SUBCHAPTER 17. BLACK FOOTED FERRETS AND PRAIRIE DOGS

800:25-17-1. Purpose

This Subchapter outlines the legal means in which prairie dogs may be controlled.

800:25-17-2. General provisions

Whereas, the black-footed ferret is ecologically dependent upon colonies of prairie dogs for survival and the prairie dog is in danger of eradication on some private lands in Oklahoma, black-footed ferrets may not be killed by any means in the State of Oklahoma and prairie dogs may not be killed by any means except rifle, shotguns, handguns, and bows and arrows. Prairie dogs may be controlled with the use of poisons subject to the provisions of this Subchapter.

800:25-17-3. Permits

A permit shall be required of all landowners and operators in Oklahoma prior to any prairie dog control work with the use of poisons, including solid chemicals and gases. The permit must be obtained from the Oklahoma Department of Wildlife Conservation and can be issued for periods up to 90 days.

800:25-17-4. Poisons

The following restrictions apply to the use of poisons in prairie dog control:

- (1) Prairie dog control with poisons shall not be permitted in any area until adequate determinations by qualified personnel are made that black-footed ferrets do not exist within a five mile radius of the proposed control area.

(2) Permits for the use of poisons may not be issued by the Wildlife Department to reduce prairie dogs in any county to fewer than 1000 prairie dogs.

SUBCHAPTER 19. OKLAHOMA ENDANGERED SPECIES

800:25-19-1. Purpose

The purpose of this Subchapter is to facilitate the perpetuation of self-sustaining population levels of native wildlife species and thereby maintain the diversity of wildlife in Oklahoma. Wildlife species which may be considered for listing are those native species which have reproduced in or otherwise significantly used, as in migration or overwintering, areas within the state.

800:25-19-2. Species of Concern [REVOKED]

[Source: Revoked at 9 Ok Reg 3075, eff 7-13-92]

800:25-19-3. Criteria to determine classification of wildlife

The following is the criteria for determining the classification of wildlife and the procedure to follow:

(1) **Nominations.** A nomination for a species may be prepared by anyone and submitted to the Oklahoma Department of Wildlife Conservation Nongame Section, 1801 North Lincoln Boulevard, Oklahoma City, Oklahoma 73105. The Oklahoma Department of Wildlife Conservation staff may also prepare species nominations and submit them for review. The nomination should contain the following elements:

(A) Description and historical summary - a literature review pertinent to the species:

(i) Taxonomy - common and scientific names; explanation of any disputes regarding the classification.

(ii) Brief description - identifying features that best distinguish it from co-generics or other similar taxa.

(iii) Habitat requirements - emphasizing those most critical to survival.

(iv) Food habits, reproductive parameters, social structure, diseases, parasites or other factors that may affect survival.

(v) Past and present distribution and abundance - focusing on Oklahoma.

(vi) Past and present habitat - especially in Oklahoma.

(B) Documentation of existing and potential threats to the species survival in Oklahoma.

(C) Proposed action - the species is proposed for one of the following:

(i) List the species as state endangered, threatened or special concern.

(ii) Reclassify the species.

(D) Name, address and resume of the nominator and the submission date.

(2) **Review.** After a nomination is received, it will be reviewed by the Oklahoma Department of Wildlife Conservation staff, technical committees and selected authorities. The preparer of a nomination which does not contain sufficient information to support the proposed action will be contacted and given the opportunity to correct the deficiency. If favorably reviewed by Department personnel, a public announcement to gather public input on the proposed action will be requested. Based upon the information contained in the nomination packet, recommendations made by the Nongame Technical Committees and Council and the public input, the Department may make a recommendation to the Oklahoma Wildlife Conservation Commission for appropriate action. Such actions may include:

(A) Listing as proposed,

(B) Listing in another category, and

(C) Reclassification to another category.

(D) No action.

(3) **Definitions.** The following are the definitions for endangered, threatened and special concern species.

(A) **State endangered species.** An endangered species is a native species whose prospects of survival or recruitment within the state is in imminent jeopardy. This determination will be based primarily upon species status within Oklahoma.

(B) **State threatened species.** A threatened species is a native species that, although not presently in danger of extirpation, is likely to become endangered in the foreseeable future in the absence of special protection and management efforts.

(C) **Special concern species.** A special concern species may be one of the following:

(i) Category I - a native species with a presently stable or increasing population that current evidence indicates is especially vulnerable to extirpation because of limited range, low

population or other factors.

(ii) Category II - species identified by technical experts as possibly threatened or vulnerable to extirpation but for which little, if any, evidence exists to document the population level, range or factors pertinent to its status.

(4) **Status of wildlife species.** The following is a key to determining status of wildlife species.

