as WIC retail vendors based upon the following:

(1) An application and all supporting documents shall be properly completed and verified by the department. No application shall be deemed complete unless it includes all necessary supporting documents required by this part.

(2) The applicant's proposed vendor site may be initially inspected by the department.

(A) The department may conduct an initial inspection of the proposed vendor site after receipt of a completed application. Such inspection shall determine whether the applicant has the minimum quantities, sizes, and types of WIC foods and shall verify any business or financial information submitted by the applicant.

(B) If the inspection discloses that the applicant's proposed vendor site does not have the minimum quantities, sizes, or types of WIC foods necessary, or that business or financial information supplied by the applicant is erroneous, inaccurate, or insufficient, the department shall advise the applicant of the deficiencies and conduct another inspection of the vendor site.

(C) If the second inspection by the department discloses that the applicant's proposed vendor site does not meet the minimum quantities, sizes, and types of WIC foods or if business or financial information supplied by the applicant remains erroneous, inaccurate or insufficient, the application shall be denied.

(3) The minimum quantities, sizes, and types of WIC foods necessary at a vendor site are those specified in the WIC Vendor Agreement. A copy of this list shall be provided to each applicant and approved vendor.

(4) The department shall complete a retail vendor price survey of WIC foods during the initial inspection by collecting the lowest posted shelf prices for WIC foods. If the regular vendor applicant's prices are ten percent (10%) above the average prices in the same peer group for WIC foods, the application shall be denied. If the above 50% WIC vendor applicant's prices are above the statewide average prices for WIC foods, the application shall be denied.

(5) The applicant shall be notified by the department within sixty (60) calendar days, whether or not the inspection or the proposed vendor site, the business, the financial, or other information provided by the applicant meet the criteria set forth in this part. If the applicant meets such criteria, he shall be notified of approval to attend the initial retail vendor training course.

[Source: Added at 10 Ok Reg 4203, eff 8-1-93 (emergency); Added at 11 Ok Reg 3823, eff 7-11-94 ; Amended at 16 Ok Reg 2505, eff 6-25-99 ; Amended at 25 Ok Reg 870, eff 5-11-08 ; Amended at 36 Ok Reg 1676, eff 9-13-19 ; Amended at 40 Ok Reg 1559, eff 9-11-23]

310:410-3-13. WIC food list and quantities

Foods which qualify for delivery to WIC participants shall be determined by the department and placed upon a list which shall be made public. Changes made to the WIC food list by the department, including addition and deletion of eligible foods, shall be distributed to all local agencies, eligible participants and WIC vendors prior to implementation. If a vendor intends to utilize a WIC food list which differs in form from the WIC food list distributed by the department, such use shall require prior approval of the department. To obtain such

approval, the vendor shall submit a request for such use in writing to the department and shall include a copy of the food list it intends to use. The department shall review the food list submitted and inform the vendor whether it shall approve or disapprove of the use of such list based upon the current department list. Disapproval of such a request shall not give rise to any right of administrative appeal.

[Source: Added at 10 Ok Reg 4203, eff 8-1-93 (emergency); Added at 11 Ok Reg 3823, eff 7-11-94 ; Amended at 25 Ok Reg 870, eff 5-11-08]

310:410-3-14. Criteria for denial of initial authorization

A determination by the Commissioner of Health or designee to deny initial authorization shall be based upon a finding that one (1) or more of the following criteria are met:

- (1) The applicant has not met the requirements of the USDA WIC Regulations or this part.
- (2) The applicant has submitted false, erroneous, or inaccurate information on the application, or in the business or financial information provided to the department or during the course of the initial on-site inspection of the proposed vendor site.
- (3) The applicant has refused to allow the department access to inspect the proposed vendor site during the applicant's normal business hours.
- (4) The applicant has submitted a FEIN or Social Security number for the business entity to be operated at the proposed vendor site which is not the same FEIN or Social Security number filed for the same business entity with the USDA SNAP and/or with the Oklahoma Tax Commission.
- (5) The applicant does not have the necessary local, municipal, or village license to operate as a business entity at the proposed vendor site.
- (6) The applicant has previously been authorized as a WIC vendor and the applicant's charges as a vendor for WIC approved foods, for a minimum of three (3) months during the agreement period, were at least ten percent (10%) or greater than the average charges submitted by other vendors of the same peer group.

[Source: Added at 10 Ok Reg 4203, eff 8-1-93 (emergency); Added at 11 Ok Reg 3823, eff 7-11-94 ; Amended at 22 Ok Reg 741, eff 5-12-05 ; Amended at 25 Ok Reg 870, eff 5-11-08 ; Amended at 36 Ok Reg 1676, eff 9-13-19]

310:410-3-15. Denial of authorization

- (a) Application for authorization as a WIC retail vendor shall be denied when the Commissioner of Health or designee finds that an applicant does not meet any of the criteria set forth.
- (b) When the Commissioner of Health or designee determines that the application for authorization as a WIC retail vendor is to be denied, the department shall notify the applicant. The notice to the applicant shall be in writing and shall include:
 - (1) a clear and concise statement of the basis for denial. The statement shall include a citation to the USDA WIC Regulations or

the provisions of this Subchapter for which the application is being denied.

(2) a description of the right of the applicant to appeal the denial of the application within fifteen (15) calendar days of receipt of the letter and the right to a hearing.

(c) Hearings under this section shall be conducted in accord with OAC 310:002 and the Administrative Procedures Act.

[Source: Added at 10 Ok Reg 4203, eff 8-1-93 (emergency); Added at 11 Ok Reg 3823, eff 7-11-94 ; Amended at 12 Ok Reg 3049, eff 7-27-95]

PART 5. WIC VENDOR EDUCATION

310:410-3-20. Initial WIC retail training by the Department

(a) An initial WIC retail training course shall be provided to vendor applicants who have met the criteria in Part 3 of this Subchapter. All vendor sites shall send a representative listed on the application to such training course except as provided for by the department.

(b) The initial WIC retail training course shall include, but shall not be limited to the following:

- (1) the purpose of the WIC Program,
- (2) certification of WIC participants,
- (3) responsibilities of the WIC retail vendor,
- (4) minimum quantities,
- (5) sizes and types of authorized WIC approved foods,
- (6) food benefit processing and transactions,
- (7) USDA WIC Regulations and the provisions of this part,
- (8) monitoring and compliance visits,
- (9) WIC fraud and abuse provisions,
- (10) potential sanctions to vendors,
- (11) collection of overcharges,
- (12) the vendor's responsibility for maintenance of purchasing records,
- (13) procedures for WIC participant,
- (14) vendor or public complaints,
- (15) the WIC vendor agreement, and
- (16) completion of the retail vendor price survey.

(c) All applicants or their representatives at the initial retail training course shall sign a roster indicating their attendance.

(d) At the end of the initial retail training course, each applicant or the applicant's representative shall sign a certification of understanding of the WIC Program.

[Source: Added at 10 Ok Reg 4203, eff 8-1-93 (emergency); Added at 11 Ok Reg 3823, eff 7-11-94 ; Amended at 22 Ok Reg 741, eff 5-12-05 ; Amended at 36 Ok Reg 1676, eff 9-13-19]

310:410-3-21. Initial WIC retail training by a vendor

(a) A vendor who meets the following criteria shall have the option of providing the initial WIC retail training to each vendor site only with

written prior approval of the department. The vendor shall meet the following criteria:

- (1) the vendor shall submit a written request to provide the training course and all materials which shall be used in the course which shall include the subjects specified in this Code;
 - (2) all WIC retail vendor outlets shall operate under one FEIN;
 - (3) department representatives shall be allowed to observe the training; and
 - (4) a certification of understanding of the WIC Program shall be completed and signed by the vendor or his representative
- (b) If the criteria in Subsection (a) of this Section are met, the department shall send a written notification permitting the vendor to provide the initial WIC retail vendor training. This permission shall be valid for the period covered by the WIC vendor authorization.

[Source: Added at 10 Ok Reg 4203, eff 8-1-93 (emergency); Added at 11 Ok Reg 3823, eff 7-11-94]

310:410-3-22. Annual WIC retail training program

- (a) Unless a vendor has attended an initial WIC retail vendor training meeting during the agreement period, a representative from each vendor site shall be notified and shall participate in an annual department sponsored training program. This person shall not represent more than one (1) WIC retail vendor site at any annual training course.
- (b) Each training program shall include, but not be limited to the following topics:
- (1) any changes to the USDA WIC Regulations or the provisions of this part,
 - (2) and issues relating to the WIC vendor agreement.
- (c) A representative from each vendor site shall sign a certificate of participation in the training program.