- Ai The species historically occurred in Oklahoma as a native; (B)
- Aii The species did not historically occur in Oklahoma as native; (exotic)
- Bi The species is known to presently occur in Oklahoma; (C)
- Bii The species probably occurs based on the number and pattern of reported sightings in the last 10 years; (D)
The species records show there is no longer a self-sustaining population free ranging in Oklahoma; (extirpated)
- Biii Evidence indicates that the species has declined significantly in population or distribution, that the population or distribution is extremely restricted and that the continued existence of the species is in imminent jeopardy; (endangered)
- Ci Evidence indicates that the species has declined significantly in population, or that its population is extremely restricted, but does not indicate that the species continued survival is in imminent jeopardy; (threatened)
- Cii Evidence indicates that the species especially vulnerable to extirpation and that the species population and distribution is presently stable; (special concern species - Category I)
- Ciii Insufficient evidence exists to substantiate the concern expressed by technical experts regarding the long-term survival of the species; (special concern species - Category II)
- Civ Insufficient evidence exists to substantiate the concern expressed by technical experts regarding the long-term survival of the species; (special concern species - Category II)
- Cv Insufficient evidence exists to substantiate the concern expressed by technical experts regarding the long-term survival of the species; (special concern species - Category II)

- species long-term survival; (no special status)
- Historical and current data indicate the species population or distribution is extremely small but does not indicate either is declining; (special concern species - Category I)
- Di
- Historical and current data on the species are inadequate to demonstrate a decline in numbers or distribution has occurred; (special concern species - Category II)
- Dii
- Historical data suggest a significant decline in population or distribution though threat of imminent extirpation cannot be demonstrated; (threatened)
- Diii
- Historical data indicate a significant decline in population or distribution and that the continued survival of the species is in imminent jeopardy; (endangered)
- Div

800:25-19-4. Threatened and endangered species

The following is the criteria for listing threatened and endangered species:

- (1) Documentation exists of the present or threatened destruction, modification or curtailment of its habitat.
- (2) Documented modification of population parameters or other factors adversely affecting the long-term survival or recovery of the species.
- (3) Biological characteristics of the species which may adversely affect the long-term survival of the species.

[Source: Added at 9 Ok Reg 3075, eff 7-13-92]

800:25-19-5. Species of special concern

The following is the criteria for listing special concern species:

- (1) **Category I Species.** The classification of Category I species involves documentation of an extremely restricted population, distribution or habitat or other factors which may adversely affect long-term survival in Oklahoma of a currently stable population.
- (2) **Category II Species.** The classification of Category II species involves concern over the long-term survival indicated by technical experts and insufficient documentation to adequately assess the population status or trend in Oklahoma.

This purpose of this Subchapter is to establish fees and application procedures for the shipping of wildlife into or out of the State of Oklahoma.

[Source: Added at 9 Ok Reg 3075, eff 7-13-92]

800:25-23-2. Application and fees

(a) Unless otherwise provided for in State Statute or administrative rules, anyone shipping or otherwise transporting wildlife, other than raptors, into or out of the State of Oklahoma must first have authorization from the Department. A fee will be charged to cover the costs of processing and handling the issuance of the permit. The issuance of an import or

export authorization number shall constitute written authority from the Department for such import or export.

(b) The following are the procedures for obtaining a permit number.

(1) Applicant may obtain a permit number by appearance at Department Headquarters in person free of charge.

(2) All permit numbers issued by mail or fax may be charged a five dollar (\$5.00) fee. A prepaid account may be established by persons wishing to fax or mail requests.

(3) Applicant shall provide all information required by the Department or permission for import or export may be denied.

(4) Licensed breeders may submit monthly export reports on forms prescribed by the Department in-lieu of individual shipment requests for export. Licensed breeders must submit annual reports of previous activity when reviewing the license. The annual report shall cover the wildlife acquisitions that occurred since their last annual report and must contain all wildlife that was held at the beginning of the reporting period. If this is the breeder's first year of operation then the reporting period will be from when the initial inspection was conducted up to the renewal of the license. If the license is not going to be renewed the annual report of previous activity must be submitted within thirty (30) days following the expiration date of the license.

(5) Licensed breeders may ship or otherwise transport to export from the confines of the State any wildlife lawfully bred or propagated without a permit.

SUBCHAPTER 26. SCIENTIFIC COLLECTOR PERMITS

PART 1. SCIENTIFIC PURPOSES

800:25-26-1. Purpose

The purpose of this Subchapter is to establish application procedures for obtaining a permit for the collection of fish and wildlife species for scientific purposes.

[Source: Added at 20 Ok Reg 2216, eff 7-1-03]

800:25-26-2. Application and fees

(a) Anyone sampling or collecting fish or wildlife, or their nests or eggs for scientific purposes, must first have authorization from the Department. A fee will be charged to cover the costs of processing and handling the issuance of the permit. The issuance of a scientific collector permit shall constitute written authority from the Department for such collection activities.

(b) The following are the procedures for obtaining a scientific collector permit

(1) Applications may be obtained by contacting the Oklahoma Department of Wildlife Conservation at P.O. Box 53465, Oklahoma City, 73152 or by appearance at Department Headquarters, 1801 N. Lincoln Blvd.

(2) The application must be accompanied by a letter of recommendation from at least one well-known scientist, or from any well-known scientific institution, who will vouch for the applicant's integrity and character. The letter must contain a brief statement about the purpose of the project.

(3) Permits expire at the end of each calendar year. A new application must be filed each time an applicant applies for a permit. A letter of recommendation may be required for each application.

[Source: Added at 20 Ok Reg 2216, eff 7-1-03 ; Amended at 21 Ok Reg 1443, eff 6-1-04]

800:25-26-3. Use

(a) A copy of the approved application must be carried with the collector permit when sampling or collecting in the field.

(b) The permit holder must notify the Law Enforcement Division at least twenty-four hours prior to the time of sampling or collecting in any county. Notification must be made prior to each trip, unless prior arrangements to the contrary have been made with the Game Warden(s) in the counties involved.

(c) Instructors in charge of educational classes may take classes into the field and allow students to collect in their presence under their permit. If students collect or sample fish or wildlife when the instructor is not present, they must have their own permit. Students collecting or sampling in the field, under the permit of an instructor, and in the presence of an instructor, are not required to have a hunting or fishing license, or individual permit except as provided in (5).

(d) Except as stipulated in (e), persons who sample or collect fish or wildlife under a scientific collector permit are not required to possess a fishing or hunting license.

(e) The permit does not authorize the holder to collect game, furbearing, or predatory species with firearms, bows and arrows, or fish with any hook and line method without a valid Oklahoma hunting and/or fishing license. The following species may not be taken under a scientific collector permit: deer, bear, elk, antelope, or wild turkey.

(f) This permit does not authorize sampling or collecting on State or Federal Refuge or Wilderness Areas.

(g) Only those specific species, areas, and methods approved by the Department will be covered by the permit. Any variations from the above rules must be covered by specific written approval by the Director and said approval shall be attached to and carried with the permit.

(h) A Scientific Collector's permit shall not be used to collect those species of wildlife for which a statewide closed season has been established by the Oklahoma Wildlife Commission, unless specifically authorized.

(i) A Federal Permit is required in addition to the state permit, if migratory birds, threatened or endangered species are to be collected.

[Source: Added at 20 Ok Reg 2216, eff 7-1-03 ; Amended at 23 Ok Reg 1583, eff 7-1-06]

800:25-26-4. Reporting

(a) The permit holder must submit a report listing all fish and wildlife collected within thirty (30) days of the end of the calendar year.
(b) Failure to submit a report, even if no fish or wildlife were collected, is cause for revoking the permit. No renewals will be issued without receipt of completed report forms.

[Source: Added at 20 Ok Reg 2216, eff 7-1-03]

PART 3. AUTHORIZATION LETTER

800:25-26-5. Purpose

Consistent with State Statute 29-3-103, the Oklahoma Wildlife Conservation Commission may enter into cooperative agreements with federal, state and local agencies regarding the study or conservation of fish and wildlife. The purpose of this section is to establish application procedures and qualification for obtaining a letter of authorization from the Director of the Oklahoma Department of Wildlife Conservation for the capture, holding and/or vouchering of fish and wildlife species for biological monitoring, conservation education, or agency-supported research purposes by government entities.

[Source: Added at 37 Ok Reg 2307, eff 9-11-20]

800:25-26-6. Application process and reporting

(a) The Director, acting on behalf of the Commission, may issue a letter of authorization to a government agency or a sub-division of a government agency including municipal, county, state or federal resource management agencies, for the capture, possession, and/or vouchering of fish and wildlife for the purposes of biological monitoring, conservation education, or research funded by the Oklahoma Department of Wildlife Conservation.

(b) The following are the procedures for obtaining a letter of authorization:

- (1) A request for a letter of authorization must be sent in writing to the Fisheries Division Chief or Wildlife Division Chief of the Oklahoma Department of Wildlife Conservation.
- (2) The request must identify the following:
 - (A) the need for or purpose of the letter of authorization.
 - (B) the name, agency and contact information (phone number, address and email) of one or more primary points of contact to whom the letter of authorization is issued.
 - (C) the species and estimated numbers of individuals for which the applicant seeks authorization to capture,

possess or voucher.

(D) the geographic area over which the request extends.