[Source: Added at 10 Ok Reg 4203, eff 8-1-93 (emergency); Added at 11 Ok Reg 3823, eff 7-11-94 ; Amended at 22 Ok Reg 741, eff 5-12-05]

310:410-3-23. Compliance training workshop

- (a) Any WIC retail vendor who has been found to have committed a Class A or Class B violation shall be required to attend a compliance training workshop. Any vendor required to attend shall not represent more than one (1) WIC retail vendor site at any compliance workshop. Attendance at the compliance training workshop shall not be required if the vendor is terminated from authorization.
- (b) The vendor shall be notified in writing of the workshop date by the department.
- (c) Workshop topics shall include, but not be limited to the following:
- (1) the WIC vendor agreement,
 - (2) the USDA WIC Regulations and
 - (3) the provisions of this part.
- (d) All vendors or representative of the vendor at a compliance workshop shall sign a roster indicating their attendance.
- (e) At the end of the compliance workshop, each vendor or representative of the vendor shall sign a certification of understanding of the topics

addressed during the compliance workshop.

PART 7. WIC VENDOR AUTHORIZATION AND RESPONSIBILITIES

310:410-3-30. Authorization

Upon successful completion of the process for application or re-authorization, each applicant or WIC vendor who meets the criteria set forth in this Subchapter shall be notified that they are approved for authorization pending completion of a WIC vendor agreement.

[Source: Added at 10 Ok Reg 4203, eff 8-1-93 (emergency); Added at 11 Ok Reg 3823, eff 7-11-94 ; Amended at 22 Ok Reg 741, eff 5-12-05]

310:410-3-31. WIC vendor agreement requirement

All authorizations to act as WIC retail vendors require a properly executed, written WIC vendor agreement between the department and the vendor. In the retail purchase system, a standard WIC vendor agreement shall be used statewide and requires ratification annually. Exceptions to this requirement shall be made with the approval of the Commissioner of Health or designee, consistent with USDA WIC Regulations (7 CFR 246.12 (f) (1)).

[Source: Added at 10 Ok Reg 4203, eff 8-1-93 (emergency); Added at 11 Ok Reg 3823, eff 7-11-94 ; Amended at 22 Ok Reg 741, eff 5-12-05]

310:410-3-32. Expiration of WIC vendor authorization and agreement

The department is under no obligation to re-authorize a WIC vendor at the time of expiration of the WIC vendor agreement.

310:410-3-35. WIC retail vendor responsibilities

- (a) The vendor shall monitor the WIC approved foods approved by the USDA and shall furnish only the prescribed quantities, types and brands of food specified on the food benefit. Pharmacies or drug stores shall be exempt from the minimum stock requirement. However, these establishments must have the ability to supply special formula in the necessary quantities upon request within twenty-four (24) hours.
- (b) The vendor shall display the price of WIC approved foods charged to the general public in clear view of customers, identifying the price of the specific WIC food item.
- (c) The vendor shall provide WIC approved foods to participants or proxies at the same price or less than the price charged to non-WIC customers.
- (d) The vendor shall accept food benefits only from WIC participants, proxies or representatives of the department.
- (e) The vendor shall not issue a WIC participant or proxy any document (e.g., rain check) purporting to give the WIC participant or proxy the right to buy a WIC food item or non-WIC food item after the food benefit is processed by the participant or proxy. The vendor shall not exchange any WIC food item unless authorized by a department representative.
- (f) The vendor shall charge the department sale prices. The value of coupons and discounts shall be deducted from the price charged to the department. The participant shall not be given cash for the difference.
- (g) The vendor shall participate in an annual WIC training program.
- (h) The vendor shall be responsible for all food benefits accepted and processed for payment by current and former employees at the vendor site. The vendor shall also be responsible for the accuracy of any information submitted to the department by such employees. The vendor shall be responsible for reviewing food benefits which have been accepted to make certain that the total cost does not exceed the posted shelf prices or the prices charged to non-WIC customer.
- (i) The vendor shall abide by the USDA WIC Regulations and this part.
- (j) The vendor and his business entity shall be subject to audit by the department or USDA for the time period covering any present or previous authorization. The vendor shall maintain all records of purchases, gross sales receipts, and invoices of all WIC and non-WIC approved foods for a period not less than three (3) years. The original of such records shall be made available to the department or USDA upon reasonable request.
- (k) The vendor shall respond truthfully and accurately to department initiated requests for retail vendor price surveys, verification of ownership of the business entity or vendor site, proof of WIC and non-WIC purchases and sales, and proof of the volume of alcoholic beverage sales. Such responses shall be in writing and be provided within fifteen (15) calendar days of receipt of the department's request.
- (l) The vendor shall maintain all refrigerated areas at a temperature of forty degrees Fahrenheit (40°F) or below, and no WIC approved foods shall exceed the expiration date printed on the food item.
- (m) The vendor shall not exchange food benefits for any form of currency, or other items of value, nor provide the participant with any amount of

currency or coin as change from a partial WIC food transaction.

(n) The vendor shall not seek restitution from WIC participants for food benefits not paid by the department or fines levied by the department, a financial institution or the department's fiscal processor. The vendor shall not seek or receive restitution from the department for monetary penalties for rejected food benefits.

(o) The vendor shall not charge sales taxes for WIC approved foods, as the department is exempt from such tax.

(p) The vendor shall reimburse the department for any food benefits redeemed in violation of the USDA WIC Regulations, this part, or the WIC vendor agreement.

(q) Neither authorization as a WIC vendor nor the WIC vendor agreement constitutes employment between the vendor and the department as a state employee or provides eligibility for any employee benefits provided by the state of Oklahoma.

(r) The vendor shall offer the same courtesies to WIC participants as offered to other customers.

(s) When material information included in the vendor's application changes, the vendor, by certified mail, shall notify the department in writing within thirty (30) calendar days.

(t) The vendor shall not deny a participant any WIC approved foods indicated on the food benefit which the vendor has in stock.

310:410-3-36. Payment obligation

Obligations of the department shall cease immediately without penalty of further payment if the Oklahoma State Legislature or any federal funding source fails to appropriate or make available sufficient funds for this process.

[Source: Added at 10 Ok Reg 4203, eff 8-1-93 (emergency); Added at 11 Ok Reg 3823, eff 7-11-94]

310:410-3-37. Conflict of interest

The department shall ensure that no conflict of interest exists between any local agency and the vendors within the local agency's jurisdiction.

310:410-3-38. Unlawful discrimination [RESERVED]

[Source: Reserved at 10 Ok Reg 4203, eff 8-1-93 (emergency); Reserved at 11 Ok Reg 3823, eff 7-11-94]

310:410-3-39. Amendments resulting from a change in statute or regulation

The department shall amend the WIC vendor agreement, in writing, to include or incorporate additional provisions which shall be

required as a result of a change in federal or state statute or regulation, or which shall be required by the department for the administration, operation, or evaluation of the WIC Program. The vendor shall receive thirty (30) calendar days notice of the effective date of such amendments.

[Source: Added at 10 Ok Reg 4203, eff 8-1-93 (emergency); Added at 11 Ok Reg 3823, eff 7-11-94 ; Amended at 22 Ok Reg 741, eff 5-12-05]

310:410-3-40. Assignment or transfer

The vendor shall not sell, assign, or transfer in any manner the authorization, the WIC vendor agreement, or the WIC vendor number. Any actual or attempted sale, assignment or transfer of the above shall be considered a breach of the WIC vendor agreement. The death of a vendor (if an individual) or the voluntary or involuntary dissolution of a vendor corporation, partnership, limited partnership, unincorporated association, or firm shall cause the vendor's authorization and the WIC vendor agreement to expire. The vendor has an affirmative duty to notify the department, in writing, at the place listed in the WIC vendor agreement, fifteen (15) calendar days in advance of any scheduled sale, lease, bankruptcy, or cessation of the vendor's business entity, or the sale of any majority interest of any corporation or partnership.

[Source: Added at 10 Ok Reg 4203, eff 8-1-93 (emergency); Added at 11 Ok Reg 3823, eff 7-11-94 ; Amended at 22 Ok Reg 741, eff 5-12-05 ; Amended at 36 Ok Reg 1676, eff 9-13-19]

310:410-3-41. Civil law suits

The vendor shall hold the department harmless for any liability for any compensation, award, or damages in connection with the vendor's performance as a WIC retail vendor for any injury which might occur to any of the vendor's employees, WIC participants, or others as the result of any act, omission, or negligence of the WIC vendor.

[Source: Added at 10 Ok Reg 4203, eff 8-1-93 (emergency); Added at 11 Ok Reg 3823, eff 7-11-94]

310:410-3-42. Voluntary withdrawal from the WIC vendor agreement

A vendor may voluntarily withdraw from participation in the WIC retail vendor program with approval of the department. A request for such withdrawal shall be made in writing by the vendor and sent to the department at least fifteen (15) calendar days in advance of the desired date of withdrawal. If at the time of the requested withdrawal, the vendor owes a fine assessment or any other monies resulting from a violation of this part, such penalty and other monies due shall be paid in full prior to withdrawal from the WIC retail vendor program. The State agency shall not accept voluntary withdrawal of the vendor from the Program as an alternative to disqualification for the violations listed in 7 CFR §246.12 (k) (1) (i) through (k) (1) (iv), but shall enter the disqualification on the record.