(E) a list or description of the methods by which fish and wildlife will be captured or taken,

(F) the names of all individuals, including the primary point of contact, who are intended to be covered under the letter of authorization.

(G) the intended final disposition of the fish and wildlife requested to be collected.

(3) Once a letter of authorization request is received, ODWC fish and wildlife biologists will conduct an internal review process. Once the request is reviewed and deemed adequate, it will be submitted for the Director's approval and signature and the approved letter of authorization will be sent to the applicant.

(4) Letters of authorization expire at the end of each calendar year, and a new request must be submitted each year that the applicant requested authorization.

(5) Within two months of the end of the calendar year, the primary point of contact is responsible for submitting a written report summarizing the activities conducted under the letter of authorization including the geographic locations where fish and wildlife were captured, the species and numbers of individuals captured, and the disposition of those animals or specimens at the end of the year. Failure to provide an annual report in a timely manner could preclude the issuance of letters of authorization in subsequent years.

[Source: Added at 37 Ok Reg 2307, eff 9-11-20]

800:25-26-7. Uses and specifications

(a) A copy of the letter of authorization must be carried by each authorized individual when active in the field.

(b) Each letter of authorization will describe the extent of the activities that it covers including the geographic area and the methods of capture or take.

(c) Letter of authorization may be issued for the capture, possession and vouchering of species that cannot be permitted under a scientific collector's permit including deer, bear, elk, antelope and turkey.

(d) Letters of authorization may be issued to individuals and laboratories within government research institutions and public universities that conduct fish and wildlife research funded by the Oklahoma Department of Wildlife Conservation.

(e) A letter of authorization does not preclude the need for a federal permit. The capture, possession and vouchering of migratory birds and federally-listed threatened or endangered species requires a federal permit unless exempted under an Endangered Species Act Section 4(d) rule.

(f) A letter of authorization does not preclude the need to obtain permission from landowners to operate on private property, or the need to obtain permission from official area managers when operating on

municipal, state or federal lands.

SUBCHAPTER 27. FACILITY REQUIREMENTS FOR CAPTIVE BRED WILDLIFE

800:25-27-1. Purpose

The purpose of this Subchapter is to establish guidelines to serve as current standards for inspections and a basis for the approval of licenses permitting activities involving captive bred wildlife.

[Source: Added at 9 Ok Reg 1291, eff 11-15-91 (emergency); Added at 9 Ok Reg 3075, eff 7-13-92]

800:25-27-2. Procedures and guidelines

(a) The following regulations shall be in effect to establish certain standards, maintenance and operations of facilities licensed to hunt, possess, raise, breed or rehabilitate wildlife, for the humane treatment, benefit, health and welfare of such captive held wildlife, or wildlife held in subjugation.

(b) Any person, so licensed for any of the activities listed in (a) of this Section shall comply with the minimum standards set forth in the Animal Welfare Act, 9 CFR Chapter 1, subpart F, Sections 3.125 through 3.142, "Specifications for the Humane Handling, Care, Treatment and Transportation of Warmblooded Animals", and this act shall further apply to any and all wildlife as defined by the Oklahoma Wildlife Conservation Code for the purpose of this Subchapter, and a copy of the above stated act and definition shall be made available to any and all persons permitted for the activities mentioned in (a) of this Section.

(c) Cage requirements for mammals shall be computed using the following equation: (length of mammal in inches plus 6) multiplied by (length of mammal in inches plus 6) = required area in square inches divided by 144 = required square feet of floor space. That this cage requirement shall be the required minimum of any mammal and its offspring that have not yet reached the age of eight (8) weeks of age.

(d) Those persons holding a Commercial Hunting Area License, or a Commercial Wildlife Breeders License and holding any mammals in subjugation, or any persons licensed to rehabilitate any sick or injured wildlife shall be required to have a veterinarian of record, and shall have a written parasite/pest control program that has been reviewed and signed by their respective veterinarian of record.

(e) Any venomous reptile possessed by a permittee shall be kept in a solid enclosure that is structurally sound so that it restricts access and contains the animal. Any ventilation ports shall be constructed of a double layer of fine mesh screen or a similar suitable material firmly secured to the cage, and any transparent sides shall be of a thickness of no less than 1/4" glass or plexiglass. Additionally, each cage door shall be key locked or secured with a similar type mechanical lock.

(f) All cages or enclosures housing any bear or cat that will grow to reach 50 pounds or more shall be key locked or secured with a similar type mechanical lock. Any cages or enclosures housing bear or cats which is visible to the public shall be required to have a perimeter/barrier fence constructed to prohibit unrestricted access, and to reduce risk of harm to the public.

(g) Commercial Wildlife Breeders who are raising, breeding, and selling mule deer, whitetail deer, and elk for the purposes of selling the deer and elk for meat, as allowed in O.S. 29, Section 5-601, may slaughter the deer and elk year round under the Exotic Livestock and Exotic Livestock Products Inspection Act in the Agriculture Code. Operators of such facilities shall contact the warden(s) in the county where the facility is located and provide notice of such slaughter a minimum of twenty-four (24) hours before the animals are slaughtered.

(h) All records, and facilities, of Commercial Wildlife Breeders shall be available for inspection at all reasonable times by authorized representatives of the Department, and/or authorized representatives of the Department of Agriculture.

(i) No person may:

(1) Kill or attempt to kill, injure or attempt to injure any cat or bear that can grow to a weight of fifty pounds or more that is:

SUBCHAPTER 29. OKLAHOMA DEER MANAGEMENT ASSISTANCE PROGRAM

800:25-29-1. Purpose

The purpose of this Subchapter is to establish procedures for Oklahoma landowners or operators to enroll in the Deer Management

Assistance Program (DMAP) to enable them to manage their land for deer and this rule also establishes responsibilities of the landowner and the Department.

[Source: Added at 9 Ok Reg 1291, eff 11-15-91 (emergency); Added at 9 Ok Reg 3075, eff 7-13-92]

800:25-29-2. Qualifications and procedures

The following are the qualifications and procedures for participating in the Deer Management Assistance Program (DMAP):

- (1) **Minimum acreage.** The minimum acreage is 1000 acres, although all reasonable requests will be evaluated. Applicants with less than 1000 acres will be allowed to form a cooperative with adjacent landowners to meet the minimum requirements.
- (2) **Application procedure.** Landowners wishing to enroll lands in DMAP will submit to the Department an application on forms provided by the Department by May 15 annually. The application will include a complete legal description of the property to be enrolled. Following review in Oklahoma City, applications will be forwarded to appropriate ODWC personnel for an on site inspection. Following inspection, if deer harvest objectives can be met with the current number of antlerless hunting days available, the request will be denied and the application fee refunded. If not, the recommended number of tags needed will be determined and the applicant will be notified of approval by September 1st.
- (3) **Season length.** Deer seasons on properties enrolled in DMAP shall be concurrent with the deer archery, primitive firearms season (with only equipment defined under legal means of take for such seasons), deer gun season and extending through the entire month of December and any special antlerless deer gun season regardless of zone.

800:25-29-3. Landowner responsibilities

The following are the responsibilities of landowners participating in the Deer Management Assistance Program (DMAP):

- (1) **Enrollment fees.** An annual enrollment fee payable at time of application is required. Permits are not transferable and may be used only on the specific area for which they are issued. An antlerless tag is required in addition to the permit. Annual enrollment fees shall be based on the acreage of the property enrolled. Two different levels will be available as follows:
 - (A) Level 1: 1,000 - 4,999 acres, \$200.00 enrollment fee.
 - (B) Level 2: 5,000+ acres, \$400.00 enrollment fee.
- (2) **Tagging.** DMAP permits will consist of readily identifiable, colored tag stock. Upon harvesting an antlerless deer on lands enrolled in the DMAP program, the permit and antlerless deer tag will be immediately attached to the animal. Antlerless deer

harvested using DMAP permits will be bonus deer and will not be a part of the regular season bag limit. Unused permits will be returned to the supervising biologist immediately following the close of all legal deer seasons. No rebate or refund for unused tags or permits will be made.

(3) **Record keeping:** Each DMAP cooperating property will be responsible for the following annual requirements:

(A) Renewal application and full payment must be received by July 31.

(B) Cooperator must complete a standardized spotlight route according to supplied instructions. The count must consist of 10 repetitions and be mailed to the property's cooperating biologist by October 1.

(C) Each deer taken from cooperating property must be properly recorded in the supplied deer harvest record book according to provided instructions. Antler beam measurements must be recorded for all antlered deer checked.

(D) Cooperators must remove one side of lower mandible from each deer taken, regardless of sex, properly tag and store mandibles according to supplied instructions until delivery to cooperating biologist.

(E) Cooperator must deliver the deer harvest record book and all mandibles to cooperating biologist prior to January 31.

(F) Cooperators failing to comply with any of these requirements will receive a written warning detailing what requirement was not met. Any additional lapses in compliance will result in termination from the program. Individuals, groups, or properties once terminated will not be allowed to re-apply.

(4) **Harvest recommendations:** DMAP cooperators must make good faith efforts to comply with the harvest recommendations provided by the cooperating biologist. Each enrolled property's harvest will be evaluated annually by the cooperating biologist and compared to the harvest recommendations. Programs failing to comply with harvest recommendations will receive a written warning. Cooperators failing to follow harvest recommendations in subsequent years may be terminated from the program.