[Source: Added at 10 Ok Reg 4203, eff 8-1-93 (emergency); Added at 11 Ok Reg 3823, eff 7-11-94 ; Amended at 17 Ok Reg 1600, eff 5-25-00 ; Amended at 22 Ok Reg 741, eff 5-12-05]

310:410-3-43. Notices

The vendor shall send all notices to the department by certified mail at the address listed in the WIC vendor agreement.

[Source: Added at 10 Ok Reg 4203, eff 8-1-93 (emergency); Added at 11 Ok Reg 3823, eff 7-11-94 ; Amended at 22 Ok Reg 741, eff 5-12-05]

PART 9. WIC VENDOR COMPLIANCE AND SANCTIONS

310:410-3-50. Compliance monitoring inspections

The department shall develop a system for monitoring the operations of all WIC retail food vendors to ensure compliance with federal and state laws and rules governing the WIC Program. The department shall investigate all alleged violations of the federal and state laws and rules promulgated thereunder.

[Source: Added at 10 Ok Reg 4203, eff 8-1-93 (emergency); Added at 11 Ok Reg 3823, eff 7-11-94]

310:410-3-51. Violations

(a) Violations shall be classified as either Class A violations, Class B violations, or Class C violations. Each class of violation is listed below.

(b) Mandatory Vendor Sanctions

(1) Class A violations:

- (A) A vendor convicted of trafficking in food benefits or selling firearms, ammunition, explosives, or controlled substances (as defined in section 102 of Controlled Substances Act (21 U.S.C. 802) in exchange for food benefits;
- (B) Permanent disqualification, disqualification or suspension from participation in the USDA SNAP, or imposition of a civil money penalty by the SNAP;
- (C) One incidence of buying or selling food benefits for cash (trafficking);
- (D) One incidence of selling firearms, ammunition, explosives, or controlled substances in exchange for food benefits;
- (E) One incidence of sale of alcohol or alcoholic beverages or tobacco products in exchange for food benefits;
- (F) A pattern of claiming reimbursement for sale of an amount of a specific WIC food item which exceeds the store's documented inventory of that WIC food item for a specific period of time;
- (G) A pattern of charging WIC participants, proxies, or department representatives more for WIC food than non-WIC customers, or charging more than the current shelf or agreement price;
- (H) A pattern of receiving, transacting and/or redeeming food benefits outside of authorized channels, including the

use of an unauthorized vendor and/or an unauthorized person;

(I) A pattern of charging for WIC food not received by the participant, proxy, or department representatives;

(J) A pattern of providing credit or non-food items, other than alcohol, alcoholic beverages, tobacco products, cash, firearms, ammunition, explosives, or controlled substances as defined in 21 U.S.C. 802, in exchange for food benefits;

(K) A pattern of providing unauthorized food items in exchange for food benefits, including charging for WIC food provided in excess of those listed on the food benefit;

(c) State Vendor Violations

(1) Class B violations:

(A) Requiring a participant to select a different type or brand of WIC approved foods when not specified on the food instrument;

(B) Failure to post current shelf prices for WIC approved foods;

(C) Seeking restitution from WIC participants for food benefits not paid by the department or fines levied by the department, a financial institution, or the department's fiscal processor;

(D) Failure to attend an annual retail vendor training program;

(E) Refusing to allow participants, proxies or department representatives to take any food items listed on the food benefit;

(2) Class C violations:

(A) Failure to submit retail vendor price surveys requested by the department;

(B) Failure to submit information requested by the department within the time period specified by the department.

(C) Failure to maintain the minimum stock requirements as specified in the WIC vendor agreement, and/or having any expired WIC approved foods on the shelf.

[Source: Added at 10 Ok Reg 4203, eff 8-1-93 (emergency); Added at 11 Ok Reg 3823, eff 7-11-94 ; Amended at 16 Ok Reg 2505, eff 6-25-99 ; Amended at 17 Ok Reg 1600, eff 5-25-00 ; Amended at 22 Ok Reg 741, eff 5-12-05 ; Amended at 36 Ok Reg 1676, eff 9-13-19]

310:410-3-52. WIC vendor sanctions

Any Class A or B violation shall subject the vendor to reimburse the department for any overcharges, charges for items not received by WIC participants, and monies paid for products not authorized as WIC approved foods.

(1) Any Class A violation shall constitute grounds for disqualification of authorization to the WIC Program. If the department determines that disqualification of the vendor would result in inadequate participant access, the department shall impose a civil money penalty in lieu of disqualification. The length

of each disqualification is listed below.

(A) Permanent disqualification: A vendor convicted of trafficking in food benefits or selling firearms, ammunition, explosives, or controlled substances (as defined in section 102 of Controlled Substances Act (21 U.S.C. 802) in exchange for food benefits.

(B) Six-year disqualification:

(i) One incidence of buying or selling food benefits for cash (trafficking); or

(ii) One incidence of selling firearms, ammunition, explosives, or controlled substances as defined in 21 U.S.C. 802, in exchange for food benefits.

(C) Three-year disqualification:

(i) One incidence of sale of alcohol or alcoholic beverages or tobacco products in exchange for food benefits; or

(ii) A pattern of claiming reimbursement for sale of an amount of a specific WIC food item which exceeds the store's documented inventory of that WIC food item for a specific period of time; or

(iii) A pattern of charging participants more for WIC food than non-WIC customers or charging participants more than the current shelf or agreement price; or

(iv) A pattern of receiving, transacting and/or redeeming food benefits outside of authorized channels, including the use of an unauthorized vendor and/or an unauthorized person; or

(v) A pattern of charging for WIC food not received by the participant, proxy, or department representatives; or

(vi) A pattern of providing credit or non-food items, other than alcohol, alcoholic beverages, tobacco products, cash, firearms, ammunition, explosives, or controlled substances as defined in 21 U.S.C. 802, in exchange for food benefits.

(D) One-year disqualification: A pattern of providing unauthorized food items in exchange for food benefits, including charging for supplemental foods provided in excess of those listed on the food benefit.

(E) Disqualification period equal to SNAP disqualification:

(i) Permanent disqualification, disqualification or suspension from participation in the USDA SNAP, or imposition of a civil money penalty by SNAP;

(ii) Such sanction shall not be subject to administrative or judicial review under the WIC program.

(F) Voluntary withdrawal or non-renewal of agreement:

(i) The department shall not accept voluntary withdrawal of the vendor from the Program as an alternative to disqualification for violations listed in

this section, but shall enter the disqualification on the record; or

(ii) The department shall not use non-renewal of the vendor agreement as an alternative to disqualification.

(G) Civil Money Penalty (For each violation subject to a mandatory sanction): The department shall impose a Civil Money Penalty in lieu of WIC Program disqualification if such disqualification of the vendor would result in inadequate WIC participant access. The Civil Money Penalty is set forth in 7 CFR 246.12(l)(x)(C) and 7 CFR 3.91(b)(3)(v).

(2) Any Class B violation shall constitute grounds for the following sanctions:

(A) For the first Class B violation, the WIC retail vendor shall be given written notice of the violation and shall be given an administrative warning.

(B) For the second Class B violation committed within one (1) year of the first Class B violation, the vendor shall be subject to a fine assessment of five hundred dollars (\$500). The vendor shall also be required to attend a compliance training workshop.

(C) The third Class B violation committed within two (2) years of the first Class B violation shall subject the vendor to a fine assessment of one thousand dollars (\$1,000).

(D) The fourth Class B violation committed within two (2) years of the first Class B violation shall be grounds for termination of the vendor authorization, and a fine assessment of two thousand, five hundred dollars (\$2,500).

(3) Any Class C violation shall constitute issuance of an administrative warning. Five (5) Class C violations within a one (1) year period shall be grounds for termination of the vendor authorization for a period of one (1) year.

(4) Second mandatory sanction, a vendor, who previously has been assessed a sanction for any of the violations listed in this part, receives another sanction for any of these violations, the department shall double the sanction.

(5) Third or subsequent mandatory sanction, a vendor, who previously has been assessed two or more sanctions for any of the violations in this part, receives another sanction for any of these violations, the department shall double the third sanction and all subsequent sanctions. The department shall not impose civil money penalties in lieu of disqualification for third or subsequent sanctions for violations listed in this part.

(6) The time period shall commence from the time the notice of violation, termination, or fine assessment is issued by the department.

(7) All fine assessments shall be paid by cashier certified check or money order in United States currency.

[Source: Added at 10 Ok Reg 4203, eff 8-1-93 (emergency); Added at 11 Ok Reg 3823, eff 7-11-94 ; Amended at 16 Ok Reg 2505, eff 6-25-99 ; Amended at 17 Ok Reg 1600, eff 5-25-00 ; Amended at 22 Ok Reg 741, eff 5-12-05 ; Amended at 25 Ok Reg 870, eff 5-11-08 ; Amended at 36 Ok Reg 1676, eff 9-13-19 ; Amended at 40 Ok Reg 1559, eff 9-11-23]

310:410-3-53. Criteria for termination of authorization and fine assessment

(a) A determination by the Commissioner of Health or designee to terminate authorization and impose a fine assessment shall be based upon a finding that one (1) or more of the following criteria are met:

- (1) the vendor has not met one (1) or more requirements of the USDA WIC Regulations or the provisions of this part;
- (2) the vendor has submitted false, erroneous, or inaccurate information on the application, in the business or financial information provided to the department, on the retail vendor price survey, or during the course of inspections of the vendor site;
- (3) the vendor has refused to allow the department access to inspect the vendor site during normal business hours;
- (4) the vendor has been found by the department to have violated provisions of this Chapter;
- (5) the vendor has submitted a Federal Employer's Identification Number (FEIN) for the business entity operating as a vendor which differs from the FEIN filed for the same business entity with the USDA SNAP, or with the Oklahoma Tax Commission;
- (6) the vendor has not fulfilled the terms of the WIC vendor agreement;
- (7) the vendor has sold, leased, or discontinued the business entity or moved the business entity to a new location or new address; or
- (8) the vendor corporation, partnership, or limited partnership has been voluntarily or involuntarily dissolved or the vendor sole proprietor has died.

(b) In deciding upon the punishment to be imposed, the department or its designee shall take into consideration the nature of the offense alleged to have been committed, the evidence regarding deliberate, as opposed to inadvertent conduct, the number of previous violations committed by the vendor, and such other evidence as may be relevant to imposition of punishment.

[Source: Added at 10 Ok Reg 4203, eff 8-1-93 (emergency); Added at 11 Ok Reg 3823, eff 7-11-94 ; Amended at 22 Ok Reg 741, eff 5-12-05 ; Amended at 36 Ok Reg 1676, eff 9-13-19]

310:410-3-54. Termination of authorization and fine assessment

(a) The termination of authorization as a WIC retail vendor and/or imposition of a fine assessment shall occur when the Commissioner of Health or designee finds that the vendor meets any of the criteria set forth in this Chapter.

(b) When the Commissioner of Health or designee determines that the termination of a WIC vendor's authorization and/or imposition of fine

assessment is to occur, the department shall notify the vendor. The notice shall be in writing and shall include:

(1) A statement of the nature of the basis for the adverse actions. The statement shall include a citation to the provisions of the USDA WIC Regulations or this Subchapter on which the termination is based.

(2) A description of the right of the vendor to appeal the adverse action and the right to a hearing under the OAPA.

(c) Hearings under this section shall be conducted in accord with OAC 310:002 and the Administrative Procedures Act.

[Source: Added at 10 Ok Reg 4203, eff 8-1-93 (emergency); Added at 11 Ok Reg 3823, eff 7-11-94 ; Amended at 12 Ok Reg 3049, eff 7-27-95]

310:410-3-55. Notice of violation

(a) Each notice of violation shall be in writing and shall contain the following information:

(1) a description of the nature of the violation;

(2) a citation of the specific provision of the USDA WIC Regulations, or this part, which the department believes has been violated;

(3) a statement of the level of violation as determined by the department;

(4) a statement that the department may take additional action under the Act or this part, including termination of WIC vendor authorization and the WIC vendor agreement, and/or an assessment of penalties;

(5) a description of the vendor's right to appeal the notice within fifteen (15) calendar days of receipt of the notice and the right to request a hearing; and

(6) the effective date for any proposed adverse action against a vendor.

(b) Hearings under this section shall be conducted in accord with OAC 310:002 and the Administrative Procedures Act.

SUBCHAPTER 5. PARTICIPATION

310:410-5-1. Purpose

The purpose of the subchapter is to establish the requirement for participation in the WIC program.

[Source: Added at 16 Ok Reg 2505, eff 6-25-99]

310:410-5-2. Definitions

The definitions as specified in section 310:410-3-2 shall apply to this subchapter.

[Source: Added at 16 Ok Reg 2505, eff 6-25-99]

310:410-5-3. Eligibility

(a) To be eligible for WIC services a person must fall under one of the following categories:

- (1) A pregnant female;
- (2) A breast-feeding woman with a child under the age of twelve (12) months;

- (3) A woman who has given birth within the last twelve (12) months; or
 - (4) A child from birth to five years of age.
- (b) Eligibility also requires that the participant live in Oklahoma and have a family income within the program limits.

[Source: Added at 16 Ok Reg 2505, eff 6-25-99]

310:410-5-4. Application

To apply for WIC services the applicant must be the person or the guardian for the person eligible for services. Guardian includes parents, grandparents, foster parents, caretaker, court appointed guardian or other proxy. Application may be made at any local agency.

[Source: Added at 16 Ok Reg 2505, eff 6-25-99]

310:410-5-6. Termination of benefits

- (a) Benefits under the WIC program shall terminate if:
 - (1) The child reaches the age of sixty (60) months;
 - (2) The woman is more than twelve months (12) since the delivery of her last child and is not pregnant; or
 - (3) The family income no longer meets the program limits;
- (b) Sanctions will be sought against any participant who:
 - (1) Provides status information which is false; or
 - (2) Applies for benefits under multiple names, multiple times, or multiple organizations.
- (c) Sanctions may include:
 - (1) Counseling;
 - (2) Suspension of benefits;
 - (3) Termination of benefits; and/or
 - (4) Repayment of benefits.

[Source: Added at 16 Ok Reg 2505, eff 6-25-99 ; Amended at 19 Ok Reg 2075, eff 6-27-02]

310:410-5-7. Hearings

A participant is entitled to a hearing on denial or termination of benefits under the WIC program. The hearing must be requested in writing and presented to any WIC local agency. The local agency will transmit the request for a hearing to the department and a hearing will be scheduled under the Administrative Procedures Act as an individual proceeding. Procedures for the hearing are contained in Chapter 2 of this title.

CHAPTER 451. FIRE EXTINGUISHER INDUSTRY [TRANSFERRED]

Editor's Note: *Effective 11-1-13, "all administrative rules promulgated the State Board of Health relating to the Fire Extinguisher Licensing Act [were] transferred to and [became] a part of the administrative rules of the State Fire Marshal Commission" [Laws 2013, c. 111, § 1(G)]. As directed, the Office of Administrative Rules transferred and renumbered the sections from this Chapter 451 of the State Board of Health's rules in the Oklahoma Administrative Code [OAC 310:451] to a new Chapter 50 in the State Fire Marshal Commission's rules [OAC 265:50]. The rules "shall continue in force and effect as rules of the State Fire Marshal Commission from and after [November 1, 2013], and any amendment, repeal or addition to the transferred rules shall be under the jurisdiction of the Oklahoma Fire Marshal Commission" [Laws 2013, c. 111, § 1(G)].*

CHAPTER 505. ANATOMICAL GIFTS

[Authority: 63 O.S., § 2216]

[Source: Codified 12-31-91]

SUBCHAPTER 1. GENERAL PROVISIONS

310:505-1-1. Purpose

The purpose of this Chapter is to provide rules for anatomical gifts, tissue banks, and eye banks as required by the Uniform Anatomical Gift Act, 63 O.S. Supp. 1999, Section 2201 et seq., as amended.

[Source: Amended at 18 Ok Reg 1711, eff 5-25-01]

310:505-1-2. Anatomical Donation form adopted [REVOKED]

[Source: Revoked at 18 Ok Reg 1711, eff 5-25-01]

310:505-1-3. Definitions

The following words and terms, when used in this Chapter, shall have the following meaning, unless the context clearly indicates otherwise.

"Act" means the Uniform Anatomical Gift Act [63 O.S. Supp. 1999, §2201 et. seq.]

"Commissioner" means the Commissioner of Health.

"Department" means the Oklahoma State Department of Health.

"Designated anatomical gift representatives" means either organ procurement representatives, designated requestors, appropriately trained tissue bank employees when requesting consent for donation of bone, skin, or connective tissue, or appropriately trained eye bank employees when requesting consent for donation of whole eyes, corneas, or other parts of eyes.

"Designated requestor" means an individual designated in writing by the hospital, who has completed a course offered or approved by a designated and qualified Organ Procurement Organization (OPO) or who has equivalent training and experience. Such courses shall be designed in conjunction with the tissue and eye bank community in the methods for approaching potential donor families and requesting organ, tissue, or eye donation.

"Existing eye bank" means any eye bank in Oklahoma which was operating on November 1, 1997 and has been in continuous operation since that date.

"Existing tissue bank" means any tissue bank in Oklahoma which was operating on November 1, 1999 and has been in continuous operation since that date.

"Eye bank" means a person, corporation, partnership, association or other legal entity established, operated, or maintained for the procurement, storage, and/or distribution of whole eyes, corneas, or other parts of eyes.