(5) **Wildlife Violations:** Any Title 29 or Title 800 rule violation occurring on a cooperating property resulting in a written citation or administrative fine being issued may result in immediate termination of the property's involvement in the DMAP program.

[Source: Added at 21 Ok Reg 1446, eff 6-1-04]

800:25-37-7. Permit requirements

The following is a list of requirements, abilities, and conditions that must be met and/or demonstrated before the ODWC will allow relocation on nest and egg control of Canada geese in Oklahoma by any private or public company, agency or person(s). Further requirements may be added as needed to address future problems or concerns.

800:30-3-2. General provisions

At least 45 days prior to entering to drill or moving any equipment onto Department property the operator will:

(1) Deposit with the Department, a performance surety bond of Fifty Thousand Dollars (\$50,000) from a surety company licensed to do business in this state. Only one bond will be required from each operator if the operator has ten or fewer wells on Department property. If the operator has more than ten wells on Department property, an additional Five Thousand Dollars (\$5,000) bonding per well will be required. This bond will be conditioned on the observances and compliance with the terms of the surface agreement. This bond will be maintained at Fifty Thousand Dollars (\$50,000) and it shall remain in effect as long as the operator is drilling or operating a well on Department lands, or until released by the Department in writing.

(2) Provide the Department a copy of the approved notice of intent to drill (Corporation Commission Form 1000), an estimate of drilling time and an area plat map generally showing the proposed locations and dimension of the:

(A) Roads.

(B) Drilling Pad.

(C) Service Area (including pumps, flowlines, separator, meter house, pulsation bottle, compressor, storage tanks and water tanks).

(D) Estimate of damage area, including cut and fill around the location.

(3) Obtain approval from the Oklahoma Archeological Survey Office (OASO) and State Historic Preservation Office (SHPO).

Written approval from the OASO and SHPO must be provided to the Department before any type of soil disturbance is allowed.

(4) Enter into a written surface contract agreement on forms as provided by the Department, [52 O.S., Section 318.2 - 318.9], sign a letter of stipulation and remit payment for damage and usage. Predetermined surface damages shall be paid to the Department under the surface contract agreement prior to beginning of any work activity. If additional damage and usage is determined by the Department after completion of proposed project, additional charges will be imposed. Activity that impacts merchantable timber will be considered as part of damages.

(5) Provide the Department a list of the names, addresses and telephone numbers of responsible personnel involved with the drilling, subsequent operation and restoration.

(6) At no time will personnel involved in oil and gas activities (except authorized security personnel) be permitted to carry firearms or other hunting, trapping, or fishing tackle or equipment onto an area unless the equipment is appropriate to a season open on the area at the time and the individual(s) would otherwise be authorized to hunt/fish and in possession of the appropriate license(s) or proof(s) of exemption appropriate for the season as stated in the Oklahoma Hunting/Fishing Regulation Guide booklet, published by ODWC. Well sites and/or lease roads may not be used as access points for recreational activity(ies) on wildlife management areas unless they are open to the public.

(7) Oil and gas activities will be avoided in or near any previously identified fragile or unique areas. However, fragile or unique areas will not preclude utilization if damage to said fragile or unique areas can be prevented. Examples of fragile and unique areas include but are not limited to:

- (A) Red-cockaded woodpecker colonies.
- (B) Potential red-cockaded woodpecker restoration sites.
- (C) Fragile environments such as natural lakes and bogs.
- (D) Turkey roosts.

- (H) Prairie chicken leks.
- (I) Highly erodible soils.
- (J) Prairie dog colonies.
- (K) Bald eagle nests.
- (L) Nesting birds.

(8) Exploration may proceed if directional drilling from adjacent areas is feasible. On Department owned leases, such areas shall be identified prior to leasing and any area with substantial quantities of such habitats will not be leased for drilling.

(9) All oil and gas construction, development and/or well reworking and servicing is extremely undesirable during high public access periods, unless otherwise approved by the Department. Routine checking or trucking will be strongly discouraged during the time from two hours before sunset to two

hours after sunrise.

(10) Oil and gas exploration and development activities will not prevent hunters and anglers from using wildlife resources or from freely pursuing their activities in the Wildlife Management Area.

(11) Flaring requirement - Flaring devices shall have a shielding device attached in such manner that the light created by the burning gases produced from a well on Oklahoma Department of Wildlife Conservation lands is not visible at a distance greater than 200 feet at night to reduce potential negative impacts on nocturnal insects and any avian and mammalian nocturnal flying animals that may forage upon insects drawn to light.

(12) Operators working in lesser prairie chicken range will mitigate and follow conservation measures accordingly through the lesser Prairie-Chicken Range-wide Conservation Plan through the Western Association of Fish and Wildlife Agencies and the Foundation for Western Association of Fish and Wildlife Agencies.