"General medical surgical hospital" *means a hospital maintained for the purpose of providing hospital care in a broad category of illness and injury. {63 O.S. Supp. 1999, § 1-701}*

"New eye bank" means any eye bank in Oklahoma which was not in operation on November 1, 1997.

"New tissue bank" means any tissue bank in Oklahoma which was not in operation on November 1, 1999.

"Organ procurement representative" means an individual who has been appropriately trained and is employed by a qualified organ procurement organization designated by the Health Care Financing Administration (HCFA) to *perform or coordinate the surgical recovery, preservation, and transportation of organs and that allocates organs to prospective recipients* {63 O.S. Supp. 1999, § 2202(9)} for a particular service area.

"Tissue bank" means a person, corporation, partnership, association or other legal entity established, operated, or maintained for the procurement, storage, and/or distribution of bone, skin, or connective tissue.

[Source: Added at 18 Ok Reg 1711, eff 5-25-01]

SUBCHAPTER 3. ANATOMICAL GIFTS

310:505-3-1. Requirement to request consent for anatomical gift

Each general medical surgical hospital with fifty (50) or more licensed beds shall ensure that when a person who is determined to be potentially suitable for organ, tissue, or eye donation dies in the hospital, a request for consent for anatomical gift is made when such a request is required by the Act. The hospital shall ensure that each request for consent for anatomical gift is made by a designated anatomical gift representative, and that each such request is made of the appropriate person as described in the Act.

[Source: Added at 18 Ok Reg 1711, eff 5-25-01]

310:505-3-2. Procedures for requesting consent for anatomical gift

Each general medical surgical hospital with fifty (50) or more licensed beds shall establish written policies and procedures describing:

- (1) Who may execute an anatomical gift under the Act;
- (2) The classes of persons and priority of the classes of persons who may consent to a request for anatomical gift of a decedent's body or part of a body under the Act;
- (3) The names and contact information for all hospital designated requestors and the contact information required to initiate the referral process to the designated OPO, tissue bank, or eye bank if they act as designated requestors for the hospital;
- (4) The name and location of the designated OPO for their service area and procedures for how to contact the OPO twenty-four (24)

hours a day;

(5) The names and locations of all tissue and eye banks with which the hospital has agreements to cooperate in the retrieval, processing, preservation, storage, and distribution of tissues and eyes;

(6) The methodology for approaching donor families and requesting organ, tissue, or eye donation which encourage discretion and sensitivity with respect to the circumstances, views, and beliefs of the families of potential donors;

(7) How to document a request for anatomical donation and the outcome of the request;

(8) The quality assurance activities used to monitor the identification of potential donors, appropriate requests for consent for anatomical gifts are made, and that outcomes of requests for anatomical gifts are documented.

(9) A method of notifying administrators if other hospital policies, procedures, or processes interfere with the identification or maintenance of potential donors, or in the retrieval of all usable organs, tissues, and eyes.

[Source: Added at 18 Ok Reg 1711, eff 5-25-01]

310:505-3-3. Certificate of request for anatomical gift

(a) The hospital shall ensure that a copy of the completed Certificate of Request For Anatomical Gift is included in the medical records of the decedent when a person who is determined to be potentially suitable for organ, tissue, or eye donation dies in the hospital.

(b) The Certificate of Request for Anatomical Gift shall include:

(1) Identifying information for the hospital and the decedent;

(2) Information on any deferrals of donation made by an OPO, tissue bank, or eye bank;

(3) Identifying information for the requested party and the requesting party;

(4) A description of the specifics and circumstances of the request and the outcome of the request.

(5) A description of the organs and tissues donated when a request is granted and any limitations or special wishes for the gift;

(6) A declaration of consent for the gift and signature blocks for the requested party and the requesting party.

[Source: Added at 18 Ok Reg 1711, eff 5-25-01]

310:505-3-4. Approved means of giving consent

(a) Consent for an anatomical gift may be given in person, or by telephone, telegraph, facsimile, electronic mail, or other electronic means when the identity of the person giving consent can be reasonably assured.

(b) The hospital shall request written confirmation of in person verbal consent, or consent received by telephone, electronic mail, or other

electronic means. The requested party's signature on ODH Form 942 shall be deemed to meet this requirement.

[Source: Added at 18 Ok Reg 1711, eff 5-25-01]

310:505-3-5. Coordination of anatomical gift activities

The hospital shall work cooperatively with the designated OPO, tissue bank and eye bank in educating staff on donation issues, reviewing death records to improve identification of potential donors, and maintaining potential donors while necessary testing and placement of potential donated organs, tissues, and eyes takes place.

[Source: Added at 18 Ok Reg 1711, eff 5-25-01]

SUBCHAPTER 5. TISSUE BANKS

310:505-5-1. Permits

(a) **Requirement for a permit.** Each tissue bank operating in Oklahoma shall hold a valid permit issued by the Department. Each permit shall be issued for a period not to exceed thirty-six (36) months provided all the requirements of this Chapter are met, and shall automatically expire on the last day of the thirty-sixth month from the date of issue if not renewed.

(b) **Permit fee.** Application for a permit shall be made on a form provided by the Department for that purpose. A non-refundable fee of one thousand dollars (\$1000.00) shall accompany each permit application. Any application received by the Department without a fee shall not be considered or processed.

[Source: Added at 18 Ok Reg 1711, eff 5-25-01]

310:505-5-2. Permit Applications

(a) **Initial applications.** Each new tissue bank shall submit a complete application for permit to operate a tissue bank and include with the completed application and fee:

- (1) A map or narrative description which identifies the proposed service area;
- (2) A description of the tissue transplantation needs in the proposed service area;
- (3) An explanation of the probable impact of the new tissue bank on existing tissue banks providing services in the proposed service area;
- (4) Evidence of accreditation by the American Association of Tissue Banks (AATB) or another nationally recognized accreditation organization for tissue agencies approved by the Commissioner;
- (5) The name of the Medical Director and evidence that he or she is currently licensed to practice medicine in Oklahoma; and

- (6) The names and credentials of all technical operations personnel who meet the requirements of OAC 310:505-5-7.
- (b) **Existing tissue banks.** Existing tissue banks applying for a permit for the first time after the effective date of these rules shall not be required to provide the information required at OAC 310:505-5-2(a)(1 - 3).
- (c) **Renewal application.** At least ninety (90) days prior to the expiration of their current permit, each tissue bank shall submit to the Department a complete application for permit to operate a tissue bank and include with the completed application and fee:
- (1) Evidence of accreditation by the AATB or another nationally recognized accreditation organization approved by the Commissioner;
 - (2) The name of the Medical Director and evidence that he or she is currently licensed to practice medicine in Oklahoma; and
 - (3) The names and credentials of all technical personnel who meet the requirements of OAC 310:505-5-7, including evidence of current certification by the AATB or another nationally recognized accrediting or certifying organization for tissue agencies and personnel approved by the Commissioner.
- (d) **Notice of initial permit application.** After a complete application for permit and fee for a new tissue bank has been received, the Department shall cause public notice of the new tissue bank to be published in the newspaper with the greatest circulation in the proposed service area of the new tissue bank. The Department shall also provide written notice of the initial permit application to each tissue bank in the state holding a current permit.
- (e) **Action on permit application.** The Department shall act to issue or deny each initial and renewal permit application within seventy-five (75) days of the publication of the notice for initial permit application, and within seventy-five (75) days of receipt of the complete application and fee for renewal permit application.

[Source: Added at 18 Ok Reg 1711, eff 5-25-01]

310:505-5-3. Compliance with Federal, State, and local laws

Each tissue bank shall comply with applicable Federal, State, and local laws.

[Source: Added at 18 Ok Reg 1711, eff 5-25-01]

310:505-5-4. Enforcement

- (a) **Denial, revocation, suspension, non-renewal of permit.** The permit of a tissue bank may be denied, revoked, suspended, or not renewed for failure to comply with the provisions of the Act or the rules of this Chapter.
- (b) **Appeals.** Appeals of Department actions against a permit or a permit holder shall be conducted according to the Administrative Procedures Act and Chapter 2 of this Title (310:002).

[Source: Added at 18 Ok Reg 1711, eff 5-25-01]

310:505-5-5. Accreditation and notification

(a) Within one (1) year after receipt of a permit, each tissue bank shall be accredited by the AATB or another nationally recognized accreditation organization for tissue agencies approved by the Commissioner in order to hold, or be eligible to hold a permit.

(b) Each permitted tissue bank shall notify the Department in writing within ten (10) days of the loss of accredited status required by OAC 310:505-5-5(a).

[Source: Added at 18 Ok Reg 1711, eff 5-25-01 ; Amended at 19 Ok Reg 385, eff 11-19-01 (emergency); Amended at 19 Ok Reg 1050, eff 5-13-02]

310:505-5-6. Medical director

Each tissue bank shall have a medical director who is a physician licensed to practice medicine in Oklahoma with appropriate training and experience in tissue bank services.

[Source: Added at 18 Ok Reg 1711, eff 5-25-01]

310:505-5-7. Technical operations personnel

(a) Each tissue bank shall employ sufficient technical operations personnel to meet the procurement, testing, quality control, and quality assurance needs for the number and type of tissue units recovered, processed, stored, and distributed to ensure that a safe and reliable product is provided.

(b) Each tissue bank shall employ at least one technician holding current certification as a Certified Specialist in tissue bank procedures for recovery, processing, storage, and distribution of skin, bone, and connective tissue by the AATB or other nationally recognized accrediting or certifying organization for tissue agencies and personnel approved by the Commissioner.

[Source: Added at 18 Ok Reg 1711, eff 5-25-01]

310:505-5-8. Tissue distribution

Each tissue bank shall give priority in tissue distribution to the Oklahoma medical community and to Oklahoma patients.

[Source: Added at 18 Ok Reg 1711, eff 5-25-01]

310:505-5-9. Annual report

(a) Each tissue bank in Oklahoma shall prepare and submit an annual report to the Department based on the previous calendar year's twelve month period of January 1st through December 31st.

(b) Annual reports shall be provided to the Department by March 31st of each calendar year.

(c) During a tissue bank's first year of operation, the annual report shall be based on the period from the first day of operation to December 31st of that year.

(d) Each annual report shall include at least the following information:

- (1) The accreditation status of the tissue bank;
- (2) A report of all regulatory, accreditation, or internal inspections which result in findings that impact the quality of the product or services provided by the tissue bank;
- (3) The names and certification statuses of all technical personnel who meet the requirements of OAC 310:505-5-7.
- (4) The name and qualifications of the current medical director including evidence the medical director is currently licensed to practice medicine in Oklahoma;
- (5) The type and geographic origins of all donor tissue procured; and
- (6) The number and types of units of processed tissue used for patients in the service area of the tissue bank.

[Source: Added at 18 Ok Reg 1711, eff 5-25-01]

SUBCHAPTER 7. EYE BANKS

310:505-7-1. Requirement for a permit

Each eye bank operating in Oklahoma shall hold a valid permit issued by the Department. Once issued, a permit to operate an eye bank shall be valid as long as the permitted eye bank is in continuous operation and meets all provisions of the Act and the rules promulgated thereto.

[Source: Added at 18 Ok Reg 1711, eff 5-25-01]

310:505-7-2. Permit application

(a) **Initial application.** New eye banks shall submit a complete application for permit to operate an eye bank and include with the completed application an initial non-refundable fee equal to one quarter of one percent (0.25%) of the capital cost of the proposed eye bank, with a minimum fee of five hundred dollars (\$500.00). Any application received by the Department without a fee shall not be considered or processed.

(b) **Application requirements for new eye banks.** New eye banks shall also include the following along with the completed application and fee:

- (1) A map or narrative description which identifies the proposed service area;
- (2) A description of the eye and eye tissue needs in the proposed service area;
- (3) An explanation of the probable impact of the new eye bank on existing eye banks providing services in the proposed service area;

- (4) Evidence of accreditation by the Eye Bank Association of America (EBAA) or another nationally recognized accreditation organization for eye banks approved by the Commissioner;
- (5) The name of the Medical Director and evidence that he or she is a board-certified ophthalmic surgeon currently licensed to practice medicine in Oklahoma; and
- (6) The names and credentials of all technical operations personnel who meet the requirements of OAC 310:505-7-7.

(c) **Application requirements for existing eye banks.** Existing eye banks applying for a permit for the first time after the effective date of these rules shall not be required to pay a fee or provide the information required at OAC 310:505-7-2(a)(1 - 3).

(d) **Notice of initial permit application.** After a complete application for permit and fee for a new eye bank has been received, the Department shall cause public notice of the new eye bank to be published in the newspaper with the greatest circulation in the proposed service area of the new eye bank. The Department shall also provide written notice of the initial permit application to each eye bank in the state holding a current permit.

(e) **Action on initial permit application.** The Department shall issue or deny each initial permit application within seventy-five (75) days of the publication of the notice. An initial permit shall expire thirty-six (36) months from the date of issue. If construction is not completed and the eye bank is not in operation prior to the expiration date of the permit, the permit shall be void.

[Source: Added at 18 Ok Reg 1711, eff 5-25-01]

310:505-7-3. Compliance with Federal, State, and local laws

Each eye bank shall comply with applicable Federal, State, and local laws.

[Source: Added at 18 Ok Reg 1711, eff 5-25-01]

310:505-7-4. Enforcement

(a) **Denial, revocation, or suspension of a permit.** The permit of a eye bank may be denied, revoked, or suspended for failure to comply with the provisions of the Act or the rules of this Chapter.

(b) **Appeals.** Appeals of Department actions against a permit or a permit holder shall be conducted according to the Administrative Procedures Act and Chapter 2 of this Title (310:002).

[Source: Added at 18 Ok Reg 1711, eff 5-25-01]

310:505-7-5. Accreditation and notification

(a) Each eye bank shall be accredited within one year of beginning operation by the EBAA or another nationally recognized accreditation organization for eye banks approved by the Commissioner in order to hold, or be eligible to hold a permit.

(b) Each permitted eye bank shall notify the Department in writing within ten (10) days of the loss of accredited status required by OAC 310:505-7-5(a).

[Source: Added at 18 Ok Reg 1711, eff 5-25-01]

310:505-7-6. Medical director

Each eye bank shall have a medical director who is a board certified ophthalmic surgeon licensed to practice medicine in Oklahoma with appropriate training and experience in eye bank services.

[Source: Added at 18 Ok Reg 1711, eff 5-25-01]

310:505-7-7. Technical operations personnel

(a) Each eye bank shall employ sufficient technical operations personnel to meet the procurement, testing, quality control, and quality assurance needs for the number and type of eyes and eye tissue units recovered, processed, stored, and distributed to ensure a that safe and reliable product is provided.

(b) Each eye bank shall employ at least one person holding current certification as a Certified Eye Bank Technician by the EBAA or other nationally recognized accrediting or certifying organization for eye banks and personnel approved by the Commissioner.

[Source: Added at 18 Ok Reg 1711, eff 5-25-01]

310:505-7-8. Tissue distribution

Each eye bank shall give priority to the Oklahoma medical community and to the needs of patients being treated in Oklahoma.

[Source: Added at 18 Ok Reg 1711, eff 5-25-01]

310:505-7-9. Annual report

(a) Each eye bank in Oklahoma shall prepare and submit an annual report to the Department based on the previous calendar year's twelve month period of January 1st, through December 31st.

(b) Annual reports shall be provided to the Department by March 31st of each calendar year.

(c) During an eye bank's first year of operation, the annual report shall be based on the period from the first day of operation to December 31st of that year.

(d) Each annual report shall include at least the following information:

- (1) The accreditation status of the eye bank;
- (2) A report of all regulatory, accreditation, or internal inspections which result in findings that impact the quality of the product or services provided by the eye bank;
- (3) The names and certification statuses of all technical personnel who meet the requirements of OAC 310:505-7-7.
- (4) The name and qualifications of the current medical director including evidence the medical director is a board certified

ophthalmic surgeon and currently licensed to practice medicine in Oklahoma;

(5) The numbers and geographic origins of all donor corneas and whole eyes procured; and

(6) The number and geographic destinations of corneas and other parts of eyes.

CHAPTER 512. CHILDHOOD LEAD POISONING PREVENTION RULES

[**Authority:** 63 O.S.1991, § 1-114.1]
[**Source:** Codified 7-27-95]

SUBCHAPTER 1. GENERAL PROVISIONS

310:512-1-1. Purpose

The rules in this Chapter establish procedures and standards for childhood lead screening, assessment, poison prevention, and reporting as authorized under the provisions of Title 63 O.S. Section 1-114.1.

[**Source:** Added at 12 Ok Reg 3055, eff 7-27-95 ; Amended at 34 Ok Reg 1281, eff 10-1-17]

310:512-1-2. Criteria

(a) The Infant and Children's Health Advisory Council advises the Oklahoma State Board of Health on the establishment of rules for the prevention of childhood lead poisoning which include risk assessment, blood lead screening, laboratory assays, sample collection, reporting, lead hazard control, and rules related to the role of the provider such as: follow-up, diagnosis and treatment, developmental screening, referral for environmental assessments and lead hazard control, and parent education.

(b) All health care providers shall comply with the following procedures for blood lead screening.

(c) After sufficient statewide data collection and documented incidence of low lead exposure, the Commissioner of Health may exempt a community or county from universal lead screening.

[**Source:** Added at 12 Ok Reg 3055, eff 7-27-95 ; Amended at 34 Ok Reg 1281, eff 10-1-17 ; Amended at 38 Ok Reg 2029, eff 9-11-21]

310:512-1-3. Lead poisoning prevention program

(a) The Department maintains a lead poisoning prevention program. This program is responsible for establishing and coordinating activities to prevent lead poisoning and to minimize risk of exposure to lead.