(13) Locations that are within 1,000 feet of any residence, campground, or Department facility will take noise reducing measures so noise level does not exceed 42 dBA.

(14) Special Provisions for oil or gas exploration or production on Department lands having commercial or municipal fresh water production including the Garber-Wellington Aquifer drainage basin/recharge area particularly T7N, R1E, Secs. 15-22, 25-35, Cleveland County, Oklahoma.

(A) No oil, gas or disposal well shall be drilled, operated, or maintained, nor shall any operation in connection therewith be carried on or conducted within three hundred (300) feet of any producing freshwater well.

(B) Domestic and public water supply wells located within a radius of one-half (1/2) mile of any oil/gas, enhanced recovery, injection, or disposal well shall be tested prior to beginning drilling, injection, or disposal and thereafter annually for the presence of deleterious substances. Such testing is the responsibility of the permittee and, at the permittee's expense, to be conducted by a person approved by the Department and Domestic or Public Water Supply well owner. The Department and water well owners shall be notified forty-eight (48) hours in advance of such testing and may be present therefore. Test results shall be filed with the Department and water well owner's upon completion.

(C) Casing.

(i) Suitable and sufficient surface casing or a stage collar shall be installed to a depth of at least two hundred (200) feet below treatable water strata encountered in the well, and the annular space behind the casing shall be filled with cement from the base of the surface casing, or from the stage collar, to the surface of the ground, by either pump and plug method or by the displacement method. No further drilling shall be accomplished until the

cement has set for at last eight (8) hours. No braden head cement job shall be performed between the surface casing and any other casing string except by special order of the Corporation Commission.

(ii) Production casing of a size not less than four and one-half (4 ½) inches outside diameter, in good condition, shall be set no higher than the top of the producing formation and cemented with a sufficient amount of cement to obtain a minimum of five hundred (500) feet of annular fill-up above the casing.

(iii) The casing shall be tested before drilling the cement plug, at a minimum pressure of one thousand (1,000) pounds per square inch held for one (1) hour. Whenever the pressure drops five (5) percent within the hour, the casing will be deemed inadequate and shall be repaired and retested until the requirements hereof are met.

(iv) Permittee shall provide documentation to the Department showing the results of the casing pressure test. The test results shall be filed with the Department upon completion of such test. The Department shall be notified in advance of the casing pressure test to enable a Department Representative to be present.

(v) Rupture in surface casing: In the event a rupture, break or opening occurs in the surface production casing, the permittee or the operator or drilling contractor shall take immediate action to repair it, and shall report the incident to the Department promptly.

(15) If at any time the operator of a well or a pipeline changes the Department will be notified immediately and the new operator shall sign a new agreement and shall observe and fulfill all requirements and stipulations of this agreement, and shall furnish a copy of new bonds to replace the existing bonds.

800:30-3-3. Site development

(a) **Roads.** Existing management area roads will be used for mineral exploration and production whenever possible and desirable to the Department. If additional roads must be constructed by the operator, they shall:

- (1) Follow the natural land contour if reasonable and possible.
- (2) Be a maximum of 40' in width; dimensions and location MUST be approved by the Department prior to construction. Operator will be charged only for width of road that is actually constructed.

(3) Possess a base sufficient to support vehicles and equipment using it. "Base" guidelines will be predetermined by the Department. In addition, road maintenance materials at the rate of 2,000 cubic yards or ton equivalent per mile, will be provided to the Department, on site, prior to road construction and will be used for annual road maintenance. Size and location of material shall be determined by the Department.

(4) Be sufficiently ditched with culverts, water bars, and turnoffs that will provide adequate drainage and prevent erosion.

(5) After completion of drilling, all roads not a part of the management area system will be gated, locked and, if necessary, bermed to exclude all unauthorized personnel. Locks and nonreproducible keys may be provided by the Department at cost. Such measures shall not be necessary when the operator's roads are secured by existing Department gates.

(6) Have cattleguards installed as determined by the Department. Include a 16 ft. pipe gate placed adjacent to each cattleguard to allow passage of livestock as determined necessary by the Department.

(b) Drilling pads.

(1) Drilling pad shall not exceed 300 feet x 300 feet. Deviations are negotiable when justified by special conditions such as well depth and necessary equipment.

(2) When directed by the Department, drilling pad must be enclosed within a berm to prevent escape of any deleterious substance from the drilling operation. Also a diversion ditch upslope of the well site shall be constructed prior to the commencement of drilling and shall be adequate to divert surface drainage water from the location if so directed by the Department.

(c) No soil farming of any type will be allowed on Department owned lands.

800:30-3-4. Site preparation

- (a) If any trees and shrubs are removed by road construction, pad preparation, pit construction or any other site preparation for mineral exploration or production, they will be piled at nearby locations for wildlife shelter as recommended by the Department.
- (b) Unless otherwise directed by the Department, a minimum of 6 inches of topsoil will be removed for road construction or any site preparation and it will be stored in topsoil stockpiles for later restoration. When topsoils are less than 6 inches, the available topsoil will be stockpiled and stabilized according to Department recommendations.
- (c) The operator will be responsible for keeping the road and site free of trash and litter at all times.
- (d) Disposal of solid waste will be in accordance with provisions of the "Oklahoma Solid Waste Management Act" and "Rules and Regulations" of the State Board of Health promulgated thereto.

800:30-3-5. Regulations for producing wells

- (a) Within thirty days after completion of the well, the operator will provide the Department a copy of the completion notice (Corporation Commission Form 1002A) and/or Plugging Report (Corporation Commission Form 1003).
- (b) A service area of 150 feet x 150 feet will be allowed around the well head unless special conditions justify a larger area and are approved by the Department.
 - (1) The remainder of the area will be covered with topsoil and restored by tilling, fertilizing (at rate and formula recommended by the nearest NRCS office), and seeding with a seed mixture rate, and time as recommended by the Department.
 - (2) Where livestock grazing occurs, the service area may be required to be fenced with four strands of barb wire on steel posts. If the well is located within 300 feet of a residence, camping area, shooting range, or other high use area, the service area and tank batteries may be required to be enclosed with a six foot chain link fence.
 - (3) All pumps, storage tanks and other containers containing potential pollutants will be surrounded by a berm or metal retainment wall of sufficient height to contain 1 ½ times the entire volume of the largest container inside. These berms must be graveled or fertilized and seeded as authorized by the Department.
 - (4) Any valves and equipment that could cause pollution to the surrounding area will be secured to prevent discharge. All leaks from tanks, lines, pipes and stuffing boxes must be stopped immediately upon detection or notification and repaired as soon as possible.
 - (5) All permanent equipment must be powered electrically or equipped with "hospital zone" or buried muffler systems that are maintained in good working condition so noise level does not

exceed 42 dBA. Noise reducing measures may include but are not necessarily limited to hush boxes, sound curtains and mufflers.

(6) All equipment in the service area must be kept painted and maintained regularly. An earthtone paint color as authorized by the Department must be used.

(7) Pipelines outside of the immediate service area must be buried at least 36 inches below the surface unless prohibited by rocks as authorized by the Department.

(8) The service area shall be kept clean of trash, debris, empty barrels, old pipes and any other equipment or materials not being used and shall be stabilized according to the Department recommendations. Spilled salt water and hydrocarbons shall be promptly cleaned up and removed from the areas as prescribed by the Corporation Commission and the Department.

(9) Unused topsoil in stockpile shall be fertilized and seeded to preserve it.

(10) Vents and exhaust systems, such as on heater treaters, shall have screens placed on them to prevent birds and/or bats from entering.

(11) Signs will be installed and maintained at the well site. These signs shall include: name, address, and telephone number of operator, plus the well name and legal location.

(12) Prescribed burning is a vital part of the land management on wildlife management areas. All permanent above ground facilities, including valves, will be engineered, constructed and maintained to withstand prescribed fire. All permanent above ground facilities must meet these standards:

(A) On well sites, vegetation will not be present within a 25 ft. radius of equipment. In the 25-50 ft. radius outside of equipment, vegetation will be kept below 4" in height during the growing season defined as May through September, and below 2" in the dormant season defined as October through April. No woody vegetation will be present within 75 feet of above ground equipment.

(B) On above ground equipment off of the well site, including flow lines and electrical lines, no vegetation will be present within 1 ft. of any above ground equipment. In the 1-5 ft. radius around above ground equipment, vegetation will be kept below 4" in height during the growing season defined as May through September, and below 2" in the dormant season defined as October through April.

(c) **Reserve Pits.** No reserve pit will be constructed on Department lands. A Closed system shall be used in lieu of a pit.

(d) **Roads.** Roads constructed by or used by the operator, including culverts ditches, turnouts, water bars, gates and cattle guards will be maintained at operator's expense.

(1) All locks and keys issued by the Department will be at cost and the operator will provide the area biologist a list of names of persons with keys.

(2) Operator is required to maintain access road(s) and wildlife management area road(s) that are used by the operator, their employees, or anyone working for the operator or anyone hauling oil, gas, salt water, or equipment to or from the well. Roads will need to be graded at least once a year with ditches, turnouts and culverts repaired and gravel added as needed or requested by the Department.

(3) Roads not needed for access to the producing well and not part of the wildlife area road system will be restored to approximate original contour, reterraced, covered with topsoil, and revegetated as described in (b), (1) above at operator's expense.