(b) The Department enforces rules for screening children for lead poisoning, and for follow-up of children who have elevated blood lead levels.

(c) The Department may enter into interagency agreements to coordinate lead poisoning prevention, exposure reduction, identification and treatment activities and lead reduction activities with other federal, state and local agencies and programs.

(d) The Department maintains a statewide surveillance system of all Oklahoma resident's blood lead levels provided such information is monitored as confidential except for disclosure for medical treatment purposes or disclosure of non-identifying epidemiological data.

(e) The Department develops and implements public education and community outreach programs on lead exposure, detection and risk reduction.

[Source: Added at 12 Ok Reg 3055, eff 7-27-95 ; Amended at 34 Ok Reg 1281, eff 10-1-17 ; Amended at 38 Ok Reg 2029, eff 9-11-21 ; Amended at 40 Ok Reg 1563, eff 9-11-23]

310:512-1-4. Definitions

The following words or terms, when used in this Chapter, shall have the following meaning, unless the context clearly indicates otherwise:

"Advisory Council" means the Infant and Children's Health Advisory Council.

"Anticipatory guidance" means providing parents or guardians of children under the age of six with information regarding the major causes of lead poisoning and means of preventing lead exposure. Such guidance is to be pertinent to the environment of the child.

"Blood lead screening" refers to measuring lead concentration by capillary or venous blood collection to identify elevated blood lead levels.

"Case Management" refers to providing a collaborative process to assess, educate, coordinate, monitor, or evaluate options and services required to meet the child's environmental health and human service needs.

"CLIA" means the Clinical Laboratory Improvement Amendments. These amendments apply to the Federal Law that governs laboratories who examine human specimens for the diagnosis, prevention, or treatment of any disease or impairment, or the assessment of the health of human beings.

"Clinical Management Guidelines" means voluntary guidelines produced by the Department for clinical management and treatment decisions based on the initial or confirmed blood lead level.

"Confirmatory testing" refers to the collection of a venous blood sample to confirm an initial elevated capillary blood lead screening result. The collection of a capillary sample within 12 weeks to confirm an initial elevated capillary blood lead screening test result may be used if the initial capillary level is less than 10 µg/dL.

"Confirmed elevated blood lead level" refers to a concentration of lead in the blood taken from a venous sample which is above the reference level. It may also refer to a second capillary test as described in "confirmatory testing".

"Department" refers to the Oklahoma State Department of Health.

"Dwelling" refers to a building or structure, including the property occupied by and appurtenant to such dwelling, which is occupied in whole or in part as the home, residence or sleeping place of one or more human beings and without limiting the foregoing, includes child care facilities for children under six years of age, schools and nursery schools.

"Elevated blood lead level" means a concentration of lead in blood at or above the current reference level as defined by the Centers for Disease Control.

"Environmental investigation" means an on-site dwelling investigation to determine the existence, nature, severity, and location of lead or lead-based paint hazards, completed by a person licensed as a

certified risk assessor by the Oklahoma Department of Environmental Quality.

"Follow-up" refers to actions by local health departments and health care providers that may include, depending on the blood lead level and exposure history of the child: risk reduction education, follow-up testing, confirmatory testing, medical evaluation, medical management, environmental investigation, and case management, in accordance with generally accepted medical standards and public health guidelines.

"Follow-up testing" refers to repeat blood lead testing by venous blood draw for any child with a previously confirmed elevated blood lead level.

"Health care provider" means any health professional or facility authorized to conduct blood lead screening. Health care provider includes, but is not limited to, physicians, physician assistants, advance practice registered nurses, city-county health departments, county health departments, medical clinics, medical offices, hospitals, and Head Start programs.

"High risk lead exposure" refers to any positive response on the LERAQ or other suitable risk assessment questionnaire.

"Laboratory" refers to any in-state CLIA approved laboratory or out-of-state CLIA approved laboratory providing blood lead testing for residents of Oklahoma. Laboratory may also refer to any entity using a point of care instrument for the purpose of blood lead testing of Oklahoma residents.

"LERAQ" refers to the Lead Exposure Risk Assessment Questionnaire which consists of a model set of questions developed by the Department to assess a child's risk of exposure to lead and includes information regarding areas of the state with higher-than-average risks for lead exposure.

"Low risk lead exposure" refers to negative responses to all questions on the LERAQ or other suitable risk assessment questionnaire.

"Person" means any natural person.

"Point-of-Care Instrument" refers to a blood lead testing device designed for the quantitative measurement of lead in fresh whole blood.

"Primary Health Care Provider" refers to any person or government entity that provides well child health care services, such as annual examinations and immunizations, to children under six years of age. Primary health care provider includes, but is not limited to, physicians, physician assistants, advance practice registered nurse, local health departments, medical clinics, medical offices, and hospital outpatient clinics.

"Program" refers to the Oklahoma Childhood Lead Poisoning Prevention Program (OCLPPP) of the Department.

"Reference Level" means a level of lead in the blood measured in micrograms per deciliter used to identify children with lead levels that are much higher than most children's lead levels. This level is based on the U.S. population of children ages 1-5 years who are in the highest 2.5% of children when tested for lead in their blood based on the 97.5 percentile of the National Health and Nutrition Examination Survey (NHANES) for the two most recent surveys. The reference level currently in use is 3.5 micrograms per deciliter.

"Risk Assessment Questionnaire" means a set of questions designed to determine an individual's risk for lead exposure and lead poisoning, as approved by the Department and based on recommendations from the CDC.

"Satisfactory specimen" means a specimen collected using an appropriate procedure which is suitable in both blood quantity and quality to perform screening for Blood Lead measurement.

"Target population" refers to any infant or child, 6 months to 72 months of age.

"Unsatisfactory specimen" means a blood specimen which is not suitable in quality or quantity to perform blood lead measurements.

[Source: Added at 12 Ok Reg 3055, eff 7-27-95 ; Amended at 34 Ok Reg 1281, eff 10-1-17 ; Amended at 38 Ok Reg 2029, eff 9-11-21 ; Amended at 40 Ok Reg 1563, eff 9-11-23]

SUBCHAPTER 3. RISK ASSESSMENT, SCREENING AND MANAGEMENT

310:512-3-1. Risk assessment and screening criteria

(a) All children in Oklahoma, 6 months to 72 months of age shall be assessed for blood lead exposure utilizing the risk assessment questionnaire as defined in paragraph (c) as part of each periodic health care visit occurring at age 6, 12, and 24 months and age 3 years, 4 years and 5 years.

(b) All children in Oklahoma shall have a blood lead screening test as part of each periodic health care visit occurring at age 12 and 24 months of age or at any age after age 24 months up to age 72 months, if not previously tested for blood lead.

(c) A risk assessment questionnaire based on recommendations from the CDC and approved by the Department before implementation should include questions related to the following:

(1) Does the child live in or frequently visit a home built before 1978?

(2) Does the child have a sibling or playmate with an elevated blood lead level?

(3) Is the child eligible for Medicaid, WIC, or Head Start?

(4) Does the child live with someone who has a job or hobby that may involve lead (example: jewelry making, building renovation or repair, working with automobile batteries, lead solder, or battery recycling)?

(5) Does the child eat or mouth trinkets or items that contain lead?

(6) Does the child live in an area identified as a high-risk target area by the Program?

(d) A "Yes" or "Don't know" answer to the questions in paragraph (c) is considered a positive answer and requires the child to have a blood lead test.

(e) The Department publishes available information regarding current high-risk target areas on its website located at:

<https://oklahoma.gov/health/leadprevention>.

(f) The Department publishes the LERAQ as an approved risk assessment questionnaire on its website.

[**Source:** Added at 12 Ok Reg 3055, eff 7-27-95 ; Amended at 34 Ok Reg 1281, eff 10-1-17 ; Amended at 38 Ok Reg 2029, eff 9-11-21 ; Amended at 40 Ok Reg 1563, eff 9-11-23]

310:512-3-2. Screening criteria [REVOKED]

[**Source:** Added at 12 Ok Reg 3055, eff 7-27-95 ; Revoked at 34 Ok Reg 1281, eff 10-1-17]

310:512-3-2.1. Primary health care provider responsibilities for risk assessment and screening

- (a) Every primary health care provider who provides a periodic health care visit to a child at age 6, 12, and 24 months and age 3, age 4 and 5 years shall assess the child for risk of lead exposure using the LERAQ, or suitable risk assessment questionnaire approved by the Department.
- (b) For children at high risk for lead exposure according to the LERAQ, or suitable risk assessment questionnaire, the primary health care provider shall perform a blood lead test beginning at 6 months of age, or when initially assessed, if older.
- (c) Every primary health care provider who provides a periodic health care visit to a child shall order an initial capillary or venous blood lead screening test at age 12 and 24 months, or at any age after age 24 months up to age 72 months if never tested.
- (d) Every primary health care provider who provides a periodic health care visit to a child at age 6, 12, and 24 months and age 3, age 4, and 5 years shall:
 - (1) Give oral or written anticipatory guidance to a parent or guardian on prevention of childhood lead poisoning, including, at minimum, the information that children can be harmed by exposure to lead, especially deteriorating or disturbed lead-based paint and the dust from it, and are particularly at risk of lead poisoning from the time the child begins to crawl until 72 months of age; and
 - (2) Discuss the child's blood lead test results with the child's family and any necessary follow up.
- (e) Any health care provider who performs blood lead screening of a child who is six months of age to six years of age and who is not the child's ongoing primary health care provider shall forward the blood lead test result, if elevated at or above the reference level, to the child's primary health care provider.
- (f) If a parent or guardian refuses blood lead testing screening of their child, the health care provider shall have the parent or guardian indicate in writing this refusal in the child's medical record and provide a copy via mail or by fax to the Oklahoma Childhood Lead Poisoning Prevention Program.
- (g) Any health care provider working with a special population such as a recent refugee or immigrant from a country known to have a higher incidence or risk of lead exposure may consider blood lead screening up to age 16.

[Source: Added at 34 Ok Reg 1281, eff 10-1-17 ; Amended at 40 Ok Reg 1563, eff 9-11-23]

310:512-3-3. Blood lead screening tests

- (a) **Capillary sample for blood lead testing.** Capillary blood specimens are acceptable for initial blood lead screening if appropriate collection procedures are followed to minimize the risk of environmental lead contamination. A capillary blood lead sample may be obtained for confirmation of an elevated blood lead level less than 10 µg/dL when a venous sample is not obtainable.

(b) **Venous sample for blood lead testing.** Venous blood is the preferred specimen for blood lead analysis and should be used for lead measurement whenever practical. A venous sample is required for confirmation of blood lead concentration equal to or greater than 10 µg/dL and preferred for confirmation of an elevated blood lead level less than 10 µg/dL.

(c) **Point-of-Care instruments.** Point-of-Care instruments shall not be used to confirm elevated blood lead levels even if the sample is collected by venipuncture.

[Source: Added at 12 Ok Reg 3055, eff 7-27-95 ; Amended at 34 Ok Reg 1281, eff 10-1-17]

310:512-3-4. Providers screening and follow-up [REVOKED]

[Source: Added at 12 Ok Reg 3055, eff 7-27-95 ; Revoked at 34 Ok Reg 1281, eff 10-1-17]

310:512-3-4.1. Health care provider responsibilities for follow-up after screening

(a) Health care providers shall provide or make reasonable efforts to ensure the provision of confirmation and follow-up testing for each child with an elevated blood lead level above the reference level.

(b) If the initial blood lead test result is below the reference level on either a venous or capillary sample, the health care provider shall retest the child annually if answers on the LERAQ or suitable risk assessment questionnaire indicate continuing high risk for lead exposure.

(c) For each child who has an elevated blood lead level at or above the reference level, the health care provider shall take those actions that are reasonably and medically necessary and appropriate based upon the child's blood lead level to reduce, to the extent possible, the child's blood lead level below the reference level. Such actions may include the following:

- (1) Education of a parent or guardian on lead hazards and lead poisoning;
- (2) Clinical evaluation for complication of lead poisoning;
- (3) Follow-up blood lead analyses as indicated based on level of elevation and period of time;
- (4) Developmental screening;
- (5) Referral to the Department for an environmental investigation for a single venous blood lead test result equal to or greater than 10 µg/dL; and
- (6) Chelation therapy should be considered and, when possible, a medical toxicologist, provider experienced in chelation therapy, or pediatric environmental health specialist should be consulted for a child with a blood lead test greater than 45 µg/dL.

(d) If the initial capillary blood lead test result is elevated, the health care provider shall obtain a venous confirmation test in accordance with the Clinical Management Guidelines as established by the Department.

(e) If the initial venous blood lead test result or the confirmation test is elevated, the health care provider shall obtain venous follow-up testing in accordance with the Clinical Management Guidelines as set forth by the

Department.

[Source: Added at 34 Ok Reg 1281, eff 10-1-17 ; Amended at 40 Ok Reg 1563, eff 9-11-23]

310:512-3-5. Reporting requirements

(a) Laboratory.

(1) Laboratories shall report the results of all blood lead tests performed on persons who are residents of Oklahoma to the Childhood Lead Poisoning Prevention Program. These reports are confidential and may be utilized only for the purpose of assuring service delivery, program administration, data analysis, and evaluation.

(2) Federal CLIA regulations at Title 42, of the Code of Federal Regulations, Section 493.1241 (relating to standards for test requests), require that laboratory requisitions contain sufficient patient data that must include patient's name, sex, date of birth, date of collection, test(s) to be performed, the source of the specimen, name and address of person requesting the test, as well as "Any additional information relevant and necessary for a specific test to ensure accurate and timely testing and reporting of results, including interpretation, if applicable." Laboratories shall report the following information to the Childhood Lead Poisoning Prevention Program by electronic data transmission: name, date of birth, sex, address, county of residence, type of sample (venous or capillary), blood lead level, health care provider ordering the test, laboratory identifiers, date the sample was collected, the date of analysis, and additional information already available such as race, ethnicity, Medicaid status and/or Medicaid Number. The laboratory receiving the sample from the health care provider taking the sample shall assure that the laboratory requisition slip is fully completed and includes the information required pursuant to the Subsection. In the event electronic submission is not available, lab reports must be submitted by a method and format approved by the Oklahoma Childhood Lead Poisoning Prevention Program.

(3) Test results that are reported to the Childhood Lead Poisoning Prevention Program have the following time limits:

(A) Results of all blood lead levels less than the reference level at a minimum of a monthly basis.

(B) Results of all blood lead levels equal to or greater than the reference level at a minimum of a weekly basis and if possible daily.

(4) All clinical laboratories shall notify the health care provider ordering the blood lead test when the results of any analysis in a child up to 72 months of age is equal to or greater than 10 µg/dL within 24 hours of the date of the analysis.

(5) Nothing in this Subsection shall be construed to relieve any laboratory from reporting results of any blood lead analysis to the physician, or other health care provider who ordered the test or to any other entity as required by State, Federal or local statutes

or regulations or in accordance with accepted standard of practice.

(b) Health care providers.

(1) All health care providers shall ensure that all of the information as specified in 310:512-3-5(b) (relating to standards for test requests), is completed for all blood lead analyses ordered and that this information accompanies the sample to the testing laboratory.

(2) On written or verbal notification of an elevated capillary lead level, equal to or greater than the reference level, the child's health care provider will obtain confirmatory testing.

(3) All health care providers shall notify the Childhood Lead Poisoning Prevention Program of any blood lead level in a child up to 72 months of age equal to or greater than the reference level within 1 week and equal to or greater than 10 µg/dL within 24 hours of having been notified of this result by the testing laboratory. The following information shall be provided when reporting: name, date of birth, sex, address, county of residence, type of sample (venous or capillary), blood lead level, health care provider ordering the test, laboratory identifiers, date the sample was collected and the date of analysis.

(4) Any health care provider utilizing a point-of-care instrument to test blood lead samples is required to report all such results, regardless of the level, to the Childhood Lead Poisoning Prevention Program, and follow the guidelines for reporting as stated in 310:512-3-5(a) (relating to laboratory reporting).

(5) Upon written notification of unsatisfactory specimens, the child's health care provider will obtain a repeat specimen.

(6) These reports are confidential and may be utilized only for the purpose of assuring service delivery, program administration, data analysis, and evaluation.

[Source: Added at 12 Ok Reg 3055, eff 7-27-95 ; Amended at 34 Ok Reg 1281, eff 10-1-17 ; Amended at 38 Ok Reg 2029, eff 9-11-21 ; Amended at 40 Ok Reg 1563, eff 9-11-23]

310:512-3-6. Fees

The county health department may collect a fee for a blood lead laboratory sample analysis, a fee for collection of a blood lead sample, or a fee for an environmental investigation, as may be indicated. Any fee collected shall not exceed the reasonable cost of providing the service or the Medicaid reimbursement rate allowed for the service, whichever is lower. Any individual consenting to a blood lead test shall be informed of the specific fee prior to the collection of the laboratory specimen.

[Source: Added at 27 Ok Reg 2521, eff 7-25-10]

310:512-3-7. Inability to pay

Persons requesting blood lead level testing will not be denied a blood lead sample analysis or, if indicated, an environmental investigation because of the inability to pay.

CHAPTER 515. COMMUNICABLE DISEASE AND INJURY REPORTING

[**Authority:** 63 O.S., §§ 1-103a.1, 1-104, 1-502, 1-502.1, and 1-503]

[**Source:** Codified 12-31-91]

SUBCHAPTER 1. DISEASE AND INJURY REPORTING

310:515-1-1. Purpose

The rules in this Chapter implement the Communicable Diseases Reporting Regulations, 63 O.S. §§1-104, 1-106, 1-502, and 1-503.
